"The matter is this. He has a boy seven years old, or thereabouts, and he always persists in talking of the lad; in fact, he can't talk about anything else, and imagines everyone as deeply interested as himself. I have nothing at all against the boy; he is a good enough commonplace little fellow, like all the rest of them. But by and by a difference in boys myself, they all seem equally objectionable. But Snaggs comes to his house, sits down, and talks about his boy, what he does and what he says, until I am nearly driven crazy. I hope you can suggest something for my relief."

"I suggest," said Sommers, "that you take Snaggs to the state of Michigan, U. S. A., and kill him."
"Why to Michigan?" queried Bremner.

"Oh, simply because they don't hang for murder there, and any pennyworth of hanging should be cheerfully borne to get rid of a man like Snaggs."
"I didn't know you were acquainted with him," said Bremner excitedly.

"I'm not, but I am afflicted in the same way myself."
"Nonsense!" cried Bremner. "I never even heard you mention your children."
"I mean that I am afflicted with a friend like Snaggs. It's a daughter in his case. His name is Gregory. I am even worse off than you are, for his only daughter is but five years old. You are two years ahead of me. By and by the boy will reach years of discretion, and he will get there quicker than Gregory's girl."

"I don't know about that," Bremner answered gloomily; "girls grow up so much faster than boys do."
"But they never reach years of discretion, you know."
"I don't believe any son of Snaggs will, either. The boy's father hasn't, at any rate. But, I say, Sommers, an idea strikes me. Why not introduce Snaggs and Gregory to each other?"

"That wouldn't be a bad plan," replied Sommers, cheerfully, "and then we might let on them. I'll back my man to be the greater bore."
"There wouldn't be any use in betting," said Bremner, "for if your man is as bad as mine, it could only end in a draw."
"Bring your man around and we'll test the case."
"Shall I bring Snaggs to your house to-morrow night, then?" asked Bremner.

"Yes, and if you're in for a bet, I'm your victim. I have great faith in Gregory, and would like to have a little stake on him."
"It's a serious subject with me," replied Bremner.
"Oh, very well then, I'll expect you to-morrow night about eight o'clock, though I suspect your man is not half so capable a boxer as my little mine."

It was a few minutes before eight o'clock when Gregory pressed the electric button at the Sommers' residence. Sommers heard him talking to Mrs. Sommers in the hall, saying: "Oh, yes, thank you, she is quite well. I'll tell you something funny that she said to-day to her mother." Sommers groaned, and helped himself to a quantity of the stimulant provided for his guests. The next moment Gregory appeared, smiling, and Sommers greeted him with well-forged cordiality. Very soon the bell rang again, and a few minutes after Bremner was introducing Snaggs to the two sitting in the smoking room. "Beastly weather this," said Gregory to the newcomers. "I don't mind the weather myself, but when a man has children he is compelled to think of it." "Have you children?" asked Snaggs, with apparent interest. "I've got a little boy myself, but he doesn't mind the weather in the least."

"I shouldn't say children," replied Gregory. "I have one little girl, and she is only five years old, but wonderfully knowing for her age, and this weather is so bad that she misses her walk with her mamma. We never trust her out with a nurse, you know."

"I was saying," broke in Snaggs, "that I have a little boy myself; he is seven, and he goes out in all sorts of weather. I don't believe in coddling children. And that reminds me of a clever thing he said to me this morning. He always comes a little piece of

JAPAN'S SEVEN HELLS.

A Curious Hot Spring Where Men and Women Do Surprising Things.
Being out on the coast of Corea and Japan, looking for things curious, I secured from the natives intelligence of a remarkable place in the remote interior of an island belonging to Japan called Kiushu. The place is commonly called "Seven Hells," and, on account of its inaccessibility and remoteness, has seldom been visited by Americans or so much as referred to in print. I determined to visit this Japanese inferno, and having everything arranged I set out with provisions for a two weeks' travel. The first few days were spent in a small Japanese steamer crossing three or four inland seas, and winding around at least a thousand different islands to get in reach of the mainland that would lead me to the end of my journey. It may appear to be an exaggeration to speak of so many islands and seas, but when it is remembered that Japan alone has four thousand islands and at least a hundred different seas, it will not appear strange that I passed a thousand islands in search of the one on which is the phenomenon.

When I had got as far as I could go by water, there was nothing left but to try the crude mode of travel of the islanders for a hundred miles or more. I hired a jinrikisha and two coolies to pull me, and at once proceeded. A whole day and night I spent in this funny vehicle, and I found it impossible for me to ride further. Then another change in my mode of travel was made. I hired a coolie and pack horse to carry my baggage, while "I took my foot in my hand and walked" for twenty miles over that rugged mountain.

Once over the mountains I was almost in sight of the "Seven Hells." An arm of another sea lashed up in a narrow neck. On every side stood gigantic mountains capped with snow, while below lay the beautiful valley. It seemed as if I might be entering paradise. I walked a little further, and in a moment the earth resounded as if a thousand cannons were exploded beneath me. I had reached the "Seven Hells," and all that had been told me of the place was fully demonstrated.

Just a few yards from where I stood was a big, bubbling cauldron. A great smoke steam arose like a cloud from the water, and upon examination I found that the sea of water was boiling and bubbling like a pot over a stove. The water was scalding hot, and would cook an egg in two minutes. This boiling sea is considered sacred by the natives, and the government had at one time to erect a fence around it to keep the people from plunging in.

From the boiling sea a continual stream of hot water runs down through a village of about three hundred people, who are the most peculiar human beings outside of China. In the center of the village is a big round bath of hot water from the sea. In this bath from ten to twenty-five are constantly to be seen bathing. There are no screens or coverings, but men, women and children all bathe together in absolute simplicity. I saw at one time nine women and ten men in the bath.

About fifty steps away from this place is a "sweat bath," dedicated to one of their gods. An open shelter is built in the streets over a cavern in the earth in which they say Buddha built for them. The excavation has a door to it similar to an old-fashioned sweet potato house. The southerners build to keep their potatoes from freezing in the winter. The door is about three feet square, and there is no way for either a person or the steam to escape except by this door. In the front were priests selling tickets for half a cent each, and six persons were admitted to the sweat bath at once. Just over the entrance stands an image of Buddha, with rice cakes, flowers and incense offerings. The people worshiped as they went in, while no old priest stood by telling the people that whoever bathed in faith should be cured of all maladies.

The image and the priests, who stood around and listened with eagerness. The priest said that Buddha sent down his angel, who met an ancient priest and told him that he would write the name of Buddha on a stone and cover it with the earth and cause the mountains to grow with it. The image and the priests, who stood around and listened with eagerness. The priest said that Buddha sent down his angel, who met an ancient priest and told him that he would write the name of Buddha on a stone and cover it with the earth and cause the mountains to grow with it.

Another peculiarity of this strange people is the way they cook and eat. Everything they do has some religious superstition connected with it, and their cooking and eating are not an exception. I am safe in saying that no people on earth cook like the people who live at the "Seven Hells" on the island of Kiushu, in the marvellous little nation of Japan. They have arranged to run the water from the Boiling Sea in small streams, about a foot under the surface of the earth, right in front of every man's door. Over these streams are mud ovens built like a pot, with a lid over some of them. In their ovens the people place what-

ever they want to cook, and the steam from the hot water does the work. This is certainly better than natural gas. Many of the people, and in fact most of them, merely dig a hole down to the hot steam, place some straw over the water, and put their potatoes, etc., in and cover them up for awhile until they are ready to eat. I saw many people cooking in this way.—St. Louis Globe Democrat.

A RAT-CATCHING FOX.

The Faithful Animal Cleared a Coal Mine of Thieving Rats.
It is well known that rats are often to be found in large numbers on board ship, but that many people who do not know that they also frequent coal mines.

There they become a great nuisance. They steal the food from the dinner table, and when the mules are being fed, and cats are taken down the shafts and kept in the mines so as to reduce the number of the rodents.

There was a coal mine, however, in Lackawanna valley, Pennsylvania, which had, a few years ago, a better way of dealing with its rat problem than any other coal mine ever showed itself to be.

One morning the mine foreman had stepped into the car and started down the shaft, when a fox leaped into the shaft and landed on the car close beside him.

The fox was trembling all over, and looked as if it had been chased by a hound for hours. It had evidently plunged into the shaft to escape from its pursuer.

It seemed puzzled as to where it was, and kept jumping from side to side of the car, until the bottom of the shaft was reached, when it sprang off and disappeared in the gangway.

The foreman told the men not to snare or hurt the fox, and they did not. Jerry, which Reynard was named, soon grew accustomed to his strange surroundings, and before long he began to slay the big rats in a way that would have made neat or terrier turn green with envy.

When the mules were being fed and the rats floxed to the stable, Jerry was there, too, and the mules ate undisturbed. Then, when the shaft was worked, Jerry shifted his field of operation to the neighborhood of the miners' dinner cans, and ended the career of many a thieving rat. Nobody ever frightened him, and so he got to be very tame and confiding.

After Jerry had lived three months in the mine, he must have got home sick, for one day he jumped on board a loaded car at the bottom of the shaft and was hoisted to the surface.

The men never expected to see Master Reynard again, but on the second morning afterward, he made his appearance at the breaker, stepped on board a car and was carried down into the mine.

The men and boys were delighted to see him, and he at once resumed business. During the following spring and summer he rode up the shaft every few weeks, stayed away a day or two, and then appeared at the head of the shaft and waited for a car to take him down. The rats had to hustle when Jerry got back from his holidays.

In the fall work was suspended in the mines, and the mules and cats were brought to the surface. Jerry was searched for all through the gangways, but could not be found, and it was supposed that he had quietly slipped on a car and got away without any one seeing him.

Six weeks later, when work was to be resumed, the foreman went down the mine and found Jerry lying dead in the mule barn. He had never been out of the mine. Every rat was killed, and as there was no other food for him to get, the poor fellow had starved to death.—Golden Days.

WILD HORSEMEN.

The Gauchos of South America and Their Untamable Ferocity.

The love of bloodshed seems inherent, for even boys will draw the faces upon the slightest provocation; and, as the throat and abdomen are the parts which are generally aimed at, the wounds are usually mortal. Murders and homicides cause little or no emotion. The man who respectfully salutes the stranger is more likely than not a hero who has met many threats. It is believed that upward of one-third of the young Gauchos die a violent death. There can be no doubt but that this disregard for the sanctity of human life is largely due to the constant disturbances which are the result of the prosperity of the South American republics.

The Gauchos are the wretched shuttles which are banded about by the battalions of rival politicians. The selfish adventurers who may succeed in grasping for a few brief bloody moments the reins of what passes for power, find among them the rough material for an army. It is a matter of chance to what party the wild horseman may be compelled to attach himself; but, having joined one, he becomes forthwith involved in continuing bloody feuds which constitute an unending vendetta. The recklessness which this engenders becomes such a second nature that he grows cruel from a sheer love of inflicting pain, or callousness to the sight of suffering.

From his infancy he has used the lasso and bolas, has dragged the agonized animal at a gallop from the terrified herd, laughing as he hamstringing it, and mocking as the comp de grace was given. His later indifference to the value of human life has been but a step in advance from these. Even his horse falls to kindle one spark of affection in his thorn-covered breast, while his dogs, though of value for driving cattle, are only tolerated as watch dogs and scavengers. The lot of a Constantine pariah dog is enviable compared with that owned by the Gaucho. As a natural result of the neglect or indifference with which they are treated, they become dangerous to strangers, while their comrades among themselves are so desperate that many are left bleeding or dead upon the ground.—Temple Bar.

The treatment of all chronic disorders or any ailment of long standing, which has produced absolute change in the tissue attacked, is so different from the treatment of acute diseases or ailments of short duration, where the function or work of the organ is involved, that it requires a life-long study and special experience to cope with them successfully. Dr. Beckman and Pixley of 21 West 123d St., New York City, have from their experience of a large cosmopolitan and hospital practice, formulated an original plan of treating such sufferers at their homes. The peculiarities of every constitution make the same disease different in every individual case, and though the same disease has been existent in its leading features and its results, for all time, yet the remedy of its relief is the discovery in each case of that one peculiarity that no one else possesses.

These peculiarities may have been inherited, may have been acquired from habits, may be due to a particular location, may be brought on by the character of one's occupation, or the result of some hidden or latent disease, which has not been discovered.

Unless this hidden truth is brought to light, treatment is of little avail. If this statement were not true, no compound that would cure disease in one individual would cure the same disease in every one, and physicians and colleges, hospitals and experience would not be necessary, and all advertised secret preparations would be successful for every one and not the failures they are.

The special feature of all treatment by Dr. Beckman and Pixley for each individual case, which is never twice alike, is aimed at those peculiarities and is the secret of their success.

The results achieved by them have clearly demonstrated that any sufferer from any long standing disease, no matter where they are situated, can by their method avail themselves of their experience even better than by a personal interview, because of the greater opportunity offered for a deliberate consultation over a written statement than could be given in person either at the home or the office.

Proof of these claims and further information may be secured by sending to them for an Individual Statement Blank.

"Society" means you-and-I-ety, with the other fellow looking on.—Young Men's Era.

Almost every person is familiar with the hardships to which a Farmer's life is exposed. Mr. Gallimore was a man of iron constitution and stalwart frame, but hard work and a series of colds brought on by repeated exposure, developed into

A Very Bad Case of Kidney Trouble
and a general derangement of the urinary organs, which finally broke him down, and from a giant in strength he became in less than a year a weak, trembling and almost helpless man. Mr. Gallimore tells the interesting story in his own way; pausing a moment he said, "my whole trouble seemed to have settled on my kidneys and in my urinary organs and continued to distress me more or less for about eight years. I went to number of different doctors of good repute, but kept getting worse all the time, my appetite became very bad and my strength all deserted me. I got so weak that I could walk but a few rods without resting. I used to be a big, heavy, strong man weighing

200 Pounds, but I Ran Down to 133 Pounds.

was weak and pale, my clothing hung to my bony frame like a bag and looked as if they were twice too large for me. After having been treated by the best physicians receiving only temporary relief, I lost all hope and thought there was no cure. One day my son was in Frank Lawson's Drug Store, your agent at Spencer, when I was feeling more dead than alive. He persuaded him to have me try a bottle of Dr. Kilmer's Swamp-Root, Kidney, Liver and Bladder Remedy. I did so and soon began to get relief and steadily improved in every way, gaining in strength and weight until

Now I Tip The Scales at 202 Pounds.

I am at the present time a vigorous old man of 74 years and feel that I have a new lease of life. I can only say to those who have lost all hopes on account of the failure of physicians and medicines, that they will not have performed every duty they owe to themselves and those who may be dependent upon them, until they have made one more effort and tried Dr. Kilmer's Swamp-Root.

Sincerely yours,
JAN. 15th, 1904.
SILAS GALLIMORE.

Farms for the Million.

The marvelous development of the States of Minnesota, South Dakota, Iowa, Nebraska and Wyoming, within the last few years has attracted attention in all parts of the world. It is not necessary, however, to search far for the causes of this wonderful growth, for this entire region, which is controlled by The North-Western Line, teems with golden opportunities for enterprising farmers, mechanics and laborers who desire to better their condition. Here are lands which combine all varieties of soil, climate and physical features that render them most desirable for agriculture or commerce. Rich rolling prairies, capable of raising the finest quality of farm products in luxurious abundance, can still be secured at low prices and upon most liberal terms, and in many cases good productive farms can be purchased for scarcely more than the very rental many eastern farmers are compelled to pay. Reaching the principal cities and towns and the richest and most productive farming districts of this favored region, The North-Western Line (Chicago & North-Western R'y) offers its patrons the advantages of perfect equipment and all the comforts and conveniences known to strictly first-class railway travel. Maps, time tables and general information can be obtained of ticket agents of connecting lines, or by addressing W. A. Thrall, General Passenger and Ticket Agent Chicago & North-Western R'y, Chicago, Ill.

It takes a sharp man to find out a woman's failings, but when a man fails the whole town echoes with the news.—Puck.

Deafness Cannot be Cured
by local applications, as they cannot reach diseased portion of the ear. There is only one way to cure deafness, and that is by a constitutional remedy. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out of the tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but a localized condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

FARM AND GARDEN.

FACTS FOR FARMERS.

Good butter is one of the things that is always in demand. This is not true of all articles. Therefore, the question of making first-class butter is of the highest importance.

A short supply of plant food decreases the fertility of the farm and makes it poorer, while a liberal supply enriches it and increases its value from year to year.

It is better to trim off the wood from old trees than to burden the limbs with useless material that only adds weight to the branches and increases the liability of breaking during high winds.

STRAWBERRY plants will soon begin to grow, and any fertilizers that are to be applied should not be overlooked, as the best time to apply the fertilizers is at the present, especially if potash is one of the principal ingredients.

Ornament for caked udder: Take a cup of vaseline and thoroughly stir in equal parts of spirits of turpentine and spirits of camphor, or saturated camphor, as called by some; beat up thoroughly and rub on udder, or apply to any wound.

A GARDEN sixty or eighty feet square, securely fenced against rabbits and chickens, will yield an abundance of vegetables for the largest family, and an orchard of one-half acre judiciously planted and cultivated, will give plenty of fruit for the same.

EVERY package of farm produce that leaves the farm is an advertisement for the man who sends it out. Neat packages attract attention and make his produce sell the second time. Pay more attention to the commercial side of your business if you want to succeed.

SUGAR BEET CULTURE.

Cultivate Plants as Soon as They Show in the Row.

The soil should be a light loam, preferably containing some lime. The land should be well drained. The beet gets the greatest part of its food at a depth of 8 to 12 inches, hence freedom from excess of water is necessary. Plow in the fall. As soon as the soil can be properly worked in the spring it should be plowed again, this time to a depth of 12 inches. Allow the soil to settle until about one week before the time for seeding. Then plow once more to the depth of 4 to 5 inches and work the soil up into a fine and light condition. After allowing the land to lie five to seven days plant the seed. No manure should be applied unless in the shape of well-rotted compost put on in the fall. The rows should be 18 inches apart; in very rich soil, less; in poor soil, more. The conditions should be such that the beets cannot attain a greater weight than 2 pounds each. Seed should be planted $\frac{3}{4}$ to $\frac{1}{2}$ inches deep, and about 20 pounds per acre.

Plant in April. Cultivate as soon as the plants show in the row. When the beets have put out four leaves plant them out so as to leave the plant standing about 4 to 6 inches apart in the row. The weeds should be kept down and the soil well stirred. A beet that grows up out of the soil is worthless for sugar; they must not weigh over 2 pounds each, and must be smooth and tapering in shape.—Farm and Home.

IMPROVED FARM GATE.

An Arrangement Which Is Sure to Give Satisfaction.

In making a gateway for a fourteen-foot roadway for a farm gate, the gate should be twenty feet long. This allows for six feet to balance that part of the gate over the roadway, and in opening, a person merely takes a portion of the weight of the gate and slides the same a couple of feet, when it is balanced and can be opened as easily as if swung on hinges.

SECURE SLIDING GATE.

This arrangement is shown in the illustration from a sketch by F. C. Farnham, of Washington. It is best to make a little roller with a three-fourth inch bolt, over which to run the gate. That part of the gate which slides on rollers should be made of double thickness of inch stuff. The gate should be shut in between two posts set far enough apart to admit the end of the gate readily. This prevents the wind from moving the gate, which is as solid as any part of the fence. Make the rail of the gate, which runs on the roller, one foot longer than the others, and nail to the two posts last mentioned a cross-piece, so that when the gate is shut the latch end will hang clear of the ground on this supporting piece.—American Agriculturist.

GOOD FARM GATE.

One That Is Not Only Substantial But Easily Constructed.

The illustration, which we re-engrave from the American Cultivator, is of a

A FARM GATE.

strongly-built farm gate. The usual trouble with farm gates, especially with heavy ones, is that the posts upon which they are hung are too small and cannot be made to stand firm. Where a gate is hung in a frame such as shown in the illustration, there is little chance for the posts to become inclined and allow the gate to "sag." If made of good material and well painted, such a gate will last a long time. The frame can be ornamented.

LABOR-SAVING DEVICE.

Excellent Contrivance for Handling Manure in the Barn.

I built a new barn in 1885, and laid cement gutters with sufficient fall to drain them into an apartment adjoining the stables. Into this pit are wheeled all the manure and bedding which can be procured. This includes leaves, sawdust, dry earth and sods, in fact, anything that will act as an absorbent and increase the manure heap. This pit is cleaned out once a week in winter and applied where it will do the most good. My device for handling manure in the barn consists of a track of strap like that used for barn door rollers, and a car which runs upon it. The track shows the thing complete. The track is fastened securely over the gut-

A LABOR-SAVING HAND MANURE CART.

ter between two rows of cows. This extends the length of the stable and in a straight line across the manure pit, driveway and hog pen which are all under one roof. Four carrier wheels are hung on a track after being bolted in pairs to blocks, A A, which run close beneath the track that the wheels cannot jump off. Under these blocks a 4-foot timber, B, is bolted to connect them, only a single bolt being used in each block. This permits the wheels to turn a curve on the track. A heavy swivel, C, is fastened to the center of this connect- ing timber, and below the swivel a crosspiece, D, which carries the manure car, E. This car is fastened to the crosspiece, D, by three-fourth-inch rods, whose lower ends catch in sockets made to receive them near the bottom of the car. Handles project from one end of this car by which it may be easily pushed or pulled. It holds one-fourth of a wagon load and runs very easily. It can be dumped into the pit or wagon almost automatically. My horses stand above the hog pen and the stable is cleaned into a chute whose lower end is closed by a door. By running the car under it I can drop the manure into the car and carry it to the pit or cow stable as is desired. It is a great labor-saving device, and as it is not patented anyone may make use of it. I make milk for the creamery and naturally feel quite a quantity of grain. In buying grain I consider its value for manure as well as for milk production. My farm responds to liberal treatment by giving me in the past season 50 tons of hay from 22 acres, 300 bushels of oats from five acres, and 13 bushels of potatoes from half an acre.—G. W. Grant, in Farm and Home.

THE KIND WANTED.

Growing Demand for Well-Bred Carriage Horses and Roadsters.

The rapid increase in the luxurious style of living that is now prevailing, says the Breeder's Gazette, calls for an enormously increased supply of carriage horses, well bred, shapely and thoroughly trained; the extension of trade and commerce calls for a large, heavy animal, that is powerful and capable of speed that is consistent with safety in the crowded streets of our cities, and such horses, weighing 1,600 to 1,800 pounds, are in demand at prices that would astonish a great many farmers. The roadster, too, is in demand. This is a sleek, robust animal that is capable of speed for hours at a gait of not less than eight or ten miles an hour, and covering a few miles at even a quicker pace. This is a horse of luxury and is an animal of high breeding and thorough training to fit it for use in all circumstances. Horseback riding is also steadily growing in popularity as a fashionable amusement and recreation, and here is a field for intelligent breeding as well as training that can very properly go hand in hand with the ordinary demands of commerce, of business, of pleasure and of fashion in the matter of horses will furnish to farmers a pretty sure market for such as can be brought up to the standard required by these demands.

The Uses of Carbolic Acid.

Carbolic acid is one of the requisites of every well ordered henry. The uses to which it can be put by poultrymen are many and varied. It is an excellent disinfectant and therefore can be employed to purify the atmosphere of the poultry house. It should be added to the whitewash and thus render this liquid more powerful against lice. Then it has an important medicinal use; diluted with thirty parts of water it forms one of the very best lotions for all kinds of wounds and sores, prompting as it does rapid production of sound flesh. Carbolic acid, when very diluted, is excellent for internal use. Roup, the most dreaded disease to which fowls are subject, will perhaps meet with as successful treatment as is possible when the throat and nasal passages are cleaned and syringed with a weak solution of carbolic acid. The acid should be diluted with two hundred parts of water for internal use, and when used as a gargle.

The Perfect Farm Horse.

The perfect farm horse has not been developed yet, and it is probable that there may not be entire concurrence in the ideal drawn. The summary of its accomplishments, however, is not beyond attainment. It must have the size and strength to draw a plow with ease; the style and action necessary to make a trip to market and back in the least possible time; of a docile disposition, but not to the detriment of nerve; a most necessary qualification of a good farm horse; and, lastly, it must be such a horse as can successfully meet competition in the sale ring.—N. Y. World.

FIRESIDE FRAGMENTS.

—Fried Apples.—Wipe the apples and slice thin. Have bacon fat hot in the skillet; put in the apples and sprinkle a little sugar over them; some add a little water. Fry brown. A nice breakfast dish.—Housekeeping.

—Berry Balls.—Roll out biscuit dough, cut in squares, put a spoonful of berries on, bring corners together, place on a buttered tin. Melt one spoonful of butter, one heaping spoonful of sugar, one-half cupful of hot water. Dip over the squares. Sprinkle with sugar, and bake.—Good Housekeeping.

—Auntie's Apple Pies.—Steam until tender six good-sized, tart apples, rub through a colander, and stir in, while they are hot, one tablespoonful of butter, when cool, stir in the yolks of three eggs, smooth, light paste, add the sugar and one teaspoonful of sugar, beaten well together. Bake with one crust in deep pie tins.—Housekeeper.

—Peppik Bread.—Fill a quart measure to within one-eighth of an inch of the top with graham flour, and the rest of white flour. Two teaspoonfuls of baking powder, salt, two teaspoonfuls of sugar. Stir with water till not quite thin enough to pour out. Bake one and one-half hours in a very moderate oven.—Good Housekeeping.

—Rice Muffins.—One pint of milk, one quart of flour, one pint of hot rice, three eggs, two tablespoonfuls of sugar, one teaspoonful of salt, one of soda, two of cream of tartar. Mix the sugar, salt, soda and cream of tartar with the flour and rub through a sieve. Beat the eggs and add to the milk. Stir gradually into the flour. When it becomes a smooth, light paste, add the rice and beat thoroughly. Bake thirty-five minutes in buttered pans. This quantity will make three dozen muffins.—N. Y. Ledger.

—Cleaning Lace.—An old lace-maker, who has woven many a gossamer web for patterns, and has taught to fashion some of the daintiest patterns which deft fingers delight in doing, gives this simple receipt for lace cleaning: Spread the lace out carefully with calendered magnesia; place another paper over it and put it away between the leaves of a book for two or three days. All it needs is a skillful hand to scatter the fine powder and then it is ready for wear, with tender threads intact and as fresh as when it was new.—Christian Inquirer.

—Brown Betty.—A gentleman recently remarked on hearing this name that he did not know what it was. It made by the following recipe: Pare and core a dozen large, juicy apples. Chop fine with a hand-knife. Butter a deep pudding dish, place first a layer of chopped apples, some bits of butter strewn over them. Then sprinkle with white sugar, flavor with nutmeg, lemon and white wine. Scatter a little of the rind of a lemon. Next a layer of bread crumbs, then a layer of apples, and so on till the dish is full, finishing with a layer of bread crumbs. Send it to the table hot or cold, and eat with cream sauce.—Western Rural.

DRESSES FOR CHILDREN.

How to Fit Out a Little Girl for the Summer Cheaply and Well.

A little girl needs ten or twelve dresses. Get two or three of brown linen strictly for morning wear. These wears and washes, however, and any material. It can be bought for twenty-five cents a yard, and three yards will make a dress, and a sash of the same put in from the seams under the arms. Make it very simply, with a short yoke and full sleeves. The sleeves should be white and blue and white check gingham at twenty-five cents a yard make nice morning dresses, made in the same simple way. Very pretty percales can be bought for twelve and a half cents a yard. They wash well, and come in pretty blue and pink stripes and dots and little flowered patterns. Made with a waist either full or plain, extending about three inches below the armbands, and with full ruffles of the same material cut on the bias, and edged with a little narrow embroidery, starting from the middle of the waist in front, and going over the shoulder, they make a very pretty and reasonable dress for either morning or afternoon. It is nice to have four of this kind; three yards of material make one. If you want it a little more dressy, make the ruffle entirely of white embroidery, and the sleeves of white and blue and white check gingham. The ruffle around instead of bringing it to a point front and back. Indian linen at thirty cents a yard, or nainsook for the same price make nice white dresses. These can be made to wear with the gimpes if preferred. Cut the sleeves low and make a very deep ruffle of embroidery to fall all around the neck, and a short puff sleeve to the elbow. A yard and a half of embroidery is required to trim in this way. Great bargains can often be found in remnants. A small-dotted muslin makes a pretty change, trimmed with lace instead of embroidery; but the lace rarely looks well after a few washings. Simplicity is the principal thing to remember, for it saves in money, time and washing, and the child will look twice as well. A short double-breasted coat made of French flannel for everyday wear is a very important thing. This cannot be bought much under three dollars and a half, and look nice, but can be made with one and a half yards of flannel at seventy-five cents a yard. A fine brown and white stripe is a serviceable color, and the great advantage of the French flannel is that it washes so well. A best coat is also needed. Very often one has just the right material in a dress that is no longer of use. A coat can quite easily be cut from the skirt of a dark red or blue or white serge dress. Make it with a big double-breasted collar and large white buttons, and it will surely have an air of its own. A white leghorn is a pretty best hat, trimmed with a bunch of daisies and a big white bow, and can be gotten up for about two dollars and a quarter.—Harper's Bazar.

DIET FOR SPRING.

Signs of Nature's Cravings for a Change in Food for the Spring.

Toward the end of winter and as the spring days come on, almost every one feels languid, loses his appetite and seems to crave nothing for the usual articles of food.

This may be interpreted as one of nature's cravings for a change in diet. At such seasons it is worth while to take a great deal of pains to provide fresh fruits and vegetables. Many serious disorders may be prevented and corrected in their earliest stages by a judicious use of greens of some sort. There are few localities where water-cresses cannot be grown, and these are among the most valuable of articles for spring diet. Any one who owns a few feet of ground with a sunny exposure may have a pit and raise lettuce and radishes the year round. It is an exceedingly easy thing to do, costs but a trifle and would save many a dollar in doctor's bills and medicine.

A carefully arranged bed for these two vegetables need not cover a space over three by ten or twelve feet in surface. It is sometimes more desirable to have half a dozen single-sand beds than one or two large ones, then if anything happens to a bush only a part of the crop is injured, whereas an accident to a large one may destroy the whole. A few weeks of work and wait.

It is idle to say that one cannot take the time and trouble for this, and that it does not pay, for it really does, and once the trial is made, nothing would induce the householder to get along without it. All of the delights of gathering fresh vegetables for our own table are not to be carelessly passed over. The hotbed, cold-frame and forcing-pit should be as much of a necessity to the occupant of every good-sized plot of ground as the vegetable-cellar and the preserve-closet.—N. Y. Ledger.

Curious Facts About the Ermine.

The ermine is a queer animal—it is one thing in winter and another thing in summer. That is a strange statement, but it is true, for in winter the animal's fur is as white as snow and it is called the ermine. In summer its fur turns reddish brown on the upper part of the body and a light yellow on the lower part. The animal is then known as the stoat. This change is quite familiar to naturalists, but not to unscientific people, and the ermine and the stoat are therefore generally regarded as distinct animals. The fur of the ermine is much valued and is in great request. At one time it was a mark of royalty and the state robes of judges and magistrates were lined with it as an emblem of purity. The ermine is so cunning in its ways that it is almost as difficult to catch as it is to "catch a weasel asleep." In fact, the only way to capture it is to mark its course from home and then follow it in its own tracks. When the dainty, fastidious little animal reaches the point in its path where the mud is strewn it will lie down and subject itself to capture and death rather than smirch one of its snow-white hairs.—Cleveland World.

A Question of Grammar, Not Love.

A young lady by the name of Priscilla Winthrop is visiting some relatives in Austin, Tex. She is very grammatical in her conversation. Koscusko Jones, who rarely ever utters a grammatical sentence, fell head over heels in love with Priscilla, and utilized the first opportunity to fall on his knees and say:

"I loves you"

"I love you, Mr. Jones," said Priscilla, correcting him.

"You say you love me, too. Ah, how nice it is in you to love me, too!"—Texas Siftings.

Didn't Dare Marry Him.

Briggs—Did you know Speerly had proposed to his cook and been rejected?

Griggs—Gracious, no. What did she reject him for?

Briggs—She said she didn't know where they could get another one.—Brooklyn Life.

Hicks (in the graveyard, reading a tombstone)—"Sacred to the memory of Thomas Anderson." "Wicks—Yes, isn't it ridiculous? Sidermud was the most forgetful fellow that ever lived."—Boston Transcript.

THURSDAY, APRIL 19, 1894.

The Annual Levy for 1894 appears in this issue of THE REPUBLICAN. The tax rate has been increased a few cents as has also the appropriations for public improvements.

The municipal election in Oakland on Monday resulted in the election of the citizens', or non-progressive ticket by a large majority. It remains to be seen what was accomplished by the election of such a ticket.

With an unexpected disregard for the quips and jeers of those who protested against following the example of Thomas B. Reed, when he was speaker of the House, the dominant party has at last resolved that quorum-counting shall be indulged in whenever such arithmetic is necessary. The Democrats of the House of Representatives are subjects for congratulation on their arrival at such a conclusion. For the entire weight of logic and common sense is opposed to the contention that a member can at the same time be present for obstructive purposes and absent as a legislator. When it was first suggested that the Fifty-third Congress would do wisely if it adopted in general the rules and methods of the Fifty-first there was practical unanimity of Democratic dissent, but every day's experience was testimony to the reasonable character of the suggestion. The Democratic quorum counter differs somewhat from the rule which worked so successfully in the Fifty-first Congress, in that the counting will be done by some other member or officer than the Speaker. But this is merely a distinction without a difference and will be useful only because it may reconcile some of those who are stubbornly opposed to anything that savors of what has been termed "Czarism." Yet the matter is regarded as somewhat of a personal victory for Reed, and Democrats have joined in good-natured congratulations. Bourke Cockran remarking that Mr. Reed was no longer the original and only czar, as the Democrats had decided to be czars. The importance of the remedy is, however, above partisanship. The people of the United States desire that the House of Representatives, being elected to legislate, shall be able to do the business for which it is chosen; and shall not be confined by a few obstructionists to a pitiful exhibition of "how not to do it."

The Great Coal Strike.

The workmen within the jurisdiction of the United Mine Workers of America, who have decided to stop work on the 22d of this month, are now guiding themselves by Mr. Cleveland's advice. In his message to Congress, the President said it would be far better for workmen to accept lower wages and steady work, than to draw higher wages and not have employment all the time. He did not vouchsafe an opinion as to the desirability of less work coincident with less wages. At all events, the miners cannot see matters as he would have seen it. They object strenuously to the wages, and have announced their preference for no work at all, if they cannot have more money for their labor.

The number of men involved makes the strike a formidable one—a movement which must cause serious inconvenience to the consumers of coal, if the programme is carried out as expected. Manufacturing will soon feel the effect of cutting off their fuel supply; so that the whole effect of the strike cannot be

measured by merely enumerating the miners who cease work.

The large number of men now without employment in most of the industries of the country, would seem to mark the present time as inopportune for a strike, but the leaders of the miners have doubtless taken this factor into consideration and measured the possible consequences.

Communicated.

To the Editor of the Republican.
When the census bulletins began to appear in 1890 and it was found that they did not furnish figures which were favorable to the Democratic party Gen. Robert P. Porter committed an unpardonable sin and many times since then howls have gone up from the Democratic press against him, but it remains for the *Mountain Democrat* (the paper that prides itself upon being correct in its statements) in the issue of this week to charge him with peevishness "to deal with the general summary rather than in the detail in giving out his latest bulletins covering the manufacturing and mechanical industries of the wage workers."

Until we read the editorial from which the above quotation is made we were under the impression that Gen. Porter had resigned some months since and that Hon. Carroll D. Wright, Commissioner of Labor, one of the best statisticians in the country, was in charge of the Census Office. We also thought that the eleventh census went into detail more than any former census made, and in the bulletin in question in the "comparative summary of totals for the U. S. 1890 and 1880," in which thirteen items are given, there are four items not given in the census of 1880 and on which were not reported separately in the census of 1880, making a difference in favor of the census of 1890 of five items out of thirteen. More the quotations from the bulletin are not correctly made.

The *Democrat* says, "while he shows quite cleverly that in 325,101 concerns the employees average \$475 a year for their labor," etc. The report, "Extra Census bulletin No. 67," says "Number of establishments reporting 355,401," a difference between the Census report and the figures of the *Democrat* of 30,000 concerns. Only thirty thousand, yet Gen. Porter, who had nothing to do with the report; only "summarized," while the *Democrat* went into "details" and makes a charge against a man who did not get up the bulletin and is in no way connected with the office and then makes a mistake of 30,000 in the number of concerns given. There is also a mistake of more than \$9 in the average of each employee. While the *Democrat* gives as the profit the amount received by the average concerns and the capitalists after deducting the cost of materials, which Mr. Wright plainly says that "the difference between the apparent cost and the value of manufactured product cannot be taken as indicating the profit or earnings of capital because many items of expense enter into the mercantile portion of the business, which branch is not within the scope of the Census inquiry," etc.

But then a manufacturer who receives the benefit of a protective tariff has about the same effect upon the average Democratic editor that a red rag has on a mad bull. Although I believe that they do have a little more respect for Mr. Carnegie since he wrote a letter in favor of the Wilson bill (of which we no doubt will hear more in the future).

Then we are told that under the high tariff protective subsidy system the wages average \$1.50 per day in the manufacturing and mechanical industries, but the *Democrat* does not tell us that in that average there are included \$45,428 females above 15 years of age and 121,194 children, but we find by the figures given that under this blighting pernicious system of protection this tariff which "is unconstitutional and a fraud," this tariff framed for the American people and not for the benefit of Europe, that there were 2,881,439 males above 16 years of age, (skilled and unskilled) employed, and that their wages were \$1,436,317,558, an average of less than two cents of being \$5.00 per day instead of \$1.50.

We defy the *Democrat* or any Free Trade advocate to show us a time in the history of the country during a period of Free Trade or tariff for revenue only, or tell us of any country under the sun where the wages of the working man was anything near equal to what they have been under the malignant protective policy of the Republican party, or a time under Democratic rule when a working man could purchase more for his day's labor than under Protection. If it can be named let us hear it.

Swanton, Md., April 13, 1894.

Full figure cabinets, \$1.50 per dozen, and other styles proportionately low.

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.

T. Jay in Cumberland News.

OAKLAND, MD., April 3, 1894.

THE COMPACT.

This compact in section six provides that the river Potomac shall be considered as a common highway for the purpose of navigation and commerce to the citizens of Virginia and Maryland, and of the United States, etc.

The seventh section provides that the citizens of each State respectively shall have full property on the shores of the Potomac river adjoining their lands with all emendments and advantages thereunto belonging etc., but the right of fishing in the river shall be common to, and equally enjoyed by the citizens of both the States.

The eighth and ninth sections provided for mutual regulations for preserving the fish, performance of quarantine and keeping open the channel and of erecting light houses, beacons, etc., on the Potomac river. The tenth section provides for the exercise of police jurisdiction over the Potomac, by both States under certain restrictions.

And the eleventh section provides for the service of the process issued in either State upon its citizens on said river, etc. Said compact was also ratified and adopted by the State of Maryland. The greater part of the provisions of this compact had special reference to that part of the Potomac which is navigable and which lies below the limits of the State of West Virginia, but some of them applied to that river throughout its whole length, and at the time said compact was made, the State of Virginia claimed to the North Branch of the Potomac, and it was well understood that said compact related to said branch and not to the South Branch so far as it was applicable to the river above the junction of said branches.

And the State of West Virginia says that it has been so understood by the people of said States ever since said compact was made, and that both States have enjoyed the rights and privileges upon said North Branch secured by said compact ever since that time, and continue to this day to exercise and enjoy them. The State of Maryland was well aware when this compact was made that the State of Virginia claimed that the North Branch was the Potomac river proper, above the mouth of the South Branch, and the former did not insist upon any rights in or to the South Branch in said compact, and by entering into it she in effect recognized and accepted the North Branch as the boundary line between the two States, and it has been so understood at that time, and has been so understood ever since by the people living along said North Branch and by all the people of said States, and they have constantly acted upon that understanding.

It was after this compact that Francis Pickens laid out the military lots under the authority of the State of Maryland, as hereinafter stated, and in doing so adopted a due north line from the Fairfax stone as the western boundary of that State. And although the legislature of that State in acting upon his report declared that said supposed boundary line is, in their opinion, far within that which that State might rightfully claim as her western boundary, yet the language does not indicate that this Legislature intended to assert a claim to go to the South Branch, but rather that the Fairfax stone was not planted at the true foundation head of the North Branch, and that said fountain head was farther west than said stone, and at a later date, as will appear hereafter, this very claim was made by said State through her commissioners.

RESOLUTIONS FOR APPOINTMENT OF COMMISSIONERS.

In 1795, in 1801 and again in 1810 the General Assembly of Maryland adopted resolutions for the appointment of commissioners to meet such persons as the State of Virginia should appoint to adjust and settle by compact the southern and western boundaries of the State and fix the dividing line and boundaries, etc.

The State of West Virginia says that she is informed that no commissioners were in fact appointed by Virginia in response to the resolutions of Maryland of 1795, 1801 and 1810, and that Virginia was not willing even to enter into a discussion of her right to the territory between the two branches of the Potomac river, and that in fact nothing was done by Virginia until after Maryland passed the act of 1818.

The State of West Virginia says that she has not had access to the said resolutions of Maryland of 1795, 1801 and 1810, but she believes and charges that they contain no assertion of any claim to the south branch of the Potomac as a boundary line of said State.

GRANTSVILLE ALL O. K.

The Commonwealth Army Well Treated in the Little Mountain Village.

Another tiresome march across the highest ridges of the Allegheny mountain system brought the Commonwealth Army across Mason and Dixon's line into Maryland and into this quaint village, fourteen miles nearer Washington. Camp U. S. Grant was pitched in a field just outside of town. It was the centre of attraction for all the people of this section of the country. The army's departure from Addison was not attended with any particular excitement. But few saw the early start that was made. Hard tack had been distributed, and as the men marched they munched and drank. For the first time in a week the weather was fine. Progress was slow, however, owing to the condition of the draught horses, several of which were about exhausted.

Two miles out of town a white mile stone by the roadside marked the border line between Pennsylvania and Maryland, the famous Mason and Dixon line of history. There the army halted. Led by the band it sang "Maryland, My Maryland," in rousing style. The halt was brief. Before the army lay the steep sides of Kiser's ridge, 2,850 feet high, and the highest point in Maryland. The three miles' ascent took two hours, as one of the horses fagged out and had to be left in charge of two men. Marshal Browne was dismounted and his handsome grey stallion put to work.

The command was halted for lunch at the bridge over Pusley's run, at the foot of Negro mountain. From that time until Grantsville was reached the men marched slowly. As the place of encampment was reached the men scattered over the wide hollow given them for quarters and soon had a dozen fires lit among the rocks. The men were presented with a lot of army canteens by Captain Beecher, of this place.

Nothing ever occurs to disturb the quiet of Grantsville, so that when the Coxey army came along one day behind schedule time, having been delayed one day at Uniontown by the snow storm, everybody, from the demur old maiden to the little boy, was out to see the show. People from Myersdale, Mechanicsburg and Salisbury came, some on foot, some on horseback and some in wagons. About 9 o'clock the advance guard, consisting of four newspaper men, four telegraph operators, Gen. Coxey's son and some one they called a manager, arrived in town and put up at the National hotel. People in great numbers lined the streets, reminding us of an old fashioned circus day. The saloons closed their doors in the afternoon and the large and excited crowd were quiet and orderly.

The streets were lined all day with hobs that belonged to Coxey's band and traveled in advance or what is more likely, regular tramps who would not submit to the hardships and discipline enforced by Coxey's lieutenants.

About 4 o'clock the army of the commonwealth, 235 strong, in charge of Smith, the great unknown, with their banners and an apology for a brass band arrived and camped for the night in an old distillery west of town.

At night they built a camp-fire in front of the hotel, where Carl Browne spoke for about two hours and a half. After his tirade against the old parties and Cleveland and John Sherman in particular, he passed the hat for a contribution, the amount of which was not made known.

The army left on Saturday morning at 9 o'clock for Frostburg. Their parade through town made a very favorable impression and many persons were heard to say "those people have been misrepresented."

They were about as quiet and orderly as any other body of men of like number would have been. Indeed it was the wonder of everyone how a body of men could be controlled and handled as they were where the officers had no means of enforcing their orders except their personal influence.

Poor deluded creatures, laughed at and almost ostracized, having no definite object in view, they tramp through snow and mud and rain, sleep on the ground or shiver by their smoldering camp fires, live on what they can get and wear what they have, expecting to get to Washington and live off of the National government, persuade Congress to issue five hundred millions of dollars, put everybody to work on the roads at one dollar and a-half a day, usher in the millennium and get back home by the middle of June.

The people who were here were very much disappointed in not seeing Gen. Coxey, as he left the army at Somersfield and went to Cumberland by way of Pittsburgh.

SPECTATOR.

A PROPER VERDICT.

The Jury Gives Miss Pollard a Judgment for \$15,000.

WASHINGTON, D. C., April 15.—The jury in the Pollard-Breckinridge case, after being closeted for one hour and twenty-eight minutes Saturday afternoon, returned a verdict of \$15,000 for the plaintiff.

Colonel Breckinridge himself rose to make a motion for a new trial, and the court then adjourned. There was a wild rush for the court room about 5:25 o'clock when the report got out that the jury had come in. Judge Bradley and the jury entered at one door, Colonel Breckinridge, his son and Colonel Phil Thompson at the other. There was some delay in waiting for the other parties. Everyone knew the jury had not come in for instructions, because they carried their coats and hats.

There was an intense silence. During the interval, the jurors sat looking solemn as the proverbial judges, while Colonel Thompson and the gray-haired defendant conferred in whispers. Five minutes passed before Attorney Calderon Carlisle, representing Miss Pollard, entered. Judge Bradley requested the people to refrain from demonstrations. Then the verdict was announced. There was no expression of approval or disapproval from the crowd.

The jury took fifteen ballots before reaching their conclusion. The difference was mainly over the amount of damages to be granted, and there was but one man on the jury who favored the defendant. On the first ballot one juror voted for the defense and hung out for a long time, but his colleagues thought that he did it more for the sake of argument than because he was strongly in favor of Colonel Breckinridge. A number of ballots were required to reach a compromise on the amount of damages to be awarded. Two or three jurors wanted to give the full amount of \$50,000, while others thought that merely nominal damages would serve to express their opinion that the Congressman had treated Miss Pollard shabbily.

Colonel Breckinridge was very cool after the verdict had been rendered. He walked away with his counsel, talking with them, but declined to speak at that time for publication, as did his attorneys.

Miss Pollard was somewhat excited, but not hysterical, while awaiting the result, and, as a woman always does, broke into tears when she heard it. She declined to be interviewed and her attorneys said that she was anxious to efface herself from the public sight as far as possible, now that the case had ended.

A Plea for Garrett and Wilson.

To the Editor of the Republican.

On the behalf of my friends and the best interests of our country I desire to speak.

All good, loyal citizens are solicitous in regard to our country's progress and development and to bring this about home industry must be encouraged and business enterprises pushed ahead. To accomplish this more capital must be invested and more men must be employed—at good wages too. The laboring class constitute the larger part of our population; hence if they get employment at fair wages they can wear better clothes, have more to eat, provide comfortable homes for their families and even indulge in some of the luxuries of life, consequently the manufacturer commands a better price for his product, the merchant a larger per cent. on his goods and the farmer finds a ready market for his beef or mutton or potatoes or whatever he has to sell, and he disposes of it at a good price too.

To govern, control and protect these things we need just and wise legislation; then the paramount question should be, who will best represent us in our law-making bodies?

The Sixth Congressional District will soon be called upon to select a man to represent us in the halls of Congress. Fellow citizens of Garrett, it is unquestionably our turn now to furnish that important personage. The other counties of the District have heretofore been supplying the demand in that direction, therefore for this and the following reasons let us assert our rights. Garrett is by no means the smallest county in the State, either as to area or population, besides the rate of increase in population is greater than any other county in the State! Our hardy citizens have been fast surmounting the difficulties of the past. The present Democratic *good times* is the most trying ordeal of which we have yet had to undergo, but Protection's star will soon reappear—the signs for it are unmistakable—then that will be the controlling power and Garrett will march on to the front. Garrett county is solidly Republican and has been loyally supporting the candidates from our sister counties heretofore. Now, therefore you

sons of Garrett, stand forth and let us demand our indisputable right to name the man for Congressional honors, and let his name be the Hon. Geo. W. Wilson, who is so worthy and so eminently qualified for the honors and duties of that high office.

Let our watch word be, Wilson and Protection.

Dear Park.

Mr. W. C. Jones was at Cranesville last week.

Mr. J. C. Rodheaver has secured a position in W. C. Jones' store.

The railroad company have a force of hands at work repairing their hotel.

Rev. Hart will preach here next Sunday evening.

Mr. and Mrs. Abe Freeland were guests of Mr. and Mrs. W. H. Chadderton last Sunday.

Mr. S. P. Specht has gone east on business.

Mr. Joseph Bowser is farming for Mrs. Funderberg.

Mr. Joe McRobie moved through here last week. We can't tell where he stopped.

Mr. C. F. Browning is on the sick list.

Hannah for George W. Wilson.

Mrs. Will Hovey and Mrs. Frank Hovey, of Sang Run, were visiting at Mrs. S. C. Hovey's last week.

A sister of Mrs. W. C. Jones from Pennsylvania, is visiting Mrs. W. C. Jones.

The street last week broke several telegraph poles down in this place.

Notice.

Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

"THE REST"

FOR SALE!

The valuable property situated in the town of Oakland, known as

"THE REST,"

is now offered for sale.

This property has a reputation and is valuable to anyone wishing to engage in keeping a Summer Resort. For particulars apply to

D. P. MILLER,

Cumberland, Md.

THAT LITTLE KID.

When I see a little youngster
Wrapped in long and swaddling clothes,
Strapped inside his wicker carriage,
Out of sight except his nose,
When he's left with dancing sunlight
Torturing each blinking lid,
Then with all my heart I'm thankful
That I'm not that little kid.

When I see him in the nursery,
By the fire warm and bright,
Playing with his toys and trinkets,
Laughing gay from morn till night—
Keeping mother, aunt and sisters
Running hither at his bid,
Lest his life should know a trouble—
Would I were that little kid!

When I watch his helpless actions
As he tries to walk,
When I hear his wordless prattle
As he does his best to talk—
When I think what firestorm studies
He must have as we once did;
Really I am very thankful
I am not that little kid.

But—when decked with bows and ribbons
On his ma's reception day,
Held by scores of budding maidens,
Loved and lauded, he hears them say:
"Let me hold him!" "Kiss me, darling!"
Pressed to scores of lips and hid
In their arms by clouds of kisses—
Joyce—I wish I was that kid!
—Boston Transcript.

"TOOTS."

BY A. S. WING.

WING low, sweet charity—
"Toots!" shrieked old Dinah from the kitchen, in a high and penetrating falsetto, whose many quavers were jerked out in a way that sounded as if the singer were undergoing some mysterious torture.

Mrs. Stocker, tending flowers in the back garden of her ranch-house in the San Fernando valley, stopped to listen. "Dinah, for to carry me home!" continued Dinah, in a deep rambling tone, suggestive of an asthmatic bass and accompanied by an energetic rattling of dishes.

As the negroess paused for breath, Mrs. Stocker heard a heavy pounding at the front door, and still smiling at Dinah's duet-like efforts, hurried round the house.

On the porch she found a testy and eccentric old man who gazed with marked displeasure at her lovely face, and, unapproached by her friendly smile, roared out: "What in thunder's going on in this house—a prayer-meeting, or a cat-fight? I've been hammering on this door for ten minutes, seems to me!"

"I'm sorry if we've kept you waiting," she answered, gently. "The various hard knocks into which his face seemed to be tied slightly relaxed, but he vouchsafed only a skeptical grant in reply.

"I've come to see your husband," said he, abruptly; "is he home?" "No, he is not."

"When'll he be back?" "Not until to-morrow."

"I suppose you don't know how to write a receipt?" he queried, with his chin cocked querulously in the air.

"I think I could," said she, smiling. "Well, I've been owing your husband some money for three years, 'cause people didn't pay me; but I've had a stroke o' luck, and here's the money. Gimme a receipt, and we'll be quits."

He said, as he lifted a heavy bag lying beside him.

"Oh, dear me!" she exclaimed; "could you not give me a check for it? I'm afraid to have so much money in the house."

He looked upon this feminine timidity with the contempt of a bitter old bachelor, and promptly snapped: "No, I can't. It's all the money I've got. People seem me huggin' in the bank, and if you don't take it, likely some one else will. I'm skeered myself!" with a sardonic grin.

She reflected that this crusty person might never make another effort to pay, and that she would never know she had the money; so she asked him into the house, where she counted the coins and gave him a receipt.

When he was gone she hid the gold among some scraps in a dark corner of her bedroom closet.

As the day wore on she grew anxious and nervous. There occurred to her

the fear that some passer-by, who had seen the old man bring the bag from the bank, had noticed his horse standing at her gate, and would suspect that she had the money.

It seemed to her that the very birds had too knowing an air as they tilted on a branch outside her bedroom window and cocked their heads on one side to look in.

If anyone broke into her lonely house, which was a half-mile from her nearest neighbors, the Gordons, who and her feeble old Dinah would have no defense.

It was with a feeling of relief that she saw John Gordon, her husband's best friend, walking toward the house. He was a dark, slender man, with a nervous manner and a rather joyless smile.

"How are you, Mrs. Stocker? Feeling rather lonesome, eh?" he called out. "We saw your husband driving by this morning with his regimentals on, and knew that meant he'd be gone some time. Wife isn't very well, and wants to know if you won't go over and stay with her while I'm away."

"I thank you. I wish I could, but Mr. Stocker can't possibly be back until to-morrow, and Randall has paid me a large sum in gold that I dare not leave."

"Has he, at last? I saw his horse standing here, but had no idea you'd ever see that money again. After a moment's thought he said: 'But why not leave it? Does anyone know you have it?'"

"No one but the man who paid it to me, that I know of—but he looks like a brigand."

"Nonsense, my dear woman! You're letting your fears run away with you. Brigands don't usually pay debts, and there's nothing to be afraid of. Just leave the money here and go over to our house to spend the night. Dardies are a scary lot, and you haven't even a sensible dog to keep you company."

She lingered to yield, but she thought of all that this money would mean to her overworked husband, and, hardening her heart against Mr. Gordon's repeated argings, persisted in staying at her post.

Saying that he was late for an engagement, her neighbor bade her a hasty farewell.

As the early darkness of the December night began to close in Nature herself seemed to Mrs. Stocker, in her overwrought condition, to be conspiring with evil beings to heighten her helplessness.

At last Dinah ponderously waddled in and broke the gloom by cheerfully announcing the evening meal. While this was in progress, a wagon drove up, and Mrs. Stocker heard the welcome voice of Ranney, a sturdy, jolly Irish peevish, with whom she had had dealings for several years. His was one of those round and jovial personalities that look like embodied jokes, and the very sight of whom makes everyone feel cheerful.

"Now, Toots," he was saying, "don't ye be forgetting me up the minute I git down. It's so long since I've had a bite that I'd be mighty poor picking. He aise, now, and the lady'll give ye a horse, maybe, with some marrow in it. I'm hollow clear through."

Mrs. Stocker opened the door in time to hear these last words, and called out: "We shall be glad to fill you up, Mr. Ranney, and Toots, too. Come in, both of you."

In walked master and beast, the man with something of a roll on his lanky legs, the white dog—whose legs seemed respectfully modeled on the same plan—with the air of conscious power and dignity belonging to a pure-blooded bulldog.

As the peddler took his seat at table, Toots sat down beside him and, without taking the slightest notice of anyone else, looked quietly into his master's face.

"I've been driving without a bite since midnight," said Ranney, "and thought I'd stop here for supper and drop the things that ye ordered last trip, Mrs. Stocker. I knew Toots was hungry, too; but, ye see, he don't beg, like common dogs. He's too much of a gentleman for that. He knows his master'll feed him when he can, and he has no patience wid whining, let alone doing it himself."

"Toots is the best dog I know," Mrs. Stocker answered, enthusiastically. She took up a bone and held it out, saying: "Toots, nice dog, will you come and get this?"

Toots eyed her gravely, with an expression which said that he knew she appreciated his worth, but thought her tone was unduly familiar.

Then he looked inquiringly at his master, to see if he approved of accepting a bone from a strange hand.

Ranney nodded and said: "Yes, old boy; go and get it."

Toots walked calmly round to Mrs. Stocker without any undignified haste, and with one polite wag of his tail took the bone, which he crushed in his powerful jaws as if it were an egg shell.

Dinah eyed him at a respectful distance, and was visibly relieved when the meal was over and she could go to the kitchen.

"Mr. Ranney," said Mrs. Stocker, hastily, "my husband is away, and I feel very timid. Can't you stay with us all night?"

"Indade, mum, now I'm rale sorry, for I'd dearly love to be any comfort to ye, but I got word that me friend, Charlie Craig, was down with fever and begging every minute for me to come to him. They say he may not live the night out, and I've been driving like mad all day to git to him in time. If 'twas anything else, I'd stay. But ye've no call to be anyways noferd, me dear lady. There's no robbers about here, and no one has iver molested ye, I know."

She thought to herself: "Dare I trust him? Perhaps he could send me some one from the village," and she told him of the money.

"Oh, now," said he, "I'll fix it. Jest as well not talk about it in the village. I'll leave ye Toots, and he won't tell, anyhow. I don't think anyone could know ye have that in the house; but if they did, they'd have a hard time gitting it, with Toots here. It 'nd be a new sort o' man that 'd git the better o' him."

"Oh, thank you, Mr. Ranney. But wouldn't Toots mind me?"

"Sairtainly he will, if I tell him. He's a knowing fellow. And there's nothing he can't do for ye, from minding a baby to chewing up tramps."

During this talk, Toots listened with an air of interest. Ranney turned to him and gravely spoke in the tone of respectful politeness that he would have used toward an intelligent man.

"Now, me boy, ye see it's this way. This lady needs ye more'n I do to-night, and so ye'll plaze me best if ye bide here with her. Don't let anyone harm her, and stay here till I come for ye."

Toots walked over and licked his master's hand.

"Good boy! Ye're the best friend I have," said Ranney, patting him, whereat Toots cocked up his ears and wagged his tail.

"Now, lie down and show the lady ye mean to stay."

Toots obeyed and quietly watched his master go.

After carefully locking every door and window, Mrs. Stocker sat down to write a letter. She found it hard to infuse a properly cheerful tone into it, and caught herself listening fearfully to every sound. The dog settled down to a comfortable nap, and seemed not in the least disturbed by the shrieks of the wind or the rattling of windows. She began to fear that if anyone broke in, Toots would not even hear it.

The ticking of the clock was almost unbearable, while his deliberation seemed purposely to lengthen the minutes as they passed. The wind increased in fury. She peered into the darkness, but could see nothing beyond the swaying trees. Toots looked at her inquiringly, but as nothing alarming was to be heard settled down once more to sleep.

Mrs. Stocker took up a book, but found it impossible to keep her mind upon it. Frightful and menacing faces rose before her, and all the tales of violence that she had ever heard came back to her. She walked the floor, forcing herself to think of faraway scenes in her happy girlhood, only to be brought back to the present by some fresh rattle of a door or window that sounded as if some one were trying to get in.

At last fatigue made her drowsy. She carried the lamp into her bedroom and left it burning, so that anyone who passed might think the family were awake, and then lay down without undressing. As she dozed off she was now and then awakened by the scrapping of the shingle upon her window, and, though she did not believe in signs and portents, it sounded to her like the tapping of the willow wand that foretells approaching death.

At last she looked at the clock, and saw that in all these sleepings and wakings, which had seemed to occupy a lifetime, a half-hour had gone by. She lay down again and at last sank into a deep sleep.

She was awakened by a gust that shook the house. As the wind lulled, she thought she heard a noise at the front door. She rushed into the parlor.

There sat Toots, with his eyes fixed intently on the door, but not moving a muscle. The noise ceased, and she went back to bed—but could not sleep.

Again she heard a metallic sound in the lock. She got up and called: "Who's there?" but there was no answer. The dog sat upright and looked at the door, but kept perfect silence. Mrs. Stocker listened. All was quiet for several minutes, but again came that metallic clink.

"Who is there? What do you want?" she cried.

No answer; but this time the sound continued.

"At him, Toots!" she screamed; "at him! Bark!"

Why was the dog so still? In an instant the reason flashed before her. Toots must have recognized the step of his master, who had come back to rob her, knowing that her only protection was his dog!

She saw the door yielding, and fled through the rear of the house. On, on, she ran towards the Gordons, stumbling, falling, getting up and running again, unconscious of fatigue. Her breath came in gasps, and she could scarcely utter a hoarse cry of "Help! help!" as she threw herself against the door of the Gordon house.

Mrs. Gordon, who was lying awake listening for her husband, roused the household, and soon they were hurrying toward the Stocker house.

As they neared it, their nerves were tense. There was a pale moon struggling through clouds, and even the most familiar objects looked strange and spectral.

The front door was wide open. They walked cautiously toward it, and looked in.

On the floor lay the figure of a masked man while over him stood the bulldog, bleeding from several cuts and his jaws horribly red. The man's throat was a gaping wound, and his right hand still clutched a knife. A few feet away lay a revolver, evidently fallen from his grasp.

Mrs. Stocker leaned pityingly toward him. "Perhaps he has only fainted. Do see if we can help him! Come away, Toots—good dog, brave dog!"

Toots looked at the motionless form beneath him, and then limped toward her.

Mrs. Gordon bent over the prostrate man and pulled off his mask. An awful cry sounded through the house.

The man was John Gordon—dead!—San Francisco Argonaut.

—Some folks are like the pedal pipes of an organ—they are never heard from until trampled upon. Others are like Aeolian harps, making music responsive to every breath that touches their trembling chords.—Ran's Horn.

PURE PATRIOTISM.

It is Not the Kind That Prompts One to Seek Only Personal Advantage.

There is much in this world which goes by the general name of "patriotism," which in point of fact is little more than a habit of enthusiasm over party ideas and accepting party utterances. While factions and party rivalry have a salutary effect in checking excesses and restraining unwise or extravagant legislation, the broad and important principles which are the basis of all political bodies must not be lost sight of.

As the body without the spirit is but a bit of useless clay, so a party organization which has outlived its purpose or has discarded or ignored the ideas and principles which crystallized it into existence is a worthless and cumbersome thing to which it is the supremest folly to cling. Partyism and patriotism are two often confused, but it is not unusual to find fairly intelligent men who have no clearly defined ideas as to what constitutes either.

The constitution of the United States and the declaration of independence should be part of the elementary education of every child who gets its tuition at the expense of the public-school fund. The fact that it is so taught places it under obligation to the educating power, which obligation should be canceled only by a perfect understanding of those most interesting and important documents.

As the case now stands the young people and children are allowed to learn that this is a free country, that the liberty of speech and of the press must not be abridged, that they have rights which everybody is bound to respect, and that a self-assertive spirit is most becoming in an American citizen.

But what they do not learn, and what would be the most useful for them to know, not only for their own prosperity and growth but for the good of the nation which is quite likely some day to require their services, is their personal obligations to the nation, the state and their fellow-citizens.

The rights of the individual are but a small part of the patriotic education of a child. As a member of society and a citizen, he is entitled to life, liberty, the pursuit of happiness, so long as the pursuit does not interfere with the rights of others, the right to labor unmolested, to earn a livelihood whenever and wherever he chooses and at the wages he may find it convenient or expedient to accept, and to do all this without the interference or question of the other members of the community. Those who are not allowed to do this are not living up to their privileges, and those who prevent this freedom or obstruct its exercise in any way are acting in direct defiance of law and order and the principles and teachings of the constitution.

Personal liberty is a very comprehensive term, but does not by any means include personal license. Liberty is by many construed as the absence of law, when it is, in fact, the presence of it. Personal safety and personal liberty are almost unknown in countries where there is no law. Good laws, strictly enforced, guarantee the well-being of society, and the highest degree of patriotism is found where such laws are enacted and respected.

One of the first lessons in life should be that the rights of every living being must be respected, but that there is no such thing as license without endangering not only the safety of the individual as well as that of the state. The best way to secure peace and prosperity in the community is to impress upon the minds of children and youth the need of respectful submission to existing authority, and so to impress upon their minds the principles of the constitution and the declaration of independence that it shall become a part of their daily habit of life to insist upon their own rights without interfering with the rights of others.—N. Y. Ledger.

A CITY OF BETTER DAYS.

The Falling Off in Dublin's Industrial Status.

The blow which fell on Dublin nearly a century ago, and which checked its material prosperity as effectively as the Spanish plague broke that of Leyden, did not operate to also blight its growth. It remains among the first score of Europe's centers of population, and the county of which it is the heart contains 50,000 more people than it did in 1841. There is only one other county in Ireland which does not exhibit a loss in population of from 30 to 65 per cent. for the same period.

This increase does not, unhappily, betoken a gain in resources and profitable activity. The average standard of wealth in Dublin has, I should think, declined considerably since 1841. Between that date and the year 1900 the fall was precipitous. The ledgers of the old banking-house of Latouche preserve a curious detail of proof. Of the 104 peers in the Irish parliament, 83 kept their accounts with Latouche, and the personal expenditure of these in Dublin aggregated \$234,000 in a single year. There were a hundred town houses of the nobility then, and there were 300 members of the commons, who, from the necessities of the case, were either wealthy men or the salaried nominees of wealthy patrons. The mere presence of parliament must have meant the annual circulation of at least two millions sterling in Dublin.

It is possible to enumerate manufacturing and mills known to have existed in Dublin in 1800, employing some 10,000 artisans, of which vestige and disappearance within thirty years thereafter. In 1825 the number of resident peers had diminished to twelve, and today there are practically none at all. The tollers went away as well, not only the woolen, silk and carpet weavers, and those skilled in the fabrication of other manufactures, but the host of builders, masons, stonecutters and artistic stucco workers who had been employed in that splendid renaissance of public and private architecture which marked the lifetime of Grattan's parliament.—Fortnightly Review.

SCIENCE AND INDUSTRY.

The gold product of west Australia last year was double that of the previous twelve months. The total export for the year was 110,301 ounces. The prospects for the present year are most promising.

Etching on glass was discovered by an old gentleman named George Schwaubker, of Nuremberg, who, to his own great disgust, spoiled his spectacles by spilling aquafortis on them and made a fortune out of the accident.

A scientific observer says that it is not improbable that Mashoualand is the Ophir of the Bible, since the quantity of gold then used was so enormous that no old world country except South Africa was capable of supplying the demand.

Measures are being taken by the authorities of Crete to revive the silk industry of the island, which was once flourishing, but which has been dwindling for some years owing to the use of bad seed. A good supply is to be furnished free.

A good extemporized apparatus for removing carbonic acid gas from wells is simply an opened-out umbrella laid down and rapidly hauled up a number of times in succession. The person who made and reports this experiment states that the effect was to remove the gas in a few minutes from a well so foul as to instantly extinguish a candle previous to the use of the umbrella.

The total sales of shares in the New York Stock Exchange in 1892 were 78,215,748; in 1891 were 66,045,217; in 1890 were 56,126,365; in 1889 were 60,829,904; in 1888 were 62,845,722; in 1887 were 53,921,028; in 1886 were 102,824,804; in 1885 were 90,920,707; in 1884 were 96,863,223; in 1883 were 96,037,905; in 1882 were 113,720,655; in 1881 were 113,392,050; in 1880 were 97,200,000; and in 1879 were 74,166,632.

The pitcher plants are so-called from having a receptacle containing clear water. The sides of the pitcher are covered with sweetish secretion possessing narcotic properties. If a fly tastes, he becomes paralyzed and falls into the water, where he is drowned. If not rendered entirely insensible, he attempts to crawl out, but is prevented from doing so by stiff down-pointing bristles on the inside of the cup. It is believed that in some way the bodies of captured insects contribute to the nourishment of the plant.

The cultivation and manufacture of jute has grown to immense proportions in India. In 1892 the exports were 61,000 bags and 7,042,000 yards of cloth; in 1891 they were 123,975,000 bags and 40,000,000 yards of cloth. This does not, of course, represent the whole of the manufactured jute trade, for very large quantities of bags and cloth are shipped from Calcutta to other parts of India and are used as coverings for raw produce and manufactured goods exported. There are twenty-five jute mills in Bengal, with 8,814 looms and 177,718 spindles. Over 66,000 persons were employed in these mills.

Humboldt made a long series of very interesting experiments with regard to the work and rest of plants. He exposed them to constant light, to constant darkness, and to light and darkness at irregular intervals different from those of nature. The plants in continual light kept awake a long time and then seemed to be overcome by fatigue and went to sleep; those kept in darkness had irregular intervals of rest and activity; those which were exposed to conditions of light and darkness different from their usual were not long in adjusting themselves to the new state of affairs.

HUMAN TEMPERAMENTS.

The Fourfold Classification Made Two Thousand Years Ago.

It is interesting to find that thoroughly scientific man, Prof. William Preyer, has adopted the fourfold classification of temperaments made nearly two thousand years ago—namely: the choleric, sanguine, melancholic and lymphatic. The existence of one or the other of these temperaments may be discovered, he says, in his work on "The Infant Mind," very early in the great majority of children—in the second quarter of the first year, beyond a doubt.

Nearly every one who has written about temperaments has made a classification of his own. Galen had nine. Haycock gave six. Grant has seven, and others have got down as low as two. Modern writers use the word nervous for choleric, and bilious for melancholic temperament. With these verbal modifications the old classification seems to answer all practical purposes, and individuals can build up combinations as needed.

Hutchinson defines temperament as the sum of the physical peculiarities of a man, exclusive of his tendency to disease. This is not satisfactory, though perhaps temperament is a thing a little too vague to be satisfactorily defined. In modern terms it may be said to be the peculiar way in which the individual reacts to the stimuli of his environment. There is no doubt that one class of persons react quickly and easily, expending energy profusely and often needlessly in their life work; others react hopefully and work buoyantly, yet with less waste. We can thus distinguish the nervous, the sanguine, the melancholic, etc. A capacity to recognize and appreciate the importance of temperament used to be considered part of a sound medical training. It has been too much neglected in our courses of instruction with microscopes and test tubes. Our teachers of practical medicine might well revive this study.—Medical Recorder.

Government Telegraph Lines.

The United States government owns a great many miles of longshore telegraph lines, connecting lighthouses, life-saving stations and other government property on the coast. It is unusual to recognize these government lines by their low poles of rather small iron piping. These poles are planted deep in the sandy beach, and, being of small diameter, they present little hold to the sea winds and thus are seldom blown down.—Chicago Herald.

It is always the other fellow who brings politics into the discussion of a public question. On our side we never sin against the level of statesmanship.—Boston Transcript.

Muscular Rheumatism

Sciatica and the Piles Adds to the Sufferer's Misery

Four Bottles of Hood's Sarsaparilla Effects a Wonderful Cure.

"C. I. Hood & Co., Lowell, Mass."

"Gentlemen: As a result of the memorable blizzard of March, 1888, I contracted muscular rheumatism. For eighteen months afterwards I was laid up with muscular rheumatism and sciatica. I then joined my son-in-law in Denver, Colo., where I was engaged in scientific and engineering, and where I commenced to take Hood's Sarsaparilla for my rheumatism and sciatica, but also of outward piles, from which for thirty-three years I had suffered."

A Thousand Deaths.

Previous to going to Denver I visited the University of Pennsylvania to be operated upon. The doctor pronounced my case elongation of the bowels and the worst he ever saw. He refused to perform an operation. Four bottles of Hood's Sarsaparilla not only relieved, but cured, both the piles and rheumatism."

JAMES R. BOND, 209 West Morris Street, Philadelphia, Pa.

Hood's Pills cure liver ills, constipation, biliousness, jaundice, sick headache, indigestion.

"COLCHESTER" SPADING BOOT

For Farmers, Minors, R. R. Hands and others.

The boot is made of the whole length of the sole down to the heel, protecting the shank in digging, turning and other work. Best quality throughout. ASK YOUR DEALER for it.

Cover all to left of this line and see how he can save.

Cover all to right of this line and see how he can save.

It does what no other shoe can do. It is the only shoe that can be worn in the mud, rain, snow, and ice, and still keep the feet dry and comfortable.

IT DOES MAKE A DIFFERENCE—avoid the use of common toilet soaps for shaving.

If you don't think it makes any difference, just send and get a cake of YANKEE SHAVING SOAP AND TRY IT.

For over half a century, Yankee Soap has been the favorite throughout the world. The quality is guaranteed first class, and the price is low. Write for a sample, and you will receive it free of charge.

TEMPERANCE NOTES.

HEREDITY IN INEBRIETY.

The Appetite for Alcohol Born in the Blood.

Recently some very extraordinary statements have been going the rounds of the press concerning the heredity of inebriety. As a rule mere assertions and denials of facts are unworthy of notice, unless supported by some evidence that has at least the appearance of truth. Anyone can criticize and deny the facts which have been acknowledged as true, but because they were asserted by any one, but as the conclusion of a large number of competent observers.

The boldness and presumption of anyone who asserts that inebriety is not inherited, sounds like the shouts of a belated traveler who has lost his way and is bewildered and confused, or one who declares there is no light in the world because he can not see.

To say there is no evidence that inebriety is inherited, there is no such thing as hereditary appetite for liquor, is to repeat Rev. Mr. Jasper's conclusions. "The sun, he do move, the earth he do stand still." Fortunately we live in an age when statements of this kind are judged, not by the author, but on the evidence which is put forward to sustain them.

The heredity of inebriety was observed by Greek philosophers and physicians, and commented on in many works of medicine and philosophy. Roman laws and civilization embodied this fact in the statutes of the time, and from this period down, in almost every age and country, the heredity of drunkenness was mentioned. The medical testimony on this point, and the laws and edicts concerning it, would fill a volume.

In more recent times this fact has been studied from a statistical point, and every observer, including hundreds of physicians of hospitals, asylums, and institutions for the insane and inebriates, have all, with one consent, recognized the heredity of drunkenness. The evidence of this can be found in reports of asylums, volumes on insanity, inebriety, and brochures on heredity.

While there are wide differences of opinion as to the extent and nature of heredity, the fact itself is not doubted by any who have given the subject careful attention. It is not possible to understand how the degenerations and defects of one person are transmitted to the descendants, simply because the problem is so vast, and involves a knowledge of biology that is not yet attained. No one can say when and how the disease of inebriety and the drink craving is carried on to the next generation; or when it will appear, or how it may slumber along for one or two generations, then break out from the slightest exciting cause. But the facts of such cases are within the observation of everyone.

Take the common, everyday statistics of the percentage of inebriates, and the fact appears that from thirty to eighty in every one hundred cases of inebriety, parents or grandparents. These figures are the highest and lowest of different observers in this country and Europe. There is no fact in drunkenness upon which there is such a universal agreement. Many persons have divergent theories and methods of explanation. Some persons think it a very large factor in the causation, and others doubt this. Much in the same way many persons believe that alcohol is the sole and only cause of drunkenness, while in reality the use of alcohol is, in many cases, only a symptom, and the "signal flag of distress" pointing to a condition of degeneration going on in the brain centers.

The great difficulty in want of agreement is that the subject is far beyond any individual theory of its nature and causes. The dogmatism which asserts "that prohibition increases drunkenness, and that spirits and drugs give, cause more inebriety than the saloons," and that some more empirical remedy "is more effective in the eradication of the drink habit than a world of prohibitory effort," requires no answer. It describes the author and his knowledge of inebriety more clearly than can be done otherwise.

The question of heredity is open to every reader of this paper, and can be decided from facts within the observation of almost everyone. Like every other fact in science it is open to correction and change. If anyone has evidence that shows that there is "no such thing as a hereditary appetite for liquor," it will be welcomed and examined by an ever-increasing army of students of this subject. Its acceptance or rejection will be decided above the levels of theory and personal opinions.

It is a fact seen in all departments of scientific and sociological studies, that those who are most learned are the least dogmatic and assertive. Such persons state all conclusions with reserve, and as the best knowledge of the present time. This is an unmistakable sign of probable correctness. While emphatic, authoritative statements, particularly on matters where exhaustive and exact studies are essential to even master the first principles of the subject, are open to grave suspicion of error and deception.

In the meantime our readers need not be disturbed with any extreme articles going through the press on heredity or any other allied topics. The real facts will be determined and stated in a different way by very different men. Fact that will not appeal to faith alone, but have some evidence sustained by our common experience and observation.—Union Signal.

SHORTENS LIFE.

The Full Effects of Drink Shown by Insurance Reports.

We find in an English newspaper a discussion of the report of the "United Kingdom Temperance and General Provident Institution," a life insurance company. The figures given cover

twenty-seven years of the existence of that organization, and they demonstrate most forcibly the advantage that persons who abstain totally from all intoxicants have over moderate drinkers in increased length of life. The company was founded on a capital basis in 1840, to give total abstinence the benefits of life insurance. In 1847 non-abstainers were admitted, but kept in a separate section. The two sections, the "Temperance," and the "General," are independent of each other, each appropriating its own profits.

At the date of the last report there were 15,000 members in the temperance section, and 14,000 in the general section. The number of expected deaths in the temperance section during 1899, based on the usual life insurance figures, were 327, with policies aggregating £32,848. The actual number of deaths, however, was only 240, the policies aggregating £31,484.

In the general section, which includes moderate drinkers, the number of deaths to be expected, according to the tables, was 387, for £33,240, while the actual number of deaths was 422, with claims of £34,246.

The comparison shows that there were 87 deaths fewer in the temperance section than were anticipated, while in the general section there were 35 more than were expected. The mortality in the first was only 73 per cent. of the number of deaths due according to the tables, while in the second it was only 109 per cent. The following table gives the results for 27 years.

Temperance Section.	General Section.
1866-70.....	1866-70.....
1871-75.....	1871-75.....
1876-80.....	1876-80.....
1881-85.....	1881-85.....
1886-90.....	1886-90.....
1891-92.....	1891-92.....
5,564	3,303
8,050	7,861

The number of deaths in the temperance section in these 27 years is thus seen to be 1,601 fewer than the "expectations of deaths" by the actuarial tables, which all life insurance companies use, while in the general section they were but 169 fewer. Out of the total number of expected deaths only 70.9 per cent. died in the temperance section and 97.9 in the general section. That is the temperance section has the advantage by 27 per cent.

It is gratifying to know that these figures do not stand alone. Their substantial correctness is verified by the experience of American life insurance companies. The Etna Life, of Hartford, long ago refused to insure the lives of persons who habitually use intoxicants, and considers beer-drinkers quite as undesirable risks as those who use distilled spirits; and the same thing is true of many of the other leading companies of both the United States and Great Britain.

These are facts which can not be too strongly impressed upon the minds of the rising generation. Once let it be fully recognized that indulgence in liquors, even in moderation, tends to shorten life, and every sensible man will shun intoxicants as he shuns any other poison. A more legal enactment will not make men non-drinkers, but when they are convinced that drinking means slow suicide, with the possible loss of health, wealth, good name, friends and all else that makes existence dear, that makes life worth living, and certainly even men who are worthy to live will abstain entirely from every form of stimulation. The more men who can be convinced of these evils the stronger will be the effort to abolish the traffic, shut up the saloons and pulverize the rum power.—Toledo Blade.

FACTS AND FINDINGS.

HAVE you ever noticed how long it takes a moderate drinker to find out that he has any bad habits?

The city of New York last year paid four million dollars for schools. Its "drink bill," by which saloons pay the amount paid by its citizens for intoxicating liquors, was fifteen times as large, or sixty million dollars. One dollar was expended to cultivate the higher qualities of men; fifteen were spent to debilitate and destroy them, and develop the lower and baser qualities.

Twenty million dollars was spent in strong drink in Australia last year, giving employment to less than ten thousand men all the year round in actual production. Had that vast sum of money been spent in other trades it would have employed twenty-five thousand men at three pounds per week for five years and twenty weeks; so, completely solving the problem of the unemployed.

The horrors and degradation produced by the drink traffic are not to be measured by any ordinary calculation of its first cost, nor are its depredations to be judged only by its effects on the business interests of the community. Its awful results are more injurious to the people; and when conscience is blunted, the anchor of our civilization is gone.—W. Jennings Demorest.

The board of managers of the children's home of Montclair, N. J., recently instructed their secretary to return a check for twenty-two dollars, one-half the receipts of a saloon in that place on New Year's day, donated to the home by the saloon proprietor. It was voted as the sense of the board that "the association could not be recognized with the acceptance of a part of a day's receipts would imply."

A Chicago paper states that 2,683 English sparrows were killed by seventy-two bounty hunters in a certain town, the largest number captured by any one person, being one hundred and sixty-two. These were taken by a little girl, the hapless innocents having made themselves drunk by feeding on refuse from the brewery of the child's father. Think of the curse on the land when God's creatures can not feed with safety! No wonder is it that Godly men and women await with patient eagerness the day when "Jerusalem shall be safely inhabited," and there shall be no more curse.

MISCELLANEOUS.

—Penelope means a weaver. The first known Penelope was the industrious wife of Odysseus.

—Only in India and Germany do the railroads earn more than 3 per cent. on their capital, the average being 2 1/2.

—"Delay is dangerous," remarked the train-robber, as he requested the passengers to hand over their valuables.—Puck.

—Amusements are to virtue like breezes of air to the flames; gentle ones will fan it, but strong ones will put it out.—Thomas.

—"Hello, Jagley, how did you get this awful cold?" Jagley—"Well, I-er you see I'm leaving off several of my bad habits."—Latter Ocean.

—The Roman legionary troops were a sort of lance breakers. The signs of tunics and breeches makers have been found in Pompeii.

—The famous Tyrian purple dye was rediscovered by a lover who desired to gratify his sweetheart's desire for a dress of a new shade of color.

—Berthollet made the discovery of a new process by accidentally noticing the corks with which he had stopped the bottles containing his chlorine gas.

—The sugar cane is mentioned by Strabo as known in India as early as 825 B. C. It was then used in its raw state, not having been known of extracting sugar.

—The province of Quebec, Canada, has a wooden railroad thirty miles long. The rails are of maple, 4 by 7 inches, and lumber trains are run over the road at a twenty-five-mile rate.

—"You don't mean to tell me," said the young man to the scientist, "that the aurora borealis is merely an electrical display?" "Certainly," "Well, well! I wonder if it isn't the exhaust of some of the remarks that got into our telephone."—Washington Evening Star.

—The total number of deaths in the United States in 1892 was about 900,000; the number of persons cremated that year, 503. As crematories have been in existence in the United States since 1881, these statistics indicate that the movement favoring the burning of the dead is not making much progress.

"I went to the magician show last night," said Rastus. "An' de way dat feller done tuk dollars out o' de ears ob people what hadn't any dollars' fore dey came was a caution. 'I's gwine recum' him fo' a p'sition in our church. He'd be a Napoleon Bonapark fo' takin' up de collections.'—Harper's Bazar.

—It is said that a red parasol destroys in a great measure the actinic power of the sun and must therefore keep the skin from freckles. Photographs have been analyzed themselves the peculiarity of light transmitted through a red medium, and it seems reasonable to suppose that a red shade might protect the complexion.

—There is a new game which should find favor with hostesses. All the young lady participants in the production of themselves of themselves, tender babies, or at any rate, of very tender age. These are arranged for inspection, and the young men are ushered in one by one to guess who are the originals. The one successful in guessing the name wins the game and receives the prize.

—There is in India a singular plant called nostoch, consisting apparently of only one microscopic leaf. It appears in some localities almost instantaneously after a fall of rain, and covers the ground with a thick carpet of beautiful green. It is now known that in the absence of moisture the leaves lose their color, regaining it during rain and thus appearing to have a new growth.

—Mr. Max O'Rell says he has found only two nations where women are the leaders—France and the United States. It is the age of 18, a girl is allowed almost every liberty—she takes the rest. In France the women are not frivolous, he maintains, as is commonly supposed. They have a knowledge of their husband's business and a voice in the management of the household.

—Karl Jansen, a young Dane, died at Stika February 5 from powder burns in the mouth. He had dropped his shotgun into the water and was drying and cleaning it by the light of a candle. After having drawn the trigger, he placed the barrel to blow into it to ascertain whether he had completely removed the old charges. In doing so one of the gun's nipples must have approached too close to the candle light, which caused the explosion of the powder in the chamber to explode, the power entering his mouth and throat.

—No country contributes so many immigrants to the United States in proportion to population as Norway. It is chiefly the rural Norse that come to America, and the immigrants are for the most part under 30 years of age. The Norse are good farmers and thrifty citizens. They, as well as their neighbors, the Swedes, have a strong desire to make homes for themselves and to have land and the conveniences of life. They frequently return to their native country, but they become permanent citizens of the United States. Most of those who come are of marked peasant type.

—The cable map of the world, prepared by the United States navy department, shows that the Mediterranean is thickly netted with cables west of Malta. So is the North Atlantic between the thirty-eighth and fifty-fifth parallels. The North sea, the Red sea and the Arabian sea have many cables. The only great unbridged spaces are the Pacific, the South Atlantic and the great stretch of the Indian ocean between Madagascar and Australia. There is no considerable cable north of Stockholm or south of Nelson, New Zealand. The Black sea is completely girdled by land lines and crossed by one cable. The Gulf of Mexico is crossed though not at its widest, by several cables, and the waters of the West Indies are becoming thickly netted with short cables.

SUBTERFUGES OF SICK WOMEN.

Idiotic Efforts Often Made to Deceive the Doctor or Disobey His Orders.

"Sly? There is nothing slyer on earth than a sick woman. It was a Washington physician who said this, and he added:

"I have to be continually on the lookout for tricks that my women patients play me. For example, yesterday I was taking the temperature of a young lady with a continuous fever. She held the thermometer in her mouth five minutes, at the conclusion of which she withdrew the thermometer and handed it to me. I was positively startled when I found that the instrument only registered 87 degrees Fahrenheit.

"If that had been her actual temperature she would have been dead, but, on the contrary, she exhibited every other symptom of rapid convalescence. The fact was that just before I gave her the thermometer she had taken a sip of water from a glass and had incidentally secreted a chunk of ice in her mouth. Naturally, that affected the record of the tube. The patient explained that she had become so disgusted with waiting for her temperature to come down to 'normal' that she had thought a little artifice would be both appropriate and excusable.

"But that is nothing compared to another bit of experience of mine. A girl of about seventeen was recovering nicely from an attack of jaundice. In fact, she was getting so much better that her sister insisted on resuming her ordinary habit of sleeping with her. I would have preferred not, but there was really no serious objection. One night, having been detained, I got around rather late. It was after 10 p. m. I walked upstairs to the sick room and found the sisters both in bed. The patient explained that she had become so disgusted with waiting for her temperature to come down to 'normal' that she had thought a little artifice would be both appropriate and excusable.

"The light burned rather dimly. I felt the pulse, which had been quite high in the morning of the same day. To my surprise, it was full, regular and quite normal as to beats. I tried it a second time with the same results. Now, what do you suppose the trick was in that case. The two girls had so arranged themselves in bed that the arm of the well sister was under the sick one, and projected in such a manner as to make it appear as if it belonged to the latter. I had been feeling the pulse of the wrong young lady.

"There was a little girl in Georgetown about 12 years of age who was on the point of convalescence after typhoid fever. She had been on a liquid diet for weeks and her appeals for more satisfactory food were pitiful. She said that the doctor had prescribed for her made her sick. Well, one morning when I came to the house and was walking upstairs to the sick room I happened to meet the patient's grandmother, who stood aside to let me pass, and I noticed that she appeared to conceal something behind her back. I stopped short.

"Madam, I said, 'let me see what you are hiding.' 'After brief demur she produced it. It was a piece of bread.

"You were going to give that bread to Nellie, I said sternly.

"Yes," she confessed. "The poor child has been crying for it."

"I took the bread from her without further remark and sought an immediate interview with her son, Nellie's father.

"Mr. Y—," I said, "you must send your mother to Baltimore at once. The next express starts at 3 p. m. She must take it."

"But, doctor," objected the father, much astonished, "this is a severe demand on your part. I cannot understand the reason for it and I am very reluctant to comply.

"You must take your choice," I replied, "between your mother's presence and your daughter's life. A moment ago I caught her in the act of trying to convey a slice of bread to the patient. If she had succeeded in doing so, Nellie would have probably been dead in forty-eight hours."

"The old lady went back to Baltimore that afternoon. As for Nellie, I met her in the street the other day and noticed that roses bloomed in her cheeks."—Washington Star.

Preserving Timber From Insects.

Experiments made in France have shown that the reason the saw-wood in insect-worm-eaten is because of the existence of starch in it. It is the starch that the insects are after, and they do not attack the hard wood because it contains no starch. The experimenters have devised a method of preserving timber from such attacks. In the spring they cut a ring through the bark around the upper end of the trunk and suppress all buds that are developed there. By autumn the starch has disappeared from the saw-wood and the tree is ready to be felled. Timber thus prepared, it is said, does not become worm-eaten.—Youth's Companion.

A Psychological Experience.

Professor—Did you ever have any psychological experiences? Remarkable one.

"Prophetic?" "Yes."

"I should greatly like to hear it."

"One night I dreamed that the sky suddenly blazed with light; the heavens were filled with a thronging host, a trumpet sounded, the dead rose from their graves, and then a voice shouted: 'Something terrible is going to happen.'"

"Well, the very next day our cook left."—N. Y. Weekly.

Meteorological.

The young man came rushing into the house of his best girl as the rain came pouring down.

"Wow," exclaimed the small brother, meeting him at the door, "sister don't know what she's talking about."

"Why, what did she say?" "She said that other day when you were here that you didn't know enough to come in out of the wet."—Detroit Free Press.

A DECAYING SECTION.

Barren and Uninhabitable Wastes of the South.

One of the most interesting facts that have been brought out by recent investigations of the United States geological survey in the southern states, but at the same time a fact that looks ominous to that region, is in connection with what are known as "the abandoned fields," that is, the fields that formerly were under a high state of cultivation under the old system of slave labor, but which have now for years lain barren, and by the action of the elements are being rapidly converted into deserts, of much the same sort as those of the Montana and Dakota "bad lands."

The extent of these regions as estimated by the field parties of the survey is alarming, some of them aggregating from four thousand to ten thousand square miles in area. What is worse, the destruction has in many places progressed so far that the land may be considered utterly useless for purposes of cultivation for many years to come, and only prompt measures will prevent other thousands of miles following in the track of these which have already been laid waste.

The most serious feature of the case is that in these new formed eastern bad lands there is present an element of destruction to the soil that is lacking in the west. There the barren soil that has no protecting cover of vegetation to hold it molded into the form of smooth rolling hills has been slowly carved and chiselled through thousands of years by the scanty rains of the region, the harder portions of the soft, friable rocks maintaining their shape and standing up in many places in grotesque sculpturing familiar in the solitary buttes of the open plains of the clustered statuary of the Garden of the Gods. But in the east the rains are copious, and at some seasons of long duration. This torrent of water, when once taking hold of the soil where the vegetable mantle has been removed, plays havoc in a single season, such as in the arid west centuries would hardly accomplish.

This description is said to apply particularly to the northeastern corner of Mississippi and to much of eastern Tennessee and Kentucky. In southern Mississippi, along the Bayou Pierre and the Big Black, the ravages of the rains on the waste land are said to be even worse. The fields are running into gulfs and breaks, and the whole face of the country is being carried away. The plantations, mansions and quarters are being undermined, and entire villages, once the home of wealth and luxury, are being swept away at the rate of the "slow year."

The only check that is suggested for this destruction is that mentioned in the report of Prof. Nat. Shaler, of the survey, on the same region. It is the planting of willows, or other swift-growing bushes and trees in thickets, so that they will be running into gulfs and breaks, and the whole face of the country is being carried away. The plantations, mansions and quarters are being undermined, and entire villages, once the home of wealth and luxury, are being swept away at the rate of the "slow year."

THE DATE OF CREATION.

Dr. John Lightfoot's Theological Demonstration of the Very Day and Hour.

In the seventeenth century Dr. John Lightfoot, vice chancellor of the University of Cambridge, the greatest biblical scholar of his time, attempted to reconcile the two accounts in Genesis by saying that of the "clean sort" of beasts there were seven of every kind created, three couples for breeding and the odd one for Adam's sacrifice on his fall, which God foresaw; that of the "unclean" beasts only one couple was created; and finally, that "heaven and earth, center and circumference, were created all together, in the same instant, and the clouds full of water," and that "this work took place and man was created by the Trinity on the sixth day, at 9 o'clock in the morning." Here, indeed, is a triumph of Lactantius' method, the result of a thousand years of biblical study and theological thought since Babel. In the eighth century, and Vincent de Beauvais, in the thirteenth, had declared that creation must have taken place in the spring. Yet, alas! within two centuries after Lightfoot's great theological demonstration as to the exact hour of creation, it was discovered that at that hour an exceedingly cultivated people, enjoying all the fruits of a highly developed civilization, had long been swarming in the great cities of Egypt, and that other nations hardly less advanced had at that time reached a high development in Asia.—Andrew D. White, Jr. D. D., in The Popular Science Monthly.

Fashion Notes.

The return of long wraps to favor is one of the accomplished things this spring, though the spring is not the season when the long wrap enjoys the greatest popularity.

The small bonnet promises to be still smaller, if that were possible. A great many round hats in turban shape, the new Amazon shape and other styles of medium size suitable for city streets will be more generally worn than ever before.

Ribbons of the chief color of the lawn or sheer cotton which they trim will be popular garniture for cotton dresses. Bezu and white lace in different widths are again used on these gowns.

A novelty of the season is the importation of cotton gowns with the trimmings already made up and the skirt finished, ready to put on the belt, but with these cost no more than twenty dollars to thirty dollars a dress pattern in material that sells at thirty-five cents a yard, they cannot be reckoned as economical dressing.—Philadelphia Press.

—Potato Fritters.—One pint of cooked potato cubes, one-half pint of milk, two eggs, season with salt and pepper; stir in flour enough to make a stiff batter and fry in boiling lard the same as corn fritters.—Farm and Fireside.

PUNGENT PARAGRAPHS.

—The man who loses his balance easily hasn't much to lose.—Young Men's Era.

—A man who puts off his enjoyment too long will find it mislaid by the time he gets to it.—Siftings.

—"Has Footlight made anything out of his play?" "Jerusalem, yes; he picked up a barrel of cabbage after the first performance."—Inter Ocean.

—Subscriber (to editor):—"How's the newspaper business now?" Editor:—"Splendid! Just got \$50 out of 'he railroad for cutting off my left leg.'"—Atlanta Constitution.

—"I'm on to your little game!" exclaimed the customer who had been given a sparrow on toast when he asked for quail.—Yonkers Statesman.

—"Judge—'Have you seen the prisoner at the bar before?' 'Witness—'I have to well, rather. Had a couple of drinks with him last night.'"—Buffalo Courier.

—"At what time in life do you consider a man in his prime?" "When he is neither young enough nor old enough to want to write poetry."—Washington Star.

—"Mrs. Talkalot—'This is an age of freedom for women. They are breaking all their bonds.'" Mr. Talkalot:—"Yes, particularly the bonds of matrimony."—N. Y. Herald.

—"Did your late boarder succeed in removing all his effects?" "I should say not," rejoined the landlady. "I don't suppose I can ever get the cigarette smell out of the curtains."—Detroit Tribune.

—"So you think Plotter is going to join the medical profession?" "Yes." "Is he studying for it?" "Yes; he has selected three acres of ground that he is going to plant in watermelons."—Inter Ocean.

—"John," said Mand, "do you know the height of sweetness?" "Well," said John, sizing her up, "it should say about five feet, four inches." That was the beginning of the engagement.

—"It will never do to have women serve on the jury. They might get to talking about the fashions in the jury-room some day, and in that case Judge, counsel and prisoner might die of old age before the verdict was brought in."—Somerville Journal.

—"Hicks—'They tell me that Gargle is missing. Have you any idea of the cause of his absconding?' 'Wicks—'No; I guess there was no particular cause, and probably he got an idea into his head that if he didn't make a missing man of himself folks would think him eccentric.'"—Boston Transcript.

WHEN MY LADY SLEEPS.

The Gown She Wears Is Much Herlikened and Properly Trimmed With Lace.

The new night-robes are victims of the lace craze, like all else which pertains to my lady's wardrobe. They are gay with ribbons, too, and many are pretty and elaborate enough to appear as tea-gowns.

The night-robe in best taste is white. A dainty and not too dressy gown is made of sheer cambric, with a deep yoke of Toren lace. This is outlined with a ruffle of cambric edged with the lace, so that the whole appears much like a sailor's collar. It is fastened in front with narrow white ribbons. The full sleeves are also tied with a little bow at the wrist, and finished with a deep fall of lace.

Night-gowns of nainsook are trimmed elaborately with Valenciennes lace. Many of the gowns have the lace in section arranged to simulate a Bolero 'sleeve. The lace frills which outline it make the effect soft and pretty.

White embroidery with a colored edge is much in favor for the less expensive night-gowns, and, coarse and broad-bordered yokes are finished with heading through which narrow ribbons are run. A rather eccentric novelty, and one which presumably will not be welcomed with fervent joy, is the gown of delicately tinted chambray, trimmed with eeri insertion and lace.—N. Y. World.

Mistakes of Nervous Singers.

The effects of nervousness are varied and amusing. One young mezzo-soprano was prevented just in time from walking on to the platform in a huge pair of fur-lined overshoes, which were put on above her slippers and which contrasted comically with her dainty gown.

Another songstress, who was gifted with a good verbal memory, was singing without a note. During a rather elaborate symphony, preceding the second verse of her song, she chanced idly to glance at the book of words which she was holding. Confusion followed. She could not link the melody with the poem. It was a terrible moment, but she stepped swiftly to the piano, glanced at the accompanist's copy and finished her song on a note. It appeared, on inspection, that by a printer's error two lines of her song had been left out of the book of words. This had confused her and was the cause of her failure to blend words and music together.—Atlantic.

Knotty Point in Natural History.

Johnny—"My story book says the wild hog is one of the most pugnacious animals in the world."

Tommy—"I don't care what your book says. The rural Bengal tiger bit me on the leg ten times pugnastier."—Chicago Tribune.

OUR WASHINGTON LETTER.

(From the Regular Correspondent.)

WASHINGTON, April 16, 1894.

Ex-Speaker Reed takes his new honor easily, as he does everything that comes to him. He has never had a doubt that the counting of a quorum would eventually become one of the fixed rules of the House, no matter which party is in power. If he felt any surprise at all at the action of the Democratic caucus in directing the committee on Rules to prepare a rule providing for the counting of members present and not voting, in order to make a quorum, it was not because the caucus had come around to his ideas but because as many as forty Democrats should have voted against the proposition. While the Republican members of the House are thorough believers in the principle of counting a quorum it is not yet certain that they will support the Rule reported by the committee on Rules, or that they will vote at all to help adopt it. The principal reason for this uncertainty is that the caucus resolution also directed the committee to report a rule to compel the attendance of absent members. It will depend upon how the Democrats intend to accomplish the proposed reforms what position the Republicans will take.

Another Democratic Senator has placed himself in the doubtful column. Senator Smith, of New Jersey, in his speech on the tariff bill, which Senator Quay correctly called a "measure of mingled malice, compromise and sectionalism," renewed the old shivers which Senator Hill sent up and down the spines of the free traders last week. It has been agreed that the debate on the bill as a whole shall end next Monday. Then the contest over the individual schedules will begin and the fighting will be forced by the Republicans from the first to the last. The Democratic managers of the bill are in doubt as to the status of at least six Democratic Senators, not to mention the successor to the late Senator Vance, of North Carolina, who died here Saturday night.

Senators Hill and Voorhees no longer speak when they pass each other. The cause is the remarkable raking over Hill gave Voorhees in his speech. They speak of each other in their personal friends in such endearing terms as "blatant demagogue" and "traitor," and each refers sarcastically to the other's "gull" in considering himself a Presidential possibility. Voorhees calls Hill a traitor because in deference to the almost unanimous sentiment of his state he refused to support the tariff monstrosity. That refusal is the one act of Hill's Senate that was not tainted with demagoguery. He was sent to the Senate to care for the interests of the state of New York and for once he did it, although he had to oppose his own party to do it. Hill hits the bull's eye when he calls Voorhees a demagogue. He has never been and never will be anything else. If any one doubts this let him read the speech with which Voorhees opened the tariff debate.

One Democratic Congressman has provided himself with shelter from the great political cyclone of next November, and many more of them would like to do the same. The man referred to is Barner Compton, who got into the House in '93, by the skin of his teeth, as the saying goes, from the Fifth Maryland District, and who was several days ago nominated by Mr. Cleveland to be Collector of the port of Baltimore. He knew he couldn't be re-elected so he utilized his "pull" to grab a nice fat federal office which he could keep until after the inauguration of a Republican President in 1897.

It is charged here that Mr. Cleveland was not only cognizant of the corrupt bargain said to have been made by the frightened free-traders with the sugar trust, whereby the trust is to be allowed to fix the sugar schedule of the tariff bill just as it wants in return for helping the free traders to push the bill through the Senate, but that he suggested the making of the bargain.

No Washington jury ever rendered a more popular verdict than that which gave Miss Pollard \$15,000 as damages in the breach of promise of marriage suit she brought against Representative Breckinridge of Ky. It was, taken all in all, perhaps the filthiest case ever tried in the Washington courts, and it was made worse by the black-guard tactics adopted by some of the Kentucky lawyers Breckinridge brought here to defend him. It is not because of any special sympathy the people feel for Miss Pollard that they like the verdict, but because they believe it will result in retiring such a hypocrite as Breckinridge has shown himself to be from the seat of Congress he has disgraced by the double life he led in their midst. If it does not, then the voters in his district must be a queer breed of men. There was

never a doubt of what the verdict would be after Breckinridge's own testimony was heard, and it was not surprising that the jury did not take an hour to decide, although it had taken more than five weeks to hear the case.

Why Wool Dropped.

"When I was in Australia and Thibet a year ago," said Eli Perkins, "I found why the price of wool fell in the United States in spite of the McKinley tariff of ten cents a pound."

"What caused this?" was asked.

"It was the wonderful increase of sheep in Australia."

"What caused this increase?"

"A mania struck England to raise sheep in Australia. Thousands of young Englishmen went there and established sheep ranches. It was the fad. Englishmen were crazy to put their money into sheep ranches in Australia. The climate is mild there and sheep thrive. The lambs all lived. Shepherds could be had for \$5 a week and rations. When I was there Australia already had 70,000,000 sheep and a population of only 4,000,000 people."

"And how many sheep were there in the United States?"

"We had only 45,000,000 sheep and 65,000,000 people. This made too many sheep and too much wool for the world's market. The result was wool went down in Thibet, India, Ceylon and finally all over the world."

"What was wool worth then?"

"Why, cargoes were shipped from Australia and Thibet for from 7 to 13 cents a pound. As soon as they paid the 10 cents duty to get it into the United States these foreign wools were worth from 17 to 23 cents—the price of our wool."

"Then our wool was 10 cents a pound higher than Thibet wool?"

"Certainly, the wool fell in value in the United States on account of the immense crop of wool made on cheap public lands in Australia, but our wool has always been 10 cents a pound higher than foreign wool. The McKinley bill has benefited our farmers. When the Wilson bill takes off this duty you will see our wool will be only worth as much as cheap Australian wool, with the freight added. When Mr. Wilson talks about free wool increasing the price of wool in America he is talking foolishness. Wilson says 'free wool will enable our manufacturers to send cloth to Europe.'"

"Will it do this?"

"No; we will never ship one yard of cloth or one knit shirt, or one yard of carpet to Europe till we have their low wages—yes, less than their low wages—because we will have to pay the freight. A child can see that. The American farmer sees the awful drop of wool since the Wilson bill came out, and he will soon have an object lesson by seeing his wool worth just 10 cents a pound less than his had been."

Altamont.

The weather here the past few days has been extremely rough, and one of the heaviest sleets known for years, which has done great damage to the fruit trees, breaking many of them to the ground; also several telegraph poles were broken down and caused wires to be in bad shape for several days, but this morning it looks as if spring had come at last and the farmers are now feeling in much better spirits and are making great preparation for their spring work.

Grand Pap Casseday is working for the Rev. H. Friend.

The young folks here are having an interesting singing school at Wilson church every Sunday night. Miss Healy, from near Swanton, Miss Rosa and her friend, accompanied by our clever track foreman, Mr. Thos. McHugh, spent Sunday at Mr. Griffin's, Deer Park.

J. H. Wheeler has been very much indisposed the past few days, but I am glad to note he is much improved at this writing.

Mr. Robert Cole, of Piedmont, who has a store here, appears to be doing a good business, with Mr. Mike Felky as manager and J. H. Ronnett, formerly of Oakland, as clerk. We wish these clever gentlemen success.

Mr. Charley Smith made a flying trip to Bloomington last week.

Several of our boys here assisted Bloomington lodge at Swanton in organizing a lodge of Junior Order Thursday night. I am informed 36 were initiated.

Mr. Charles Wilson and wife were guests at Mrs. Bishop's Sunday.

Mr. Wm. Bishop, our handsome lightning slinger at this place, slung himself clear out in the country on Sunday, but came back Monday and reports every thing lovely and that all he could see was Albright.

Mr. Albert Lee is now teaching a very successful subscription school at this place.

Mr. Ed Wheeler, of Piedmont, spent Sunday with his father-in-law Mr. John Rowan.

The Hon. Robert H. Brooks, of Brooklyn, N. Y., spent last week in

this town shaking hands and telling some good old city stories to his old friends.

Mr. A. Rexrode has turned his interests at Mr. Beckman's over to Mr. Henry Smith.

Mr. Charles Ott, who used to be operator at this place, spent Sunday here with the boys.

Wonder what is the trouble with Jeffers, as he never goes away from town any more.

We are at a loss to know what has become of Winfred, as we never hear from her any more. We can conceive no idea unless she has gone to join Coxy.

SELDOM SEEN.

CAUTION.—If a dealer offers W. L. Douglas shoes at a reduced price, or says he has them without name stamped on bottom, put him down as a fraud.

\$3 SHOE THE WORLD.
W. L. Douglas shoes are stylish, easy fitting, and give better satisfaction at the price advertised than any other make. Try one pair and be convinced. The stamping of W. L. Douglas name and price on the bottom, which guarantees the value, saves thousands of dollars annually to those who wear them. Dealers who push the sale of W. L. Douglas shoes gain customers, which helps to increase the sales in their district of goods. They can afford to sell at a low price, and we believe we can save money by buying direct from the manufacturer.

W. L. Douglas, 233 Broadway, New York City.
D. E. Ott, Oakland, and Wm. Ryland, Friendsville.

HECH & BROMGOLD'S
SAW MILL AND ENGINES
A wonderful improvement in Friction Feeds and Gigs, back motion of carriage three times that of any other in the market. Friction Church Feeds, cutting all the feed going to stand with little loss of power and saving in power and wear. Also Friction Feeds, Corn Planters, Shellers, etc. Mention this paper.

Annual Levy for Garrett County,
Maryland, levied on the 16th day
of April, 1894, by the Board of
County Commissioners for Gar-
rett County, Maryland.

The Clothing Department.

It will be a revelation to you. Men's and boys' suits for less than cost. Drop in and see. It will pay you to look through the stock at learn prices in

The Notion Department,

where thousands of useful articles at first cost may be found. The stock must move at once as the time is coming to put in the new stock. The reduction in the price of Dress Goods will be startling. You will be enabled to secure Fine Woolen Fabrics at the usual price of Cotton and Worsteds—almost as low as calicos.

Auction Every Saturday Until Stock is Reduced.

The auction sales will be under the management of Mr. John Shaeffer, who is now in the east looking up bargains and will return with fine line of Silks, the Latest Novelties, Carpets, Mattings and Oilcloths.

WE ARE SELLING GOODS AT COST NOW.

Our first auction will be held on Saturday, March 24, beginning at o'clock a. m., to which all are cordially invited.

Very respectfully yours,

SINCELL BROS.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and a horizontal crease near the top edge. A dark, irregular stain is visible along the bottom edge, possibly from a binding or another page. The overall tone is a warm, off-white or light beige.

ONLY A MEMORY.

Was it a dream? I saw once more my boyhood's dear old home,
The rose-embowered cot where I was born,
The woodland paths where my lithe feet
Would often roam.
As happy as the birds that sing at morn,
I saw the tender orchards and the meadows
Kissed with dew,
The skies that never with clouds were over-
cast.
But oh, the blissful picture soon had faded
From my view.
'Twas only a sweet memory of the past.
Again I saw the grindstone that I often had
to turn.
Until I sadly longed to run away,
And too, the cellar where I had to churn
and churn and churn,
And sprout potatoes every rainy day.
There were the fields wherein I used to hoe
the beans and corn,
Where crops were slow and weeds grew very
fast.
And when I often sighed and wished I never
had been born—
'Twas only a sweet memory of the past.
The neighbor's watermelon patch from which I
used to steal.
The biggest melon I had strength to pack;
The church where every Sunday with a stone-
bruisse on my heel
I'd have to limp to services and back.
The beach tree where my sire oftentimes
would cut a switch.
And lay it on my jacket thick and fast.
Or else he'd take his slipper and give it to
me—
'Twas only a sweet memory of the past.
Let sad-eyed, sorry pools rant about the
charm of youth.
I'm glad that with its trials I am through.
They have forgotten all about its thorny side,
In truth.
'Tis distance lends enchantment to the view.
Away with childish pleasures, give me deeper
joy or woe.
With foolish dreamers I would not be
classed.
The youthful vision fades: ah! it tickles me
to know
'Twas only a sweet memory of the past.
—Nixon Waterman, in Chicago Journal.

THEIR PRIVATE LIFE.
JACK ENGLISH, a ticket agent, baggage master and telegraph operator at the little station called Ranchman's Center. It was a new place, a new man, out on the prairie, half a mile from the nearest human habitation, but being situated in the midst of a wide belt of excellent grazing country, it was regarded as a good shipping point. It already did more business than boasted of several hundred inhabitants. There were two freight trains a day each way, the through and local, the latter of which carried passengers, having a coach attached to the rear for that purpose. Then there were the accommodations going in opposite directions and the daily express and mail east and west, which passed through the lonely place between the hours of ten and twelve at night.
Hence Jack had all the after part of the night at his own disposal and as soon as the last train—the east-bound—express—passed he looked up the station and crossed the prairie to the little cottage, half a mile away, where his mother and sister Lizzie kept a pleasant home for him. They had their cow, their garden and their "truck patch" to look after, and the product of these, in addition to the twelve dollars a month pension, which the mother, a soldier's widow, received, enabled them to live quite comfortably.
Lizzie was a bright, active girl of fourteen, always busy with her work or book, but with all her intelligence and industry she was an inveterate coward. She was afraid of everything, and often made herself miserable by imagining danger when none existed. But she was ambitious, nevertheless, and wanted to learn everything Jack undertook.
Hence when he took charge of the little office down at the crossing she announced her determination of studying telegraphy. Jack assured her the art was as full of electricity as a thunderstorm, of which she stood in mortal dread, but she persevered in her effort notwithstanding, and in a few weeks could manipulate the instrument so as to receive and send messages as correctly if not quite as speedily as her teacher.
Pleased with her progress, the brother secured two second-hand instruments and a coil of wire and put up a line from the house to the station, so that she might have practice without having to walk to the office during the cold weather.
Under Jack's directions the cowboys put it up, and though it was not stretched so well as it might have been and the poles were only fence posts spliced together, it worked as perfectly as the main line. Fearing that the officious line man might object to the instrument on his end of the line being in the office, Jack set it up on one side of the big, empty freight room, and here, when the weather was not too cold, he spent many a half hour in conversing in telegraphic language with the little sister at home.
One night about the middle of February there was a terrific thunder and windstorm with a blinding fall of rain and hail, a very unusual thing at that season of the year. It came up suddenly about eleven o'clock, after the west-bound train had passed and an hour before the eastern one was due. Jack had been lying dozing on the cot in his office, but at the sound of the thunder he got up to look out.

The rain was beginning to fall then, and the wind shook the light frame building in such a fierce way as to cause him to shiver. While he stood by the window, watching the threatening clouds, a vivid flash of lightning revealed for an instant a troop of horsemen galloping across the prairie in the direction of the station.

Thinking they were belated cowboys caught in the unexpected storm, he paid no further attention to them, but after another look at the approaching cloud went back to the stove, where a still an hour till train time he took up a book, turned the night-lamp higher, and lazily stretched himself on the cot to read.

He had read only a few pages when above the roar of the thunder and the beating of the rain and hail against the window he heard the clatter of horses' feet. A moment later heavy footsteps on the platform outside reached his ear, and before he had time to conjecture what the unusual disturbance at that hour of the night meant, there came a loud knocking at the outer door.

Thinking they were people from a distance to wait for the train, he inquired, more from habit than suspicion: "Who is there?"

"Passengers to take the midnight train," was the quick answer. "We're wet to the skin and half-frozen. Let us in without delay," and the impatient moving of feet outside confirmed the statement.

Without a moment's hesitation Jack drew back the heavy bolt and threw the door open, when in crowded half a dozen rough-looking men muffled in the cars in furs and woolen comforters.

Not liking their appearance, the young telegrapher was about to reenter his office so as to put a lock between himself and them, but before he had succeeded in carrying out the thought suggested he was seized by one of the stalwarts and hurled unceremoniously to the floor. Then while two of the number held him down the others busied themselves in binding his hands and feet.

Thinking they had come for the purpose of tapping the safe, Jack felt relieved that there was only one dollar and a few cents there. Sometimes he had considerable money in charge, and only that day he had delivered a package of gold to a ranchman, but now he wondered how the robbers would feel when they learned how much they had risked for one dollar and six cents. He supposed, of course, that they would go through his pockets in search of the key of the safe, but they didn't; instead, they carried him into the freight room and laid him down against the side of the building, with the injunction to "keep mum, if he valued his bacon."

For awhile after they had disposed of him all was still in the waiting-room, then he heard them moving about cautiously, he thought.

Notwithstanding the predicament he was in himself he smiled grimly at thoughts of their chagrin when the contents of the safe should be revealed to them. "Why, it won't pay for the powder it will take to blow it open," he muttered, under his breath.

His soliloquy was interrupted by one of the men opening the door and inquiring: "Say, youngster, is there anything we've got to do to that train to get it to stop?"

"Hang the lantern out, of course, you must," replied one of his rough companions. "I've been around railroads enough in my time to find out a thing or two." Then, pushing past the first speaker, he held the light above his head and demanded of Jack: "Is the train on time, sonny?"

"It was at ten o'clock," answered Jack, and then, with a wild hope in his heart, he added: "Let me loose and I'll find out."

"Not much, my hearty," responded the rough, in a grating voice. "Let you at that infernal instrument and you'll send the train through like lightning and so cheat us out of that pile of gold we're after. No, sir; we're not the green gamins you take us for, that's sure."

Jack shuddered as the door closed behind the bold speaker.

He understood now why they had not asked him for the key of the safe. It was not the paltry sum that might be found in a little country depot they were after. They intended to rob the train, and since the rogue had made known his business it occurred to him

The next move was to take off his shoes so as to make no noise in moving around. Still, with his freedom regained he was unable to accomplish anything, for the outside door was locked and the key was on a ring with other keys hanging on a nail in the office.

He began feeling about to find out if there would be any chance of raising the window, when he almost stumbled over the small table where his little old-fashioned instrument sat. He tried the circuit and finding it complete determined, in spite of Lizzie's known cowardice, to ask her help.

She was a sound sleeper, but his hope was that she might have been waked by the storm and so be made available as an assistant. His conjecture was correct and almost immediately the circuit was opened and the response came.

Then as rapidly as possible he made known the situation at the station and asked if she would go down to get a quarter of a mile distant, and sign the train. The reply was in the affirmative, and there was no indecision in it either.

Then he flashed back:

"Put a piece of thin, red flannel around the lantern, go down to the deep cut and swing your red light around the track as soon as the train rounds the curve. Keep it up until you are sure it has been seen, and when the train stops go to the conductor with the news I have told you. Be as quick as possible, for it is almost train time, and if you're not too late there will be bloodshed."

"All right," returned Lizzie. "I'll be off inside of three minutes," and, coward though she was, she kept her promise. It was very dark, still raining hard when she slipped quietly out of the back door of the cottage, not wishing to disturb her mother, who was just recovering from an attack of fever. It was still thundering in the distance, and every flash of lightning made her shiver and cover as if wounded by the glaring sheet of fire. But in spite of her terror she did not slacken her speed and reached the deep cut just as the headlights of the approaching train began to glimmer around the curve beyond.

Faithfully she delivered the message committed to her and then fell fainting at the conductor's feet. As soon as she revived a little she got her into the care of several of the passengers, and a few minutes later the train was again in motion, ready for the anticipated attack.

As soon as Jack was sure that Lizzie would carry out his instructions he wrapped the cord loosely around his hands and feet and lay down in his old position, not wishing to excite suspicion in the breasts of the robbers should they take it into their heads to

pay him another visit before the arrival of the train. He knew it must be almost midnight and the movements of the rogues outside convinced him that they were preparing for the work they had come to do.

Through the window he could see that the red lantern had been swung into position, and after a little he heard them pacing restlessly up and down the platform as though growing impatient. The clock in the office had struck twelve at least twenty minutes before a faraway whistle announced the approach of the tardy train. Immediately there was a cessation of the monotonous tread outside, and a few moments later, with a rumble and roar and hissing of the air brakes, the train drew up to the station. The next moment the command of "Hands up!" of several revolvers fired simultaneously, rushed out just in time to see his half-dozen midnight visitors marched into the baggage car at the point of a dozen leveled at their heads.

In the midst of the babel of voices that followed, Jack found out that Lizzie had succeeded in stopping the train and that with the aid of volunteer passengers the train crew had no difficulty in capturing the robbers, who were not prepared for them as they attempted to board the train. Two of them were wounded, and the other four, seeing that it was no use to resist, had quietly surrendered.

Brave Lizzie was given into the care of her brother, and in spite of her protest a purse of fifty dollars, raised by the grateful passengers, was thrust upon her. After the train had started, Jack looked the station secretly and as the two walked home together they agreed to say nothing about their experience to their mother until she was well and strong again. Consequently the first intimation she had of the danger they had braved came a week later in the form of a check for two hundred dollars from the railroad company—payable to Jack and Lizzie Taylor—for the use of their private line in capturing the robbers.—Chicago News.

—Helen—Yes, I overheard Tom telling Charlie that you danced like an angel. "Do you think he was in earnest?" "Yes, for he said there was nothing that would tempt him to dance with you again."—Inter Ocean.

SCIENCE AND INDUSTRY.

—When sugar is added to water the mixture does not freeze at several degrees below freezing point. This enables bicyclists to continue at work when ordinary mortar would congeal.

—The latest fad in the treatment of smallpox is to shut up the patients in a room from which ultra violet rays are excluded by red window panes or red shades. All the patients thus treated in the Hergen hospital, Norway, recovered soon and with few scars.

—Kitsato, Koch's able Japanese pupil, who has gone back home on a mug allowance from his government of \$45,000 to get started and \$15,000 a year afterwards, is reported to be almost successful in curing tuberculosis modified by his method.—Medical and Surgical Reporter.

—The depth to which the sun's rays penetrate water has been recently determined by the aid of photography. It has been found that at a depth of 55 feet the darkness was to all intents and purposes the same as that on a clear but moonless night. Sensitized plates exposed at this depth for a considerable length of time gave no evidence of light action.

—Dr. Zergler, a German scientist, thinks that it may be possible to forecast the weather by taking photographs of the sun's disk. He says that "circular or elliptical halos round the orb of day indicate violent storms, especially if the halos are dark in tint or of a large diameter. Lightning and magnetic disturbances may also be expected from these signs."

—Snow weighed at Washington at different times in 1887-8-9 weighed from five and one-half to ten and three-quarters pound per cubic foot. In Canada it weighed from fourteen to twenty-one pounds per cubic foot. In twenty-four hours after falling, temperature 50 degrees F., twenty-eight pounds ten ounces; twenty-two hours after falling, temperature 30 degrees F.

—The importance of bathing is an acknowledged fact, but the when and how are not so well understood. M. Werthimer, of Paris, has been making experiments, and gives the result to the public. He shows that a sensation of cold on the skin acts on the circulation of the lower part of the trunk, that is, it is a very serious condition. Banks—"What was it?" Rivers—"He said he would see me hanged first."—Brooklyn Life.

—Brother Foster, remarked Walker to his friend, the other tramp, "what do you most admire in man?" Mr. Foster laid his hand impressively across his diaphragm. "Good victuals, Brother Walker," he replied, "and plenty of them, washed down with a sufficiency of some invigorating liquid."—Detroit Free Press.

—No Danger of Making a Mistake.—Foreman—"I need about three lines to fill out the literary column." Night Editor—"The literary editor has gone home." "I know it, but I've got to have those three lines, can't you clip something from an exchange?" "No time for that, and it isn't in my line. Let me see. You won't make any mistake if you run this in: 'Another absorbing novel from the pen of J. Marion Crawford is in preparation and will be issued in a few weeks.'"—Chicago Tribune.

UNCLE SAM'S MAIL.

The Little Stamp That Carries Your Letter to Its Destination.

There was a big fire uptown a week or two ago, and there were a lot of engines and hose carts, hook and ladder and patrol wagons—all the usual crowd of vehicles that a fire brings out; and, of course, a lot of persons to look on. The fire lines were promptly laid out, and policemen and firemen were stationed all about to keep the crowds in place. All wagons and carriages were turned aside, and made to go a block or two either side. Suddenly a horse dashed right up into the crowd, which fell away at each side; the policemen looked, and when they saw what sort of a wagon the horse was drawing they called out: "Room, room, make way there!" and let the driver go right on through the fire lines, passing the burning building and rapidly on its way. At first persons watching thought it was an ambulance, but it wasn't; it was a big, blue, covered, box-like looking wagon, and the reason it could go unhindered was that the fire lines were because it had on one side the letters "U. S. Mail."

It seems a simple thing to put a postage stamp on a letter, but in reality it is a wonderful thing. Aladdin, when he rubbed the lamp in the Arabian Nights story that you have all read, called up powerful slaves, who flew to do his bidding. And to stamp a letter with the little bit of painted and gummed paper that the post offices sell for the purpose is to ask the aid of a powerful government, that stops at nothing, to carry the letter safely and quickly to its destination.

Mail wagons have the right of way over everything else, not excepting fire engines and ambulances. Mail trains and mail steamers must not be hindered in their progress in any conceivable way. Night and day, without let or hindrance, your letter must be rushed on to the address it bears.

A stamped letter is a sacred thing in the eyes of the United States government. No one is permitted by law to open it except the person whose name it bears. A man committed suicide not long ago, and on his desk was found a letter addressed to some one away off in Iowa. The stamp was on the letter, and though it had not been opened, the coroner was started, and though the coroner was not anxious to open it, for he felt sure it would throw some light on the man's death, he could not do it. The man's death, pinkish, oblong bit of paper, with the head of Washington engraved upon it, that was gummed up in one corner, was as good as a body of armed soldiers to protect the dead man's wishes.

And every little innocent stamp that is used does the same watchdog service.—N. Y. Times.

PUNGENT PARAGRAPHS.

—Professor—"Why does the earth move?" Hardup (absently)—"Can't pay the rent, I suppose."—Tit-Bits.

—"Er—has young Hifi come into his money yet?" "Come into it? Great Scott, man! He's gone clear through it."—Buffalo Courier.

—"I've never had the courage to get married." "Havent, eh? What's your business?" "O, I'm only a lion tamer."—Philadelphia Record.

—"I would like to have the heroine in my book quite unlike the usual ones. What would you suggest?" "Why not make her interesting and sensible?"—Inter Ocean.

—"Teacher—"Now, remember that in order to become a proficient vocalist you must have patience." Miss Flippkins—"Yes, and so must the neighbors."—Washington Star.

—"Tom—"The management seems to have spared no expense in the production of this play." Kitty—"No, indeed; they have given every chorus girl at least three coats of paint."—Brooklyn Life.

—"My daughter, that idle spendthrift will not make a good husband for you." "Not a good husband! Why, papa, he is the handsomest man I ever danced with."—Munsey's Magazine.

—"What song is now most popular?" Asked St. from way down east. Straightaway his city friend replied: "The one that's sung the least."—Boston Courier.

—"Dr. Schweitzer—"Playing chess is like making love—the knight tries to take the queen; you are mated by the bishop; then off to the castle—in the air—and, alas! everything is in pawn."—Halo.

—"I wonder why that Mrs. Elderbody should marry that man. He is ever so much younger than she." "That's right. A great advantage to a woman to have youth on her side."—Boston Transcript.

—"Edith—"Well, I guess this cook don't know much about cake, does she?" "Mamma—"Why?" "Eddie—"Well, I've looked and looked through this piece of sponge cake and there isn't a scrap of sponge in it."—Inter Ocean.

—"Banks—"What did her father say when you told him that you wanted to marry his daughter?" Rivers—"Well, he didn't absolutely refuse, but he imposed a very serious condition." Banks—"What was it?" Rivers—"He said he would see me hanged first."—Brooklyn Life.

—"Brother Foster," remarked Walker to his friend, the other tramp, "what do you most admire in man?" Mr. Foster laid his hand impressively across his diaphragm. "Good victuals, Brother Walker," he replied, "and plenty of them, washed down with a sufficiency of some invigorating liquid."—Detroit Free Press.

At Death's Door

Blood Poisoned After Typhoid Fever

A Marvelous Cure by Hood's After All Else Failed.

"Twenty-five years ago I had a bilious fever, and later it turned into typhoid fever, and for five weeks I lay like one dead, but at last I pulled through and got up around. I soon discovered on my left leg just above the knee a small brown spot about as big as a three-cent piece. I did not pay any attention to it until two years after, when it commenced to spread and have the appearance of a ring worm. It itched and burned and I commenced doctoring, but to no avail. Last February I tried an herb for the blood and it broke out in the worst form of a rash all over my body. Finally my husband bought a bottle of Hood's Sarsaparilla and I had not taken more than half of it before I began to feel better. I have had four bottles

OUR WASHINGTON LETTER.
(From Our Regular Correspondent.)
WASHINGTON, April 23, 1894.
The free traders in the Senate have become so discouraged because of the revolt in their own party, the broadsides poured into them by the Republicans during the general debate on the tariff bill, which is to close to-morrow, and the unmistakable trend of public sentiment against the present bill, that they have opened negotiations with the recalcitrant Democratic Senators which, it is believed, will end in their complete and abject surrender. Republicans have not, of course, been made acquainted with the exact nature of these negotiations, but enough has leaked out to cause many to believe that the income tax is to be dropped and the present tariff bill practically abandoned—something like the old Mills bill being substituted therefor.

The impression left by the representatives of the National Workingmen's Protective Tariff League—more than one thousand in number—who met in convention here Saturday, has been decidedly good. The Democrats of the Senate Finance Committee refused to hear their personal protests against the tariff bill, but they were compelled to hear them read on the floor of the Senate by Senator Quay, and the members of the League occupied the galleries of the Senate as pleased listeners. These men and women did not come here to attempt to coerce Congress by threatening to remain in Washington until some absurd demands were complied with, as Coxey's army proposes to do, but merely in the exercise of their rights as American citizens to protest against being deprived of their bread and butter by vicious legislation; and having filed their protest they quietly returned to their homes. They neither walked nor came on free railroad transportation, but on tickets purchased with the money of the laborers they came to represent. Nor did they ask donations of food; they paid for everything they got, as self-respecting people usually do. Washington people will be glad to see them again under happier circumstances.

These are times when nothing but plain talk will fill the bill, and Senator Hawley thought one of these times was at hand when he replied to the extraordinary speech of Senator Allen, of Nebraska, in favor of the Peffer resolution, which provides for the formation of a new Senate committee to hear the petitions of Coxey's army and similar organizations. Senator Hawley paid particular attention to Mr. Allen's denunciation of the laws which prohibit parades in Washington without permission of the authorities, and the marching of any organized body of men across any portion of the Capitol grounds, laws which Mr. Hawley declared to be right and proper and said would be enforced to the letter. But the most striking part of Mr. Hawley's speech was the conclusion in these words, calmly and deliberately uttered: "I am sorry to say, but I feel bound to say, that the speech of the Senator from Nebraska was one that would have been received with tumultuous applause in a meeting of anarchists. It had in it, not requiring a microscope, but visible to the naked eye, the bacteria and nuclei of anarchy." Rough, but deserved.

The Populists in Congress, while pretending to be opposed to the absurd id— which is causing so many ill-advised men to move toward Washington—are in reality doing everything in their power to encourage the movement. Representative Boon, of Minnesota, has introduced a resolution in the House directing the Secretary of War to furnish camping grounds and tents for all organized bodies of "laboring people" who may come to Washington to obtain "redress from Congress." The adoption of a resolution like that would invite every tramp in the country to spend the summer encamped in the suburbs of Washington, and that the result of bringing such an enormous body of men together, whose respect for law and order are not their most striking traits, would be no man can tell. But there isn't even a possibility that Mr. Boon's resolution will get even a score of votes in the House, if it ever comes to a vote at all. Those who are coming to Washington expecting to be taken care of by Congress would better turn back.

The Democrats of the House profess to be greatly surprised because the Republicans are making appropriation bills the basis for showing up the absurd blunders of this blundering administration, and they are actually talking of having the committee on rules bring in a rule with each appropriation bill to limit debate thereon. It is not surprising that the Democrats should object to having their unfitness to be in charge of the government continually referred to, but it would certainly be surprising if the Republicans of the House neglected any opportunity for keeping that fact before the country.

THE BOUNDARY.

The Story of the Great Boundary dispute Continued.

T. Jay in Cumberland News.

OAKLAND, Md., April 23, 1894.

MARYLAND ACT OF 1818.

In 1818 the General Assembly of Maryland passed an act (chapter 206 acts of 1818) proposing to Virginia the appointment of commissioners to settle the western boundary of said State and agreeing to adopt the most western source of the North Branch of the Potomac as the point from which the western boundary should start.

VIRGINIA ACT 1822.

On the 28th of February, 1822, the Legislature passed an act (chap. 14, acts 1822) which provides that the Governor is hereby authorized to appoint three commissioners on the part of the State to meet such commissioners as may be appointed for the same purpose by the Commonwealth of Maryland to settle and adjust by mutual compact between the two governments the western limits of this State and the dividing line between this State and the Commonwealth of Maryland, to commence at the Fairfax stone on the head waters of the north branch of the Potomac river, and to run a due north course to intersect the line between this State and the State of Pennsylvania. Said commissioners were required to report their proceedings to the General Assembly for confirmation, rejection, etc.

Under the resolutions, commissioners were appointed both by Maryland and Virginia, and they went to the Fairfax stone in 1824. The Maryland commissioners refused to begin at the Fairfax stone because they claimed that it was not at the most western source of the North Branch of the Potomac river. They claimed that the most western source was a point about one mile west of the Fairfax stone, and the difference between the two places of beginning embraced a section of country about one mile in width and thirty-six miles in length.

The Virginia act required her commissioners to begin at the Fairfax stone. The difference between the two commissioners put an end to any further negotiations, and consequently nothing was done.

REPORT OF MARYLAND COMMITTEE, 1833.

In 1835 the Maryland Legislature passed another resolution for the appointment of commissioners, and the governor of Delaware should act as umpire in case of disagreement, and in 1837 a committee of the Legislature of that State made an elaborate report to the Legislature on the question of the boundary line of the State, in which purports to be a history of the matter as given, and the various acts and resolutions of the Legislature of the two States above mentioned are referred to.

In speaking of the passage of the resolution of 1818, above mentioned, the committee says:

"The State had now become wearied with her efforts to reclaim the territory south of the North Branch and hence this act of 1818, chapter 206, in proposing to Virginia the appointment of commissioners, agrees to adopt the most western source of the North Branch at the point from which the western boundary shall start, and the report closes with a recommendation of certain resolutions providing for appointment of commissioners and that the governor of Delaware should act as umpire."

This report and the accompanying resolutions were transmitted to the governor of Virginia in June 1832, and are found in the journal and documents of the House of Delegates of Virginia of 1832-33.

APPOINTMENT OF C. J. FAULKNER.

On the 20th of March, 1832, the Legislature of Virginia passed an act (acts 1832, page 308), directing the governor to procure an authenticated copy of the record of a decision made some time anterior to the revolution, before George II, in a case brought before his majesty in council by the late proprietor of the Northern Neck of Virginia, and the late proprietor of the Western Domain of Maryland in a controversy and dispute touching the limits and boundaries of the several letters patent granted by Charles II and James II, for lands lying on both sides of the river Quirion or Potomac, etc.

Under this act of the governor of Virginia appointed the late Charles J. Faulkner, and he collected a large amount of valuable historical information and a large number of important documents relating to the western boundary matter, and in November, 1832, made an able and exhaustive report to the governor on the subject, and returned with his report the evidence and documents collected by him. This report was published in full in Kercheval's History of the Valley of Virginia, chapter 13, and in Lewis' History of West Virginia, chapter 17. But the documents returned by him were not published and have

been lost.

ACT OF VIRGINIA OF 1833.

In 1833 the legislature of Virginia passed an act (acts 1833, page 24) similar to the above recited act of 1822 except that it provided for the boundary line "to commence at the Fairfax stone or at the first fountain of the Cohungoruton or North Branch of the Potomac river, and to run a due north course," etc., and also that if Maryland failed to appoint commissioners, then the Virginia commissioners should run the mark and line, etc., etc.

CAUTION.—If a dealer offers W. L. Douglas shoes at a reduced price, or says he has them without name stamped on bottom, put him down as a fraud.

W. L. DOUGLAS
\$3.00 SHOE
BEST IN THE WORLD
W. L. DOUGLAS Shoes are stylish, easy fitting, and give better satisfaction at the price than any other make. For the pair and convinced. The stamping of W. L. Douglas's name and price on the bottom, which guarantees their value, saves thousands of dollars annually to those who wear them. Dealers who push the sale of W. L. Douglas Shoes gain customers, which helps to increase the sale of their full line of goods. They can afford to sell at this price, and yet believe you can have money by buying your footwear of the dealer who sells the "Gentlemen's" shoes.

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD., THURSDAY, MAY 3, 1894.

NUMBER 8.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Seeds by ounce, pound, pint and peck at H. E. Felt's Grocery.

Begin preparations now for the observance of Decoration Day.

In another column of this paper will be found the financial statement of the town.

The new Town Council will assume control of the city government on next Monday.

Dr. Thomas H. Koon, of South Carolina, has located at Eggon, for the practice of medicine.

Justice A. B. Gouder has removed his office from the Mayers building to the Felt building on Alder street.

Mr. Frank Rathbun, an employe of this office, who had an attack of quinsy, has recovered and is again at his case.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Miss Alice Murphy, lately of Baltimore, will start a millinery store at Deer Park about April 21, 1894. A share of the public patronage is solicited.

Communications from Elder and New Germany were received this morning too late for publication this week. They will appear in our next issue.

The young ladies of St. Mark's church entertained an immense throng of people on last Sunday evening by the rendition of the "Ten Virgins."

Rev. Ernest R. McCauley, of Gettysburg, Pa., will preach in St. Mark's church, Oakland, on Sunday morning, the 13th inst. The public cordially invited.

The members of the Lutheran Sunday school have purchased from Prof. S. C. Smith a Carpenter chapel organ for use in the Sabbath school room of the church.

A number of Baltimore and Ohio Railroad carpenters are engaged in laying a new sidewalk along Railroad street. It will require three weeks to complete the job.

The coal and coke business is booming at Corinth, West Va., six miles west of Oakland. The strike has not reached this point and orders have doubled within the past week.

Dr. A. S. Arnett, of Aurora, died on Monday night last after an illness of several weeks. He was about forty years of age and leaves a wife and five children to mourn his death.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church.

Dr. W. N. Berkeley, of Drs. McLane & Berkeley, Frostburg, will be at the Commercial hotel, Tuesday, May 8, to treat catarrh and disease of eye, ear and nose. Eyes examined for glasses.

Rev. Dr. Alexander will conduct services in the Garrett Memorial church on Sunday at the usual hours both morning and evening. The evening discourse will be upon "Eli, the High Priest."

A very great improvement has been made in the appearance of the Glades Hotel property by the erection of a neat paling fence along the front of the yard and by the hotel and cottages being painted.

Thornton Wilt, a farmer living near Frankville, fell over an embankment on Tuesday night and dislocated his shoulder. Dr. Z. T. Kalbaugh, of Piedmont, was called and rendered necessary surgical aid. —Piedmont Independent.

"Pietresque America" will be given in Offutt's Hall on Thursday evening, May 10, for the benefit of the Oakland Cornet Band. This will be an opportunity to hear Mr. Rudisill's celebrated lecture. Illustrated by 150 magnificent views.

The ladies of the Garrett Memorial church gave an entertainment in Offutt's Hall on last Thursday night, for the benefit of the church, entitled "The Deestrick Skule." There was a large crowd present and the entertainment was a success both financially and socially.

S. T. Jones, Esq., cashier of the Garrett County Bank, will deliver a lecture before the Epworth League at St. Paul's M. E. church on next Monday evening. The subject will be "Banks; their use and business." The public cordially invited.

Mr. King Delawder, who was appointed a Justice of the Peace for the Seventh district, qualified Tuesday before Clerk Tower and entered upon his duties. His office is in the Mayers' building in the room formerly occupied by Squire Gouder.

Lorenzo and Emily McRobie, of Deer Park, were tried before Justice Gouder Monday on the charge of disturbing a religious meeting. They were found guilty and sentenced to pay a fine of \$1 and costs each, in default of which they were sent to jail.

In default of the payment of \$30 and costs Justice Hoyer sent Richard N. Murphy, of Deer Park, to jail in Oakland until such fine and costs are paid, for an assault on the person of John McRobie, which assault occurred near Deer Park on last Saturday.

A lady of Tooleys, La., was very sick with bilious colic when M. C. Tisler, a prominent merchant of the town gave her a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says she was well in forty minutes after taking the first dose. For sale by Oakland druggists.

Mr. and Mrs. Richard K. Maroney arrived home on last Monday evening from the eastern cities where they had been to spend their honeymoon. A reception was tendered them the same evening by Mr. Maroney's parents at their residence in the East end, at which a number of invited guests were present.

Miss Jennie Smith, the well known railroad evangelist, preached Sunday morning and evening at Kingsley M. E. church, Cumberland, to a large congregation, mostly railroad men and their families. Notices of the service were conspicuously posted around the Queen City Hotel and Baltimore and Ohio shops.

Dr. S. F. Scott, Blue Ridge, Harrison county, Mo., says: "For whooping cough Chamberlain's Cough Remedy is excellent." By using it freely the disease is deprived of all dangerous consequences. There is no danger in giving the Remedy to babies, as it contains nothing injurious. 25 and 50 cent bottles for sale by Oakland druggists.

The following bulletin has been issued along the line of the Baltimore and Ohio railroad: "Conductors and trainmen must not allow tramps and other persons not employed to ride on freight trains." This order, which was issued on last Friday morning, will be rigidly enforced and no exceptions whatever will be made.

Dr. J. Lee McComas was in Baltimore last week attending the annual meeting of Medical and Chiropractic Faculty of Maryland. He was appointed a delegate to the American Medical Association, which meets in Galveston, Texas, and also a delegate to the National Association of Railway Surgeons, which meets in San Francisco, Cal., on June 8th.

Garthright has just received a car load of flour, shorts, corn and oats chop and bran, all of which will be sold cheaper than has been sold in Garrett county for twenty years. The cash or produce will get good bargains. Want one thousand bushels potatoes at fifty cents cash and trade. Barb wire cheaper than was ever sold.

The Democrat especially requested to copy.

The postmastership in Oakland was settled on last Wednesday by the appointment of Dr. Edward H. Bartlett, a life-long Democrat. This appointment was a great surprise to almost every one in the town, especially those who were applicants for the office and had been promised the support of Mr. McKaig. In the appointment of the genial doctor it only widens the breach that has for some time existed in the ranks of the local Democracy, but "it's none of our funeral," so let the war go on. We have no doubt but that the doctor will make an efficient official and will give entire satisfaction. He will assume charge of the office in about two weeks.

HERE AND ELSEWHERE.

Movements of Prominent Persons Known to the Readers of "The Republican."

[Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—EDITOR.]

Mr. Joseph Adair, of Terra Alta, was here Monday.

Mr. D. G. Smith spent Sunday at Terra Alta with relatives.

Mr. A. M. Lee, of near Swanton, was in to see us Friday last.

Mr. Jim Lakin, of Terra Alta, was here Tuesday on business.

Miss Emma Murphy, of Swanton, was here shopping on Saturday.

Mr. Joseph E. Harned spent Sunday in Cumberland with friends.

Rev. H. S. Keller, of Eggon, was in the city Tuesday for a few hours.

Mr. David Guegy, of Eggon, was a pleasant visitor at this office yesterday.

Mr. and Mrs. P. J. Garrett, of Deer Park, were here Monday and Tuesday.

Merchant L. H. Friend, of Swanton, was in Oakland on business Saturday.

Miss Cora Jones and Mrs. W. O. Posten, of Terra Alta, were in Oakland Tuesday.

Mr. J. F. Bartley, of Bayard, W. Va., was in the city on business on last Saturday.

Mr. and Mrs. Edward M. Spedden were at Terra Alta Sunday with relatives.

Mr. W. T. Steyer, of near Gorman, was in the city Monday morning for a few hours.

Miss Fanny Crim, who spent the winter in Washington, has returned to her home in Oakland.

Rev. Wesley Davis, of Pittsburg, who was on a visit here last week to relatives, has returned to his home.

Miss Laura Twigg, of Cumberland, is a guest of the Misses Browning at their residence on Liberty street.

Miss Kate C. Spedden, of Terra Alta, was among relatives and friends in Oakland Saturday and Sunday.

Mr. B. Fraley and son Albert, of Terra Alta, were in Oakland on last Sunday as the guests of Mr. G. A. Fraley.

Mr. Walter Yost, of Baltimore, was the guest of Mrs. Jennie Johnson on Alder street two or three days recently.

Mr. James W. Tasker, of Deer Park, and a veteran of the late war, was in the city on Saturday and called on us.

Mrs. J. Lee McComas, who has been on a visit to relatives in Baltimore, returned to Oakland on last Saturday evening.

Dr. L. S. Brook, of Morgantown, was here Sunday on his way home from Aurora where he had been on professional business.

Mrs. Eli Williams and daughter, who spent a number of weeks with relatives and friends in Frostburg, have returned to Oakland.

Mrs. James O. Cleveland, who has been quite ill for the past three weeks with an attack of heart and lung trouble, is improving.

Mr. Howard Nethkin, of Deer Park, was here on Saturday. He expects to attend school at Mt. Union, Ohio, this summer.

Fish Commissioner Browning, who spent several days at Deep Creek since our last issue, returned to Oakland on Monday evening.

Mr. A. C. Browning, who recently removed from Deer Park to a farm near Cranesville, was a pleasant visitor at this office on last Friday.

Mr. and Mrs. E. O. Ridenour, of Aurora, were on a visit to Mr. and Mrs. Geo. L. Bosley and other relatives in Oakland Saturday and Sunday last.

Major George D. DeShields, of Cumberland, and Capt. G. W. Hoover, of Grafton, two of the B. & O. hotel superintendents, were in Oakland Tuesday.

Miss Mary Smith, of Hazleton, West Va., was here on last Saturday visiting her brother, Mr. D. G.

Smith. She was accompanied by Miss Nora Kelley.

Mr. Caryl Cuppett, of the firm of Cuppett Bros. merchants of McHenry, was in the city a few hours Tuesday and made this office a very pleasant call.

Messrs. J. Shapiro & Bro. have removed their store from the old Republican building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at their own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

King Solomon was alive he would say: "Go to the traveling man, learn his ways, and be wise." Mr. C. W. Battell, a Cincinnati traveling man representing the Queen City Printing Ink Co., after suffering intensely for two or three days with lameness of the shoulder, resulting from rheumatism, completely cured it with two applications of Chamberlain's Pain Balm. This remedy is gaining a wide reputation for its prompt cures of rheumatism, lame back, sprains, swellings and lameness. 50 cent bottles are for sale by Oakland druggists.

This morning Mr. Asa Willison, deputy collector of internal revenue for this section of the State, accompanied by his son, Mr. J. N. Willison, left for Grantsville, Garrett county, where he will make his headquarters for the next two weeks while engaged in taking up the maple sugar crop in that county. Mr. Willison drove over land and will be kept very busy in this work. The maple sugar bounty in that county amounts to a considerable sum of money, and great care is required in making up the reports and issuing the receipts.—Cumberland Times, Monday.

There are to be no more dropped letters into mail cars. The Postmaster General has issued an order that hereafter mail will not be taken on the railroad mail cars unless it first passes through the postoffice. The order was made necessary because many business men in the neighborhood of railroad depots in all localities mailed their letters on the train to save them a trip to the postoffice and it made a large amount of extra work for the railway mail clerks. Time was taken up that was needed in sorting out mail between stations.

Hon. Jere Wilson, of Washington, D. C., spent Wednesday of last week in Oakland. Judge Wilson has been very prominent for some time as chief counsel for the plaintiff in the Pollard-Breckinridge suit. He has been engaged in many important cases in Washington. He was one of the lawyers engaged in the celebrated "star route" case which occupied the court six months and a half in the trial of it. The judge is very enthusiastic in praise of Hon. Richard H. Alvey, formerly chief justice of the Maryland Court of Appeals, but now chief judge of the Court of Appeals of the District.

Persons who sympathize with the afflicted will rejoice with D. E. Carr of 1235 Harrison street, Kansas City. He is an old sufferer from inflammatory rheumatism, but has not heretofore been troubled in this climate. Last winter he went up into Wisconsin and in consequence had another attack. "It came upon me again very acute and severe," he said. "My joints swelled and became inflamed; sore to touch or almost to look at. Upon the urgent request of my mother-in-law I tried Chamberlain's Pain Balm to reduce the swelling and ease the pain, and to my agreeable surprise it did both. I have used three fifty cent bottles and believe it to be the finest thing for rheumatism, pains and swellings extant." For sale by Oakland druggists.

It may do as much for you. Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure of all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores.

Notice to the Public. All persons knowing themselves indebted to Henry J. Mayers will please call at the drug store and settle at their earliest convenience. 2-4 HENRY J. MAYERS.

Bishop-Albright Nuptials.

Perhaps the most enjoyable occasion that has been witnessed for a long time in the vicinity of Cranesville was the wedding of Mr. Wm. Bishop, of Altamont, to Miss Ida Albright, of Cranesville, which took place at the handsome residence of Mr. Edward Albright on Sunday. Those present were Messrs. B. F. Browning, O. F. Feather, D. C. Feather, S. A. Dunham, Alvin Friend, J. E. Otto, George Falkenstein, C. W. Cramer and D. W. Frazee, of this place; Walter Hauger, of Terra Alta; Frank Stuck, of Newburg; Elmer McClain, of Grafton, and Misses Jane Otto, Grace Thomas, Georgia Albright, Vernie Smith, Lydia Cramer and two handsome and amiable sisters of the groom. Rev. Harkness, of Terra Alta, performed the ceremony, after which the many friends gathered the happy pair as man and wife and then retired to the dining room and found the nuptial feast one that is seldom if ever surpassed in grandeur and deliciousness. The parlor was decorated with various kinds of evergreen which added much to its grand appearance.

The bride and groom were appropriately attired for the occasion and presented fine appearances.

Among the many presents received by the bride was a check for one thousand dollars presented by her father.

The happy couple took leave during the evening for Terra Alta where they took a train for the eastern cities.

We are sorry to lose Mrs. Bishop from our social circle, yet we trust that our loss will be some other gain. We wish that their journey through life may be as pleasant as their wedding day. A FRIEND.

A New Ordinance. At a meeting of the Town Council on last Saturday evening the following new ordinance was adopted with but one dissenting voice:

"Be it ordained, by the Mayor and Town Council of Oakland, That it shall be unlawful for any person or persons to open, maintain, conduct or keep directly or indirectly any saloon or place for the sale of intoxicating liquors within two hundred feet of any church or house for religious worship, or public school building, within the corporate limits of Oakland.

"Be it ordained, That each day any violation of the preceding section occurs it shall be deemed a separate offense."

The penalty prescribed for violating the foregoing is a fine of not less than one dollar or more than twenty-five dollars or imprisonment in the town lock-up.

Ye Country Editor.

He riseth in the morning and knoweth not what the day may bring forth. If he telleth all the news he runneth a great risk of having a tin ear put on him, and if he telleth not the news the people say he is a g. and there is no joy in it. The crafty man enjoyeth him into giving him a fifty cent puff for a five-cent cigar, and found mothers frown on him if he fails to flatter their freckled-faced broods. And all his ways are ways of woe and his days are full of sorrow. The life insurance man setteth snares for him, and on the whole he hath a dence of a time.—Germantown Republican.

Notice.

To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to

MICHAEL W. DURST, 7-26t. Grantsville, Md.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seedling down in meadow and buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomatoes and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Ripans Tabules cure jaundice.

Decoration Day.

Crook Post No. 35, G. A. R., extends an invitation to all G. A. R. posts, the Knights of Pythias, Odd Fellows, Jr. O. U. A. M. and the school children of Garrett county, to meet with them on Decoration Day and participate in the decoration of the graves of deceased comrades.

A. G. STURGIS, H. Low, Adj't. Commander.

Land for Sale.

The undersigned offers for sale a part of "Swan Meadows," lying about 4 1/2 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINCER, Oakland, Md.

A New Millinery store.

I have just opened a new line of millinery goods, flowers, ribbons, laces, straw goods, fancy goods and notions. Prices reasonable. Store on Oak street near the Davis bridge. MARIÉ CUNNINGHAM.

Bucklen's Arnica Salve.

THE BEST SALVE IN THE WORLD FOR CUTS, BRUISES, SORES, FLEETS, SALT RHEUM, FEVER SORES, TETTER, CHAPPED HANDS, CHILBLAINS, CORNS, AND ALL SKIN Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 5-17r

Dentistry.

Dr. D. O. McKinley will be at Friendsville May 14th and 15th; Hoyer, 17th; McHenry, 18th; Oakland, 21st and 22d; Deer Park, 23d and 24th. Teeth extracted without pain. 8-3t

Trespass Notice.

All persons are hereby warned not to trespass upon the lands of the undersigned lying in District No. 8 near Gorman for any purpose whatever. All dogs found on the land will be shot. Persons found guilty of trespassing will be prosecuted. W. J. WILSON, JOHN T. STEYER, 8-3t J. G. STEYER.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sturgis, Oakland, C. F. White, Hattons; The Co-operative store, J. O. DeBerry, Corinth; E. A. Weimer, McHenry; Smith & Callis, Johnstown; J. E. Gagey, Accident; Jonas Frazee, Yough Store Co., R. Liston, Selbyport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

A Quarter Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00 6

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became a Girl, she clung to Castoria. When she had Children, she gave them Castoria.

A Test of Civilization.

Not simply comfort and convenience in the daily intercourse of social life, but economical considerations of vast importance are involved in the question of improved roads through our country. The most cursory study of statistics showing the distance over the average wagon roads of our country through which a load of wheat will pay its own transportation is a convincing object lesson to any man concerning the wealth producing, labor saving, food cheapening effect of good roads. A farm 12 miles from a railroad station in a district with good roads is worth more than one equally good three miles removed from the railroad where the roads are as bad as they are in many farming districts where the land is rich.

Civilization has been well defined as the "aggregate manifestation of the mastery which mind has attained over matter among a given people at a given time." This definition will bear careful thought, and physical tests more immediately indicate the degree of civilization which a community has reached than does the condition of its streets and roads.—Merrill E. Gates, President Amherst College.

Ripans Tabules relieve scrofula.

THE REPUBLICAN.

OAKLAND, MD., THURSDAY, MAY 10, 1894

NUMBER 9.

VOLUME 18.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.
Take your wool to Sincell Bros.

Sincell Bros., are buying wool at high prices.

Sincell Bros., are paying big prices for wool.

Sincell Bros., pay more for wool than other merchants.

Mr. E. C. Harvey, of Gorman, was here on business Saturday.

Seeds by ounce, pound, pint and peck at H. E. Felty's Grocery.

Begin preparations now for the observance of Decoration Day.

Mr. Thomas J. Peddicord was in Cumberland on business Saturday.

Mr. Chas. A. Tower spent Sunday in Kingwood with the fair sex.

Mr. Henry Kahl, of Accident, was in the city Monday for a few hours.

Mr. Will C. Kidd, of Baltimore, spent Saturday and Sunday in Oakland.

Mrs. Sarah Leuthe returned from a visit to Piedmont Sunday evening.

Mr. Charles Selden, Jr., of Baltimore, is in Oakland as a guest of the Central Hotel.

Mr. John J. Breneman, of Accident, was in Oakland and paid his respects to this office.

W. H. Malette has a number of pairs of shoes which he will dispose of at less than cost.

Mrs. E. C. Tasker returned from Washington to Oakland on last Thursday evening.

Mr. Grant Bower, a Kingwood type, was here for a few hours on last Friday morning.

Mr. J. N. Willison, of Cumberland, spent Monday and Tuesday in Oakland on business.

Justice L. C. Fike, of near Markleysburg, was in Oakland Monday on professional business.

Miss Della Edwards, who spent the winter in Frederick City with friends, has returned to Oakland.

Mr. Eli Williams has moved from Oakland to Friendsville, this county, where he has engaged in business.

The attention of our readers is called to-day to the advertisement of Mr. W. H. Malette, which appears on this page.

Prof. R. G. Richardson, of Piedmont, was here Monday to close a contract for the erection of a house at Mountain Lake Park.

Mrs. Harmon Hesen, of Martinsburg, arrived in Oakland Saturday evening with her children to visit Mr. and Mrs. H. Hesen near town.

Mr. M. Z. Dawson, a former resident of Mountain Lake Park, but now living with his family at Rowlesburg was here on Saturday last.

Mrs. E. M. Ebert, who has rented the Allegany House at the Park, was here on Saturday. She was accompanied by Mr. and Mrs. E. C. Manown.

Miss Tillie Litzinger, of Grafton who spent several weeks in Oakland as the guest of her brother, Editor Litzinger, departed for her home Monday evening.

Mr. W. S. Wolf, who recently purchased the White livery stables, is improving that property very much by the free use of paint, weatherboarding, etc.

Miss Mattie Porter, who has been teaching at Elkins for several months, returned to her home in Oakland last Monday night and will remain during the summer.

Mr. Henry J. Mayers went to Wheeling on Monday. He returned Tuesday accompanied by his wife who has been there two or three weeks visiting relatives.

Only for a couple more weeks can those elegant cabinet photographs be had for \$1.50 per dozen. Don't let this opportunity pass.
9-11f LOAN & CO.

Mr. John E. Gnagay, the Accident merchant, returned to his home from Baltimore via Oakland on last Saturday. He had been east to lay in a large stock of spring and summer goods.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Rev. Dr. Alexander will conduct services in the Garrett Memorial church on Sunday at 11 a. m. and 8 p. m. The evening discourse will be upon "Hannah."

Rev. Ernest R. McCauley, of Gettysburg, Pa., will preach in St. Mark's church, Oakland, on Sunday morning, the 13th inst. The public cordially invited.

All members of Garrett Council Jr. O. U. A. M., are requested to assemble at their hall on next Tuesday evening as business of importance is to be transacted.

Mr. George Crim, who spent the winter in Washington working at his trade, returned to his home in Oakland on last Thursday and will remain here during the summer.

Mr. Christian Orendorf, of Bittering, was in Oakland Tuesday. He accompanied his daughter Annie thus far on her journey to Illinois, where she has gone to reside.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

Mr. John Shartzer has moved to Oakland the remaining stocks of goods of three different stores and will sell them out for less than their cost. Auction every Saturday afternoon and night until goods all disposed of.

Rev. Earnest R. McCauley, of Gettysburg, Pa., will preach in St. Mark's church next Sunday evening at eight o'clock instead of Sunday morning as stated in last week's issue of this paper. The public cordially invited.

"Picturesque America" will be given in Offutt's Hall on Thursday evening, May 10, for the benefit of the Oakland Cornet Band. This will be an opportunity to hear Mr. Rudisill's celebrated lecture. Illustrated by 150 magnificent views.

Dr. J. Lee McComas and son Lee started for Galveston, Texas, on train No. 1 last Friday night. The doctor has gone to attend the annual meeting of the National Medical Association. They will return to Oakland in about two weeks.

A lady of Tooleys, La., was very sick with bilious colic when M. C. Tisler, a prominent merchant of the town gave her a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says she was well in forty minutes after taking the first dose. For sale by Oakland druggists.

Dr. S. F. Scott, Blue Ridge, Harrison county, Mo., says: "For whooping cough Chamberlain's Cough Remedy is excellent." By using it freely the disease is deprived of all dangerous consequences. There is no danger in giving the Remedy to babies, as it contains nothing injurious. 25 and 50 cent bottles for sale by Oakland druggists.

The new Town Council met on Monday and organized by the election of Dr. Henry W. McComas as president. The following nominations were made by the Mayor and confirmed by the Council: Clerk, Mr. John C. Dunham; bailiff, Mr. Joseph Martin; police magistrate, Justice King Delawder; attorney, Mr. G. S. Hamill. Mr. Thomas Little was elected treasurer by the council.

Garthright has just received a car load of flour, shorts, corn and oats chop and bran, all of which will be sold cheaper than has been sold in Garrett county for twenty years. The cash or produce will get good bargains. Want one thousand bushels potatoes at fifty cents cash and trade. Barb wire cheaper than was ever sold. 8-2

The wind and rain storm which passed over Oakland on Sunday evening was one of great severity and considerable damage was done to fences and trees. The new house which Mr. D. M. Dixon is erecting was twisted out of shape. A cow belonging to Mr. James W. White, which was in a stable with two horses was killed by a bolt of lightning. The horses escaped uninjured.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

Persons who sympathize with the afflicted will rejoice with D. E. Carr of 1235 Harrison street, Kansas City. He is an old sufferer from inflammatory rheumatism, but has not heretofore been troubled in this climate. Last winter he went up into Wisconsin and in consequence had another attack. "It came upon me again very acute and severe," he said. "My joints swelled and became inflamed; sore to touch or almost to look at. Upon the urgent request of my mother-in-law I tried Chamberlain's Pain Balm to reduce the swelling and ease the pain, and to my agreeable surprise it did both. I have used three fifty cent bottles and believe it to be the finest thing for rheumatism, pains and swellings extant." For sale by Oakland druggists.

Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-tf.

Dentistry.
Dr. D. O. McKinley will be at Friendsville May 14th and 15th; Hoyes, 17th; McHenry, 18th; Oakland, 21st and 22d; Deer Park, 23d and 24th. Teeth extracted without pain. 8-3t

Bucklen's Arnica Salve.
The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-1yr

A New Millinery Store.
I have just opened a new line of millinery goods, flowers, ribbons, laces, straw goods, fancy goods and notions. Prices reasonable. Store on Oak street near the Davis bridge. MARIE CUNNINGHAM.

Cure for Headache.
Having the needed merit to more than make good all the advertising claimed for them, the following four remedies have reached a phenomenal sale: Dr. King's New Discovery, for Consumption, Coughs and Colds, each bottle guaranteed—Electric Bitters, the great remedy for Liver, Stomach and Kidney troubles; Bucklen's Arnica Salve, the best in the world, and Dr. King's New Life Pills, which are a perfect pill. All these remedies are guaranteed to do just what is claimed for them and the dealer whose name is attached herewith will be glad to tell you more of them. Sold at all Drug Stores. 1

Rogers' Specific Liniment.
A radical cure for cholera. Sold by A. G. Sturgiss, Oakland, C. F. White, Huttons; The Co-operative store, J. O. DeBerry, Corinth; E. A. Weiner, McHenry, Smith & Callis, Johnstown; J. E. Gnagay, Accident; Jonas Frazee, Yough Store Co., R. Liston, Selbyport; A. Vass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

Look for Posters.
The Coxey movement stopped at Deer Park and just wondered how could be that John Felty was selling groceries, dry goods, notions, shoes and everything kept in first-class store, so cheap. This is the way: Selling for cash and buying low, he gives the people the benefit of low prices. Don't fail to call on John, Deer Park, Md.

N. B. The best stock of spring goods ever brought to this county you can find there. All fresh and new. 9-3t

Decoration Day.

Crocket Post No. 35, G. A. R., of Oakland, desires the presence of all G. A. R. Posts as well as all old soldiers to meet with us and join in observing memorial day, May 30th. Invitations are also extended to all lodges K. of P., Odd Fellows, Jr. O. U. A. M., Hibernians and the citizens generally. Invitation is also extended to all school children to meet with us, and also the Oakland Cornet Band.

Donations of flowers will be gratefully received. They can be left at Crocket Post Hall or Sturgiss' drug store on Wednesday morning, 30th.

A. G. STURGISS, H. L. W., Adj't. Commander.

Notice to Citizens of Oakland.
You are requested to meet at Sturgiss' Hall on Friday evening, May 18, 1894, at 8 o'clock p. m., for the purpose of organizing a Fire Department Company. Let there be a full turn out. By request, MAYOR AND TOWN COUNCIL. 9-2t

Notice to Trespassers.
All persons are hereby notified not to trespass on my land known as "Swanton," by cutting timber, clearing land or by farming of pasturing land that is cleared on my premises, fishing, or in any other way trespassing, as I have instructed my agent to prosecute all trespassers to the fullest extent of the law. M. M. ARMSTRONG. CHAS. A. WILT, Agent. Westport, Md. 9tf

Notice.
To the farmers of Garrett county. Having organized the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to MICHAEL W. DUBERT, Grantsville, Md. 7-26t

Trespass Notice.
All persons are hereby warned not to trespass upon the lands of the undersigned lying in District No. 8 near Gorman for any purpose whatever. All dogs found on the land will be shot. Persons found guilty of trespassing will be prosecuted. W. J. WILSON. JOHN T. STEYER, J. G. STEYER. 8-3t

Land for Sale.
The undersigned offers for sale a part of "Swan Meadows," lying about 4 1/2 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINCCELL, Oakland, Md.

A Million Friends.
A friend in need is a friend indeed, and not less than one million people have found just such a friend in Dr. King's New Discovery for Consumption, Coughs, and Colds. If you have never used this Great Cough Medicine, one trial will convince you that it has wonderful curative powers in all diseases of Throat, Chest and Lungs. Each bottle is guaranteed to do all that is claimed or money will be refunded. Trial bottles free at all drug stores. Large bottles 50c and \$1.00. 1

German Baptist Annual Meeting.
The Annual Meeting of the German Baptist Brethren will be held at Meyersdale, Pa., on the Pittsburg Division of the Baltimore and Ohio Railroad, commencing May 24th, 1894.

For this occasion the B. & O. R. R. Co. will sell excursion tickets to Meyersdale and return from all stations on its system of lines at rate of one first class fare for the round trip. From points east of and including Pittsburg and Wheeling the tickets will be sold from May 22nd to 28th inclusive, and will be valid for return passage within thirty days from date of sale.

From points west of Pittsburg and Wheeling the tickets will be sold from May 21st to 26th inclusive, and will be valid for return passage within thirty days from date of sale.

For time of trains, etc., address nearest Agent of the B. & O. R. R. Co. or O. P. McCarty, Gen'l Pass. Agent, B. & O. S. W. Ry, St. Louis, Mo.; L. S. Allen, Ass't Gen'l Pass. Agent, B. & O. R. R., Chicago, Ill.; E. D. Smith, Div. Pass. Agent, B. & O. R. R., Pittsburg, Pa.; or B. F. Bond, Div. Pass. Agent, B. & O. R. R., Baltimore, Md.; Chas. O. Scull, Gen'l Pass. Agent, B. & O. R. R., Baltimore, Md. 8-4t

FOR MALARIA, LIVER TROUBLE, INDIGESTION, USE BROWN'S IRON BITTERS.

Mountain Lake Park.

Mrs. S. L. Allen, of Grafton, spent a few days at the Park.

J. T. McGraw has rented the Allen cottage for the summer.

J. J. Hetzel, of Cumberland, visited the Park yesterday. He is going to have an inviting summer home when the improvements are finished.

Merchant Richardson, of Piedmont, spent Monday with us. He is planning to build a cottage on his lot. A wise man.

Supt. Sheets of the B. & O. R. R., purchased the Atkinson cottage last week. A desirable location.

Mrs. Dr. Gregory visited her husband last Thursday. The Dr. came here seeking rest. Friday he and his wife returned to Washington.

T. J. Peddicord and wife were at the Park Monday.

C. W. Conner was a visitor at the Park last week. He attended a meeting of the Community Council.

Hon. Thos. Davis, of Grafton, last Saturday called at the Park to inspect the improvements made on his cottage. He has a beautiful place.

Mrs. Echart, of McHenry, is visiting her son Jake. She will remain here a week or more.

J. M. Jarboe, of Oakland, is at work making an addition to the Mountain Lake Hotel.

The storm Sabbath night blew down a dozen trees, and lifted Miss Harris' little chapel off its foundation and set it safely on the ground.

Strangers are seen on our streets almost every day. It begins to look like old times again.

The Allegheny House is open for guests. Mrs. Ebert and her family arrived from Kingwood last Thursday. We are delighted to have her at the Park.

Miss Jennie Smith spent a day or so at the Park and then was off for New York.

The Anniversary of the Battle of Gettysburg promises to be an interesting occasion. The G. A. R. boys will be on hand. They want to hear Comrade Thompson. His lecture on Gettysburg is very interesting. The Oakland Post has had the matter before them and are much interested. The railroad company will give a one fare round trip rate from the 3rd to the 5th, inclusive. This will insure a good crowd.

The prospects are that Sam Jones will again visit the Park, and lecture sometime in August.

Several families are expected to move into their cottages this week.

A bicycle class will be formed this summer under a competent instructor. Cycles will be for rent.

Numbers of buggies are seen on our streets. The warm weather is bringing the people outdoors.

Adam Howell is at work on the 30x40 addition to The Columbian.

Adam will get the tabernacle—won't we enjoy it? The capacity will almost be double. The raised seats will be appreciated.

When Baby was sick, we gave her Castoria.

Deer Park.

Mr. Samuel Green, of Elk Garden, is among his many friends here.

Mr. Aquilla Bartly is visiting his uncle, Mr. Joseph Lashorn.

Mr. Brunner Bantz, of Cumberland, was here a few days last week.

Mr. George Marville is at home with his family here.

Mr. D. F. Graham was here on business last week.

Hon. and Mrs. A. F. George were here on Thursday visiting their mother, Mrs. Wm. E. George, who has been ill.

Miss Emma Murphy, of Swanton, was here on business on Monday last.

Mrs. Tillson has been on the West Virginia Central road visiting her father, Mr. Robert Hoad.

On Sunday evening last quite a storm visited this place, blowing down outbuildings, fences and trees. In also visited the farm of W. H. Chadderton near this place and blew down nearly all his fences, also his wagon shed and four sheets of steel roofing from his barn.

Mr. James Groffon has treated his house to a coat of paint.

Mr. Frank Thrasher went to Frankville on Sunday last.

Crellin.

As it has been some time since we saw any items in your valuable paper from this part of the sphere, we concluded to pen you the happenings.

The Preston Lumber and Coal Co.'s mill resumed operations on the 2nd ult. and is doing a booming business. They have remodelled their mill and built an addition of 36 feet to the main building.

O. W. Stull & Co., of Bear Creek, Pa., have embarked here in the mercantile business. They bought the stock, fixtures and building formerly owned by White and DeBerry, of Terra Alta, and the new firm is now erecting a new two story building 40x60 feet opposite their present place of business. The gentlemen contemplate buying their goods in car load lots, which will give our citizens advantage of low prices. We wish them success in their new venture.

J. Hoover, of Miller's Mines, Pa., has purchased a lot in this place and is erecting a dwelling, and will run a huckster wagon for the accommodation of our citizens.

Miss Nellie Butler, of Oakland, is teaching our juveniles this summer.

Our citizens are treating their lots to new and substantial fences and putting down board walks.

OAKLAND, GARRITT CO., MD.

THE LAND OF "PRETTY SOON."

I know of a land where the streets are paved
With the things which we meant to achieve,
It is called with the money we meant to have
And the pleasures for which we strive.
The kind words unspoken, the promises broken,
And many a sweetened boon
Are stowed away there in that land some-
where—
The land of "Pretty Soon."

There are uncut jewels of possible fame
Lying about in the dust,
And many a noble and lofty aim
Covered with mold and rust.
And oh, this place, while it seems so near,
Is farther away than the moon,
Though our purpose is fair yet we never get
Here—
To the land of "Pretty Soon."

The road that leads to that mystic land
Is strewn with plumed wreaths,
And the ships that have sailed for its shining
strand
Bear skeletons on their decks.
It is farther at noon than it was at dawn,
And farther at night than at noon.
Oh let us beware of that land down there—
The land of "Pretty Soon."
—Ella W. Wheeler, in Youth's Companion.

ALICE'S MISTAKE.

Her Hasty Words That Caused
Months of Misery.

I had thought I loved him, had been
very happy as his affianced bride, and
whispered with a strange pride his
name, remembering that some day it
would be my own as well. But mine
was not the nature to work content. I
was rather an early date, I thought,
when an engagement was so new a
thing, not quite three months old, to
be called to account for my actions.
And what had I done wrong? My
betrothed, Clarence Withers, had been
absent for a week, and during his ab-
sence Will Maynard had been my
escort wherever I had chanced to go. I
would not have my engagement an-
nounced, although it was currently
suspected; there were many kind friends
to whisper the fact of my so-called
flirtation to Clarence upon his re-
turn. And so my first meeting was
not, alas, what I had painted to my-
self. When I went forward to meet
him, glad, oh, so glad, to see him home
again, and ready to tell him so, if he
needed telling other than the story he
could read in my eyes and outstretched
hands of welcome, he only took my
hands in his and held me off rather than
drew me to his heart, where my
head had so often lain, and said, in
cold, strange tones, so unlike the lov-
ing words of welcome I was waiting
for:

"Alice, what is this I hear about my
wife?"

"Your wife, Mr. Withers? During
which of my sleeping moments have I
been dignified to that title, or you
aspired to the authority of a husband?"

"To me, Alice, a promise made is a
promise kept, and from the day you
gave yourself to me I have looked upon
you as my wife as solemnly as though
a priest had already blessed our union.
You know full well my opinion of Mr.
Maynard. He is a man I would not
permit to cross my threshold, yet dur-
ing my short absence he has been con-
stantly and publicly by your side. In-
fact, has shown you attentions you had
no right to receive."

"Mr. Maynard is a particular friend
of mine," I exclaimed, with flashing
eyes, slipping my hands from his clasp,
"and permit me to say I will no longer
listen to this harangue. No right to re-
ceive ordinary courtesies from a gentle-
man! You strangely forget the fact
that you call yourself such when you
dare address me thus. Good morning,
Mr. Withers."

"Stay, Alice," I spoke quickly, for-
give me. But it was so hard to hear
all this just as I arrived home, hungry
for your welcome. You know, dear,
there were so many aspirants for this
little hand I sometimes can scarce be-
lieve in my own rare fortune. Are you
not glad to see me, Alice?"

"Glad? No. I was glad you
sent all my happiness back into my
own heart, and made your first words
words of reproach and blame. I have
done nothing to deserve either, and I
would do the same again."

"Not if you knew it gave me pain."
"Yes, because you have no right to
feel pain. If you have no trust in me,
let us part."

"It is not a question of trust, my
Alice. But come, be my own sweet
girl again and promise me to announce
our engagement, and thus put a stop
to Mr. Maynard's needless devotion."

"No, Mr. Withers. I have seen
enough to know that with such a na-
ture as I have this morning learned
yours to be I never could be happy. I
will return you your letters and your
gifts, and you will send me my letters
and pictures. Hereafter we meet sim-
ply as friends."

And so we parted. He grew very
pale when I said it was all over—white
to the lips with anger, I suppose. What
a fiendish temper he must possess, and
what an incorrigible tyrant of a hus-
band he would have made! Well, it is
all over now, I thought. I am very
glad, although I wished the strange
pain would go away from my heart,
and could not think what had caused it.

It was two weeks since Clarence
Withers and I had met and parted, and
I did not see him until the night of
Mrs. Strinther's party. He was looking
oh, so handsome—evidently not pining
in secret, for, as usual, he was the life
of the party, and devoted himself to that
pretty Irene Brooks. Well, it did not
wear the willow either for that matter.
Mr. Maynard was very devoted, and
my old friends rallied to my standard
in all their force. He asked me once to
dance with him—a square dance—but I
declined, and he looked indifferently
relieved; and once when I was laugh-
ing and talking with Mr. Maynard, I
felt his eye was on me, and threw ad-
ditional emphasis into the nothing he
was saying. Yet I was tired and

bored. Why was it Mr. Maynard's so-
ciety had ceased to attract me?

But yet it seemed so strange to meet
everywhere; to exchange a smile of icy
coldness and a courteous bow of for-
mal greeting and feel that all was over.
I don't think I quite realized it until
the day Mr. Maynard told me his en-
gagement to Irene Brooks was a pos-
itive fact. I did not think he could
have quite forgotten in three short
months. He always admired her, I
knew, and as she is meek and amiable,
she is just suited to such a bear. For
my part, I hate married men and mar-
ried life, and thought, with inward
congratulations, of the many years he
I should take the fatal plunge.

But my congratulations vanished
when I awoke, one morning, with the
lead consciousness that I had given,
the night before, a favorable answer to
Will Maynard's wooing. I did not
mean to say "Yes." I did not care for
him when he was away from me; but
he was so earnest, so determined, I
scarcely knew I had consented until I
felt his lips press mine and he had
slipped a glittering stone upon my
finger. It was there, as I awakened,
so that I knew it was no dream. All
day I caught its sparkle; all day it
served as witness to my mad folly.

But when, that night, I entered Mrs.
Somers' drawing-rooms, leaning on his
arm, he looking down on me with a
sort of possession-look, I fancy, I
caught Clarence Withers' eye, full of
scorn and full of anger. I think mine
flushed back equal contempt. I am sure
I felt it. Had he not just set me the
example? I was only following in his
footsteps, carrying out his pet theory,
that the man always should precede
the woman and she bend to his lordly
will.

At last the summer came. What a
long, long winter it had been, and how
glad I was to see once more the birds
and flowers, I thought, as I wandered
one lovely morning in June away from
the gay party who were spending the
day among the woods and trees, revel-
ing in a picnic of the good, old-fash-
ioned sort. I hate picnics and always
did, and I was glad to have escaped
them all. So I wandered on, stooping
now and then to pluck a wild flower or
an exquisite fern, until, on the verge of
a steep rock, my eye caught a bunch of
loveliest anemones. I sprang forward,
eager to grasp it—too eager, alas!—for
my foot tripped and I fell forward
upon the sharp stone, cutting an ugly
gash in my forehead. I think it stunned
me for the moment. I must have faint-
ed; but, surely, ere I opened my eyes, I
caught the sound of breathless tones
exclaiming: "My God, my darling!"
and felt hot kisses rain on cheek and
lip.

Slowly I unclasped the sealed lids and
gazed into the pallid face of Clarence
Withers. My strength came back with
my pride and, drawing myself away, I
said:

"Do not be alarmed, Mr. Withers. It
is all right now. Did you imagine you
held Miss Brooks? Allow me to re-
lieve you."

"No, Miss Brooks is fortunately in a
place of safety. I am glad for your
accident was so trivial. Good morning."

And so he left me. Were those cold,
indifferent tones the warm, loving
tones I had listened to but a moment
before? No, I had been dreaming;
and, stanching the blood with my
handkerchief which still flowed freely,
I walked on, and soon stumbled upon
Mr. Maynard, hastening to find me.

Oh, how his words of pity and dis-
tress grated on my ear. I answered
him pettishly, and begged to be taken
home. My head ached, he ordered the
carriage at once. I would not al-
low him to accompany me and, with
anxious solicitation, he tenderly bade
me good-by, closed the door upon me,
and I was again alone.

All night I lay and tossed upon my
bed, and morning found me feverish
and restless, but with a new, undan-
tled resolution, that ere I slept again I
should have returned Will Maynard's
ring, and asked him to give me back
my plighted troth.

Yet the words came with a hard
struggle, and the tell-tale blood crimson-
ed my cheek and brow as I stood be-
fore him and acknowledged I could not
marry him.

"No, Mr. Maynard. You have been
very good, very kind, but I cannot love
you."

"Why, then, did you consent to be
my wife?"

His tones were calm now, with the
calmness which precedes the mountain
storm, when all nature is hushed, and
not a leaf stirs, not even a bird's
note trembles until with a mighty
roar heaven discharges its artillery, and
the hills quake.

"Oh, do not ask me. I do not know.
I cannot tell you."

"Do you mean that these few months
have been a farce in which you and I
were the chief actors? Who amongst
your friends have been the audience to
watch this poor puppet-show, in which
your experienced hands have pulled the
strings? Do not look indignant. You
have no right to indignation. Have
you never loved me?"

"Never, Mr. Maynard, as I should
have loved you. You came to me at a
time when my heart was hungry. Your
words fascinated me, and I hoped and
believed I would find the happiness I
sought. Oh, forgive me! I know how
wrong I have been. Indeed, you cannot
be more sorry than am I, for you
have not the additional sting of remorse.
Think of me as you will, but forgive
the pain I have caused you and try to
forget me."

But no forgiving glance answered
my appeal. Pitilessly and coldly the
man spoke, in cutting tones:

"I said we were the chief actors.
Doubtless there has been a power be-
hind the scenes. Perhaps Mr. Withers
has regained ascendancy over your
heart. Well, did I say? Excuse me, Mr.
Miss Ellis, I did not mean to do you
such injustice as to mention what you
do not possess. I wish Mr. Withers
every joy."

"Stop! You are unjust, indeed—nay!
more—enough, unmanly! Mr. Withers is
no more to me than the wind that
blows; less, indeed, for it brings re-
freshing air and fragrance from
myriad of flowers. I hope never to
see his face again, since his name has
only brought me fresh insult, but he
at least is a man, and would scorn to
strike a woman to the core who plead-
ed to him for forgiveness. Go, Mr.
Maynard. We are quits now. I trust
in time I may forgive you."

It was over then—all over. And for
my wicked folly I was punished. Even
Clarence, I thought, with curling lip,
would have been satisfied. I trust his
wooing with Miss Brooks was some-
what smoother than had been this of
mine. Why did I think of him? What
care I whether it were smooth or
rough? Our paths lay widely apart.
The world was broad enough for both.

Was it? Ah, tell-tale heart that beat
both, and, if our paths diverged so
widely, what was death when they told
me, two short weeks after, Clarence
Withers was not expected to live.

He had been stricken with a fever
then prevalent in our midst, and on ac-
count of which only that day I was to
have gone into purer air. And now
the physicians said there was no hope
of his recovery. Ill, dying—Well,
what did it matter to me? Did not
the world was broad enough for both?

the physicians said there was no hope
of his recovery. Ill, dying—Well,
what did it matter to me? Did not
the world was broad enough for both?

Was it? Ah, tell-tale heart that beat
both, and, if our paths diverged so
widely, what was death when they told
me, two short weeks after, Clarence
Withers was not expected to live.

He had been stricken with a fever
then prevalent in our midst, and on ac-
count of which only that day I was to
have gone into purer air. And now
the physicians said there was no hope
of his recovery. Ill, dying—Well,
what did it matter to me? Did not
the world was broad enough for both?

Was it? Ah, tell-tale heart that beat
both, and, if our paths diverged so
widely, what was death when they told
me, two short weeks after, Clarence
Withers was not expected to live.

FLOWER LEGENDS.

Pretty Stories from the Myths of the
Ancients.

We are told by those curious in such
statistics that more than a third part
of all flowers yet examined—1,192
among 4,000—are white; that bees have
a strange preference for blue flowers,
and that of all colors of these gay chil-
dren of the spring yellow is most dura-
ble. These facts may delight the evan-
gelists, but men in general, and
especially women, whose province is
flowers, take more pleasure in the
legends of their origin and symbolism.
The Grecian mythology and the Chris-
tian legends abound in such personifi-
cation and ascription of flowers to par-
ticular beings and events.

Of Greek flower myths, the best
known are those of the hyacinth and
the narcissus. Hyacinth was a beau-
tiful youth beloved by Apollo and
Zephyr, the gentle south wind. One
day when the god and the mortal were
throwing the heavy discus, Zephyr
guided it against the head of the youth.
The grieving god caused delicate purple
flowers to grow from the blood of the
youth—the wild flowers of Greece,
which still bear the name of hyacinth.

Narcissus, the son of a river god and a
nymph, had made many nymphs un-
happy by his wondrous beauty and
haughty scorn, a punishment being
sent down in punishment of
too great loquacity, had condemned to
speak only in the last words of an-
other. Through rejected love, Echo
had pined away to a rock and a sound,
when Venus chastised Narcissus for
his scorn of her power. Weary with
hunting, he was resting by a crystal
spring, in which he beheld his own
form and face. Not until he had fallen
deeply in love with the beautiful image
did he know that it was but a shadow
of himself. Consumed by his passion,
he forgot food and sleep and reman-
ing in the spring until he had
drowned in the cold, white flower that
perpetuates his name.

Flowers in Christian story are mostly
associated with some Bible charac-
ter or medieval saint—the spring snow-
flake, for instance, with the sin of Eve,
after the expulsion from paradise,
snow fell and icy winds chilled the ill-
clad pair, as Eve sat on the ground
with an infant son in her arms and
wept for what she had sinned away.
Then appeared an angel, who, taking
snow from his mantle, shaped a small
flower out of it and said:

"Take this snowflake as a sign that
the winter will soon be past; every
year it will bloom in the snow, to bid
thee hope for the advancing spring."

Many flowers also are connected with
the crucifixion, among them the rose,
the carnation, the pansy, the lily, the
crocus, and the violet. Christ hung on
the cross, angels who, in medieval
tradition, collected from his side the
blood preserved in the Holy Grail
touched with his robe the earth where
drops of blood had fallen. Immedi-
ately the cross was surrounded by fragrant
flowers, which were growing upward,
their dying Master might be
strengthened by their scent. And be-
cause the rose was thus present at the
crucifixion, it became by heavenly
command the queen of flowers.

The Virgin Mary is the center of
many Roman Catholic legends. The
marigold is supposed to have taken its
color from her fair hair—greatly ad-
mired in the east, because of its con-
trast to the ordinary dark brown or
black. The lily is her especial attri-
bute, the emblem of her purity. Tra-
dition says that when the disciples had
buried her she rose glorified from her
grave and was borne to heaven by
angels. Her mourning followers,
blinded by her glory, looked down into
the grave she had left, and beheld it
was full of snow-white lilies, which
they gathered reverently and planted
in memory of her.

But of all flower legends, those most
popular in Germanic countries are con-
nected with the forget-me-not. One
refers to the creation of the flowers.
God had named them one by one, but
the little blue daisy, being born near
him, so it lifted its tiny head in hu-
mility and whispered: "Forget me not."
The Lord then named it in its
own words. Another legend says that
two German lovers were walking by a
stream, gathering flowers for the
bridal wreath. The bride longed for
a blue flower growing in the water;
the bridegroom, trying to reach it, was
carried away by the current. Throw-
ing the little flower on the bank, he
cried: "Forget me not," and sank. His
dying words became the name of the
little flower.—Detroit Free Press.

THE TOWN REGULATOR.
A Great Fire Bell in Newark by Which
All Watches and Clocks Are Set.

There is an old "blue law" still be-
lieved to be extant in this city, which,
while it is practically obsolete, would
create considerable commotion if it
were put into effect. The law of the
old times required that when the fire
bell rang at a certain hour, every
child, boy or girl, must go home and
presently go to bed. It was a wise
provision at the time and would do no
harm if put into effect at the present
time. But, oh! what a scampering
there would be all over the city.

The penalty for violation of this law
was the arrest of the offenders and a
night spent in the lockup. While the
law is not now observed as far as any
one can ascertain, still the fire bell
rings regularly at 9 o'clock every night.

At last the striking of the bell has
gradually assumed another signifi-
cance. By its clang watches and clocks
are regulated everywhere within
sound of its reverberations. At par-
ties, concerts, theaters, balls, or at
church, wherever it may be, at the
sound of the first stroke every owner of
a watch takes it from his or her pocket
or dress and compares the time.

There have been occasions well au-
thenticated, so it is said, where men
sound asleep in their chairs at the club
mechanically took their watches out
in their pockets without losing a snore
when the 9 o'clock bell struck.

Each housewife looks at the clock on
the mantle, and if any deviation is no-
ticed the clock is made to conform in
its time to the great fire bell at Halcy
and Academy streets.—N. Y. Recorder.

A Burglar Alarm.
She thought she heard burglars and
she walked her husband.

"Well, my dear," he said, when she
had, in fear and trembling, explained
the state of the case to him, "let them
go."

"But they won't go," she urged.
"Let them steal them!"

"But there is nothing I want them
to steal."

He rolled over growling.
"I suppose," he said, "you would not
object if they stole away, would you?"

And that's what they did, probably,
for there was no sign of them next
morning.—Detroit Free Press.

Their Tastes Differed.
Mr. Smythe (of Boston, across the
table)—Which do you prefer, Lamb or
beef? My own tastes regarding them
are very fixed.

Miss Jones (of Chicago)—O, I reckon
I like bacon a little the best. (Aside
to the waiter)—And put some liver in
the pan with it.—Trinity.

Marriage Would Be a Failure.
Bernard—Do you think a young man
can marry comfortably on \$600 a year?
Miss Hatch—Yes, of course he can;
but then he would be most uncomfort-
able after his marriage.—Brooklyn
Life.

PUNGENT PARAGRAPHS.

—Western "Ad"—Wanted an ener-
getic young man for a retail store,
partly out of doors, partly behind the
counter.

—Any person—From five to fifty
tons of coal—se of, will please
send word, or drop it through the post
office.—New Haven Paper.

—Jeweler—"This clock will go twelve
months without winding." Oldboy—
"Well, how long would it go if it were
wound?"—N. Y. Herald.

—Mr. Joblots—"Silsby told me to-
day that he had just bought a catar-
man, and was going to keep it down
at the river." Mrs. Joblots—"Male or
female, James?"

—A Nebraska man hugged his girl so
hard that he broke one of her ribs.
When she got well he forgot to hug
her, and that broke her heart.—N. Y.
Tribune.

—Way Off—"This rich relative of
yours, is he a distant relative?" "Yes,
extremely distant since he became
rich."—N. Y. Press.

—"Look here, old chappie, just in-
troduce me to your pretty cousin."
"All right, I'll do so; but mark, if ever
you marry her, don't lay the blame on
me."—Humoristische Blatter.

—Johnny—"Pa, did you know ma
before you were married?" Pa (with
a sigh)—"I thought I did, Johnny."—
Boston Transcript.

—Mamma (as she is serving the pie
at table)—"What is an improper frac-
tion, Johnny?" Johnny—"Anything
less than a quarter, mamma."—New-
port News.

—"Say, pa," asked Freddy, "why is
it that when you or Uncle George tell
me a story you always get laughed at, and
when I tell one I get a hick?"—Buf-
falo Courier.

—Marriage Changes—A girl some-
times coaxes her lover not to spend so
much money on her, but she doesn't
have to coax him after they are mar-
ried.—Athens Globe.

—"I declare I don't know what to
do," mused Dr. Fizzle. "Here's old
Mr. Goutley kicking about my charges,
and he's too good a customer to cure."
—Philadelphia Record.

—"I hear, McGinty, that yez broke
yer leg." "Then yez heard wrong,
Laurel. Yez must think I'm a fool.
It was broke by accident. What would
I want to break my own leg for?"—
Society.

—An Irishman on a western railroad
bragging of having a correct timepiece,
was heard to remark upon pulling out
his watch: "If the sun don't over that
hill in a minute and a half, he will be
late."

—Misses—"Bridget, I told you to
tell those ladies that I was out." Brid-
get—"So I did, mum; I said you was
out, but I thought you'd be back in a
few minutes, an' mum, they said they'd
come in an' wait."

—Johnny's Arithmetic—"Johnny,"
said the schoolboy's mother, do you
like your arithmetic?" "No'm, I think
the influence of that book is unwholes-
ome and depressing." "Why?" "Be-
cause it is full of horrible examples."
And his mother was so stunned that
she forgot to punish him.—Washington
Star.

THE TOWN REGULATOR.

A Great Fire Bell in Newark by Which

Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

The Governor yesterday pardoned ex-State Treasurer Stevenson Archer from the penitentiary, who was serving a term of five years for embezzling the funds of the State.

The Democratic Senators have finally come together on the tariff bill and are harmonizing their differences. The bill is to be amended in several particulars and is to have the support of all the Democrats except Hill, who announces his unchanging opposition as long as the income tax is retained. The whole matter was settled in caucus. After a full discussion of the compromise amendments proposed, the measure was approved by a vote of 37 to 1. Mr. Hill being the only Senator who voted in the negative. There was six absentees, but it was understood that all six would support the action of the caucus. As it stands, therefore, the Democrats claim that the votes of the forty-three out of the forty-four Democratic Senators will be given for the amended tariff bill as now agreed on, the income tax included.

A prominent Senator tersely sums up the new tariff situation about as follows: "The Wilson bill, as it came from the House, would have been beaten in the Senate by fifteen majority; so the Wilson-Voorhees bill was prepared. It had come to be seen that that would be beaten, if unamended, by five majority, therefore a new bill, the Gorman bill, is being prepared. The Gorman bill is to be substantially a protection bill. Increased rates of duty are being prepared all along the line, and specific duties are being substituted for ad valorem duties. No industries, with three exceptions, which need protection, will fail to receive it, if the interested parties make their wants known in suitable ways to Mr. Gorman and his associates. The radical Democratic Senators, such as Mills, Berry, and Coke, assent with reluctance, but there are three conditions of surrender insisted upon: (1) Lumber is to remain free of duty; (2) wool is to remain free of duty; and (3) all protective duties are to be kept a little lower than those of the McKinley bill. There is much doubt expressed on both sides of the Senate chamber as to whether the new compromise scheme will succeed. But Senator Harris, who was in charge of the tariff debate, says he will now begin an "era of business" and that he hopes to reach a final vote by the 1st of June.

The "New York Times" on Senator Lodge.

As the galled jade winces on the application of a load, so the New York Times cries out with rage and apprehension against additional burdens on British manufacturers. After all the money expended through the Reform School of this city and other channels to excite sectional animosity in this country, to set the West and the South against the Northeast and the manufacturers of New England against the prosperity of the South, after all the work done by "Reformers" sectional hate in the interests of the foreign capitalist classes, it seems base to the New York Times and to all reformers of that class to have Senator Lodge call attention to the settled hostility of Great Britain to

the interest of Americans in its general legislation, and particularly in its policy regarding silver. Or as it is diplomatically stated by the Birmingham Post: "Especially the Government of this country, which refused to abandon its gold standard in order to enable the United States silver men to obtain a fancy price for their product," it being no part of the British program to allow any other people to obtain even a living price for their product.

The New York Times joined other papers of the "Reform" stripe in writing such editorials as would lend color to the charge that the New York bankers were the only enemies of a fair price for so important an American product as silver in furtherance of the "Reform" program for exciting internal distrust and animosity. It is no wonder that the amendment introduced by Senator Lodge, imposing differential duties on British products, and calling the attention of the country to the discrimination practiced by England, tending as it does to cement us in a common opposition to the outrage, and undo the work of the past nine years, is spoken of as "statesmanship of the new school on the Republican side in the latitude of Boston."

Neglecting personal abuse, the usual care for the interests of those foreign producers and their import-agents, which are called "consumers," is paraded with the assertion that last year 32 per cent. in value of our imports came from Great Britain and her colonial dependencies and the people of the United States would be compelled to pay a larger part of the discriminating duty. This would be true if other countries and their dependencies did not produce the same raw materials as Great Britain, and if we and other countries did not produce about the same manufactured commodities.

The enactment of Senator Lodge's amendment would strike a double blow at the theory on which British trade has been built up and at British trade. It would still further hinder access to her largest market, and, what is worse, it would encourage the manufacture of "goods that can be made in England" in other countries, surely reducing their price. But its enactment during the term of the present administration is probably impossible. Its proposition however, is a serious menace to the continuance of a mode of thought in this country that Great Britain has built up through her agents at great cost. Hence the wail of the New York Times.—American Economist.

Oak Hill.

The weather is beautiful. Wheat and oats looking fine. Our farmers busy planting corn. Messrs. Adam Schlossnagle and Jas. Groer are farming the widow Schlossnagle's farm this season.

Mr. J. D. Schroyer is moving from our section to Friendsville. We are sorry to see you leave us Jake.

Our Sunday school is getting along nicely. Our superintendent Mr. Solomon Lee understands the management of our school.

Miss Bena Schroyer has been appointed secretary, and Mr. Mahlon Dietrick has been chosen treasurer. Mr. Silas Teets teaches the bible class.

Mr. Ed. Evans, who has been chopping logs for Jos. Groer, received an ugly flesh wound with his axe.

Geo. H. Rumburgh, of Westminster county, Pa., is in our section buying eggs which he proposes to pickle for winter use.

Jos. Teets, who has been laid up with pneumonia fever is out again. John Ault has accepted a contract of cleaning off some new ground for J. W. Schroyer.

Our supervisor on road from Friendsville to Accident is doing good work on the road. Just keep this up Bro. Silas Teets. You say your road is in bad condition. This one knows who travels it.

Jonas Frazee, of Selbyport, was a guest of the Hons. Silas Teets and Jos. Groer last Sunday.

Martin Bush is clearing out new ground for buckwheat.

Rev. Cox will preach at our school house Sunday next at 6 p. m. Messrs. Evans and Schlossnagle have about finished sawing for Jos. Groer.

If a dry season sets in for sixteen weeks like we had last season and the blamed Wilson bill on our hands I fear some of us will go to the wall.

Death of an Old and Highly Esteemed Citizen.

The Angel of Death visited Oakland on last Friday afternoon at 4.40 o'clock and called hence the soul of one of Oakland's oldest and greatest esteemed citizens, Mr. John George Miller.

Mr. Miller was born in York, Pa., on April 9th, 1813, and was therefore in the eighty-second year of his age. His father was born February 3d, 1773, and his mother January 2nd, 1780. His parents were married on Christmas day of 1798, and were very prominent people in their day. From this union there sprang twelve children, the subject of this sketch being the eighth. Mr. Miller went from York, Pa., to Frostburg in 1851, where he married Miss Susan Offutt, sister to Mr. D. E. Offutt, of Oakland, on December 24th, 1855. After his marriage he continued to reside at Frostburg (with the exception of about two years) until 1887, when he and his family came to Oakland. At the early age of twenty-one years Mr. Miller was converted and became a member of the Methodist Episcopal church, which membership he retained until his death, a period extending over sixty years. During his residence at Frostburg he was an active member of the church but in later years was unable to give that attention to his church he desired on account of bodily ills. As a Christian gentleman he was far-extended and as a citizen was faithful to every obligation. By the death of this venerable man Oakland loses one of her best citizens. His family an honored husband and father and his church a devoted member.

The esteem in which Mr. Miller was held by the people of Oakland was attested by the throng which gathered at St. Paul's church on Sunday to pay a last tribute to his memory.

The text of the sermon delivered by the Rev. Geo. W. Kepler was "Blessed are the dead who die in the Lord." In the course of Rev. Kepler's remarks he paid a glowing tribute to the virtues of the deceased. He was assisted in the services by Revs. Dr. Alexander and John M. Davis.

The interment occurred in Oak Hill cemetery. The pall bearers were Col. A. G. Sturgiss, Capt. John M. Jarboe, Dr. E. H. Bartlett, Messrs. Scott T. Jones, S. L. Townsend and Thomas J. Peddick.

The casket was literally covered with floral offerings, all of which were very handsome.

Death of an Old Lady.

Mrs. Jane Hahn, an aged pilgrim, departed this life on the evening of April 29th, in her 73d year. Mrs. Hahn was born Nov. 6, 1821, near Frostburg. About the age of 17 she openly confessed Christ and became a member of the Lutheran church. She had been a consistent member to the day of her death. She married the late John Hahn and moved to this county to live. She had been an invalid for more than twenty years, but through all her sufferings she never lost her child-like faith in God, but was constantly admonishing her friends and loved ones to live Christian lives. She seemed to live for the future alone, not desiring the goods of this world, but longing to depart with her Christ. Her bible was her daily guide, and when too ill to read she would call her friends to read it for her. Her health through the last winter had been comparatively better than for years but suddenly she became ill and after intense suffering for twenty-eight hours she fell asleep in Jesus. Just before her departure when asked by members of her home if all was peace she said yes, and it was not as hard to die as she had thought. Just before her illness she spoke of her faith in her Savior and said it was only through His loving kindness she had been spared so long. She leaves four sons and three daughters to mourn her death, namely, Thomas and Scott Hahn, of Good Intent, Pa.; George Hahn, of Patton, Ala.; Isiah Hahn, Mrs. V. B. Wensell, who has cared for her through her years of suffering, Mrs. Lydia Polan and Miss Sarah Hahn.

Pea Ridge.

Fine weather and farmers planting corn.

Misses Gracie Merrill and Clara Merrill are visiting at Elias Merrill's on Savage River at this writing.

Mr. Charley Fuller is working for Olen Wilhelm.

Mr. Jefferson Green lost a valuable horse Sunday from the effect of colic.

Mr. Frank Lancaster is numbered among the sick.

Preaching services at Cherry Grove next Sunday at 10:30. All cordially invited.

Mr. Henry Merrill contemplates taking a trip to Manadler's Ridge in the near future.

IF YOUR BACK ACHES.
Or you are all worn out, really good for nothing. It cures you, cleans your liver, and gives you a good appetite.

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.

T. Jay in Cumberland News.

OAKLAND, Md., May 3, 1894.

APPOINTMENT OF COMMISSIONERS LEE AND McDONALD.

Under these acts the governor of Maryland appointed Thomas J. Lee commissioner on the part of Maryland, and the governor of Virginia appointed Agnus McDonald on the part of Virginia.

These commissioners, Lee and McDonald, met at Washington city August 18, 1888, and applied to the Secretary of War for the service of an officer of the United States engineers to aid them in the discharge of their duties. The Secretary promptly detailed Lieutenant N. Michler of the United States Topographical Engineers for that purpose.

The commissioners, with Lieutenant Michler, met at New Creek, in Virginia, near Keyser, West Virginia, and proceeded thence to Fairfax stone, which was reached and easily recognized in the 19 of September, 1888.

MICHLER'S LINE RUN.

Lieutenant Michler was first assigned to work on the southern boundary line, and it was not until June, 1889, that he began surveying the line from the Fairfax stone to the Pennsylvania line. The work was prosecuted during the remainder of that year, and on the 20th of December, 1889, Lieut. Michler made a report of the work done, to said commissioners; and therefore the commissioners made a joint report to the Legislature of their respective States, transmitting therewith said report of Lieut. Michler, with the maps made by him and the correspondence between said commissioners.

This report and documents, together with a message of Gov. Wise, of Virginia, prepared before the expiration of his term of office, was transmitted to the Legislature of Virginia by Governor Letcher, on the 9th of January, 1890, and the whole is filed herewith as part of this answer, as the same was afterwards published in pamphlet form marked: "Defendant Exhibit J," and the following named parts of the same is desired to be taken as part of this answer, viz:

The message of Governors Letcher and Wise, pages 3 to 7 inclusive; joint report, pages 8 and 9; the instruction to Lieut. Michler on page 13; Lieut. Michler's report, page 15 and down to on page 16, then from—on page 25 to the conclusion of the report, page 31.

It appears from said message of Gov. Wise that Commissioner McDonald made a special, separate report in addition to the joint report required by both commissioners, but the State of West Virginia says that she has not been able to find said report or any copy of it.

The State of West Virginia also files herewith as part of this answer marked "Defendant's Exhibit K," a duly certified copy of the book prepared by said commissioner Lee, and is now in the land office of Maryland containing the correspondence between him and Mr. McDonald, and certain letters of his to the Governor of Maryland concerning the boundary question.

COMMISSIONERS DISAGREE.

It will appear from the above mentioned message of Governor Wise and the said correspondence between the commissioners that they differ as to the powers and duties imposed on them by the acts of the Legislatures under which they were appointed.

Mr. Lee contended that they "were simply directed to retrace and mark certain boundary lines named in the acts" under which they were appointed, and that the Virginia act of March 26, 1858, establishing the commission acknowledged and adopted the meridian line from Fairfax stone to the southern line of Pennsylvania as the boundary between the two States.

Mr. McDonald contended that the commissioners were authorized to ascertain the true boundaries and were not bound by the lines specified in the act. And he claimed that the charter of Maryland required the meridian line to be run in order to obtain a starting point in the 40° of latitude and that the boundary line was not to follow from said starting point, the said meridian, but to diverge southwestward until it struck the Potomac river proper—that is at some point where it had become a river, which point he claimed would be about the town of Piedmont.

McDONALD SENT TO ENGLAND.

Owing to the difference in view the Legislature of Virginia took no action on the report of said commissioners, but did adopt a resolution under which Mr. McDonald was commissioned to go to England to procure documentary and other evidence to establish the true boundary between Virginia and the State of Maryland.

Mr. McDonald sailed for England in June, 1890, and after that never acted any further in conjunction

with Mr. Lee in locating, tracing and marking either the western or the southern boundary line of Maryland.

Mr. McDonald procured a large amount of documentary evidence on these boundary questions and subsequently made a report and returned this evidence to the governor of Virginia, but nearly, if not all of it has been lost or was destroyed during the late war and cannot now be obtained.

But on the fifth of March, 1890, the Legislature of Maryland passed "an act for the establishment of the southeastern and northwestern boundary line between this State and Virginia, and making further appropriation to complete the survey and mark the same." (See acts 1890, ch. 385.)

Said act is as follows, so far as it relates to the western boundary:

Section 2. And be it further enacted, That the northwestern line of this State is a line connecting at Fairfax stone, at the head of the North Branch of the Potomac river, and running thence due north to a southern line of Pennsylvania as surveyed in the year 1859 by the commissioners appointed by the States of Maryland and Virginia in conformity with the laws passed by the said states for that purpose.

Section 3 appropriated \$10,000 "for the payment of the State's proportion of such expenses as may be required to complete the survey and record of said line." &c., &c.

MICHLER LINE MARKED BY MARYLAND.

Mr. Lee as commissioner of the State of Maryland in the summer of 1870, employed two surveying parties to "continue tracing the line between the points determined by Lieut. Michler, &c., and to mark the line at every prominent point and on an average about every half mile." &c., &c. And in August of that year he reported to the Governor of Maryland that the work was about completed. See the correspondence of Commissioner Lee, a copy of which is filed herewith as above stated as "Exhibit K," and the State of West Virginia also files herewith as part of their answer a copy of the map made by Lieut. Michler marked "Defendant's Exhibit O," and in the message of Governor Hicks, of Maryland, to the Legislature at the January session, 1862, he says:

Report of the commissioners on the part of Maryland to ascertain and define the southeastern and northwestern boundaries between Maryland and Virginia are herewith submitted.

I am informed by the commissioner that the tracing and marking of the western line of the State from the Fairfax stone to the northern boundary of Maryland was completed the summer of 1860, the work was commenced in 1859, with the co-operation of Virginia in conformity with chapter 275 of the acts of 1852. The commissioners of Virginia failed to join in the completion of the survey, but it being a matter of great importance to Allegheny county that it should be no longer delayed, the commissioners for Maryland completed the work as required by chapter 385 of the acts of 1860.

Mr. Lee in his letter to Mr. McDonald, of May 8, 1860, says:

"In the act of 1852, in relation to retracing and marking the western line, Maryland yielded, as she has unfortunately too often done, the point of issue between the commissioners of 1815," &c.

DIFFERENCE BETWEEN MICHLER'S AND DEAKINS' LINES.

The report of Lieutenant Michler shows the meridian line run by him strikes the Pennsylvania line about three quarters of a mile west of the old line run by Francis Deakins, which he says is that "generally adopted by the inhabitants as the boundary line," and he further says that if this line "is adopted it will cause great litigation, as the patents of the lands call for the boundary as their limits."

MARYLAND CLAIMS TO MICHLER'S LINE.

It will be seen that between the Michler line of 1859 and the Deakins line of 1788 there is a triangular strip of land having its apex at Fairfax stone and its base, three-quarters of a mile in length, on the Pennsylvania line, on an altitude of thirty-seven miles.

The state of Virginia has granted patents for lands on the west of the old Deakins line, and those claiming under these Virginia patents have held up to said Deakins line. After the Michler line was run and marked the citizens of Maryland began to claim the right in some instances to extend their holdings up to the Michler line, and in others to take up the land between said Deakins and Michler lines. This has led to many disputes and to some serious conflicts and litigation as Lieut. Michler predicted it would.

Ever since said Michler line was run and marked as aforesaid, the State and people of Maryland have claimed and insisted that it

was the true boundary line between the States. And ever since the passage of the acts of 1852 by the Maryland Legislature has there been any claim put forward by or on behalf of said State that the meridian of the South Branch was the boundary line or that any other line was the true boundary except the Michler line, until the bill was filed in this suit by the attorney general of Maryland.

Physicians Must Register.

A law passed by the Legislature at its late session provides that they shall be registered by the first day of July.

The law in question says that any person who shall practice medicine or surgery in Maryland after the date named without being registered in the manner prescribed shall be fined not less than \$10 nor more than \$200 for each offense. It amends the law passed in 1892, which provided for the licensing of applicants to practice medicine and surgery after they had passed an examination before a board of medical examiners. This feature is retained in the new law, which provides, in addition, for the registration of physicians and surgeons practicing before June 1, 1893.

Commissioned surgeons of the United States army, navy or marine hospital service, physicians and surgeons in actual consultation from other states, persons temporarily practicing under the supervision of a medical preceptor or rendering gratuitous services in an emergency and midwives are exempted from the provisions of the law.

Physicians and surgeons of the State are required to be registered in the Circuit Courts of their respective counties. Those who were admitted to practice since June 1, 1892, are required to file with the clerk of the court a license from one of the medical boards of the State. Those who were practicing prior to that date may be registered upon making affidavit to that effect in their application for registration. The names are recorded in a book kept for that purpose.

Loaves.

Spring is here at last.

Most of the farmers are through planting corn.

Mrs. Henry Albright, of near Craneyville, is visiting friends and relatives in and about this place.

Mr. and Mrs. Franklin Suter were the guests of Mr. Noah Pysell.

Mr. Samuel Ferguson and Mr. Samuel Butler, who have been farming the Ferguson farm near this place returned to Oakland Saturday last.

Mr. Jerome Dewitt was the guest of Mr. John Wilburn Sunday last.

Miss Maggie Cuppett, of Friendsville, is visiting her sister Mrs. E. Custer.

Our Sunday school is progressing nicely under the management of Mr. George Bishop as Superintendent.

Mr. Freeman Dewitt was the guest of Mr. W. M. Callis Sunday.

A young man by the name of Johnny has recently disappeared. We suppose he has gone to join Coxe's army.

We would like very much to hear from the Bittering correspondent.

Dentistry.

Dr. I. L. Ritter will be at Accident Monday, May 14, Johnstown, Tuesday, May 15, Craneyville, Wednesday, May 16, prepared to do all classes of dental work. Teeth extracted without pain. 9-1t

Elder-Delayed.

Weather very nice.

Farmers busy getting in their spring crops.

Master Earnest Schlossnagle, of near Accident, was visiting at Isiah Friend's a few days last week.

Walter Coddington is erecting a new dwelling house at this place.

Mr. Arthur DeWitt, of Hayes, accompanied by his sisters Misses Sadie and Vesper, were calling on friends in this vicinity Sunday.

Rev. N. Hart preached a very interesting sermon to a large and attentive audience Sunday evening.

We are sorry to hear of the death of Mr. Morgan Conway formerly of this place, but resided for the past few years near Uniontown, Pa., where he died April 30th. We extend our sympathy to his bereaved family.

Elmer S. Green and family were visiting T. M. Conway Sunday.

We are hearing a great deal of talk about a new school-house at this place and hope that it will take a more substantial form than talk as we are in need of a new house for the reason that the pupils can not keep comfortable and also because the house we have at present is not suitable for the purpose of school. Give us good houses and the teachers will give us good work.

Friends Brothers are very busy at Friendsville erecting a ware-house adjoining their store room.

WHITE ROSE.

Ripans' Tablets relieve nausea.

THE REPUBLICAN.

OAKLAND, MD., THURSDAY, MAY 17, 1894

NUMBER 10.

VOLUME 18.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your wool to Sincell Bros. Sincell Bros., are buying wool at high prices.

Don't fail to decorate your house on the 30th.

Sincell Bros., are paying big prices for wool.

Sincell Bros., pay more for wool than other merchants.

Mr. Scott Burkham, of New York, arrived in Oakland Tuesday night and is a guest at the Bosley House.

Mr. Chas. J. Newman, the Railroad street confectioner, was in Terra Alta for a few hours on last Sunday.

Rev. Wm. E. George, of Deer Park, was in the city Tuesday on business.

Mrs. Silas Shirer and two daughters, of Oakland, were the guests of Mrs. G. A. Bolden on Monday.—Oracle.

Renewed efforts are being made to collect funds for a suitable monument to Francis Scott Key in Frederick city.

Mr. James D. Hamill has rented Mrs. Totten's house opposite the postoffice and will move into it with his family.

Miss Agnes Hart, of Oakland, Md., is visiting her sister, Mrs. C. A. Bolden, North street.—Meyersdale Commercial.

Our old friend, Dr. W. H. Ravenscroft, of Elbon, Pa., was in Oakland Tuesday shaking hands with his many friends.

If you have not seen the line of gentlemen's shirts at Townshend & Son's you have missed it "largely." At hard time prices.

FOUND.—Finest line, latest styles and best bargains in crush, straw and derby hats in town at Townshend & Son's. 10-4t.

A new time table will go into effect Sunday on the B. & O. Some important changes will be made in the running of passenger trains.

The Rev. Geo. W. Kepler will preach a sermon on Odd Fellowship at St. Paul's church on Sunday morning, May 27, at 10:30 o'clock.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

The citizens generally are urged to attend the meeting on to-morrow night at Sturgiss' hall for the purpose of organizing the Fire Department.

Mr. and Mrs. Jacob Feik, of near Accident, were in the city on Tuesday. From here they went to Swanton to visit relatives for a few days.

Gold, silver, nickel, aluminum and steel spectacles and eye-glasses carefully adjusted at lowest prices at the Commercial Hotel May 17th and 18th.

Dr. E. H. Bartlett, the newly appointed postmaster at Oakland, assumed charge of the office yesterday morning, his commission having arrived Tuesday.

The venerable Thomas Bosley departed from Oakland Tuesday for Lee county, Illinois, where he will remain during the summer visiting his daughter.

Lately opened, complete lines of gents', ladies' and children's shoes, any style, Oxfords and Bluchers, tan and black. Prices rock bottom, at Townshend & Son's. 10-4t.

You will find a full line of dress goods, palm-leaf crepes, dotted swiss, ginghams, bunnings, etc., all colors, at Townshend & Son's 10-4t.

Spectacles and eye glasses carefully adjusted and at lowest prices by our eye specialist, who is now at the Commercial Hotel, Oakland, Md. The Globe Optical Co.

Mr. H. A. Custer, of Friendsville, who recently embarked in business at Knottsville, W. Va., passed through here Tuesday on his way home to visit his parents.

The Globe Optical Company, of Washington, D. C., have a temporary office at the Commercial Hotel. Examination free by their graduated eye specialist. May 17th and 18th.

The annual meeting of the German Baptist Brethren will be held at Meyersdale, Pa., on the Pittsburg Division of the Baltimore & Ohio Railroad, commencing May 24, 1894.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

Mr. Thomas B. Wiley, of Bittinger, brought to Oakland Tuesday the remainder of his maple sugar crop consisting of over sixteen hundred pounds which he sold to merchants in town.

Cornelia Chapel, near Bayard, will be open for public worship on Sunday, May 20th. The Rev. John P. Hubbard will preach at 10:30 a. m. A cordial invitation is extended to all to attend.

Prof. Chas. D. Smith closed his school here on last Friday and will leave sometime this week for his home in Baltimore. He will return about the 15th of June and open the Normal here.

At a congregational meeting of the members of St. Mark's Lutheran church Sunday night it was decided to sell the parsonage to Mr. E. J. Fringer for the sum of \$1,500, who will move here and occupy it.

Just after the hour of noon Sunday Dr. T. DeWitt Talmage's big church in New York city was burned to the ground incurring a loss of over a half million dollars. The trustees of the church decided to rebuild at once.

The members of Lily Division No. 9, U. R. K. of P., are requested to report at their hall on Wednesday morning, May 30, at 10 o'clock sharp in full dress uniform to participate in the Decoration Day exercises on that day.

Dr. W. N. Berkley of McAule & Berkley, Frostburg, will be at Accident May 29; Friendsville, May 30; Grantsville, May 31, to treat catarrh and diseases of the eye, ear and nose. Eyes examined for glasses. 10-2t.

Mr. John Shartzler has moved to Oakland the remaining stocks of goods of three different stores and will sell them out for less than their cost. Auction every Saturday afternoon and night until goods all disposed of.

Mr. Daniel L. Conaway will open an ice cream parlor in the Felty building on Alder street in a few days, where he will be pleased to serve all who may give him a call. Ice cream in any quantity will be delivered to private residences.

Owing to a severe cold Rev. Dr. Alexander was rendered unable to conduct services in his church last Sunday night. The usual services will be held both morning and evening next Sunday at 11 a. m. and 8 p. m. The subject of the evening discourse will be "Hannah."

Mr. John Kness, of Davis, has been in Oakland and made arrangements with the Oakland Candy Co. to establish a bakery. An oven will be erected at once and fresh bread, pies, cakes, etc., will be delivered daily to the patrons of the above firm.

On Friday night last the post-office at Elkins was broken into by unknown burglars, and robbed of \$75 in cash \$550 worth of stamps and several registered letters. It is said a gang of thieves have been operating in the vicinity for some time past.

Messrs. Michael & Pogue, of the Park, were in Oakland Monday and left a large order for job printing with us. They are the gentlemen who will conduct the sanitarium at the Park this summer, having secured Mrs. Kate V. Hardy's cottage for the purpose.

A lady of Tooleys, Ia., was very sick with bilious colic when M. C. Tisler, a prominent merchant of the town gave her a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says she was well in forty minutes after taking the first dose. For sale by Oakland druggists.

Mr. C. A. Wilt, of Franklin, Pa., who has been here several months conducting the photographic business for Lear & Co., started for his home Tuesday morning. During his sojourn with the people of Oakland Mr. Wilt made many warm friends who will be sorry to learn of his departure.

The management of Deer Park and Oakland summer resorts have secured the services of Nayal Academy band, Chas. Zimmerman director, to play during the coming season, in place of Prof. Ross Jungnickel's Baltimore orchestra which has been doing service for a number of seasons past.

Mr. John T. Watson, of Onancock, Va., a graduate of the College of Pharmacy of Baltimore, is in charge of the Mountain Lake Park drug store. Mr. Watson is a young man who came to the Park well recommended and will no doubt make a success of the business there this summer.

Dr. S. F. Scott, Blue Ridge, Harrison county, Mo., says: "For whooping cough Chamberlain's Cough Remedy is excellent." By using it freely the disease is deprived of all dangerous consequences. There is no danger in giving the Remedy to babies, as it contains nothing injurious. 25 and 50 cent bottles for sale by Oakland druggists.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

FEIK.—Jonas Harrison, aged 5 years, 6 months and 11 days, son of Mr. and Mrs. Jonas Feik, of near Accident, died on May 9th of diphtheria, and was buried the following Friday in the Dunkard cemetery near Accident. The funeral services were conducted by Revs. Samuel Miller and David Hochstetler.

Prof. A. L. Saltzstein, jr., of Washington, a graduate of the Imperial Optical Institute of Germany and the Philadelphia Optical College, is in Oakland representing the Globe Optical Co., of Washington, D. C., and will remain here until tomorrow. Consultation on the diseases of the eye can be had by applying at the Commercial Hotel, where the professor has his rooms. Hereafter he will make regular monthly visits to Oakland.

Oakland District Conference will be held at Rowlesburg, June 19th-21st, commencing at 2 p. m., on Tuesday, and closing on Thursday night. Programs have been sent to all the pastors in sufficient quantity to supply their delegations. If any fail to receive them, others will be sent by applying to G. W. Kepler, Oakland. The preachers are requested to send the names of all delegates to be entertained to A. B. Rohrbaugh. A full attendance is urged.

Many persons whose eyesight is defective, and who would receive much assistance and comfort from the use of carefully selected and adjusted glasses, are doing their eyes great injury through not realizing that their vision is so imperfect. Our graduated eye specialist is here at the Commercial Hotel for two days, May 17th and 18th, and we invite you to call and have your eyes examined, free of charge. The Globe Optical Company, Oculists and Opticians, Metzger Building, Washington, D. C.

The new Young Men's Christian Association building in Cumberland was dedicated on Tuesday evening with appropriate exercises. The address of the evening was delivered by Mr. John V. L. Findlay, of Baltimore. The present association was organized December 10, 1888. Up to the present time it had been renting property for its purposes. The new building is well arranged for the purposes of the association and is a fine structure.

Do you ever suffer from weak and defective eyesight? It will cause your head to ache, your eyes will become red, watery, hot, painful and fatigued—the vision will be blurred. All this may be cured by the proper adjustment of glasses. Call at the Commercial Hotel where our Eye Specialist will be glad to examine your eyes and detect all errors of refraction. The Globe Optical Company of Washington, D. C., Thursday and Friday, May 17th and 18th, at the Commercial Hotel, Oakland, Md.

Persons who sympathize with the afflicted will rejoice with D. E. Carr of 1235 Harrison street, Kansas City. He is an old sufferer from inflammatory rheumatism, but has not heretofore been troubled in this climate. Last winter he went up into Wisconsin and in consequence has had another attack. "It came upon me again very acute and severe," he said. "My joints swelled and became inflamed; sore to touch or almost to look at. Upon the urgent request of my mother-in-law I tried Chamberlain's Pain Balm to reduce the swelling and ease the pain, and to my agreeable surprise it did both. I have used three fifty cent bottles and believe it to be the finest thing for rheumatism, pains and swellings extant." For sale by Oakland druggists.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seedling down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Dissolution of Co-Partnership. This is to give notice that the partnership of D. S. Custer & Bro., has this day been dissolved by mutual consent. The business of the late firm will be continued by D. S. Custer. D. S. CUSTER, Friendsville, Md., April 25, 1894. 10-3t*

DRAINAGE ALL IMPORTANT.

Unless Free From Water Good Roads Cannot Be Maintained.

Among those who have given the subject of road improvement careful attention there is a settled conviction that the good condition of any road depends upon a system of thorough drainage—a system which embraces not only the removal of the storm water which falls upon the surface of the road and the land adjoining, but also the water which filters through the ground. The latter, if allowed to percolate into and through the subsoil underlying the roadbed, will render the travel way soft and springy, often affecting the compacted surface of the road, so as to cause it to break up, or, in other words, "the bottom drops out." The remedy is thorough drainage.

In fact, the basis of all road improvement in the country is the thorough drainage of the road surface and the foundation of the road embankments. In the experiments which have been made in road drainage by laying one or two lines of tile drains along the sides and parallel with the road the result has been so satisfactory that some persons have become entangled with this method of road improvement and conclude that in it there is a remedy for all the defects which may be encountered. But we are convinced that the best improvement of our highways will combine at least three essential features, which are:

First—A road embankment of sufficient height to be at least above overflow from extraordinary rainfall, and sufficiently crowning to shed the water readily, and wide enough to accommodate the travel and not of a greater width.

Second—That the road shall have open ditches on each side of sufficient capacity to carry all flood water from the roadway and from the lands adjoining into the nearest water course without hindrance. The surface or open ditches should have such a perfect grade that no water will find a lodgment along the line of the road on either side.

Third—That two lines of tile drains be placed parallel with the roads, one on each side, at the base of the embankment.

The underdrains should be laid at the depth of three or more feet. The size of the tile will depend on the length of the drain and the fall, but it is probable that they should not be less than 4 inches in diameter in any case, and as much larger as the needs may require. The three essential features named embrace two systems—the removal of the surface water speedily and effectually, the removal of the water of saturation remaining after the removal of the surface water and the prevention of the flow of soil water under the roadbed. The underdrains should have a uniform descent or grade to some natural stream or outlet where the water discharged will flow away freely and

at no time back up in the drain. The crowning of the road should be sufficient to cause the water falling upon the surface of the road to flow readily through the side ditches. If it fails to flow away and remains in the ruts and depressions, it will increase the amount of mud and the inconvenience of travel. Roads in such a condition should have good machines passed over them as often as necessary to make and keep the surface level.

It is a mistaken idea that an underdrain laid in the middle of the road will drain the surface of the road. The travel and the action of the water falling upon the road will so effectually cover the surface that no water on the road will find its way down to the drain thus laid. To the contrary, the horse tracks and ruts will hold water like earthen vessels until it is removed by evaporation or otherwise. Roads graveled and drained as proposed will cost from \$400 to \$500 a mile, but when done they will be good roads for 11 months and commendably passable the remainder of the year with a little timely repairing.

Where gravel and stone are not to be had at a reasonable cost we know of no improvement so satisfactory in all respects as the roads well graded and sufficiently drained. Where gravel or broken stone can be had, it will be found that the thorough drainage of the road as proposed will save half the gravel or stone that would otherwise be required to make a good road. A dry foundation to build upon is the most important factor in road construction. Tile drains may be used to intercept water percolating through the earth of the higher ground adjacent and likely to interfere with the road, or springs or secret places under the roadbed may be drained out with tile so as not to interfere with the embankment. After a road has been put into good condition and thoroughly underdrained nothing need be done except to keep the surface of the travel way smooth and the open ditches free from any drift accumulations.—J. J. W. Billingsley.

Dentistry. Dr. D. O. McKinley will be at Friendsville May 14th and 15th; Hloves, 17th; Mellerry, 18th; Oakland, 21st and 22d; Deer Park, 23d and 24th. Teeth extracted without pain. 8-3t

Bucklen's Arnica Salve. THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-1yr

A New Millinery Store. I have just opened a new line of millinery goods, flowers, ribbons, laces, straw goods, fancy goods and notions. Prices reasonable. Store on Oak street near the Davis bridge. MARIE CUNNINGHAM.

Put the Dollars Where They do the Most for You!

OAKLAND, GARRETT CO., MD.

THE DOMESTIC POSTMAN.

The thing that gives a married man the trouble of his life And makes him weak and weary and afraid to meet his wife, Is rascally underling to deliver, without fail, Her endless correspondence daily given him to mail.

In spite of all his efforts to remember her commands, Like tying knots in handkerchiefs, and strings upon his hands, In spite of solemn promises to do it right away, He never takes the letters from his pockets all the day.

At night he brings them home again; unconscious of his crime, He takes her kiss he don't deserve, and at the supper time, When suddenly remembering the letters in his coat, A choky, strange sensation takes possession of his throat.

His jaunty manner changes and his spirits have a chill, "What are you, Ducky Doodles," says his wife, "are you ill?" "O, no," he gasps, and then to keep the dreaded question back, He adds: "O, say: I saw to-day the loveliest sea-sickness cure."

It doesn't work because his wife can read him like a book: "John! Have you mailed my letters?" comes the question with a look That holds no pleasure for him if he hasn't. In distress He blushes, hems-a-haws awhile—then boldly answers, "yes!"

"John! you have not," I know it. (John is red: red than a fire.) "I sat up late to write it. I declare! It is a shame." Then rushing to the back-rack to his overcoat, She finds her morning letter—and a lot she gave before.

Poor John, with guilty features, tries his hardest to explain: Caught in a lie he humbly vows he won't forget again. But all the same he does it, and in consequence his life Is filled with tribulations and a fear to meet his wife.

—H. C. Dodge, in Goodall's Sun.

WATER LILIES.

BY T. FEATHER.

(Copyright, 1904, by the Author.)

"Effie! Effie, are you going to the picnic this afternoon?" said pretty Minnie Astor, as she rushed into her cousin's room, flushed with pleasurable excitement, one morning in August.

"I don't think I shall," she replied. "I have nothing fit to wear."

"For shame, Effie. Why, your poor cousin here has only two dresses, and even those have such a lot—a whole wardrobe full."

Effie shrugged her shoulders as she gazed into the mirror with a discontented expression on her face, and answered: "Well, I have worn them until I am tired of them."

"Surely you could wear one of your dresses again," said Minnie.

"Perhaps I could; but don't bother me. I hate to be bothered when I have nothing to put on that I have not worn before."

She glanced into the mirror again with the same expression on her face, and as she watched the masses of wavy, light hair fall around her as she brushed it, her countenance cleared. She thought surely Charlie Emmet could not think her cousin Minnie prettier than herself. Then she turned to Minnie.

"Yes; I will come this afternoon," she said.

Effie Stott certainly was a pretty girl, or rather would have been if she could have entirely rid herself of that dissatisfied and selfish expression which she habitually wore. She rarely harbored any pleasant thoughts, except when she was trying to please one or other of the sterner sex.

She did not improve her position with the men by her undignified scorn. They appeared to be fond of talking to her to a certain extent, but she never made any lasting impression, save to cause them, on close acquaintance, to fight shy of her.

Minnie, on the contrary, was a high-spirited girl, with a laughing expression that seemed to indicate that she

had not a care in the world. She was about two and twenty years of age, an orphan, and she had resided ever since she could remember anything in her aunt's house. Unlike her cousin, she was not wealthy, her total income being only sufficient to keep her from absolute want. However, she was quite contented with her lot, and did not think it a very hard one, after all.

Everybody liked Minnie Astor, ex-

cept her girl acquaintances, many of whom detested her, chiefly, it must be admitted, because she was a general favorite with the opposite sex. The men liked her because she was so natural in her manner, and they could talk to her without being made aware that they were too highly appreciated. Proportionately with the increased admiration which was vouchsafed her by her male friends her feminine acquaintances were the more jealous.

"What shall you wear, Minnie?" asked Effie, presently. "Are you going to wear your white or your gray dress? I wouldn't wear my white if I were you. I think it will rain." Inwardly she hoped it would rain, and that Minnie would wear her white dress, so that she would appear to considerable disadvantage in her wet and bedraggled condition.

Minnie's dresses were not numerous. When she asked her cousin if she intended to wear her white or her gray, Effie had mentioned the only two gowns the girl had to wear. The white one had been washed goodness knew how many times.

"I shall wear my white one, and some flowers with it," Minnie said, turning to go.

"Oh, Minnie, you might come and help me to choose a dress for myself," called Effie, as her cousin was leaving. "Certainly, Effie, with pleasure." And she wheeled about, and together the girls began to inspect the wardrobe.

"Why, Effie," said Minnie, "you have heaps. Here is your fawn lace one. How will that do?"

Effie turned up her nose even higher than it was—a feat one would have supposed to be almost impossible without turning it over her head altogether, as she replied:

"No; I never shall. What, wear one I have worn at a dozen garden parties this summer? Not if I know it!"

"Oh, Effie. Why you only wore it at the Browns' fête and at the bazaar!"

"Well, everybody has seen it, haven't they?"

"Nonsense. It looks beautiful, too." "I shall wear it, anyhow."

"Then there is this pale green." "That won't do, either."

The inspection went on for some time, and finally a sweet-looking pink muslin was decided upon. Effie thought that surely, in this dress, she would be able to keep Charlie's attention all the afternoon.

Two o'clock arrived and the picnic party were all present at the rendezvous, with the exception of Minnie. The girls voted for going straight away, but the gentlemen were of an other opinion and refused to proceed without her. This settled matters, and presently Minnie came hurrying up wearing her old white dress, and a large straw hat, trimmed with white ribbon and natural pink roses, and carrying a pretty bunch of roses in her belt. Flushed as she was with her hurried walk she looked the very picture of health and beauty. Jealous eyes, even, could not refuse her the palm.

Effie had, however, by this time secured the attendance of Charlie Emmet, and did not notice the appearance of Minnie at all. She was quite contented with her own escort, and even the latter's added charms were powerless to make her jealous so long as his attention was fixed upon her.

Charlie was a splendid specimen of an Englishman. He was not what anybody would exactly call handsome, though he could not be called plain. He stood five feet nine inches in height, and had a distinguished appearance which could not fail to attract and captivate. Moreover, he was the reputed possessor of a fortune in itself sufficient to place him above the vice of envy. Consequently he was surrounded with the flattery of anxious mothers and voracious maidens. Minnie he had seen some time before, and he had been a little piqued by her evident insensibility to its advantages.

It was a new experience to him, and one calculated to increase, if she had but known it, his growing love for her. To-day he had determined that, come what might, he would speak to her and obtain an answer to an all-important question.

On arrival at Winsford Towers the party alighted, and luncheon was served in the hall except pretty Nellie Lansdowne and Frank Gregory, who had long been known to be numerous fathoms deep in love with each other. They dropped out of the line very quickly and retired to a quiet spot in the wood. How they spent their time it boots not to inquire.

The afternoon was warm and sultry, and the coolest place seemed to be on the water. That once reached the boat was rapidly filled. Effie had to be helped into it by Charlie or she "would never have dared to go to the lake at all," she said. Minnie, on the other hand, helped herself, and was seated in the boat before anyone had the chance to come to her aid.

The oars were got out and a shady part was reached, and there, to the ladies' delight, were some water lilies. To please them the gentlemen were all on their feet to obtain them. Effie, by a crafty maneuver, gained possession not only of those she had picked for herself but of those which Charlie had got for Minnie, whilst she was only able to get a solitary one. Charlie would have picked some more, but there were none in sight. Minnie, though sorely disappointed, refused to show that she cared, and laughingly declared that she did not want any more than she had.

Effie held to hers in her usual selfish fashion and declined to part with a single flower.

The boat floated upon the surface of the lake for some time without the aid of the oars, when they came to another cluster of lilies. Minnie saw them first, the others being too busy talking

or idly lying down in the boat to notice them. She leaned over, and in her attempt to pluck a fine specimen overbalanced herself and fell into the lake. All was confusion immediately. Charlie alone retained his presence of mind, and diving into the water minus his coat and boots he endeavored to rescue her.

This he found some difficulty in doing. He struck out in Minnie's direction, but she had floated some little distance away, and his first snatched at her dress was futile. At last he managed to seize firmly hold of it whilst the boat was being brought toward them.

With some difficulty Minnie was drawn on board, but Charlie swam to land and leaving Minnie in the care of the others he himself ran to a farmhouse near and obtained a blanket in which to wrap her, and requested the farmer's wife to get a bed ready for her. Then he hurried back and reached her just as she had returned to consciousness.

Quickly folding the blanket round her, with the aid of Fred Lancaster, another member of the party, carried her to the house. Then, and not till then, did Charlie think of himself. He was offered a suit of corduroy which belonged to the farmer's son, and he quickly divested himself of his wet garments and, encased in these, he returned to his companions, when he heard the news that Minnie was seriously ill and a doctor was sent for. Little, fussy Dr. Davidson soon arrived and attended to the girl. It was some weeks, however, before she came round sufficiently for Charlie to see her, and he had several times been to the house ere he was allowed that privilege.

When he was found her looking back the ghost of her former self. She had been allowed to get up for the first time for a few hours. Though she was flushed with excitement at the idea of the interview, Charlie was unpleasantly struck with the alteration that had been made in her countenance by her weeks of illness. He was about to make an observation to that effect when she interrupted him with: "Oh, I am so glad you have come. I have so wanted to thank you for saving my life. I do not know how I can repay the immense service you have done me."

"Shall I tell you?" asked Charlie, as he reached her side.

She looked at him and replied unthinkingly: "Yes." Then she blushed as she saw his earnest gaze. Her eyes sought the floor whilst he took a seat beside her, and holding one of her hands in his, he said: "Give me yourself."

"I thought it was Effie you preferred," she said.

"Effie! Why she is nothing but a dressed-up doll. A fellow would tire of her in a week. It was you that I cared for all along, and if you do not marry me I shall never marry at all."

Overcome by the awful fate which might overtake him in the event of her refusing, Minnie consented to become his wife.

The shades of evening fell ere he left her side, the time going rapidly as these two confessed again and again their love for each other. After this it did not take Minnie long to recover her health and strength, for there is nothing like happiness for restoring bells. In a few weeks the wedding bells were pealing, and Effie, finding she could not be bride, made up her mind to be the next most important personage, chief bridesmaid.

Her fate was not so happy as Minnie's, for she had long determined to marry for money and position. She did marry for both, and obtained them through an old peer, but she rapidly lost her beauty, becoming every day sower and sower, until in less than two years she would have been voted an old woman by those who did not know that she was barely twenty-four.

Minnie and Charlie, happy in each other's love, which now they shared with a little heir, grew younger every day, until their friends were almost ready to believe that they were years younger than when they were married.

Taking Him Down.

The irascible guest had been sitting at the hotel table about six minutes, and no waiter had come to him. He equirred around awhile, and when he caught sight of the head waiter he called him up.

"Here," he said, ill-naturedly: "I've been waiting here for half an hour for somebody to take my order, and nobody has come near. What I want to know is if I'm going to be waited on or not?"

"Certainly, sir," responded the head waiter, most politely.

"I want to know why I've been kept waiting so long?" he went on, determined to make it as unpleasant as possible.

"Really, sir," apologized the head waiter, "I can't tell. I only came on watch ten minutes ago, and the man who was on duty when you came in half an hour ago has left and won't be back until this time to-morrow."

The guest knew the head waiter was lying to him, but somehow it occurred to him that he was not altogether spotless himself, and he shut up.—Detroit Free Press.

MICROTOMY A FINE ART.

Though the Microtome is but Little Known to Many.

If one would see some microtome work, let him seek a medical student possessed of a microscope. The same will show him a number of glass slips, three inches long, perhaps, by three-quarter wide. These will be labelled: "One, Muscle," another, "Scientific Nerve," a third, "Scalp of a Child," and a fourth, "Cat's Liver." Such names do not lead one to anticipate art and beauty, and this makes the art and beauty all the more charming. In the center of each of these slips, covered by an extremely thin circular disk of glass, he will see a little slice of matter, the size, perhaps, of the head of a pin, and so small, and so thin as to be altogether transparent. This is, let us say, your cat's liver, etherized by the microtome. Under the microscope it has the air of a Madonnas of the old masters wear. The cells of the liver form an interlacing tracery of golden pink, and the diverse blood vessels, of which there are three sorts, appear, if injected, as branching shapes of crimson, blue and other sweet and pure colors, even such as the Madonnas of the old masters wear. The scalp may be even more delightful, with its hairs like stout, brown musts, a greenish cuticle and sunset-tinted sub-dermal tissue below.

It is obvious that with such an infinite variety of material the microtome must needs have a great variety of instruments. Some things he cuts with a common razor in his hand; such must needs be of a firm consistency, neither flabby nor brittle. Some again—larger things—he cuts with a plane.

Little things that he cannot hold he holds in his hand, or the tip of the elder, and so gets a fingerful that may be grasped and cut. A soft substance, such as human muscle, he hardens by the immersion of a lump of it in a suitable fluid or he takes it fresh and almost living, and freezes it firm upon a metal slab by means of ether. A rock is cut into thin slices by a lapidary's wheel, a rotating disk of steel made keen by rubbing diamond powder on the edge, and these slices are stuck to a piece of glass and gradually rubbed thinner and thinner upon emery powder of increasing fineness, and finally upon round emery.

How dainty things like sand grains the microtome overcomes by imbedding in hard substances. He particularly dreads and rejoices over such brittle substances as coal. One would expect mere blackness of coal even in its thinnest, but here, on certain coal, reveal myriads of little flattened cells of stony orange or lemon-yellow color, the spore shed long since by the trees which perished to form our coal seams.

There are in London perhaps half a hundred or more human beings who live by this making of thin slices from solid things which, when cut, reveal myriads of little flattened cells of stony orange or lemon-yellow color, the spore shed long since by the trees which perished to form our coal seams.

He relates a gruesome story of a tone of pathos, how this Mrs. Webster was a landlady of his who died suddenly—"poor old lady!"—and was "post-mortemed" by a confidential friend. "So I took these little mementoes," he says, waving his hand at the shelf. It is a grim and sordid fate for a landlady that she should be post-mortemed by her own lodger and retained at 6d., 9d. and 1s. a slice, according to the choiceness of the parts. But there are those who suspect our microtome of having obtained his human material in a legitimate way from the dissecting room, and having created his Mrs. Webster for literary effect.

Still, the jumble of matters in the corpiant little bottles upon his shelves remain old enough: pickled organisms from the deep sea are side by side with scraps of plant, root and stem, and the mortal remains of a pet puppy, while the bones of a dead mouse are in a jar of Borneo shreds a bottle with some cubic inch of substance that was once part of the vestiture of a human soul in a London hospital. Sooner or later they will come to the knife edge and the glass slip. Our microtome is indeed on the level of Shakespeare. All being paid its tribute to his art; he makes it clear and brilliant for us, using his stains and media not to hide but to display, making truth truer and the visible plain. His work is a veritable microcosm—a summary of the world.

The ordinary microtomeists who cut sections for the medical students, as a rule, do little in the direction of cutting rocks. This has a special technique, and is practiced chiefly at the greater geological schools—at the Royal School of Mines, for instance. It is almost impossible to convey an idea of the appearance of sections of some granite rocks when seen in polarized light. Let the reader think of the tints of a film of gas refuse floating on water, of the spectrum of a gas by a glass prism, of the opal, of the mother of pearl, of old stained-glass windows, of Burne-Jones at his best. All these, and more also, will be seen in such a rock as Pierite or Dunite. A day will come when artists will seek these things and learn a thousand delights of coloring from their study. For microscopic sections may be collected for their beauty, for their technical excellence, thinness and so forth, or their historical interest, and for their scientific importance.

—Pall Mall Budget.

FIRESIDE FRAGMENTS.

—When you are hurried and a postage stamp will not stick, moisten it and rub it on the flap of an envelope and then quickly put it in its place.

—A woolen rag saturated with boiled linseed oil is recommended for removing scratches from a highly polished surface, which may afterward be varnished with shellac dissolved in alcohol.

—Parsnip Fritters.—Scrape, split and boil till tender. Mash smooth and add one beaten egg, one teaspoon of flour, pepper and salt to taste, and milk for a smooth batter. Fry in clear fat and drain on brown paper. Serve hot.—Housekeeper.

—An appetizing spring salad is made from cucumbers, white onions and green pepper. Chop the cucumbers, and to each one of medium size add a teaspoonful of chopped green pepper with the seeds removed. Dress with a French dressing. Serve with fish or broiled beefsteak.

—Boned Leg of Mutton.—Have the bone taken out of a nice fat leg of mutton. Make a rich stuffing of bread crumbs, yolks of hard-boiled eggs, chopped liver, a little chopped onion, butter, a little sage, sweet marjoram, black pepper and salt. Fill the leg with this forcement and bake, basting often.—Boston Budget.

—A Good Dessert.—Soak one-half teaspoon of tapioca in warm water until clear. Place in a saucepan with one and one-half pints of water, one-half cup sugar and scant cup of washed raisins. Cook until raisins are soft. When cool add one-half teaspoonful lemon essence. Especially good eaten with cream.—Prairie Farmer.

—Biscuits.—For this biscuits take half a pound of flour and the yolk of one egg. Beat the egg and add it to the flour; then pour in sufficient milk to make a very stiff paste. Beat this well and then knead it. Roll out the paste as thin as possible, then cut it into nice sized biscuits. Bake them for about twenty minutes in a slow oven.

—Chocolate Pudding.—One pint of milk, one pint of bread crumbs, one-half cupful of sugar, the yolks of three eggs, five tablespoonfuls of grated chocolate. Scald the milk, add the bread crumbs and chocolate. Take from the fire, add the sugar and beaten eggs. Put in a pudding dish and bake fifteen minutes. Beat the whites with a tablespoonful of sugar, spread over the pudding and brown. Serve cold.—Good Housekeeping.

—To Bake Cabbage.—Cook a cabbage perfectly in salted water. Take it up with a skimmer, so as to drain out the water as much as possible. Put it into a dish, cut it up, season to your taste with butter and pepper, adding a little more salt if necessary; then add a cup of rich sweet milk—less, if the cabbage is small. Put the whole in a baking dish and cover the top for a quarter of an inch with rolled crackers or fine bread crumbs, on which you put minute pieces of butter here and there. As soon as it browns it is done. Serve in the same dish. This is the most delicious way cabbage was ever cooked. The rolling crackers are put over it to absorb the moisture.

—Fluffy Tresses Reign.

This necessitates fortnightly Shampoo and Eternal Vigilance.

For the nonce fluffy tresses are the style.

Women were wont to brush their hair down; now they brush it up, comb it up and blow it up with a fan to produce the effect of thistledown and corn tassels.

The hair is first done up dry, then crimped all over, and finally dressed, the caprice being suggested by the style of the hat.

There is a quantity of bottled stuff for the head toilet, but by all odds the best, cheapest and most satisfactory is lavender water. The alcohol, which is the "body" of all the toilet waters, refreshes, if it does not entirely cleanse the scalp; it stimulates the action of the glands, and as it evaporates, the offensive odors of perspiration are carried away. There is just enough oil and fragrance in the lavender flowers to "dress" the hair, and the hair is allowed to dry, without combing or brushing. It leaves the hair dry, glossy and comparatively sweet, which nothing else will do.

Violet water, too, makes a nice shampoo, but it lacks the essential oil of the lavender, and, moreover, it is not as refreshing.

These waters are only recommended for well-kept heads of dry, coarse hair. For the vast forty thousand who have not the conveniences for good grooming and brushing, bay rum will be found excellent. When the water is all over the scalp, rack the hair with a coarse comb and then brush until the head is red, hot and clean, and the hair is dry and fluffy. For naturally oily tresses this is one of the quickest methods of dry shampooing.

A little fine scent of violet, lilac, hyacinth, sandalwood, valley lily or Egyptian lily goes a long way as a hair cleanser. A tablespoonful is enough to perfume and bring out the natural gloss of the hair, but it is not cleansing nor to be used on oily hair.

In the uptown boarding-schools, gratifying attention is given to personal refinement as well as personal culture. One of the toilet hints on which emphasis is laid with red ink, is two shampoos a month for every girl in the dormitory.

The mistress of the bath does not think that a lady can give her head the care it should have, and the preceptress agrees with her. Every fortnight a professional lady's maid goes to school, and each fair head gets one hour's time and fifty cents' worth of care-taking.

The cost of crimping, gas included, is about fifty cents a week. There is no danger of any of these beautifully groomed girls bleaching or dyeing their hair. They have been taught that clean hair is beautiful, and that no hair and no girl can be beautiful or refined without absolute cleanliness.—N. Y. World.

Mrs. Mattie Gupton, Dukedom, Tenn.

Gave New Life

Sick Headache and Neuralgia Cured by Hood's.

"Hood's Sarsaparilla has done me a great deal of good. I have been a sufferer from Sick Headache and Neuralgia nearly all my life. The pains had become so intense that my hands would cramp for hours so that I could not use them. The doctor told my husband there was little help for me. The different medicines tried had greatly deteriorated me. Since using two bottles of Hood's Sarsaparilla I have realized relief, so much so that I feel like a new person. Our little boy has been troubled with his throat but since taking Hood's Sarsaparilla soreness and hoarseness have gone and he is in better health." Mrs. MATTIE GUPTON, Dukedom, Tenn.

Hood's Pills assist digestion and cure headache. Sold by all druggists, etc.

Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made otherwise, at the risk of the sender. Address, THE REPUBLICAN, Oakland, Md.

THURSDAY, MAY 17, 1894.

Notice.

Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

The South Pays no Pension Money.

Mr. Hepburn, a member from Iowa, in a speech delivered recently, in the House, on the subject of pensions, says: "The late Confederate States do not in reality contribute one dollar to the payment of pensions. Of the \$150,000,000 internal revenue taxes the south paid less than \$9,000,000; of the \$177,000,000 custom receipts the South paid but \$4,000,000, and of the miscellaneous receipts less than \$2,000,000, so that the South contributes less than \$15,000,000 to the revenues of the government. "The South gets back \$9,000,000 of this in sugar bounty, \$5,000,000 in pensions and \$5,000,000 as a deficit in postal receipts. The South receives back \$3,000,000 more than it contributes. "Addressing the Southern members he concluded: 'You contribute not a cent to Northern pensioners—What difference does it make to you what we do with our own money?'

A Warning to Republicans.

The greatest danger to the Republicans this year is in the feeling of confidence, which seems to prevail everywhere, that the country is disgusted with the Democratic party. There is a feeling that the people will vote a Republican Congress into power as an expression of their discontent and indignation on account of the failure of the Democratic Congress. This feeling of confidence in Republican prospects has in it an element of danger which should be guarded against very carefully.

The New York Tribune more than a month ago published an article in which there were some suggestive figures, and which should be reproduced in every Republican paper. They are intended to show that the popular indignation at the Democracy, which undoubtedly exists through the country, does not necessarily mean Democratic defeat at the polls next November. It will only be by the hardest work and a solid massing of forces that the Republicans will be able to obtain a majority in the next Congress, for the Democrats have many advantages to start with. They have the power of the administration, the control of the machinery in many important states, and the additional advantage that they have so gerrymandered Republican states that it has been possible for them to elect in them a majority of the congressmen.

In the article referred to above it is shown that the Democrats start with 120 districts which it is almost utterly useless for the Republicans to contest, as their ballots will not be counted if they cast a majority of votes. This has been the case heretofore and always will be the case until a federal election law is passed that will guarantee a free vote and a fair count. The south will give certificates to these 120 Democrats without fail, excepting perhaps the four districts in West Virginia, the only state in the so-called solid south in which honest elections seems possible. After these 120 districts are secured the Democrats only need 59 votes to give them a majority of the house of representatives. Ten northern states have been gerrymandered by

Democratic legislatures, so that they can elect Democratic Congressional candidates though the states give large Republican majorities for state and national tickets.

This, then, is the situation which the Republicans have to face. Though it is true that there is popular indignation against Democracy, disfranchisement of Republicans in the south, unfair gerrymanders of northern states and the power of the national administration all comprise an advantage for the enemy which will be hard to overcome. It is not intended to discourage Republicans by calling attention to these matters, but rather to warn them against over-confidence. The duty of the party is plain. The nomination of strong candidates, an aggressive campaign, hard individual work and a full vote on election day can only accomplish a victory over the powerful combination arrayed against the people.

Weather Crop Bulletin.

The weekly report of the Maryland State Weather Bureau dated Tuesday contained the following: Western Maryland.—A good crop of strawberries is in prospect, and all kinds of berries promise large yields; there will be a few peaches, pears and apples. Wheat is beginning to head out, in most places, excellent. Oats are well started, but cool nights are keeping them back. Early-planted corn is coming up, some replanting was necessary on account of the heavy rains on the 6th; cutworms doing some damage. Grass is still backward, and from present indications the hay crop will be light; from some localities better reports have been received. Potatoes are growing well and, as yet, no beetles have been noticed. Peas are in bloom, and all garden truck is getting a healthy growth.

Baltimore.—Weather good the past week. Corn planting finished. Early planted corn and potatoes coming up. Apple trees in bloom. A good shower of rain on the 11th and some frost on the 12th. Cool nights are keeping the oats back.

P. P. LOHR.

Grantsville.—Weather too cool and dry for grass. Wheat doing remarkably well and oats well started. Apples in bloom and promise a fair crop. Strawberries look well; a few in bloom. A light frost on the 12th. J. S. MILLER.

Stonyside.—All crops except wheat suffering for rain. Plowing for buckwheat in progress. Corn about two-thirds planted. Ground hard and dry. J. G. KNAUER.

Mountain Lake Park.—Oats, potatoes and corn look well. No damage done by last frost, as it was very light. Rain greatly needed.

CHAS. J. BUNCE.

Thayerville.—Storm of 6th instant did much damage to fruit trees and fences. This week has been very good for farm work. Rain badly needed.

R. BECKMAN.

Maple Sugar Bounty.

A telegram to the Baltimore Sun dated at Cumberland Monday, referring to the bounty on maple sugar in this county says:

"Deputy Internal Revenue Collector Asahel Willison has returned from a trip to Garrett county to gather the returns from the maple sugar product of the past season. The returns show an output of slightly over one hundred and fifty thousand pounds, earning bounty of one and three-quarter and two cents per pound, according to quality. The total bounty this year will be about \$2,100. The product this year is short compared with that of last year, which then cost the government in bounty \$2,708. The farmers of Garrett county are paying greater attention to cereals of late and are now adopting more progressive ideas in tilling the soil, and, as a consequence, land that could have been bought at \$4 an acre a few years ago is now worth ten times that amount."

Colored Society Notes.

Miss Tina Curtis, who spent the winter in Martinsburg, has returned to Oakland for the summer.

Mr. William Gilmore, of Piedmont, is visiting his daughter, Mrs. Daniel Holt.

The Sabbath school met at the residence of Mr. W. H. Walker on last Sunday afternoon. The prospects for a good school are promising.

Mr. and Mrs. Chas. Washington were in Oakland Monday.

Mrs. Clara Coach, of Frederick City, arrived in Oakland Tuesday night. She expects to remain here during the summer.

Snakes.

A correspondent at Pea Ridge says that Mr. Noah Garlitz killed a snake that measured six feet in length and seven inches in circumference and thirteen pleasant eggs were found in it.

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.
T. Jay in Cumberland News.
OAKLAND, MD., May 4, 1894.

ADVERSE POSSESSION.
The State of West Virginia insists and claims the continuance uninterrupted and open adverse possession of and exercise of exclusive jurisdiction and control over all said territory south of said North Branch, and west of the meridian line drawn from the Fairfax stone to the State of Maryland line, and the colony and the State of Virginia for more than one hundred and fifty years; and the acquiescence of the State of Maryland therein as a full and complete answer and defense to the claims and pretenses of the State of Maryland set forth in her bill of complaint filed in this suit.

And the State of West Virginia asks that the court will give and accord to her the benefit of all the legal and equitable presumptions arising from the said long continued possession and exercise of jurisdiction and control over said territory and said laches and acquiescence of the State of Maryland.

MARYLAND ACT OF 1890.
The State of West Virginia further answering, says that the act of the General Assembly of Maryland under and by virtue of which this suit was instituted by the Attorney General of said State, being chapter 563 of Acts of 1890, and published along with the bill filed in this suit, did not authorize or direct the Attorney General to make such a claim as that contained in the said bill, and did not contemplate the assertion of the old claims of Maryland to go to the south branch of the Potomac as her boundary line, which had long since been abandoned by her. It simply provides, "That the Attorney General of the State be and he is hereby authorized and directed to take as speedily as possible such steps as may be necessary to obtain a decision of the Supreme Court of the United States which will settle the controversy between the States of Maryland and West Virginia over and concerning, and which will finally fix and determine the true location of that portion of the boundary line between said states, lying between Garrett county in the State of Maryland and Preston county in the State of West Virginia."

And so the State of West Virginia says that the Attorney General of the State of Maryland had no authority to bring this suit in the manner in which it was brought and that the said bill of complaint was filed without proper authority from the plaintiff the State of Maryland.

ACT OF 1890 RECOGNIZES THE NORTH BRANCH AS BOUNDARY.

And the State of West Virginia says this last named act of the Legislature of Maryland is of itself a recognition of the North Branch as the boundary line between the states and the Fairfax stone as a point in said boundary.

The provision of the constitution of the State of Maryland of 1871 authorizing the creation of the county of Garrett, and the act of 1872 by which it was created, both recognize the North Branch as the boundary line and the Fairfax stone as a point in said boundary as has been heretofore shown and this act confines the object of the suit authorized to be brought to the settlement of that portion of the boundary line between said Garrett county in Maryland and Preston county in West Virginia. This is the only line between the counties named in said act. And the real matter of controversy between the two States as to this line was and still is whether the old Deakins line of 1788 or the Mehler line of 1859 is the true boundary line of the States between said counties. And the intention of the legislature in directing suit to be brought was to obtain a settlement of this disputed boundary line and not to open again the controversy about the South Branch of the Potomac.

DEAKINS LINE THE BOUNDARY.

Now as to this line running from Fairfax stone to the Pennsylvania line the State of West Virginia respectfully insists and claims that the old line run by Francis Deakins in 1788 is and should be established as the true boundary line between the two States and that she is entitled to all the territory lying west of said line.

This line was run under the authority of the State of Maryland and is a duo north line. It was run by a competent and experienced surveyor selected by the State and doubtless the instruments used were the best obtainable then. The courses and distances of the military lots laid off by Deakins along the said line all call for this line as a duo north line as appears by the copies of said courses and distances filed herewith as above stated. The grantees of these lots took possession of said lots as they were laid

out and held under them only up to said Deakins line.

The State of Maryland prior to the running of said Deakins line had made some few grants for land which extended westward of said line as run by said Deakins. But after said Deakins line was run and established the State of Maryland never made any more grants of land lying west of said line.

VIRGINIA GRANTS UP TO THE DEAKINS LINE.

On the other hand the State of Virginia had, prior to the running of said Deakins line, made a number of grants for land lying along the meridian line, drawn from the Fairfax stone to the Pennsylvania line, which grants called for natural objects in the "Maryland line," and after said Deakins line was run the said State of Virginia continued to issue patents for the vacant land lying just west of and adjoining said Deakins line, calling for natural objects in said line, until the whole of the territory lying west of and adjacent to said line was taken up and patented by the State of Virginia, and the patents of said land claimed under said Virginia patents, and those claiming them, have claimed and held possession of the lands granted to them respectively up to said Deakins line as the true boundary line between Maryland, Virginia and West Virginia, and in this way the said Deakins line came to be adopted and recognized by the inhabitants and land owners along the same as the State boundary line and as the limits of their lands. No controversy arose between the holders of the Maryland military lots as laid out by Francis Deakins and the said Virginia patents, except in some instances, as to the true location of the Deakins line. The only other controversies that remained after said Deakins line was run were such as arose between persons holding under some old patents issued by Maryland prior to the running of the Deakins line for lands lying west of said line, and persons claiming under patents issued by Virginia for the same land. But these are few in number, and limited in the amount of land involved.

Communicated.

To the Editor of the Republican.

Please allow me space in your valuable paper to refer to a matter of interest, especially unto myself. The ways of many people are past finding out, and the ways of some people in this part of the country are doubly hard to find out. One is not always disappointed when misled by strangers but we expect good of friends.

About midway between this place and Frostburg is a farm-house termed the half-way house where many thrilling circumstances transpired during the stage days of the old national pike, and the present proprietor, who is none other than one of the honored members of the Board of County Commissioners, (Mr. Thomas H. Layman) and his estimable lady are fully determined it shall not lose its record for startling occurrences during their day.

So on the evening of the 10th inst. as I was returning from Frostburg, where I had conducted the funeral of our aged and most highly respected citizen, Mr. Wm. Frost, I was stopped and invited to spend the night at said house. As the shades of night began to steal over the earth quite interesting people began to assemble and kept coming until sixty odd strong had taken possession of the house and we were impressed that perfect obedience would be our safest way out of our dilemma.

About 9 o'clock we answered an invitation into the famous dining-room where we were publicly and substantially pounded—at least \$20 worth of pounds. After remaining until about midnight saying and doing everything possible to relieve us of our scare they took their departure saying all kinds of nice things.

No one courts surprises and poundings, yet they can be endured occasionally, these hard times especially when they end so well.

This is my fourth year among these strong people and I have learned to love them, and though they are scripturally peculiar on account of good works, yet I shall never forget them.

J. H. ENLOW,

Pastor M. E. Church.

Grantsville, May 12, 1894.

If King Solomon was alive he would now say: "Go to the traveling man, learn his ways, and be wise." Mr. C. W. Battell, a Cincinnati traveling man representing the Queen City Printing Ink Co., after suffering intensely for two or three days with lameness of the shoulder, resulting from rheumatism, completely cured it with two applications of Chamberlain's Pain Balm. This remedy is gaining a wide reputation for its prompt cures of rheumatism, lame back, sprains, swellings and lameness. 50 cent bottles are for sale by Oakland druggists.

MEN OF OAKLAND.

Here is Something for you to Read, Ponder and Think About.

A great many of the good citizens of the town of Oakland—and for that matter other towns—work hard to induce other industries to locate within the corporate limits and wholly neglect to give proper encouragement to home talent. The famous western novelist, E. W. Howe, hits the nail on the very head in his novel, "The Story of a Western Town," which made a great hit a few years ago and received the enthusiastic praise of such eminent literary men as W. D. Howells and Mark Twain. Read the excerpt that follows and when you come to the "quiet man" that was building a woolen mill down on the river," stop and consider whether the circumstances such as are there described does not exist right here in your midst. Then let your thoughts travel in the direction of where your patronage should go with reference to the "quiet industries" which are springing up or have sprung up. In a chapter headed "The Peculiarities of a Country Town," Mr. Howe says:

"There was one thing I noticed of Twin Mounds which was probably true of every other country town—it was constantly threatened either with great prosperity or great danger, but whether the event threatening the prosperity or the danger came to pass the town progressed about the same. There was no perceptible effect from any of the events the people were certain would prove either very disastrous or of great benefit, from which I am led to believe that no one is familiar with the art of town building, although I have never known a man who did not profess to know all there is worth knowing about the science."

Town seems to be the natural accretion of years, and although the people in Twin Mounds often related how desperate were their struggles with adversity the facts probably are that the place would have been fully as large without the great number of public meetings for public purposes and the endless worry of individuals with reference to it.

"There was a very general impression that manufactory were needed, and this was talked about so much, and so many inducements were offered, that the people became discouraged, believing that the average manufacturer had a wicked heart and hollow head to this wrong end of the matter in the face of his own interest. Therefore we were very much surprised to learn once, after all hope had been abandoned, that a quiet man was building a woolen mill down the river, which he completed and afterward operated without the help of the committees which had been appointed to aid in such matters of public weal."

"The trouble was that the man lived in Twin Mounds, whereas we had been expecting a man and money to come from a distant point for that purpose and had never thought of looking about home, but spent a great deal of money in sending committees away to make arrangements for a woolen mill. This circumstance, though humiliating, proved a good thing, for it taught the people that if the town were to be built up at all it must be by its own citizens, which knowledge was afterwards used to good advantage."

"The people were always miserable by reason of predictions that unless impossible amounts of money were given to certain enterprises the town would be ruined, and, although they always gave, no sooner was one found exhausted than it became necessary to raise another. It was said during the collection of each amount that it would never be necessary again to give to this sort of charity, as the enterprise then in hand would insure the fortune of Twin Mounds, but there was never an end to the ridiculous business, and we were always in a state of dreariness on this account, as the men demanding the charity for insignificant enterprises threatened to go to the rival towns and permit the grass to grow in our streets."

"In thinking of the matter since I have thought that Twin Mounds would have been a much better town but for the fact that it was always expecting improbable disaster, but which never came, for the people were thus prevented from exercising their energy, if they had any."

Although the above excerpt is from a work of fiction, it is so true to life that its wisdom is apparent. Three good points to remember are the following:

Always encourage home talent when it stands ready to establish an enterprise that will build up the town.

Never attempt to raise more money to secure new enterprises than the town can afford to part with.

Always look on the bright side of the town's outlook. Never predict anything but prosperity.

Well men often die because they believe they are suffering from some wholly imaginary ailment, and a good town sometimes retrogrades simply because of the croaking of calamity howlers. Say nothing if you cannot say a good word for the town, but keep on saving the town's wool.

Rea Ridge.

Rev. Jesse Robeson preached a most able sermon to a large congregation Sunday.

It makes us feel good to see so many persons at Sunday school. Sunday school next Sunday at 10 o'clock a. m. All are invited to attend.

Mr. Walter Crow was the guest to Mr. Olen Wilhelm Sunday.

Mr. George Beaman purchased a stump puller recently and expects to do a booming business.

Mr. Shadrack Garlitz visited friends at Avilton Sunday last.

Messrs. Walter Lancaster and Herman Robeson were at New Germany Saturday night.

Mr. Isadore McKenzie contemplates building a large barn this summer.

Several of our people attended church at Mount Union Sunday.

Mr. Wm. A. Robeson will move his saw mill to Olen Wilhelm's in the near future.

Decoration Day.

Crook Post No. 35, G. A. R., of Oakland, desires the presence of all G. A. R. Posts as well as all old soldiers to meet with us and join in observing memorial day, May 30th. Invitations are also extended to all lodges K. of P., Odd Fellows, Jr. O. U. A. M., Hibernians and the citizens generally. Invitation is also extended to all school children to meet with us, and also the Oakland Cornet Band.

Donations of flowers will be gratefully received. They can be left at Crook Post Hall or Sturgis' drug store on Wednesday morning, 30th.

A. G. STURGIS,

H. Low, Adj't. Commander.

Town Council Proceedings.

To the Editor of the Republican.
Inasmuch as there has been so much dissatisfaction, expressed by some of our people regarding the way in which the corporation affairs have been conducted in the past, I will endeavor to give you the proceedings of the Council for publication.

Council met in the council chamber Monday evening, May 14, at 8 o'clock p. m., with all the Councilmen present.

The resignation of Clerk Dunham was read and accepted. Mr. Geo. H. Fulmer was nominated to fill the vacancy and when the yeas and nays were called the vote stood as follows: Yeas, Councilmen Little and Shartzer; nays, Councilmen Naylor, Smithman and Hyde; Councilman McComas declined to vote. Mr. L. E. Townsend was then nominated. The yeas and nays being called, the vote stood as follows: Yeas, Councilmen Naylor, Smithman and Hyde; nays, Councilmen Little and Shartzer; Councilman McComas declined to vote; thereupon Mr. Townsend was declared elected.

The street light opposite the Glades Hotel on Railroad street was ordered turned on. The town paying two-thirds of the expenses and the proprietor of the Glades paying one-third.

Council then adjourned to meet Thursday, May 17, at 8 o'clock p. m. JOHN SHARTZER.

Decoration Day at Hoyes.

Sherman Post No. 11, G. A. R., whose head quarters is in Friendsville, will meet at Hoyes on Decoration Day.

We desire the presence of all G. A. R. Posts as well as all old soldiers to meet with us and join in observing Memorial day, May 30. Invitations are also extended to all Jr. O. U. A. M. councils. Invitations are extended to all school children, and citizens generally.

Donation of flowers will be gratefully received, and such donations can be left at the M. E. Church on Wednesday morning, May 30.

Wm. H. H. FRIEND, Com.

THE LILAC.

The lilac stood close to Elizabeth's window. All purple with bloom, while the little maid spun. Her sister was a long one and she was weary, And mused that she never could get it done. But a wind set stirring the lilac blossoms, And a wonderful sweetness came floating in. And Elizabeth felt, though she could not have said it, That a friend had come to her, to help her spin. And when that she kept on at her spinning, Gay as a bird, for the world had begun To seem such a pleasant, good place for working. That she was amazed when her sister was done.

And the pale-browed little New England maiden, Outside of her lessons, had learned that day, That the sweetest around us will sweeten labor. If we will but let it have its way. —Mary E. Wilkins, in St. Nicholas.

LIGHTHOUSE MAGGIE.

A Little Girl Who Lives Far Away from Other Children.

Down in Newark bay, on the coast of the Atlantic, lives a little girl eleven years old whose entire life has been spent out at sea. Her name is Maggie Wood, and her home is the big stone lighthouse one sees when at Mariner's harbor, Staten Island, or sailing down the bay.

This girl lives away from all other children; her chief pastime is in watching the boats pass, and in hearing the sounds which come across the waves. On clear days in summer, standing out on the stone pier of the lighthouse, she can hear the children of the picnic excursions sing as they go down the bay. In winter she wraps up warmly and stands as far out as the rough winds will allow and waves her apron to the sailors on the boats who wave a reply back. Sometimes they blow their steam whistles for her, and sometimes, for they know how she loves music, they shout sea songs or blow upon a flute.

Every day Maggie's aunt and uncle, with whom she lives, see that she has her regular lessons; she has read school books which her uncle brings home on his rare visits to the city. She is not at all an unlearned child. She draws and paints a little, and her favorite work is to sketch the old stone lighthouse.

As soon as school hours are over Maggie puts on her cloak, draws her little hood up over her head and hurries out to play upon the pier. She has 100 feet of stone platform for a play-

MAGGIE AND HER HOME.

ground. She races around the lighthouse half a dozen times as fast as she can go. Then she rolls over and over with Towzer, her sea dog, and she throws sticks in the water for him to swim out and get.

Towzer is a brown water spaniel, and he has the record of saving just as many lives as Maggie numbers years to her life, so that the little sea girl has a real hero for a companion and playmate.

Frequently Maggie's uncle takes her out in the lifeboat and lets her fish and play in the water. Sometimes an exciting event occurs. Maggie takes a hand in a "great rescue." A bird, sick or wounded, will hover over the water or fall in the waves, and then Maggie and her uncle row out where it is treading, and pick up the poor little thing, and carry it to "land" as tenderly as if it were a human being. When the bird gets well it is let go again; and that is another exciting event.

One day last summer Maggie had a great adventure. She had gone out on the pier to set for a sea-eagle which had had a broken wing. It had been shot at by some sportsman and left to die on the waves. Maggie had carried it into the lighthouse and taken care of it until its wing was strong. Then as the gull seemed unhappy, she had resolved to let it go. She freed it just as a flight of gulls swept past. In a minute it had gone, disappearing with the others. But only for a minute could the bird keep on its proud course; then it flew more slowly; gradually it sank to the surface of the waves.

Quick as thought Maggie untied the boat, and drawing long, sweeping strokes, she pulled out all alone to the spot where the bird lay in the water and brought him back again to the lighthouse. Now he has become a family pet and never flies very far away.

The hero, Towzer, is an excellent bird dog. But he has an odd trait. If Maggie's uncle shoots ducks or other birds good for food Towzer swims out and brings them in, taking care that they do not get away from him, and he is not always very gentle with them, either. But let Maggie say: "Towzer, there is a poor sick bird out there. Get him, Towzer. Careful! careful!" He will swim out and bring the wounded bird as gently to the shore as if he were the mother bird himself. He draws his lips over his teeth until they are soft as silk.

There are days when Maggie cannot see beyond the lighthouse. All day

long she hears only the "Toll! Toll!" "Toll!" of the warning bell. She feels as if she were away off on another sphere. As she herself expressed it: "As if an Arabian Nights' story had come into my life and carried me in a roc's egg to another planet."

In summer, when city people come over to the lighthouse, she is very happy, and when she "expects company" she helps polish the lighthouse lamp until it shines, and even takes a hand in securing the stone pier into perfect neatness. She has a store of sea grass and curious shells and queer dried fish for visitors, and, far from pitying her, many of them envy Maggie such a peaceful, romantic home. —Addison Lyman, in St. Louis Republic.

THE BEAD PUZZLE.

So Simple in Construction That Any Child Can Make It.

Its construction is simple, the materials not costly and the only tools required a bradawl and pocketknife. Its construction is the only simple thing about it—at least, I fancy this is what those not in the "know" will say. I fear, too, I shall have a difficulty in making myself quite clear over the "puzzle" part.

However, I will do my best, though, I doubt not, many boys would eventually succeed in solving the difficulty without any explanation. I say, then, after you have made the puzzle try and solve it before you read up the explanation.

Take a piece of hard wood, an inch wide and six inches long. At half an inch from either end make a bradawl hole. In the middle cut out a small oval hole. Procure two glass beads, which must be too large to pass through the oval hole. Take a piece of twine about eighteen inches long. Double it at the middle and pass the loop through the oval hole, and then pass the two ends of the twine through the loop. Take a bead and thread it on one of the ends of the twine, and fasten that end to one of the bradawl holes. By the same with the other bead and end of twine, and fasten at the opposite bradawl hole.

Your puzzle is now complete, and ought to appear like the diagram. The puzzle is to get the two beads together. This, seeing they are too large to pass through the oval hole, is not easy. You may draw down the center loop and pass the right-hand bead through it toward the oval hole. Then take the two strings passing through the oval hole and draw them toward you. The loop will be drawn through the hole from the opposite side, but by the same with a double one. Pass the bead through to the left and let slack. The bead will now be confined by a single loop. Pass it through again to the left, and there you are. To part the beads again, reverse the order of procedure.

If you wish to make a more complicated puzzle, you have only to add to the length of the strip of wood; but, in making the holes, remember they must run alternately—beginning with a bradawl hole, then an oval hole, a bradawl hole again, and so on, finishing with a bradawl hole.

You may form as many "loops" as you like, and amuse yourself by getting all the beads on any one particular loop. Or you may astonish your friends by asking them how many beads they would like placed on any particular loop.

You retire to a secluded corner of the room, or place your hands under the table, and lo! the "passage" is effected. Let your friends plainly understand the beads will not pass through the oval holes. By the way, if you use a number of beads, the twice must be continuous—without knots, and finally looped into each oval hole—Golden Days.

Fish Which Go Gunning. The jaeulator fish, which is found in the lakes of Java, uses its mouth as a squirt-gun, and is a good marksman. If a stake or pole is put in the water with the end projecting three feet above the surface, and a beetle or fly is placed on top of the pole, the water will soon be swarming with finny gunners. Presently one comes to the surface, observes its prey and measures its distance. Then it screws its mouth into a very funny shape, discharges a stream of water, and knocks the fly or beetle into the water, where it is instantly devoured by the successful shooter, or some of its hungry companions.

Where He Drew the Line.

The natural enmity to the tax-gatherer is said to be especially prevalent in a certain county of Missouri. A well-to-do German farmer came into the village of which he is accounted a resident to pay his taxes. The bill was handed to him, itemized as follows:

State tax	\$14.22
County tax	7.10
School tax	4.30
Total	\$25.62

The German scanned it closely for some moments, and then said stolidly: "I pay de state tax, I pay de county tax and I pay de school tax, but I pay no total tax! I got no total, and I never had any. But total tax, she is one fraud!"

Disappointed. Mr. Staylate—You look charming to night. She (yawning)—Do I? I was expecting you to say I looked tired.—Brooklyn Life.

Grounds for a Smash. He'd always been a man of peace, He wouldn't harm a hare, But when a dude with cigarette Blew smoke into his face, you bet He smashed him then and there. —Kansas City Journal.

FARM AND GARDEN.

PRETTY RABBIT PEN.

It Is Easily Made and Presents an Attractive Appearance.

To encourage my boy in learning the use of tools, I designed and helped him make an ornamental rabbit pen (Fig. 1). A box of inch stuff two by four feet and sixteen inches deep was procured, the top taken off and the open part placed on the ground. Four strips each one by two inches and four feet long were nailed to the box, a cross strip of the same size two feet long being nailed in across the center to complete the framework of the foundation (Fig. 2). A part of one side of the box was removed and fitted with hinges to be

FIG. 1.—PERSPECTIVE VIEW OF RABBIT PEN.

used as a flap door, and two round-topped holes were cut in the front part of the box for doors between the back and front of the pen. On the foundation was nailed, projecting a little beyond the framework. Strips like those used in the construction of the foundation in the same manner about the top of the box and floored over. On this framework five pairs of one by two-inch rafters, set for one-fourth pitch, and projecting four inches, were securely nailed. Four strips of one and one-half by one-inch stuff were nailed at intervals of one and one-half inches with a one-fourth inch bit, and of these the front cage was constructed by inserting one-fourth inch round iron rods cut to four-inch pieces, the strips being securely nailed at top, bottom and corners. The middle pair of rafters supported a partition in the roof with a hole between the compartments. Another hole for ingress to the attic was left in the floor in the back room. The roof was sheathed with three-fourth-inch boards, and a cornice fitted on eaves and gable. It was then shingled, and a neat cresting added to the comb. The back gable was boarded up with vertical pieces and fitted with a small hinged door. The front gable was finished by nailing on vertical slats, one at each bottom end, and one of one-half by three-fourths-inch pine. A pit was dug one and one-half by three feet in size and two feet deep, and lined with boards around the sides. The back part of the pen was placed directly over the pit. Grown rabbits could jump over the pit into the front cage, and the little ones remained in the cage until too large to get out through the wires. Rabbits dig down in the pit and construct their own breeding places in burrows beneath the pen. The pen proved to be warm in winter, cool in summer, and well adapted for keeping rabbits. With a long-handled shovel all refuse could be easily removed from the pit through the trap door, and the pen never became offensive. With a pair of white rabbits and their young, the pen was a pretty sight at the back of the lawn, and was always attractive to visitors. It was painted with dark red mineral paint and trimmed with white, which harmonized well with the bright green lawn and the dark green foliage of the shrubbery. —American Agriculturist.

FIG. 2.—FRAMEWORK OF RABBIT PEN.

Good Pasture for Hogs. Galen Wilson, in the Practical Farmer, tells how to have pasture for hogs: Divide your lot into two fields. Sow one to oats alone at the rate of three bushels to the acre, as soon as the soil is fit for sowing, and the other to corn and oats. About the 10th of May sow the other to sweet corn, two bushels to the acre. About the last of June, change the animals from the oat field to this corn. Then plow the oat field and sow to corn in the same way, and change the hogs back when necessary. If the number of hogs is rightly proportioned to area and fertility of soil there will be green feed until winter. For this purpose sweet corn is worth about fifty per cent. more than common field corn.

We Have Too Many Scrubs.

Too many scrubs are kept on American farms. In a land that produces such a surplus of feedstuffs at such small cost, and where pure-bred sires are now attainable at almost nominal cost, such a state of affairs is beyond comprehension. It is a disgrace to American agriculture that in this land of plenty, it respects all kinds of food and fattening foods, there should be such a percentage of inferior farm animals. Every farmer can replace all ill-shaped, thriftless beasts by well-formed early-maturing stock, and thousands are contributing nothing but scrubs to the low-priced, unsalable farm stock with which our country is cursed and by which our markets are flooded.—Breeder's Gazette.

How to Cure Egg Eaters.

To keep chickens from eating eggs keep plenty of ground bone, oyster shell and fine gravel before the flock all the time, so they may eat at will. Construct the nest in a dark place under some shelf, and feed a little salt and meat. By doing this you will seldom be annoyed by those egg eaters. To those that have formed the habit pare off the upper mandible quite blunt and put china nest eggs in the nests. They will work awhile at these artificial eggs to break them, and find lag they will not yield they very often never try to eat another egg.—Farm and Home.

LIME FOR POULTRY.

It Given at All, It Must Be Given in a Diluted Form.

The suggestion to give grain soaked in lime water to poultry is well worthy of quasi condemnation. Animals cannot live on mineral food, and lime in this—its natural condition—is acid and injurious. There is no need for it, either, or for the trouble taken in preparing the grain. Some fresh bones with the meat attached, as are thrown aside by the butchers, especially the softer and more cellular rib bones, make the best form in which to give the lime needed by hens. If it is too much trouble to break these with a hammer on a block in the poultry yard, which has been my practice for years, the bones may be burned in the kitchen stove and the ashes given to the fowls in the yard or in some place to which they have free access. The waste bones of the household may also be thus turned to use in the most profitable way, and a flock of fifty hens will consume all the waste of a good-sized family. For large flocks a contract should be made with the local butcher. In this form the lime is digestible and the phosphoric acid in the bones will also be valuable. It is very certain that no indigestible matter given to a hen can help her in any way to make shells for her eggs, all the material of which must necessarily pass through the blood before it can reach the ovary.

It is a common experience among poultrymen that rape and hemp seed are useful to the laying hens, and increase the number of eggs. Now both of these seeds are rich in lime, the ash of the former having 14 per cent. of it and that of the latter 23 per cent. And in this regard it might be mentioned that the seed of the asparagus, which is eaten by fowls with great avidity, has more than a third of its ash lime. The culture of this plant, one of the leguminosae, may be recommended as very useful to poultry-keepers. It is a common crop on the small French farms, and its common name sainfoin, and the fowls eat the whole plant, which like all its family (the clover) has a great quantity of lime in it. Clover itself is thus useful to fowls as a green crop on this account. This is the only way in which lime can be given to fowls healthfully.—Country Gentleman.

NICE FOR THE HENS.

Ingenuous Contrivance for Self-Opening Poultry House.

The illustration is to show a contrivance by which the hens let themselves out of the poultry house in the morning, when they come off the roost. The house can come out at any time, so as to permit sleeping poultrymen to slumber without being compelled to get up and open the door. The hen will be up and out early without giving any person annoyance. When the fowls wish to go out they always resort to some accustomed place near the door. One may step on the platform to which the chain of the spring is attached and her weight pulls the spring down, the staple is released from the catch and the

CONTRIVANCE FOR SELF-OPENING POULTRY HOUSE.

weight of the board causes it to fall, which opens the door.

The designer, Mr. Smith M. Evans, Alabama, says that it works well and is very satisfactory. In the illustration, A is the opening for fowls to enter; B is the hole through which the staple of the door passes to catch on the spring latch inside. C is the spring latch with chain (D) attached to the trap door (E), on which the fowls step the weight of their bodies drawing down the catch, which liberates the staple (H), and the weight of the door (G) causes it to fall, allowing the fowls to come out at the opening (A); I is the spring latch of the catch and F shows hinges. The arrangement is very simple and can be applied to any poultry house. Any person can make the contrivance, and it is given here for the benefit of all who may be interested.—Farm and Fireside.

AMONG THE POULTRY.

The beautiful light Brahmas are coming back into favor. What breed has better table meat, more of it, and lays more eggs, when they bring a good price? The bodies of Light Brahmas are so large and warm that they lay more steadily in winter than do lighter breeds.

PLYMOUTH ROCKS are notable for laying frequently to sit. A rotation of yards, thus keeping their surroundings somewhat strange, will overcome the tendency to brood, and insure steady laying. Another advantage of having several yards into which the fowls are changed occasionally is that they may be kept cleaner and more healthy.

Some advise, and a few practice, throwing out the grain for the morning meal after the fowls take to their perches at night that they may eat early, and the trouble of supplying breakfast may be avoided. It is a bad plan. Nothing so quickly attracts mice and rats, that destroy not only food intended for fowls, but prove a detriment in other ways to the poultryman's interests.—Rural World.

Highest of all in leavening strength.—Latest U. S. Gov. Food Report.

Royal Baking Powder

ABSOLUTELY PURE

Economy requires that in every receipt calling for baking powder the Royal shall be used. It will go further and make the food lighter, sweeter, of finer flavor, more digestible and wholesome.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW YORK.

Botanical Lore. Teacher (to botany class)—After a bean is planted, a little shoot appears above the ground, and this soon bursts into two leaves. Now, what comes next?
Bright Boy—The bean-pole.—Good News.
How's This? We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.
F. J. CUREX & Co., Props., Toledo, O.
We, the undersigned, have known F. J. CUREX for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligation made by their firm. West & Traux, Wholesale Druggists, Toledo, O. Walding, Krumm & Marvin, Wholesale Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free. Hall's Family Pills, 25c.

Cheap Excursion to the West. An exceptionally favorable opportunity for visiting the richest and most productive sections of the west and northwest will be afforded by the Home-Seekers' low-rate excursions which have been arranged by the North-Western Line. Tickets for these excursions will be sold on May 5th and 20th, to points in northwestern Iowa, western Minnesota, North Dakota, South Dakota, Montana, Nebraska, Colorado, Wyoming, Utah, Montana and Idaho, and will be good for return passage within thirty days from date of sale. Stop-over privileges will be allowed on going trip in territory to which the tickets are sold. For further information call on or address Ticket Agents of competing lines. Circulars giving rates and detailed information will be mailed free upon application to W. A. Thrall, General Passenger and Ticket Agent, Chicago & North-Western Railway, Chicago.

Mrs. Poppleton—(Henry, are you crazy?) Take that mark off. You are frightening baby so bad he'll not go near you. Mr. Poppleton (complacently)—That's why I put it on.—Puck.

The Greatest Medical Discovery of the Age.
KENNEDY'S MEDICAL DISCOVERY.
DONALD KENNEDY, of ROXBURY, MASS., has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common Pimple.
He has tried it in over eleven hundred cases, and never failed except in two cases (both of them humors). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston. Send postal card for book.
A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.
When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it. Read the label.
If the stomach is foul or bilious it will cause squeamish feelings at first. No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

VOLUME 18.

OAKLAND, MD., THURSDAY, MAY 24, 1894

NUMBER 11.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your wool to Sincell Bros. Sincell Bros., are buying wool at high prices.

Sincell Bros., are paying big prices for wool.

Mr. Will Smith, of Hoyes, was in the city Tuesday.

Sincell Bros., pay more for wool than other merchants.

Mr. Ira Culp, of Wilson, was here on business yesterday.

Seeds by ounce, pound, pint and peck at H. E. Felty's Grocery.

Mr. and Mrs. Geo. E. Bishoff, of Johnstown, was here yesterday.

The Bosley House is rapidly filling with guests for the summer.

Mr. Fred A. Thayer has opened his law offices in the Felty building.

Mr. E. S. Gilpin, of Swanton, was an Oakland visitor on Saturday.

Mr. Reese E. Friend, of Friendsville, was in the city a few hours Monday.

Thomas Hay Rakes and Champion mowing machines for sale by J. M. Davis & Son.

W. H. Malette has a number of pairs of shoes which he will dispose of at less than cost.

Mr. Daniel W. Dorsey, of Grantsville, spent several days last week in Oakland with friends.

Mrs. S. T. Jones and children are on a visit to friends and relatives in and near Wheeling.

Mr. Jonas Hostetter, of Accident, made this office a visit yesterday while he was in town.

We have on stock a car load of Oehlman guano and Silvergray for buckwheat. J. M. Davis & Son.

Mr. J. P. Wiley, of Grantsville, was in the city Thursday. He returned to his home Friday morning.

Dr. J. Lee McComas, who is traveling in the south-west, has our thanks for copies of Texas papers.

Mr. James Smith, of Hazleton, W. Va., was here on Saturday visiting his brother, Mr. David G. Smith.

Mr. John Shartzler has opened a furniture store at Bayard, W. Va., and is selling goods on the installment plan.

Mr. J. M. Jarboe is improving his Alder street property by erecting a new porch and otherwise repairing it.

Fish Commissioner R. T. Browning, who is now residing at Lake Browning, spent Monday in Oakland on business.

Miss Lizzie Leary departed from Oakland Tuesday morning for Warrensburg, Mo., where she has gone to visit relatives.

Mr. and Mrs. E. H. Sincell and children spent Thursday last at Huttons as the guests of Mr. and Mrs. U. G. Palmer.

Mr. Geo. M. Menhorn and son Harmon, of Accident, was in Oakland Saturday and called to see THE REPUBLICAN.

If you have not seen the line of gentlemen's shirts at Townshend & Son's you have missed it "largely." At hard time prices.

J. M. Davis & Son have on hand a few two seated spring wagons and single buggies, and a first-class 8 hoe grain drill at reduced prices.

FOURND. — Finest line, latest styles and best bargains in crush, straw and derby hats in town at Townshend & Son's. 10-4t.

Chief Judge A. Hunter Boyd was here Friday hearing the equity case of Sharpless vs. Bear involving the title to an engine, boiler and saw-mill.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Messrs. H. A. Reichelt and Henry Leatham, of Keyser's Ridge, were in Oakland on Tuesday on business before the School Board.

The attention of our readers is called to the advertisement of Miss Marie Cunningham, which will be found in another column of this issue of THE REPUBLICAN.

You will find a full line of dress goods, palm-crepe, crepe, dotted swiss, ginghams, bunnings, etc., all colors, at Townshend & Son's. 10-4t

Lately opened, complete lines of gents', ladies' and children's shoes, any style, Oxfords and Bluchers, tan and black. Prices rock bottom, at Townshend & Son's. 10-4t

The demand for cottages and rooms is much greater than it was at this date last season. From every quarter the outlook for a great many summer visitors is excellent.

G. W. Delawder has opened the famous sporting resort, Lake Cleveland, and a large party of gentlemen from Oil City, Pa., are catching trout and having a good time generally.

M. B. Ross, of Oakland, has been notified of an increase in his pension, to date from 1863. Under the arrangement Mr. Ross will receive about thirteen hundred dollars back pay.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

Mr. John Shartzler has moved to Oakland the remaining stocks of goods of three different stores and will sell them out for less than their cost. Auction every Saturday afternoon and night until goods all disposed of.

News reached Oakland yesterday morning announcing the sudden death of Mrs. Jonas Gnagney which occurred at her home in Grantsville Tuesday morning. We have been unable to learn the particulars of her death.

Dr. W. N. Berkley of McLane & Berkley, Frostburg, will be at Accident May 29; Friendsville, May 30; Grantsville, May 31, to treat catarrh and diseases of the eye, ear and nose. Eyes examined for glasses. 10-2t.

The members of Lily Division No. 9, U. R. K. of P., are requested to report at their hall on Wednesday morning, May 30, at 10 o'clock sharp in full dress uniform to participate in the Decoration Day exercises on that day.

Rev. Dr. Alexander will hold services in Garrett Memorial church Sunday morning and evening. The morning services will begin at 11 o'clock, and the evening services at 8 and after this will terminate at 9. The character at night will be that of "Samuel the Sec."

A lady of Tooleys, La., was very sick with bilious colic when M. C. Tisler, a prominent merchant of the town gave her a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says she was well in forty minutes after taking the first dose. For sale by Oakland druggists.

Mr. Samuel Lawton completed the erection of a private telephone line running from the office of the Park Association to J. M. Davis & Son's store in Oakland. Mr. Lawton also has the contract for furnishing a six-inch hot air Ernsack pumping engine for the Mountain Lake Park Hotel Co.

Dr. S. F. Scott, Blue Ridge, Harrison county, Mo., says: "For whooping cough Chamberlain's Cough Remedy is excellent." By using it freely the disease is deprived of all dangerous consequences. There is no danger in giving the Remedy to babies, as it contains nothing injurious. 25 and 50 cent bottles for sale by Oakland druggists.

If King Solomon was alive he would now say: "Go to the traveling man, learn his ways, and be wise." Mr. C. W. Battell, a Cincinnati traveling man representing the Queen City Printing Ink Co., after suffering intensely for two or three days with lameness of the shoulder, resulting from rheumatism, completely cured it with two applications of Chamberlain's Pain Balm. This remedy is gaining a wide reputation for its prompt cures of rheumatism, lame back, sprains, swellings and lameness. 50 cent bottles are for sale by Oakland druggists.

At a meeting of the citizens of Oakland held at Sturgiss' hall on last Friday evening for the purpose of organizing a fire department, there were quite a number present and the names of about twenty volunteers were taken. The permanent organization will be established to-night at which meeting all the citizens are urgently requested to be present.

Garthright says he can't be overstocked with first class butter, fresh eggs and wool. The highest trade and cash prices paid for all kinds of good produce. 1,000 bushels nice potatoes wanted. Large lot of clothing to be closed out at greatly reduced prices. Mt. Lake Park affords the best market in the county during the summer season. 11-2t

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at their own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

Rev. W. A. Spencer, D. D., of Philadelphia, Pa., corresponding secretary of the Church Extension Society, will hold services in the M. E. Church at Davis, W. Va., on June 2nd and 3rd. The first service will be held June 2nd at 7:30. He is well and favorably known through the church and nation and it will be a rare opportunity to hear him preach and sing.

Maj. G. D. DeShields and J. H. Hazleton passed through Oakland on Monday night, on their way to Cincinnati, Indianapolis, St. Louis and other western cities. They go on the interest of the Deer Park and Oakland hotels. Major DeShields, superintendent of the B. & O. hotel system, is one of the best hotel men in the country, and says the outlook for a prosperous season was never better. The Deer Park hotel will open about the 27th of June and the Oakland on the 5th of July.

George L. Bosley says he has more applications for rooms than he has had for several years past. Nearly all the rooms in his house are engaged, and among the guests already, there are W. Scott Burham, of New York; Mrs. Capt. Pendleton, Washington, D. C., and John Swan, of Baltimore. Col. Swan has spent every summer at Oakland for forty years past. He declares that there is no climate in the world equal to this, and he believes he is accurate in his statement upon this subject.

Extraordinary stories are told of the healing properties of a new oil which is easily made from the yolk of hen's eggs. The eggs are boiled hard, and the yolks are then removed, crushed, and placed over a fire, when they are carefully stirred until the substance is on the point of catching fire, when the oil separates and the oil may be poured off. One yolk will nearly yield two teaspoonfuls of oil. It is in general use among the colonists of South Russia as a means of curing cuts, bruises, etc.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Persons who sympathize with the afflicted will rejoice with D. E. Carr of 1235 Harrison street, Kansas City. He is an old sufferer from inflammatory rheumatism, but has not heretofore been troubled in this climate. Last winter he went up into Wisconsin and in consequence has had another attack. "It came upon me again very acute and severe," he said. "My joints swelled and became inflamed; sore to touch or almost to look at. Upon the ur-

gent request of my mother-in-law I tried Chamberlain's Pain Balm to reduce the swelling and ease the pain, and to my agreeable surprise it did both. I have used three fifty cent bottles and believe it to be the finest thing for rheumatism, pains and swellings extant." For sale by Oakland druggists.

The Glades Hotel has been painted and improved generally and is in apple pie order. It is lighted throughout by electricity, and at night looks as if some important event was being celebrated by an illumination. Mr. Wagner, who has leased the property for three years, has taken charge. He has a large number of applications for rooms on file. Mr. Wagner is a thorough hotel man, and we predict that under his management the Glades will regain its old time popularity as the leading summer resort in this section. Mr. Wagner will do away with the colored dining room servant, and in his stead there will be a sufficient number of neat, tidy white girls, under the supervision of an experienced white woman as head waiter. This will be a new feature in the summer resort business of this section, and we hope the experiment will be successful.

On next Monday morning Mr. James Allen and his family will leave Oakland for New York City where they will take passage for London, England. From London Mr. Allen will embark for Johannesburg, South Africa, where he will be employed as a chief driller in the gold mines near that city. Mrs. Allen and her children will go from London to Glasgow, Scotland, her old home and reside there with relatives. At London Mr. Allen will be joined by his brother-in-law, Mr. Thomas Ashenurst, who left here one day last week and who will accompany him to Africa. These sturdy Scotch people, who have resided here for about three years, leave hosts of friends behind who wish them all the success possible in their new homes. Mr. Allen has promised THE REPUBLICAN a letter from Johannesburg when he arrives there, which will no doubt be very interesting to our readers. Johannesburg is a German settlement, in a good climate, and is one of the chief towns of the Transvaal Republic.

Dentistry. Dr. D. O. McKinley will be at Friendsville May 14th and 15th; Hoyes, 17th; McHenry, 18th; Oakland, 21st and 22d; Deer Park, 25d and 24th. Teeth extracted without pain. 8-3t

Bucklen's Arnica Salve. THE BEST SALVE in the world for Cuts, Bruises, Sores, Fleets, Salt Rheum, Fever Sores, Tetters, Chapped Hands, Chills, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-1yr

For Sale Cheap. A desirable residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre. FRED. A. THAYER. Office in Felty Building opposite postoffice.

Dissolution of Co-Partnership. This is to give notice that the partnership of D. S. Custer & Bro., has this day been dissolved by mutual consent. The business of the late firm will be continued by D. S. Custer. D. S. CUSTER, H. A. CUSTER, Friendsville, Md., April 28, 1894. 10-3t*

B. & O. Dropping Men. Thirty-one molders and pattern-makers employed in the foundry of the Baltimore and Ohio railroad at Mt. Clare, were discharged Tuesday morning. A rumor was afloat on the streets of Baltimore Tuesday that the foundry and car shops of the company at Mt. Clare are to be closed and that in the future the car building and foundry work of the company would be done at the Ryan-McDonald works at Curtis Bay.

Baltimore and Ohio railroad officials denied however that the rumor was correct and said the discharge was due to the hard times and to no other cause. The discharge has caused considerable unrest among the men at Mt. Clare, as it is feared that more discharges will follow.

Are you a subscriber?

A Card.

I have resumed the practice of law; office in the Felty Building opposite the postoffice, where I will be pleased to see all my former clients and any others who choose to entrust their legal business to my care.

Will be assisted in all important cases by Benjamin A. Richmond of the Cumberland bar.

FRED. A. THAYER.

Glade Valley.

Weather cool and wet. Corn nearly all planted. Wheat and oats look well.

Miss Maud Nicholson, who was visiting at her grandpa's, Mr. J. H. Roth, for several weeks, has returned to her home at Dobbin, W. Va.

Mr. George Smith, our genial merchant from Red House, was the guest of Mr. David Gnagney Sunday.

The singing class at the Red House meets every Sunday night. It is conducted by Messrs. David Gnagney and Sol. Fike.

The Glade Sunday school was reorganized last Sunday with Mr. D. O. Roth superintendent and H. A. Shaffer assistant.

If we are not mistaken there will be a wedding in this vicinity in the near future.

Mr. D. O. Roth is the happiest man in this district—of course it's a boy.

Mr. and Mrs. D. J. Slabach were the guests of Mr. Daniel Gnagney Whit Sunday.

J. Bird failed to send in his news for publication last week.

Sheep shearing is now in order. Most of the farmers have their sheep shorn, but we think Free Trade wool will be a failure. J. Bird was offered 12 cents a pound for wool this year, while two years ago he got 25 cents in cash, and yet there are people who are howling for free trade. J. Bird.

The Old Time Road.

Formerly the only intelligent conception of a road anywhere on the Atlantic tier of states was two sand ruts, varying in depth from 3 to 8 inches, carried on to infinity or as far as the exigencies of the traveling public demanded. The intervening space between the two ruts was filled in with sand. Success from the torture of these roads was sought by occasional turnouts to the right or left, but soon new ruts were formed, and the last condition of the unfortunate animals compelled to travel them became worse than the first.

Toward the interior of the state, where gravel beds are found, decided improvements are made on the sand ruts. A degree of hardness was imparted by the gravel, which, for most practical purposes, was encouraging if not satisfying. Great centers of population soon demanded sounder and more solid roads—beds to resist the general tendency to rut, which is everywhere apparent where heavily laden teams are numerous.—Philadelphia Record.

Put the Dollars Where They do the Most for You!

We have just received a full line of New Jewelry, Watches, Clocks, etc. The latest designs in Ladies' Breast Pins, Hair Pins, Ear Rings, Rings, etc. Also a full line of novelties in Gold and Silver. We are offering everything at the lowest figures to keep pace with the times. If you don't fall to see our window on Railroad Street filled with novelties of the season. For Jewelry, Elegance and Style our line cannot be excelled. We keep on hand constantly a full line of Silverware, such as Castors, Butter Dishes, Berry Dishes, Sugar Bowls, Pickle Dishes, Water Pitchers, Cream Pitchers, Kettles, Forks, Spoons, and many other novelties suitable for Wedding Presents, etc. We can suit you in style and price. Try us.

SPECTACLES AND EYE GLASSES. We have also put in a full line of Spectacles and Eye Glasses. Our facilities for fitting glasses are the best. We can give you any kind of frames and lenses to suit you. We guarantee all glasses to give satisfaction.

Fancy Groceries, Fruits and Vegetables.

In our Grocery Department can be found Fine, Staple and Fancy Goods at prices to suit all. In Vegetables and Fruit we cannot be beaten.

HIGH PRICES THESE TIMES

A STUMBLING BLOCK.

An awful obstacle it is, too! What a source of great pleasure would it be to him in these distressing times "could he but overstep it!"

Prevents Many a Man from Well Dress!

Makes Many a Man Unpleasant!

Compels Many a Man to Want!

We've Overcome This All!

Popular Prices Within Reach of All!

Rule the Order of the Day!

Don't claim to sell all the goods in the city but do claim to sell at the lowest prices offered in Oakland. Our motto is

"QUICK SALES & SMALL PROFITS."

We only ask a trial and a call at

W. H. MALETTE'S,

The Cheap Cash Grocer and Jeweler.

Decoration Day in Oakland.

The several secret societies of Oakland have accepted the invitation extended by the G. A. R. Post and will turn out on next Wednesday and participate in the exercises of the day.

The societies will form in front of G. A. R. hall on Alder street at ten o'clock a. m. and march from there to the cemetery where the graves of deceased soldiers will be decorated with appropriate ceremonies. The Oakland band will be furnish music throughout the entire day.

A good time is promised these who visit Oakland on that day.

Deer Park.

Col. A. A. Hosmer and family of Washington, D. C., are now located at their beautiful summer residence here.

We learn from good authority that D. T. Thayer has found lime stone on his farm near this place.

The paint, scrub and whitewash brush are adding very much to the appearance of our lovely Deer Park.

Felty has put a twenty-foot awning up in front of his store, which adds very much to its appearance and comfort.

Mrs. Tabb, of Cincinnati, is now at Pleasant Rest for the summer.

Mr. and Mrs. W. C. Jones are away in Pennsylvania visiting their parents.

Mr. Adam Long is now located in the old postoffice building with all kinds of fresh meat for sale.

Our school building needs painting very much. We hope our worthy board will have it attended to at once.

Rev. J. W. Bedford is improving his property by having a large stable built.

Mrs. S. C. Hoye is very ill.

Elder.

Weather very nice.

Our Sunday school is progressing very nicely, but we think there is room for improvement and it should be made.

S. F. Cuppett and wife were calling on Robert Sterling Sunday the 20th.

D. O. Dewitt and wife, of Hoyes, were visiting at Isaiah Friend's May 13th.

Waiter Coddington has completed and moved into his new house, which is quite an improvement to the place.

Robert J. Sterling cut his foot while working on his father's clearing, but is slowly improving.

Forest fires were raging in our vicinity at the beginning of last week, having been started by sparks from the engine on A. Knabb & Co.'s road, and gave our people some work to keep their fences from being burned. S. F. Cuppett lost over 100 rails.

Chas. Frazee made a business trip to Friendsville Saturday evening and returned Sunday. We suppose he combined business and pleasure.

WHITIE ROSE.

The Soldier Sleeps.

In echoes die away:
No more to hear the bugle note
Horne on the waiting breeze,
Or see the smoke from campfires float
Above the arching trees:
No more to breathe the incense sweet
From soldiers' homely fare,
As busy hands and hurried feet
The morning meal prepare:
No more the breakfast call to hail
With merry glee and jest,
Or haste to greet the early mail
From those he loved the best:
No more to see the banner bright
Its lovely folds unfurl
Against the sky's soft amber light
And clouds of gold and pearl:
No more at morning of the guard
To take his place in ranks,
Or reap the laurels of the guard
The weary sentry's thanks:
No more to pass the long, long day
On lonely picket post,
Where oft the bushes, far away,
Seen an advancing host:
No more to spend the weary hours
With dreams of o'er fragrant pipe,
Or plucking daisies, familiar flowers
Or luscious berries ripe:
No more the campfire's genial glow
At evening to look
Where tales of love and joy and woe
The bugle's blarens look:
No more the blundering march
His cheering vapor breathes,
To see sweet visions gently roll
Along the fleecy wreaths:
He sleeps, the soldier sleeps, no more
To watch the fray,
The cannon's loud defiant roar,
The shout of soldiers rushing in,
The long roll of the drum,
The shell's wild scream and horrid din,
The bullets' deadly hum:
The battle line, the gleaming steel,
The valor's blinding flash,
The charge, the soldier's comrade's reel,
The valiant forward dash,
The grandeur of the serried rank,
As o'er the field it sweeps,
The struggle on the breastworks' bank—
For, lo! The soldier sleeps.
Sweet he sleeps, for all he had—
His life—he freely gave
That o'er a land with peace made glad
The flag he loved might wave,
And while his grave the chaplet bears
Above its lowly bed,
The crown of duty done he wears
Before the throne of God.
—Thomas Calver, in Once a Week.

OUR FIRST DECORATION DAY.

where I lived in the southern part of Illinois.
It was in the '60's and for some years the towns around us had been keeping what you now call Memorial day, and some one suggested that we, too, raise a small flag and scatter flowers on the graves of our soldier boys once a year, so that we would show to all that our boys in blue and our boys in gray were not forgotten, and the 30th of May was set apart for that work of love.
It was the night before the 30th that I saw her walking along through the rain, seemingly utterly regardless of the storm which swept around her. She had neither umbrella nor cloak to protect her slim form from the watery elements. She wore this entire dress and a well-worn shawl; her head was covered by an untrimmed straw hat. She was neat and clean. I knew something of her circumstances and so wondered at her being away from home at dusk.
A number of years before she and John, her husband, good, honest John Small, had begun their wedded life in a little, vine-covered cottage just on the outskirts of our town.
John worked in the town—a splendid mechanic they said he was—a manly-looking fellow, tall, broad-shouldered, with wavy hair and dark-brown eyes. He made a comfortable living and they were very happy. When the oldest child was six and the youngest a baby in arms that great "call to arms" for a nation's safety came, and John—what could John do but respond?
A company was organized in our little town and John enlisted. One day, with banners flying, and the beat of drum and noise of life resounding through the streets as if it were a gala day instead of a day of gloom and fear, they marched away.
I remember it plainly, as if it were but yesterday, seeing John stoop over the baby in her arms, as if loath to leave them, kiss the tiny face and hands over and over again.
He fought and fell, a captain among our boys, and when well enough they sent him home, only for the loved ones there to see how intensely he suffered. The journey was too much for him. Unconscious when he arrived, he remained so until he lifted up his eyes in that land where battle strife and beat of martial drum are never dug. We buried him—I say we because our whole town honored our fallen captain, and universal was the sorrow expressed for his wife and babies.
There was a little money left, and Mary kept her place and raised garden stuff to sell. As years rolled by that

was not enough to give her even a seat in church, and she moved into town and took to sewing.
Time had healed the sorrow in the hearts of the town folk as it had covered the grave with green. As I watched her I thought of her sorrow and great need, and wondered how we could so soon forget her.
I saw her enter a shop and come out directly with a disappointed look, tucking something under her arm. In my own arms I carried a box of cut flowers which I had purchased to place on the grave of an only son whose death had laid to rest just after that dreadful battle of Bull Run.
Although it was raining very hard at this time, wondering still more at her mysterious way, I followed. The last place which she had entered was a music store and I tracked my brain to find a reason for her doing so. She hurried along and promptly she seemed to come to the desired place, cautiously looked around her and then entered. When I came abreast of the place I saw that it was a loan-shop. Could it have come to this? Was she so reduced in circumstances that she found it necessary to pawn articles to exist?

PARTING WITH JOHN'S FLUTE.

I waited patiently until she appeared, the "something" under her shawl was gone and she started to retrace her steps homeward.
I did not follow farther, but resolved that I would not sleep that night until I knew just what John's wife was situated. After changing my wet garments for dry apparel and having a cup of tea, I started for her home.
When I reached the door of her apartment at the end of a long, dimly-lighted hall, I heard her running the machine and singing as she worked. I was surprised at this, for with poverty I had always coupled discontent.
She answered my knock by opening the door and saying how surprised she was to see me standing there. We talked of many interesting subjects, she telling me of the children and her work and of her many many struggles with poverty and doctors and drug bills. Naturally our conversation turned to the subject of Decoration day as the morrow had been christened, and smiling such a sweet, calm smile, she arose and going to the sink at the end of the room brought from it a box filled with flowers, which she had bought to place on John's grave.
She told me then, with her eyes filled with tears, she knew her John was a noble soldier and he so dearly loved flowers she could not think of his grave without a flag to mark and so she had managed to buy some for it. The children would go with her early on the morrow and they would spend an hour or two with him.
"She had managed to buy some," Yes, there was the secret of her walk in the storm and her mysterious disappearance into the place of the "three balls." I said nothing to her of what I intended, but silently admired such deep devotion. I saw his grave next day literally covered with the fragrant blossoms.
That evening a friend called at the place of "three balls" and upon inquiry found that it was John's wife, and she was ignorant of the practice, but had sold.
He purchased the same at my request and we sent it, together with a purse well filled with money collected by the army boys, to John's wife, making it indeed a day of decoration to those lonely hearts.—Chicago News.

A DESPERATE CHARGE.

It Carried a Bold Confederate Brigade Completely Through the Union Army.
From nine in the morning till five in the afternoon this charging and counter-charging in the woods went on. Brigade after brigade was knocked to pieces, fell back, reformed and went in again. There was a surprise every half hour. The trees were not so thick as to hinder the progress of the troops. They were thick enough, however, to conceal movements, until often the columns marching in different directions came front to front or front to flank within half a musket shot before either discovered the other. Then volleys were delivered and received at short range. Masses of troops fell to fighting until one or the other gave way. This happened when Stunt, of the confederate side, marching to relieve Cheatham, came plump upon two brigades of Van Cleve's division of union troops, and fought them muzzle to muzzle. Bates' brigade, led by the present junior senator from Tennessee, made one of the most remarkable

movements. It plunged forward through the union lines opposite it and kept going until it crossed the state road, for control of which both armies were fighting. On it went over the road, through mow fields, and into a clear field, bringing up at Widow Glenn's house, half a mile in the rear of the whole union army. Rosecrans had to pull two brigades out of the battle and send them after Bates to drive him back to where he belonged. In that wild, reckless charge the Tennessee brigadier had three horses shot under him.—American Tribune.

PATRIOTIC OBSERVATION.

The Duty and Privilege of a Loving and Grateful People.
At this season there should be no alloy in the golden tribute of our country to the soldiers. Their memory should be cherished, their bravery extolled and their examples emulated. It is impossible to value too highly their deeds on southern battle fields, nor to speak too emphatically of their patriotic motives. The inculcation of the lessons of patriotism is as much a duty as the defense of the country. The an-

PARTING WITH JOHN'S FLUTE.

niversary of the day when the graves of our beloved heroes are strewn with the flowers of a nation's love should be observed with all the fervor which a patriotic and home-loving people can command.
The observation of Decoration day should not be left alone to the organizations of old soldiers. A grateful nation should make of the day an annual occasion for the rehearsal of the valorous deeds of "the boys of '61;" citizens should vie with each other in exemplifying their affection for them, and the youth of the land then, if at no other time, should hear the history of their achievements. A patriotic people must not suffer the stigma that they have allowed the enthusiastic and hearty recognition of this occasion gradually to fail.—Chicago Graphic.

AS BY A MIRACLE.

Showing How Presence of Mind Can Secure Absence of Doubt.
The opera house was crowded. The curtain had gone down hastily in the middle of the second act of the musical extravaganza, and the audience, after a slight buzz of surprise and impatience, sat waiting for the rise again. Something had happened.
A fire had broken out in the property room.
With the feeble means at their command the stage attendants tried in vain to extinguish it.
The flames, reaching the combustible materials strewn carelessly about and began to eat their way upward. Dense volumes of smoke obstructed the efforts of the hastily-improvised fire brigade, and rose aloft through the unprotected regions back of the stage.
The terrible truth could be kept from the audience only a few moments longer. The fire was beyond control. Something must be done.
Outwardly calm, but with a face whose ghastly paleness mocked the mechanical smile it wore, the leading tenor stopped in front of the curtain.
The flames licked up the soul of man, moved by an intuition whose lightning flash infinitely transcends the swiftest processes of thought, leaps instantly and unerringly to the solution of some gigantic problem before whose sudden awful and inevitable front the plodding faculties of reason stand appalled and helpless.
In the life of this man the supreme moment had come.
The problem confronted him, and he was equal to it.
The building must be emptied with all speed, but without the dreadful knowledge that life and death were involved. There must be no maddened rush of frenzied humanity, blocking the doors and barring its own way of escape.
There was only one thing to be done. Assuming the easy attitude of a favorite singer in the act of responding to a second encore, the leading tenor unfolded a piece of sheet music and spoke in a low tone to the leader of the orchestra:
"Prof. Gibbons," he said, "oblige me by playing 'Two Little Girls in Blue.'"
—Chicago Tribune.

A young Lake Benton carpenter, recently married, described the dear girl's dress as follows: "It has plain sides, with base around the bottom, crown molding above, dormer window sleeves running into the gable, with a scroll work of velvet around the neck."
—Minneapolis Journal.

MISCELLANEOUS.

—To-morrow is the day that never comes.—Rau's Horn.
—New York charity hospitals are only partly supported by the city, but the sum donated amounts to \$750,000.
—At a small village in Kent, south England, twenty shirts are annually given away to deserving poor persons.
—We take greater pains to persuade others that we are happy than in endeavoring to be so ourselves.—Goldsmith.
—In England, France and Germany the ratio of multiple births is 13 twins per 1,000; 160 triplets and 8 quadruplets per 1,000,000 births.
—It is not what a man earns—not the amount of his income, but the receipts that determines his poverty or wealth.—Anon.
—In Paris, by an ordinance of the senate recently passed, women who stand independently at the head of a mercantile business have a right to vote in the election of trade arbitrators.
—Clerk—"I don't think you will be able to wear this collar. You can't stretch your neck up like that all the time." "It's exactly what I want. I'm going to the theater to-night."
—Human nature is not so much depraved as to hinder us from respecting goodness in others, though we ourselves want it. We love truth too well to resist the charms of sincerity.—Steele.
—While young board up a great stock of knowledge, though in that season of dissipation you may not have occasion to spend much of it; yet a time will come when you will need it to maintain you.—Beveridge.

The Montana Stockgrowers' association has adopted a resolution providing for the employment in each round-up, from June to November, inclusive, of an expert wolf poisoner, the expense to be divided pro rata among the stockmen.
—The total coinage, gold and silver, of the reign of Henry III. was \$3,800; the total coinage of the reign of Victoria up to 1892 was \$54,100,000, of which \$32,500,000 were of gold and \$21,600,000 of silver.
—The three or four weeks old Crown Prince of Bulgaria has been made Prince of Thessalon, Duke de Saxe, knight of two orders and honorary chief of the Fourth infantry, the Fourth cavalry and the Third artillery regiments.
—It is said that the Historical society of Pennsylvania has the most complete collection of American colonial laws in the United States. It was made by Charles C. Tamm and includes the laws of the Danish and British West Indies.
—Yellow corn meal is sold to the Italians of New York, though few others of the inhabitants consume it, unless, indeed, southern-born negroes retain their taste for corn pone. The Italians make of it a palatable and agreeable but soggy dish, beyond the digestive powers of any stomach save one long inured to garlic and onions.
—In the museum of ivory collected by the Princess Maud of Wales are to be found tusks of wild boars shot by the czar of Russia and sent to her collection, the tusks of elephants shot by her father and uncle, and the teeth of alligators, sharks, walrus, seals and lions.

—There was a general falling off in the customs and excise duties collected in all the British Australasian colonies during last year with the sole exception of New Zealand. In New Zealand the revenue increased 0.82 per cent. in Victoria, 17.20 per cent.; in South Australia, 10.51 per cent.; in Western Australia, 10.84 per cent.; in Tasmania, 9.74 per cent., and in Queensland, 6.55 per cent.
—The report of archeological discoveries in the San Juan Valley is something that has been expected for a long time past. It was known to a few persons that there were interesting unexplored cliff dwellings there, and doubtless many have had the matter in mind. The San Juan region, separated from civilization by a rough country, and the approach, whether by way of Colorado from the east, or through Utah from the north and west, is difficult. The region lies in the southeastern corner of Utah.
—Book thieves of the utmost apparent respectability have the largest book stores of New York, and it is not long since a venerable gray-haired man was arrested in a publishing house with a satellite full of new books just stealthily removed from the counters. He had been systematically robbing the houses of booksellers. It is known that one of the richest and most notable clubs in New York that a few members make a practice of cutting illustrations from books in the library, while doubtless every club that has a library is despoiled of its books by its own members.
—The district of Whitechapel, London, is rapidly ceasing to be, as it is generally considered, a distinctively Cockney-populated locality. In 1891 one in every five inhabitants of the district was a foreigner, and since then there has been a great influx of foreigners, mostly Russians and Russian Poles. More than two thousand of these foreigners settled in the district during last year, driving out almost as many Londoners. The birth rate in Whitechapel is 41, as compared with 25 in the western districts of London and 47 in Russia. Even if immigration should cease it is considered pretty certain that the Russians and Poles will soon predominate in Whitechapel.

Why Not?
"May," said her husband as they prepared to go out enlisting, "do you really mean to use those calling cards with your name spelled 'Mae Kathryn Allys Smith'?"
"I certainly do," replied Mrs. May Catharine Allys Smith.
"Very well, then," said her husband, firmly. "I am with you," and he politely presented her with a card neatly inscribed:
"Mae Kathryn Allys Smith."

GEORGE WILLIAMS.

Founder of the Young Men's Christian Association. The first society of this organization was called into life June 6, 1844, at London. The semi-centennial of this event will be celebrated in grand style in London and New York. Mr. Williams, the founder, will participate in the exercises at London.

TORPEDO BOAT NO. 2.

Built for the United States Government at Dubuque, Ia.

The First War Vessel Constructed at Yards Located Over a Thousand Miles from the Seaboard. She Will Be Named the Ericsson.

[Special Dubuque (Ia.) Letter.]
Marine architects and the many interested in our new navy have centered their attention on torpedo boat No. 2 to be known as the Ericsson, nearing completion in the yards of the Iowa iron works of this city. This interest is but natural when the fact is considered that although designated No. 2, it is the first experiment in torpedo boat building in this country worthy of the name. The Cushing No. 1 is in no particular up to the standard,

U. S. TORPEDO BOAT NO. 2, THE ERICSSON.

and in build, machinery, speed and the anticipated effectiveness in action furnishes no gauge for comparison. The Cushing is purely a Henschhoff product, readapted to torpedo uses, while the Ericsson is the result of careful study by the naval department, and has been built after the designs drawn by men versed in that branch of naval construction. So it will be seen that there never has anything been completed in this country from which comparison may be drawn, and it is sufficient to demonstrate the Ericsson's excellence by saying that England and France, with at least 300 each of these boats, have nothing superior, and it is doubtful if anything they have produced will ever equal this unique craft.
This boat is 150 feet in length and 15 1/2 feet beam in the widest section. She will have a displacement of 120 tons, and, while like all of her class, will sit low in the water. Yet, when ready for sea, she will need about 4 1/2 feet of water to safely navigate. In her after sections she resembles the whaleback, with graceful lines drawn in to the eigh-shaped termination, but forward she holds her depth well, giving her smooth and unbroken lines to the stem, and so sharply drawn that the least possible resistance is provided.

No greater care could possibly have been taken than has been lavished upon this vessel, every piece of material being subjected to a thorough and scientific inspection, and nothing else than apparent perfection was allowed to go. Her frames are of steel and the plating of galvanized steel from three-sixteenths to one-fourth of an inch in thickness. The work in completing the hull has been slow on account of the excellence required, and, as finished, is pronounced a masterpiece by experts and government inspectors.
In no part of her construction is so much interest taken as in the machinery. Bearing in mind that the speed requirement is twenty-four knots, it follows that the propelling power must be something more than ordinary, and it is doubtful if a finer set of engines was ever built in this country, and no boat of the size of the Ericsson has ever been provided with greater developed power.
She has two engines of the vertical inverted cylinder, quadruple expansion type, which, together, make a remarkable amount of machinery for a boat of its size. The high pressure cylinder has a bore of eleven and one-half inches; the first intermediate, sixteen inches; the second intermediate, twenty-one and one-half inches, and the low pressure, thirty inches, with a

general stroke of the piston of sixteen inches. The twin screws are made of malleable iron and are four feet seven inches in diameter. These engines are expected to develop two thousand horse power.
The steam supply is to come from two Thornycroft boilers, one placed in the section immediately front and the other aft of the engines. They were built here under royalty to the English patentees, and are remarkable in more ways than one. The principle on which these boilers are constructed is not new, but is seemingly carried to the limit. The flues or the tubes connecting the sections number in each boiler over twelve hundred, giving an enormous heating surface. These are covered with a casing of malleable and galvanized steel, and with these and the machinery in place and fuel in the bunkers the little craft has a full cargo.

The armament of the torpedo boat will consist almost wholly of the arrangements for using the Whitehead torpedo. To repel boarding she will carry four one-pounders, rapid-firing guns, but her effectiveness is entirely in her power to reach a point close enough to the enemy, fire her torpedo, and run away. The quadruple in her crew are such that there will undoubtedly be no great strife among the sailors of the navy to be assigned to her. There is barely room for the crew and officers, with no opportunity for accommodating guests or making this last addition to Uncle Sam's fleet a pleasure boat. The general equipment of the torpedo boat will be as perfect as it is possible to be made. She is provided with steam steering gear, with patent enudators and an incandescent lighting system that is wonderfully perfect.

The work on this boat was commenced nearly three years ago, it being the first experience of the Iowa iron works, whose managers have worked in some particulars under a great disadvantage. Added to this came the strike at Homestead, from whence much of the material in the construction of the boat was received. A strike at home also delayed the work, and for some months during the past winter nothing whatever was done, but the little craft is now nearing completion. The finishing touches are being put on both hull and machinery, and it is expected that in a few days she will be ready to slide into the Mississippi.
It will take some days to prepare for her trip to the sea, which promises to be not only interesting to those navigating her, but to the people along the Mississippi river, this probably being the only opportunity they will ever have of seeing a real torpedo boat. In going from Dubuque to a point below the rapids just above Davenport, Iowa, after which she need anticipate no trouble in reaching the gulf.

The delivery of the boat by the contractors to the government will be made at Pensacola harbor after the trial trips have been made and she has been demonstrated to be one of the fastest, if not the fastest, crafts in the world.
Fully realizing their obligations to reach the twenty-four-knot limit, the contractors seemingly have no fear whatever of failure. They claim to have the machinery to drive the boat much faster than this if required, and are anticipating in the real speed achievement of the Ericsson their very best advertisement for this inland shipyard.
—DR. C. H. HURLOCK.

The Republican.

BENJ. H. SINGELL, Editor and Proprietor.

RATES OF SUBSCRIPTION:
This Republican is published every Thursday morning at the following rates:
One copy one year.....\$2.50
One copy six months.....1.50
One copy three months......75
One copy one month......35
Single copies......10

ADVERTISING RATES.
First insertion for space of ten nonpareil lines; each additional insertion after first at one-half rate. For space of ten nonpareil lines, positive 750 deviation will be made from the above rates.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at par; but, if made otherwise, at the risk of the sender. Address, THE REPUBLICAN, Oakland, Md.

THURSDAY, MAY 24, 1894.

Notice.

Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

A Spell of Weather.

This year's May has made a record for herself with a remarkable spell of weather. Snow storms and thunder storms, solar storms and hail storms, high temperature and low temperature, have succeeded each other with great rapidity. An extraordinarily large precipitation has filled the rivers to overflowing, causing great loss to property and damage to crops. Fortunately there has been little or no loss of life. The snow storm in Kentucky and Tennessee is an event of such an exceptional nature as to excite wonder. In one part of the former State snow fell to a depth of 10 inches, and the fall extended as far south as Chattanooga, Tenn.

A dispatch from Somerset, Ky., says that a May snow was never known before in that section; and throughout Eastern Kentucky the oldest inhabitant has to keep mum or lose his reputation for veracity. The connection between these terrestrial storms and the perturbations reported in the sun, will form an interesting study for scientists.

The Senate Investigation.

The committee investigating the charges of bribery and stock jobbing made against senators, have decided to sit with closed doors. This may be gratifying to senators, but it will not satisfy the public. The decision of the committee recalls the fact that the Credit Mobilier investigating committee resolved to do its work in the same secret way. It is safe to say that had they been able to carry out the plan the scandal would have been decisively stifled, but the pressure of the public opinion burst in the doors, let in the light, dragged out the facts and pilloried the guilty.

Nothing less than similar opportunity in the case of the Senate investigation will satisfy public opinion. If the determination to make the investigation secret is persisted in, the public will regard it as a farce and the report of the committee will command no respect. It is not the report of the committee, but the evidence which chiefly interests the public. It is desired that the trial shall take place under public survey, so that testimony can be considered as it is given, collateral facts elicited by newspaper inquiry, and a thorough sifting of the case be assured. It is well known that the Senate is disinclined to investigate the charges. Recently a resolution to investigate charges of senatorial speculation in Sugar trust certificates was voted down. The plan of secret investigation looks like an attempt to limit as much as possible the scope of the inquiry.

The Right Kind of Citizens

A town or city, remarks an exchange, is just what its citizens make it. Given the right sort of people, and a desert waste will be transformed into a garden that shall bloom like the rose and a straggling settlement into a thriving city. Given the wrong sort of citizens and all the advantages of soil, climate, geographical position and wealth go for naught. Manufacturers do not make the city. It is the city that makes the manufacturers. The stock-yards and the grain elevators did not make Chicago; pork packing did not

make Cincinnati; a railroad centre did not make Indianapolis. In each case the city is the cause and the business the effect. These cities had public spirited men, and they attracted the kind of business which is located in them—that is all.

And what is the right kind of citizen? He is the man who does not look across the continent for an investment, but spends his money at home and encourages home enterprises. The right kind of citizen does not grumble about high taxes, because he has sense enough to know that taxes must be high in a growing city, and that if low taxes are a desideratum he must go to a place that has stopped growing or that has never grown much. The right kind of citizens know the distinction between the virtue of economy which avoids all waste, but spends money freely for public improvements, and the vice of parsimony that spends nothing unless absolutely compelled to. The right kind of citizen may not be a wealthy man—indeed he is more frequently not one—but he cheerfully helps support the public schools and the churches, and he is in favor of the public library.

The right kind of citizens believe in well lighted streets and good sidewalks, for he knows that vice and crime hate gas light and electric light almost as much as they do daylight, and that they delight in darkness. He also knows that these things give a good impression to strangers. The right kind of citizen also is fully aware of the fact that no expenditure brings so great a return to the citizens as that which he pays in taxes, provided it is honestly and judiciously applied.

Don't Kill the Sheep.

To the Editor of the Republican.
Two years ago the country was under Republican control. For thirty years the policy of Protection had been maintained, had been modified and improved from time to time as the needs of the Government, the changed conditions of business interests and experience required. The changes had always been made with a view to the advancement of the industrial interests of the United States. The McKinley tariff, which raised such a howl throughout old England and the Democratic camp in America, cut off a hundred million dollars of tariff revenue which could have been done without under Republican rule. It placed sugar and a great many other products on the free list and reduced the duty on a great many other things, all with a view to bettering the condition of the American.

When the duty was taken off of sugar a bounty was added so as not to injure the sugar industry of this country; fifty per cent. of foreign imports were put on the free list, but it was that class of products which we cannot produce successfully in this country, and hence would not injure any of the business interests here by bringing about a ruinous competition with the underpaid labor of Europe. The result was just what the Republicans hoped and believed it would be. Every sort of business was booming and new enterprises were springing up to swell the increasing volume of trade. Everyone had all the work he could at the highest rate of wages ever known and the people of other lands came flocking to our hospitable shores to share the advantages of our abundant thrift and prosperity.

In this mountain country devoted mainly to agriculture and stock-raising, the old methods were being discarded and other crops and improved methods were being adopted in their stead.

Wheat and corn to a considerable extent has been abandoned and fruit, potatoes and garden truck adopted as more remunerative and less exhaustive of soil and muscle; sheep has to a great extent taken the place of beef cattle, and it was generally conceded by intelligent farmers that there was more money in sheep than in any other variety of farm stock.

The sheep has been designated as the animal with the golden hoof, and at twenty-five cents per pound for wool the cost on a sheep's back would pay for the keep, and the profits derived from the sale of mutton and lambs was no inconsiderable item, not to mention the improvement in the fertility of the soil devoted to sheep husbandry.

With fifty or one hundred head of sheep it was possible for the farmer to realize quite a comfortable little sum in clean cash each year to help pay the taxes and the thousand and one incidentals where the ready money is always so very convenient.

But there are two political parties in these United States constructed on lines of policy diametrically different.

One of the parties has devoted its energies since its advent into power first, to the defence of the Union which the other attempted to break up and destroy; then when peace had been declared, to the up-building of manufactures and a new industrial system; to the defence of the public credit and the reduction of the National debt; the adoption of such financial measures as would give to the people a sound, safe and honest monetary system; securing a stable, a reliable basis on which to transact business.

The other party, after the defeat of its little enterprise to break up the Union, devoted its energies to the nursing and keeping alive of the hatred and animosity engendered by the war. It sought to make political capital by arranging class against class, by the encouragement of every disloyal sentiment, by hampering the Government in its effort to pay the debt of the war, by encouraging every financial heresy, by fomenting discontent and dissatisfaction among the people and by arranging every dissatisfied element against the general Government.

This party is in power now, and having sown to the wind the country is reaping the legitimate harvest.

Calhoun is said to have declared that he would go out of his road at any time to kick a sheep.

His disciples, many of whom believe in nullification, state's rights and secession, are now to enjoy this predilection. They are in the kicking business.

They are about to avail themselves of this opportunity to gratify this traditional propensity.

This administration and Congress are not kicking the sheep alone, but the farmers who own the sheep, and who by their votes placed them in a position where they could kick effectually.

The South is interested in cotton and the more wool the less cotton will be used, hence the kick.

Well, the farmers who voted that way will have to grin and bear it, but if the Democratic newspapers and disseminators of misinformation were compelled to stand the "heft" of the kicking it might be said as of old, "the judgments of the Lord are true and righteous altogether."

When the Republican party was restored to power after Cleveland's first term and it was assumed that the duty on wool would be restored to what it was in the Morrill tariff the price of wool went up at once to 27 cents, but when at the following election the Democrats were successful which seemed to foreshadow their return to power, the price of wool promptly dropped to 25 cents, where it stood until the cyclone of 1892 and although there has been no change in the tariff yet the purchasers of wool and the manufacturers of woollens must anticipate what is coming. They know the price of foreign wools, they know what these wools can be laid down here for, and as they purchase this spring for next winter's next summer's consumption they must buy so as to be able to sell in a free wool market. Besides, they know that England and other European countries are waiting for the Wilson bill to become a law so that they can dump the cheap wools manufactured out of cheap wool and by cheap labor on to our markets necessitating a large reduction in the price of woollen goods, and under the circumstances it is not strange that the price of wool should go lower than ever before—should, in fact, approach the free trade basis.

The Democrats claim that this will be advantageous to the people generally, while the Republicans contend that the gospel of cheapness can be carried too far—that cheap commodities imply low wages and incidentally cheap or degraded men and women.

With a protective tariff prices will be higher, but our own people will do the manufacturing and get the pay for it. Cheap clothing will not avail the laboring man anything if he cannot get the work to earn the money to buy with. Better have steady employment at good wages and pay more for his coat. The farmer would be better off with good prices for his wool, his mutton, his lambs, and his surplus of every sort than if he had bought his clothing a little cheaper and had no market for the products of his farm.

With a proper guarantee against foreign competition the farmers and flock-masters of this country would produce every pound of wool that could be consumed in this country, and then the \$27,000,000 which go out annually to pay for foreign wool would be retained and paid out to our own people.

This, I fancy, would be better than squandering untold millions on the whiskey trust, on the sugar trust, and on the various other trusts and combines while the farmers and wool growers are left

to fight it out with the cheap wools and the cheap products produced by the cheap labor of other countries.

Many of the farmers of Garrett county, as well as elsewhere, were instructed by the papers they read and by their party leaders that just as quick as free trade should be substituted for protection the price of wool would go higher. They declared that experience and statistics proved this, but we hear no more of this now. The opportunity of an experimental test is too manifest.

If the people could know the truth they would advocate whatever policy would result most favorably to them. People as a general rule do not vote against their individual interest, but in this instance they so voted because they had been deceived, had been led to believe against reason that free trade in wool would be to their advantage. Perhaps this claim will not be abandoned. Let us see, Garrett county produces probably 150,000 pounds of wool which is selling today for nine cents per pound less than it brought two years ago under a Republican administration. This net loss would therefore foot up \$13,500. And to this an equal amount representing the loss on the sales of mutton and lambs and we have \$27,000 as the amount confiscated in Garrett county by the head of this Government, taken out of the pockets of the farmers of this county. Add to this the shrinkage in value of all the cattle, horses, poultry and general farm and garden products sold, and then add to this the reduction in business, the loss on account of reduction in wages, and the amount is simply appalling, probably four times as much as the total amount collected annually for State and county taxes.

This is done in order that Australia, South America, the Argentine Republic, New Guinea and other countries may have free access to our markets and in order that England, Germany and France may grow richer by doing the work which the people of this country needs and ought to have.

When free trade or tariff reform has once been permitted to get in its work, when the people have had a good sickening dose of it they will not want another during this generation.

A good honest Democratic farmer said the other day that if fifteen and sixteen cents was all that wool was worth we might as well kill the sheep. I said, "No, don't kill the sheep, but kill the party that brought this thing about," and to the farmers of Garrett county I would repeat the admonition: don't kill the sheep, but the next time you go to the polls use your vote to help paralyze the party that dares to use their first accession to power in the confiscation of the property of honest American citizens for the benefit of aliens and foreigners.

Decoration Day.

Crook Post No. 35, G. A. R., of Oakland, desires the presence of all G. A. R. Posts as well as all old soldiers to meet with us and join in observing memorial day, May 30th. Invitations are also extended to all lodges K. of P., Odd Fellows, Jr. O. U. A. M., Hibernians and the citizens generally. Invitation is also extended to all school children to meet with us, and also the Oakland Cornet Band.

Dorations of flowers will be gratefully received. They can be left at Crook Post Hall or Stargis' drug store on Wednesday morning, 30th.

A. G. STURGIS,
H. Low, Adj't. Commander.

Condition of Ex-Treasurer Archer.

It is now though probable that Ex-State Treasurer Stevenson Archer will be able to leave the City Hospital, at Baltimore, for his home in Belair in the course of the next week or 10 days. He has been cheered considerably by Mrs. Archer's visit the physicians reported yesterday and an improvement in his condition has become apparent. It is regarded as certain, though, that he can never be entirely cured of his malady.

Married.

At St. Ann's church near Grantsville, Thursday, May 17, 1894, by Rev. S. J. Clarke, pastor, Mr. John O. Getty, and Miss Annie E. Dorsey, both of this county. Owen Porter, of Frostburg, and Miss Carrie Dorsey, sister of the bride, were the attendants. The church was crowded with friends of the couple, and at the residence later a reception was held lasting several hours, during which a bountiful collation was served. Besides Father Clarke, Revs. McEvoy, of Butler, Pa., and McKenna, of Mayersdale, Pa., were present. Mr. and Mrs. Getty will reside in Grantsville. Mr. Getty is a son of ex-Senator W. R. Getty, and his bride one of the attractive daughters of Patrick Dorsey, a wealthy and estimable gentleman.—Frostburg Journal.

Ripans Tablets relieve nausea.

Mountain Lake Park.

Hon. Gozo Tateno, the Japanese minister at Washington, D. C., has rented Dr. Baldwin's cottage for the summer.

Mr. Michael and wife, of Water Gap, Pa., with Mr. Pogue, of Wheeling, have rented Altamont cottage and will open it for guests on the 20th. A bath room is being added for the comfort of their patrons.

Mrs. M. Ebert, of Kingwood, W. Va., with her son and daughter, Mr. and Mrs. Maworn, has moved into the Allegheny House and will have it ready for guests by June 1st.

The Columbia hotel improvements are nearing completion. The addition is three stories. Each floor will be 30x10 feet. The grounds belonging to the hotel have been very much improved. The hotel has sixteen guests.

Mrs. Sawyer, of Wheeling, is putting the Assembly House and cottages in shape for guests. In fact she has some guests now.

Miss Sarah Harris, of Franklin, Va., is here busy at work getting her house ready for guests.

J. J. Miller's family of Cumberland have moved into their cozy cottage.

Mrs. S. L. Allen, of Grafton, W. Va., spent part of last week at the Park. They will not keep house here this summer but will board.

Capt. Sheets, of Grafton, has purchased Mr. Atkinson's cottage and two lots. He is improving the property.

Mrs. Hornbrook, of Wheeling, is here for the summer. She is with her daughter, Mrs. L. F. Ballard.

Mrs. Belle C. Harmon, of Romney, W. Va., has purchased the lot south of Romney cottage from Major Alderson; price \$250.

Mrs. M. E. Whitaker, of Wheeling, has rented the Yoder cottage on G street. A delightful place.

Rev. C. W. Baldwin, of Washington, D. C., visited the Park last week.

Four new cottages were commenced last week. They are to be ready for occupancy by the early part of June.

The interior of "Oak Crest" cottage has been painted and papered. Supt. Rudisill feels comfortable in the improved appearance of his home.

Mrs. Little and Railroad Agent Burk's family, of Wheeling, have rented Dr. A. T. Young's cottage for the summer. A delightful location.

Fern cottage is being enlarged by the addition of two rooms and a large porch. It will be occupied by Dr. Rambeau, of John Hopkins University.

John Dunhill, city passenger agent of the Baltimore and Ohio railroad at Mt. Pleasant, Pa., has rented a cottage in Cozy row, and will occupy it next week.

J. T. McGraw, of Grafton, has rented the Allen cottage on G street. Dr. Sells, of Stubenville, O., has rented one of Miss Bowman's cottages for the summer.

J. F. Watson of Onancock, W. Va., has opened the drug store and will have charge of it this summer. He comes well recommended as a druggist.

Rev. Dillon, of Pittsburgh, Pa., spent several days at the Park. He is a frequent visitor.

L. A. Rudisill has received his commission as a notary public by appointment of Governor Brown. The Park and adjacent woods are full of honey suckles and other wild flowers.

Mrs. Will Dice, of Mansfield, O., will open P. T. Garlright's house.

Mrs. R. C. Burton, of Zanesville, O., has rented C. E. May's cottage on K street.

A private telephone line is being put up by Samuel Lawton between J. M. Davis & Son's store, Oakland, and the office of the Mountain Lake Park Association at the Park.

W. R. Johnson, of Topeka, Kansas, has the lumber on his G street lot for a cottage to be ready for occupancy next month.

R. C. Richardson is putting the lumber on the ground for a cottage. His lots are on F street.

June 1st the Baltimore and Ohio Railroad company will sell a one fare round trip ticket from all points between Cumberland and Grafton to the Park. This is the opening day. The Oakland band will be present and at night there will be an electric illumination.

The following is the program for the summer: June 1, Opening Day; 8-10, Sunday school workers convention; 16-20, Christian Alliance convention; July 3, anniversary Battle of Gettysburg; 4, Independence Day; 7-16, camp-meeting; 25-29, inter-State W. C. T. U. convention; August 1-21, Chautauqua.

H. C. Sharp and wife of New Philadelphia, Ohio, have moved into their cottage.

For Malaria, Liver Trouble, or Indigestion, use BROWN'S IRON BITTERS

Elbow.

Farmers are all done planting corn.

Ephraim and Jonas Broadwater visited H. M. Broadwater Sunday last.

Rev. John Green preached an excellent sermon to a large congregation at Gregg's school house last Sunday.

Mrs. W. W. Broadwater was visiting friends at Westernport last week.

Charles Merrill is visiting friends and relatives in Pennsylvania.

Edward Wiland was the guest of T. J. Broadwater Sunday last. Rumor has it a wedding soon.

SOMEBODY.

LIAMS.

The first society of this organization at-centennial of this event will be celebrated June 1st, the founder, will participate in the

meral stroke of the piston of sixteen ches. The twin screws are made of agnesia bronze and are four feet seven inches in diameter. These engines are pected to develop two thousand re power.

The steam supply is to come from two ironcraft boilers, one placed in the aer aft of the engines. They were

here under royalty to the Eng- patents, and are remarkable in re ways than one. The principle on which these boilers are constructed is new, but is seemingly carried to

limit. The flues or the tubes con- taining the sections number in each

over twelve hundred, giving an orous heating service. These are

ved with a casing of magnaesia and yantized steel, and with these and machinery in place and fuel in the

sters the little craft has a full go.

I desire to inform the people of Oakland and vicinity that I am now prepared to furnish them, at very reasonable prices,

MILLINERY GOODS, FLOWERS, RIBBONS.

SIOW and Fancy Goods, Notions, Etc.

52-Store on Oak street at east end of Davis bridge.

Give me a call, examine my goods, and be convinced that my stock is complete in every particular.

11 2m MAHIE CUNNINGHAM.

STOCKHOLDERS' MEETING.

Notice is hereby given that the annual meeting of the stockholders of the Mountain Lake Park Association will be held at the principal office in Hutton, Garrett county, Md., on Saturday, June 16th, 1894, at 11 o'clock a. m., for the purpose of electing a board of directors to serve for the ensuing year and the transaction of such business as may properly come before such meeting.

T. G. BALDWIN, Secretary and Treasurer.

NOTICE TO TAX-PAYERS.

This is to notify the tax-payers of Garrett county that the Annual Levy for 1894 has been made and published, and to call their attention to the following abstract of Section 45, Chapter 206, Acts of 1889, relating to the disbursements to be allowed and interest to be charged on all tax bills.

"All county taxes shall be due and payable on the first day of September next and, unless the date of the levy thereof and on all county taxes paid on or before the said 1st day of September a discount of 3 per cent. shall be allowed; and after the 1st day of January all taxes shall bear interest at the rate of 6 per cent. per annum until paid; the Treasurer shall take the discount from and charge interest on all tax bills for county purposes regularly in the manner aforesaid, and shall note the same upon the receipt given for taxes so paid; but the discount shall not be made to any person or corporation in violation of the whole amount of State and county taxes due by such person or corporation in violation of the current year be paid when the same is made."

T. G. BALDWIN, Treasurer of Garrett County.

It is requested that in days she will be ready to slide the Mississippi.

will take some days to prepare for trip to the sea, which promises to be only interesting to those navigating her, but to the people along the Mississippi river, this probably being opportunity they will ever of seeing a real torpedo boat. On

at of the shallow water of the the utmost care must be taken from Dubuque to a point be- rapids just above Davenport.

A NEW STORE.

I HAVE A FULL LINE OF

Millinery Goods, New and Stylish Hats, Ribbons, Flowers, Lace, Gloves, Mitts, Corsets, Veiling, Fancy Goods and Notions.

Also have Sugar, Calico, Muslin and other articles at reasonable prices.

BUTTER AND EGGS

taken in exchange for goods.

MARY SPINDLER, 10-3m. ACCIDENT, MD.

A MINX

KITTY TRELOWNEY, a Minx. MARION HARCOURT, an Angel. GEOFFREY FORTESQUE, a Minx.

SCENE—A drawing-room.

have you come back for good from your travels—nearly two years, isn't it? And is your father better? When did you get back? And can you guess what a wicked girl I am, and how miserable this unhappy secret makes me—at least, part of it, for some of it's happy, you know; but I do so want your advice and sympathy and—

Marion—O my dear Kitty, stop! Sit down and let us talk quietly. I want sympathy, too.

Kitty—(open-eyed)—You! You want sympathy! I thought you were above that weakness.

Marion—Not a bit. I want all you can give me.

Kitty—Oh, do tell me; but you must hear me first—my troubles are more pressing. I'm in such a fix! I've got a letter from him! Whom?

Kitty—(impatiently)—The him, of course. There's only one him—at least, there ought to be only one. That's just it.

Marion—What do you mean?

Kitty—I mean that—there are two. Marion—You are engaged to two men at once?

Kitty—Well, you see—they overlap—for the moment.

Marion—You take my breath away. Explain!

Kitty—You remember my writing to tell you about my engagement to an awfully nice, clever fellow, a lawyer, about eighteen months ago, and how he had to go to India—to take evidence on commission, they call it, I think—a few weeks after we were engaged?

Marion—Yes, I remember. He was as good as gone, wasn't he?

Kitty—Oh, yes; he's come right enough. I'm expecting him here now—immediately—any—every moment; and I don't want him!

Marion—Explain! Explain!

Kitty—Last summer, I went to stay at Mrs. Fairlight's place on the Hudson, and of course, there was lots of bonneting, tennis, picnics and—(hesitates) moonlight walks.

Marion—(gravely)—Oh, my dear Kitty!

Kitty—The situation's got to be faced. I know I'm a wicked flirt, and all that; but oh, Marion, he is such a darling, and I really, truly want to be his wife.

Marion—Then why weren't you true to him?

Kitty—Which him? I'm speaking of the—the well, the now one.

Marion—Kitty, you are dreadful. You never talked about it like this before. Who is it? Tell me, quick!

Marion—(after a pause)—I don't feel that I can talk to you as freely as I could once have done. I shall get it out of you. You met him abroad. Where was it? Who is he, and when were you engaged?

Marion—We are not engaged.

Kitty—Broken off? Oh, Marion, I'm so sorry, dear.

Marion—No, not broken off. He was engaged before we met.

Kitty—(whistles)—And he fell in love with you and told you so?

Marion—No.

Kitty—He never told you he loved you?

Marion—No, not in so many words.

Kitty—Well, when shall you see him again?

Marion—I do not expect ever to see him again.

Kitty—And you love him very much?

Marion—I could love him very much.

"LET US TALK QUIETLY."

Kitty—Poor thing! Marion, it's four o'clock, and you've never helped me out of my fix one bit. He may be here at any moment, and what am I to say to him?

Marion—(bewildered)—You're speaking now of—

Kitty—The original one. Don't you understand? He returned from India yesterday. I have to tell him I love some one else, and I can't. I don't love the bell. Marion, I can't see him!

—I won't. (Suddenly) you must. (Rises.)

Marion—Don't be absurd. I can't see a perfect stranger.

Kitty—(making for the door)—Say you're a friend of the family, and I'm a silly, blue-brained girl who doesn't know her own mind. Say anything

you like; but get me out of this, and I'll love you forever. (Flies out of the room by a side door as the servant enters by another and announces Mr. Fortesque. Marion rises.)

Marion—Mr. Fortesque!

Mr. Fortesque—You here! I—I had no idea you knew the Treloveys.

Marion—Yes, Kitty and I are old schoolfellows.

Mr. Fortesque—(with some emotion)—I never thought to see you again. And Miss Trelovey, has she told you all about me?

Marion—She told me she was engaged to—some one very nice.

Mr. Fortesque—Ah! why did she run away as I came upstairs?

Marion—I will go and ask her to come back to the door.

Mr. Fortesque—Please tell me first why she ran away.

Marion—She shall tell you herself.

Mr. Fortesque—Then there is something to tell me. What is it? She has changed towards me. I half guessed it from her letters of late. She is afraid to tell me herself, and has left you to do it for her. Isn't it so?

Marion—Yes.

Mr. Fortesque—And she loves some one else?

Marion—She must come and speak to you herself. I'll fetch her. (Goes towards the door.)

Mr. Fortesque—Stop—did you tell her of our previous acquaintance?

Marion—No, but I must now. (Marion retires, and in a few minutes Kitty enters in a rather shame-faced manner.)

Mr. Fortesque—How do you do, Kitty?

Kitty—O Geoffrey, I'm so sorry; are you dreadfully angry?

Mr. Fortesque—Do I look angry?

Kitty—No, I can't say that you do. I thought you would be. I think you ought to be. You ought to look—well—

—little unhappy.

Mr. Fortesque—You want me to look unhappy because you love some one else.

Kitty—I think it would have been rather nice of you.

Mr. Fortesque—But supposing I love some one else?

Kitty—(eagerly)—But you don't, do you, Jeff?

Mr. Fortesque—My dear Kitty, what can it matter to you now?

Kitty—(doubtfully)—N-no. Of course, it oughtn't to matter. But I didn't think—

Mr. Fortesque—That I could be as faithless as yourself?

Kitty—How horrid of you!

Mr. Fortesque—No, I'm not, and I haven't been faithless. I have been

true to you, Kitty, and would have married you. You wish to be free. Well, I give you your freedom.

Kitty—Oh! I never thought you'd take it so coolly. You want to be free, too?

Mr. Fortesque—Naturally.

Kitty—To marry some one else?

Mr. Fortesque—Yes, I wish to marry some one else. You want to do the same, I understand. What could be better?

Kitty—Oh! but I didn't think you would be so glad to get rid of me. I—I—Jeff, who is she? Is she pretty, and young, and clever? Is it any one I know?

Mr. Fortesque—Yes, it is your old schoolfellow, Marion Harcourt.

Kitty—(amazed)—Marion! Why—

—you've only known her five minutes!

Kitty—Then you are the man she has been telling me of—who was engaged to some one else and with whom she parted forever.

Mr. Fortesque—We thought we had parted forever.

Kitty—I should think so—when you were engaged to me.

Mr. Fortesque—Don't you mean, Kitty, when you were in love with some one else?

Kitty—(sits down and writes)—There! Mr. Fortesque—Can you be polite in ten words?

Kitty—Read it, and see! (Writes him.)

Mr. Fortesque—(reads)—To Trelovey Club. Please come congratulate me—Kitty.

Kitty—Why the other one, of course. Go and hand it in, quick.

Mr. Fortesque—(going out)—Little minx! Society.

TEMPERANCE NOTES.

LESSONS IN TEMPERANCE.

A Missionary's Experience Among the Children of Drinking People.

Miss H. was a missionary in a chapel belonging to a city church. One of the first problems she met there was of course the mischief done by the drink. She was not sure of the sympathy of the church members nor of the frequenters of the chapel. But the children were not prejudiced, so she began in the sewing school. She told how girls were tempted to slip beer when they were sent for it, but that many would not touch it, because they saw the mischief it worked in their homes. Then she told how it hindered children in the studies at school. When they had beer for breakfast or at lunch, it made them so stupid that they could neither study nor recite, and sometimes they even went to sleep. She told of one little boy made so drunk by wine at lunch that he could not climb the stairs to the school-room, and he had to go home again.

These things repeated in the homes made the mothers anxious about their boys, and this was shown in the mothers' meetings and produced temperance talks there. Then the mothers begged to bring their boys along. This easily opened the way for a band of hope to be held after the mothers' meeting, and to which the children could come direct from school. The mothers came and with them took their children. A few temperance chromo cards and illustrated tracts and papers helped secure the children's interest in hearing the truths about alcohol, and being shown the strange things it did right before their eyes every day. Then they were taught what drinks contained alcohol, and how it came there. They were shown its color, and the color of its flame when burning; and they repeated in concert a list of the most common alcoholic drinks:

Alc. brandy and port, I must shun. And stout and wine and cider, too. Strong whiskey, brandy, gin and rum, And all the punch and toddy crew.

When the question was asked what they should do when told to say, "Excuse me, for I fear it would not please God."

In a German family the little children were so much impressed with what they learned about beer, that they declined to drink it at the breakfast table at home. The father began to make their father-in-law, the mother said, "Let's see if they can give any reasons."

So she gently questioned them and drew out the stories of the children too stupid, through beer, to study in school, and when they added that they wanted to be good, she began to make their father-in-law, the mother said, "Let's see if they can give any reasons."

So she gently questioned them and drew out the stories of the children too stupid, through beer, to study in school, and when they added that they wanted to be good, she began to make their father-in-law, the mother said, "Let's see if they can give any reasons."

which 644,532,505 gallons are brewed in north Germany, 544,830,505 gallons in Bavaria, 50,955,750 gallons in Wurtemberg, 56,445,840 gallons in Baden and 17,083,305 gallons in Alsace-Lorraine. Great Britain comes next with a total of 874,192,275 gallons, while Austria Hungary is third with a total of 598,889,475 gallons, and France follows with about 255,000,000 gallons. These are the only countries in which the production reaches 100,000,000 gallons; but relatively to their population, Denmark, with 49,198,000 gallons brewed and Norway with 38,304,390, have a much larger production than most of the others. But Russia, with its vast area and large population, produces only 65,892,870 gallons, while the quantity of beer produced in other countries is: Switzerland, 29,694,405 gallons; Spain, 33,092,500 gallons; Turkey, 3,100,000 gallons; Italy, 3,209,665 gallons; Roumania, 2,235,000 gallons; Luxemburg and Serbia, 2,093,500 gallons each, and Greece, 150,342 gallons. The average quantity of beer brewed out of Europe is 289,968,415 gallons in the United States, 26,258,900 in Australia and 4,000,000 in Japan.—Temperance Bulletin.

WATER GOOD ENOUGH.

A Reminiscence of Lincoln's First Nomination for the Presidency.

The nomination of Lincoln for president of the United States was quietly received at his home in Springfield, Ill. When the committee from Chicago arrived to appraise Mr. Lincoln of his nomination, his two boys Willie and "Tad" were perched on the fence before the house. "Tad" stood erect, and welcomed the committee by shouting "Hooryay." Charles Carleton Coffin describes the reception of the committee.

"Mrs. Lincoln was pleased to see you in the other room, gentlemen. You will be thirsty after your long journey. You will find something refreshing in the library."

In the library were several hundred volumes ranged upon shelves, two globes, one terrestrial, the other celestial, a plain table, a pitcher of water and glasses, but no wines nor liquors.

You did not find any great spread of liquors, I take it, remarked a citizen of Springfield the next morning.

"No," I replied.

"Thereby hangs a little story: When we knew you were on your way, a number of us called on Mr. Lincoln and said that in all probability some of the members of the committee would need some refreshment, wines or liquors."

"I haven't any in the house," he said. Lincoln sent them back, gentlemen, I can not allow you to do what I will not do myself," was the reply.

"But that was not the end of it. Some of our good democratic citizens, feeling that Springfield had been highly honored by the nomination, sent over some baskets of champagne, but Mr. Lincoln sent them back, thinking them for their intended kindness."

Interior.

EVERY whisky barrel contains a long and deep river of death.

According to the last report of the commissioner of internal revenue there are 215,434 retail liquor dealers in the United States.

An English physician says that in his treatment of two hundred cases of scarlet fever without alcohol there was a mortality of two per cent against the six per cent in hospitals where alcohol is prescribed.

The Bonars of Scotland were saintly men, and it is interesting to know that Andrew, spending sixty-three of his eighty-three years in the ministry, was ever an ardent friend of temperance. Among his last efforts was an appeal to his countrymen on the "Trustworthiness of Moderate Drinking."

The American consul at Copenhagen reports to the state department that the relation of intoxicants to poverty, immorality and crime in Denmark is very marked, when with a population of 2,200,000 the consumption of opium is five gallons per head, and the population of five gallons of distilled spirits and eight gallons of lager beer.

The British register general has published a table of comparative mortality of men, 25 to 65 years of age, in different occupations, the inquiry being made of three years, which shows significant and emphatic testimony against alcoholic beverages as related to health and longevity. The standard of 100 was taken as the lowest or most healthful. Innkeepers and liquor-dealers represent a mortality of 274; inn or hotel servants, 267; brewers, 245; while farmers are put down at 114; gardeners at 105; and ministers at 100.

The good people of Manchester, N. H., are rejoicing over a partial triumph gained in a contest with the saloons of that city. Imperative orders have been issued from the police department that every saloon, including hotels and eating-houses where wines and liquors are served, shall close their doors at ten o'clock p. m., and refusal to comply with these instructions means that the proprietors will be turned out of business. Dining-rooms where liquors are served will not be permitted to open on Sunday, and sermons and partitions which obstruct the view of the interior of saloons from the street are to be at once removed.

There has been organized in Manchester, which is known as the best city in Germany, a branch of the National Association Against the Abuse of Alcoholic Drinks. Privy Councillor von Pottenkofer has been elected its president and professors Doctors Volt and Bollinger are the vice presidents. Noted ecclesiastics, including the Archbishop von Thorna and high military officers are among the promoters. The leader of the movement emphasizes the fact that the use of beer when it reaches a point such as it has in Bavaria gradually undermines the resistibility of the body and the mental energy, and that therefore both from an economical and humanitarian point of view the consumption of beer ought to be restricted.

THE AVERAGE PRODUCTION OF FOREIGN DISTILLERIES FOR THE LAST FEW YEARS.

Following are some interesting particulars with regard to the quantity of beer which is now brewed in Europe, the figures, which may be taken as approximately correct, representing the average for the last five or six years. The total quantity brewed is 5,105,000,000 gallons, Germany coming first with a production of 1,971,000,105 gallons, of

FIRESIDE FRAGMENTS.

—To counteract the effects of poison oak or ivy.—Mix ten or twenty drops of bromine in an ounce of glycerated vaseline or olive oil, and apply three times a day.—Laura Hooker.

—Scotch Shortcake.—Three-fourths of a pound of rice flour, one-fourth of a pound of sugar, a pinch of salt. Roll out and cut into forms, and bake on buttered paper; while hot sprinkle with sugar.—Boston Budget.

—Spanish Cream.—One-half box of gelatine, one quart of milk, four eggs, and four tablespoonfuls of sugar. Put the gelatine into the cold milk, letting it come to a boil on the range; add the yolks and sugar, boil one minute. Take from the stove and add the beaten whites; flavor and pour into a mold.—Good Housekeeping.

—Whitewash.—Slack the lime with hot water and add a quart of sifted wash to each half pail of whitewash. It is said the finished work will be whiter and better for this addition. For cellars add copperas until it is of a yellow tinge and it will destroy the odors and keep destructive vermin from troubling.—Orange Juice Farmer.

—Tomatoe Butter.—Take nice, ripe tomatoes, wash, slice and cook without paring until done. Strain through a sieve, being careful to rub all the pulp through. To each half-gallon of the pulp and juice add one cupful of sugar and one teaspoonful of ground cloves. Cook until quite thick, keeping it well stirred all the while.—Farm, Field and Fireside.

—Sandwiches, says Prof. Blot, are too well known to need any description, but I will venture to give you the following points: To each pound of minced boiled ham add a tablespoonful of table oil, half as much lemon juice, and a very scant teaspoonful of dry mustard. Mix thoroughly. Use bread a day old, and butter the slice before putting it. Trim off the crust and cut into little squares, spread with the ham and lay the pieces together.

—Country Scones.—Three eggs, one cup of sugar, one tablespoonful of water, one cup of flour, sifted, one teaspoonful of essence of lemon. Bake twenty minutes with a quick fire. This same recipe can be used for a roll jelly cake; instead of baking it as a loaf cake, pour it into the dripping pan, with a piece of well greased paper in the bottom of it. When done, turn it top side down on a clean towel; take off the paper and spread the cake with some kind of tart jelly, then begin to spread and roll it with the hands, core a stiff froth, and to them add one cup and a half of sifted granulated sugar; mix carefully into this, stirring constantly, the sifted flour, and add one teaspoonful of extract of vanilla. Pour this into a slow oven for forty-five minutes. When baked turn the pan upside down on something that will admit of the air passing under it, and allow it to stand until the cake falls from the tin. Use with white icing.

In making this cake to have all the ingredients as light as possible.—Ladies' Home Journal.

—The secret in making angels' food lies in the baking of it. Sift one cup of flour and one teaspoonful of cream of tartar several times through a fine sieve. Beat the whites of nine eggs to a stiff froth, and to them add one cup and a half of sifted granulated sugar; mix carefully into this, stirring constantly, the sifted flour, and add one teaspoonful of extract of vanilla. Pour this into a slow oven for forty-five minutes. When baked turn the pan upside down on something that will admit of the air passing under it, and allow it to stand until the cake falls from the tin. Use with white icing.

You will find a full line of dress goods, palmetto crepes, dotted swiss, ginghams, bunnings, etc., all colors, at Townsend & Son's 10-4t.

Dr. R. A. Ravenscroft of Accident, was in Oakland Sunday evening for a few hours. From here he went to Dawson, Md., to visit his parents for a day or two.

Oakland is said to have educated potato bugs. According to Mr. John Shartzer's latest account Mr. Potato Bug has reached so high a stage of cultivation that he makes daily visits to the larger stores and calmly surveys the ledger, to see who has purchased seed potatoes. — Terra Alta Oracle.

Prof. S. C. Smith, who was on a business trip in the northern end of the county for two or three weeks, returned to his home in Oakland last Friday afternoon.

Lately opened, complete lines of gents', ladies' and children's shoes, any style, Oxfords and Bluchers, tan and black. Prices rock bottom, at Townshend & Son's. 10-4t

Rev. McCauley, of Virginia, who has been called here to preach by the congregation of St. Mark's church, will conduct services in that edifice both Sunday morning and evening.

Dr. G. M. P. King, of Washington, proprietor of Monte Vista near Oakland, arrived in the city Saturday evening and is preparing his beautiful summer place for the reception of visitors.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

Mr. John Shartzer has moved to Oakland the remaining stocks of goods of three different stores and will sell them out for less than their cost. Auction every Saturday afternoon and night until goods all disposed of.

Sometime ago I was troubled with an attack of rheumatism. I used Chamberlain's Pain Balm and was completely cured. I have since advised many of my friends and customers to try the remedy and they all speak highly of it. SIXON GOLDBAUM, San Louis Rey, Cal. For sale by Oakland Druggists.

Mr. J. S. Meyers, clerk of the County Commissioners, who spent a week or ten days with relatives at his home in Friesville, returned to Oakland Sunday evening. He was accompanied by his father and Mr. Robert Sterling, of Elder, who went to Grafton Tuesday morning to participate in the Decoration Day exercises at that city.

Garthright says he can't be overstocked with first class butter, fresh eggs and wool. The highest trade and cash prices paid for all kinds of good produce. 1,000 bushels nice potatoes wanted. Large lot of clothing to be closed out at greatly reduced prices. Mt. Lake Park affords the best market in the county during the summer season. 11-2t

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

The rainy season covering a period of ten days terminated Monday evening with a heavy freeze. Ice formed to a considerable thickness and everything was covered with a heavy coating of frost. Vegetation, which was in advance of what it usually is at this time of year, has received a decided setback, and early vegetables, corn, tomatoes and potatoes are entirely destroyed. It is feared that the wheat and fruit crops have been greatly injured.

I have two little grand children who are teething this hot summer weather and are troubled with bowel complaint. I gave them Chamberlain's Colic, Cholera and Diarrhoea Remedy and it acts like a charm. I earnestly recommend it for children with bowel troubles. I was myself taken with a severe attack of bloody flux, with cramps and pains in my stomach, one-third of a bottle of this remedy cured me. Within twenty four hours I was out of bed and doing my house work. Mrs. W. L. DUNAGAN, Ban-aqua, Hickman Co., Tenn. For sale by Oakland Druggists.

While at Peakskill, N. Y., Mr. J. A. Seriven, a prominent manufacturer of New York City, purchased a bottle of Chamberlain's Cough Remedy. Such good results were obtained from its use that he sent back to the druggist from whom he had obtained it for two more bottles of the same remedy. When you have a cough or cold give this prescription a trial and like Mr. Seriven you will want it when again in need of such a medicine. It is a remedy of great worth and merit. 25 and 50 cent bottles for sale by Oakland Druggists.

While in Topeka last March, T. Barber, a prominent newspaper man of La Cygne, Kan., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life. Every family should keep this remedy in their homes at all times. No one can tell how soon it may be needed. It costs but a trifle and may be the means of saving much suffering and perhaps the life of some member of the family. 25 and 50 cent bottles for sale by Oakland Druggists.

Farmers look to your interest. Get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Bucklen's Arnica Salva. THE BEST SALVE IN THE WORLD FOR CUTS, BRUISES, SORES, ULCERS, SALT RHEUM, FEVER SORES, TETTER, CHAPPED HANDS, CHILBLAINS, CORNS, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-1yr

Valuable Advice. Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-4t.

Dissolution of Co-Partnership. This is to give notice that the partnership of D. S. Custer & Bro., has this day been dissolved by mutual consent. The business of the late firm will be continued by D. S. CUSTER. D. S. CUSTER. Friendsville, Md., April 28, 1894. 10-3t*

Land for Sale. The undersigned offers for sale a part of "Swan Meadows," lying about 4 1/2 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINCELL, Oakland, Md.

Notice. To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to MICHAEL W. DUNST, Grantsville, Md. 7-26t.

For Sale Cheap. A desirable residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre. FRED. A. THAYER. Office in Felt Building opposite postoffice.

A Card. I have resumed the practice of law; office in the Felt Building opposite the postoffice, where I will be pleased to see all my former clients and any others who choose to entrust their legal business to my care.

Will be assisted in all important cases by Benjamin A. Richmond of the Cumberland bar. FRED. A. THAYER.

Notice to Trespassers. All persons are hereby notified not to trespass on my land known as "Swanton," by cutting timber, clearing land or by farming of pasturing land that is cleared on my premises, fishing, or in any other way trespassing, as I have instructed my agent to prosecute all trespassers to the fullest extent of the law. M. M. ARMSTRONG. CHAS. A. WILT, Agent, Westernport, Md.

The Fourth to be Observed in Royal Style in Oakland.

To make anything a success it behooves persons to take time by the forelock, and that is what the people of Oakland have done regarding the celebration of the independence of these grand and glorious United States.

The Fourth of July, 1893, was observed in fine style by our people here, but the Fourth of July, 1894, will be observed in a much finer and on a more elaborate scale.

On last Saturday night the leading spirits met and the following committees were appointed to endeavor to make the coming Fourth one to be long remembered by the citizens of Oakland and the visitors who will no doubt be present on that day:

General executive committee: Dr. H. W. McComas, president; E. H. Sincell, chairman; Truman West, H. J. Mayers, F. A. Thayer, J. M. Litzinger, E. P. Anderson, D. E. Bolden, J. C. Peddicord, Thomas Little, Walter S. Wolf, Richard K. Maroney, A. G. Sturgiss.

Invitation committee: J. M. Litzinger, E. H. Sincell, Benj. H. Sincell.

Transportation committee: E. P. Anderson, H. J. Mayers, J. C. Peddicord, Chas. Selden.

Music committee: D. E. Bolden, H. W. McComas, Samuel Lawton, J. E. Legge.

Decorations committee: Truman West, H. J. Mayers, D. E. Bolden. Finance committee: John Shartzer, Clifton White, H. W. McComas. Misses Nettie Michaels, Nettie Kepler.

Amusement committee: H. W. McComas, J. E. Legge, R. F. Bartlett, W. A. Sturgiss, Chas. Selden. Trades display committee: H. J. Mayers, F. Felty, H. C. Sincell, J. W. Hart.

Advertising committee: J. C. Peddicord, E. H. Sincell, W. H. Spedden.

The above committees are hard at work and are doing good service.

In addition to the large crowds of persons expected from out of town there will be also the railroad men's picnic held at Bradley's grove, at which a thousand or more will be present.

This celebration will not be an Oakland affair exclusively, but every one living in the county is earnestly invited to come and make the day one of pleasure and profit. Don't make arrangements to have a picnic at your church or school house, but come to Oakland and mingle with the citizens of the town.

Married.

KNIGHT—POEY.—On May 26, 1894, by the Rev. George W. Kepler, at the Commercial Hotel, Oakland, Mr. Jesse Lee Knight, of Monongalia county, W. Va., and Miss Margaret M. Poe, of Taylor county, W. Va.

FRASHER—CARPER.—On May 25, 1894, by the Rev. George W. Kepler, at the Commercial Hotel, Oakland, Mr. Charles M. Frasher and Miss Pearl C. Carper, both of Beverly, W. Va.

MCKEITH—FRANKHOUSER.—On May 26, 1894, by the Rev. George W. Kepler, at the New Glades Hotel, Oakland, Mr. David A. McKelvie and Miss Cora May Frankhouser both of Preston county, W. Va.

The Cycle Forging Ahead.

Here's a triumph for the steed of steel. A Kentucky man says that in his own blue grass state the bicycle has won so wide a popularity that it is to a considerable extent supplanting the horse and contributing to a dull horse market. This should suggest to Kentucky that since the breeding of horses is no longer the profitable industry it once was, and since the bicycle is getting away with the horse, it may be worth while to engage in bicycle making.

Wheelmen no longer look for a great name first of all. They look for a first rate machine. This opens the market to makers who have the skill and enterprise to offer the best at popular prices. The bicycle has become a staple article because it meets a human want and, in its own sphere, fills the bill as no other device for locomotion ever has done before it.

It had a little hardheaded prejudice to overcome, but this task it has accomplished with a rapid development of its merits. It is no longer more undignified to ride a bicycle than to ride a horse. The day is not far distant when a man who breaks his neck from a bicycle will be pitted as much as though he had been run over by a railroad train or kicked to death by a mule.

Mountain Lake Park.

Friday is opening day.

All the passenger trains will stop at our station from this day on.

The Smith Military Band will give a concert in the tabernacle Friday night at 7.30. Everybody is invited.

The electric lights will be turned on in full blast. The auditorium will have electric lights.

Sunday morning at 11 o'clock the Rev. Harry Moore, of Keyser, will preach the opening sermon. He is an able preacher. The services will be held up stairs. The hall will be made comfortable.

Friday week a Sunday School Worker's Convention will be held. It will continue over Sabbath. The first service will be held on the evening of the 8th at 7.30.

The following topics will be discussed: What are the essential elements of a true Sunday School teacher? How to increase the spiritual power of the Sunday school? What are the chief benefits derived from a Sunday school in the country? The importance of temperance lessons in Sunday school. The relation of the Sunday school to the church. The State work—its success and needs.

The questioner: How to increase the spiritual power of the Sunday school. Among those who will be present and take part in the discussions are Rev. Geo. H. Nock, of Baltimore; Rev. Chas. T. Wedel, of Keyser; Rev. McCauley, of Oakland; Prof. Hinebaugh, Rev. Kepler and others. The B. & O. railroad will sell a one fare round trip ticket to the convention from Cumberland, Grafton and intermediate points from June 8th to 10th good to return to the 11th. This promises to be a very interesting occasion.

The convention has the most hearty endorsement of the Garrett County Sunday School Board. Every Sunday school in Garrett county should send one or more delegates to the convention.

The Park is being put in neat trim for the season. It certainly looks handsome. No finer place can be found in the land. Already a number of families are here and many more will come in this week. The Park will be crowded this summer.

Sam Jones is to be here August 10th. This means a great crowd. The improved auditorium is certainly great. It is surprising to notice the great improvement. The capacity of the auditorium is about 2500. It will be comfortably seated.

Everybody is invited to attend the band concert. Let there be a large turn out to encourage the boys. Oakland should be out in full force. There is no admission fee. Our farmer friends ought to be present. Bring the whole family. Tell your neighbors about it.

A number of strangers visited the Park last week. We expect to see many strange faces on our streets from this on, and hope to meet many old friends.

"Cycling is the exercise par excellence," and in the days to come

the cycle class at the Park will enjoy the pleasure of this healthful sport.

Prof. Learned, of the Johns Hopkins University, has rented Mrs. Blake's cottage for the summer.

Lawyer Johnson, of Parkersburg, W. Va., was at the Park Monday. His first visit for two years.

Miss Cooper, of Baltimore, and a lady friend spent Friday at the Park. They were hunting a cottage.

We were glad to see Mr. Mung, of Wheeling, at the Park Thursday last. Mr. Conner also dropped in on us to see the improvements on the tabernacle.

Charles Dawson is papering and painting the interior of the Masden cottage.

Mrs. R. A. Haden, of Wheeling, has rented Dr. McLain's Baltimore avenue cottage.

Piedmont contractors are building Prof. Richardson's cottage. They are pushing it on to completion.

Miss Addie Sherman has been quite sick. She is improving slowly. She is fortunate in having the care of Miss Jennie Smith.

W. R. Johnson, of Topeka, Kan., is building a six room cottage on H street. He expects to occupy it next week.

Every reader of THE REPUBLICAN is invited to the Park Friday.

Decoration Day in Oakland.

Yesterday was quickly observed by the citizens of the town in decorating the graves of those who have gone before.

At ten o'clock the old soldiers were formed in line in front of the G. A. R. hall, led by the band and followed by the school children and members of the Uniform Rank, K. of P. The march to the cemetery was then taken up and upon arriving there the last resting place of departed comrades and brothers were decorated with appropriate services. The address was delivered by Prof. R. B. Sanner and was a very masterly effort.

The threatening clouds which hung over the town prevented many persons from decorating their houses and stores, still a number used flags and bunting in profusion.

See the World's Fair for Fifteen Cents

Upon receipt of your address and fifteen cents in postage stamps, we will mail you prepaid our SPECTACLES PORTFOLIO or THE WORLD'S COLLEGE EXPOSITION. The regular price is fifty cents, but we want you to have one we make the price nominal. You will find it a work of art and a thing to be proud of. It contains full page views of the great buildings, with descriptions of same, and is executed in highest style of art. First satisfied with it, after you get it, we will refund the stamps and let you keep the book.

Address H. E. STECKLER & Co., Chicago, Ill.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

HOW I WON HER.

Story of a Mishap That Brought About a Happy Marriage.

[Copyright, 1914.]
It happened in this wise. I was staying in the neighborhood of Market Corby, and my hostess asked me to accompany her to a musical concert in the town square. "John," she said, "declares he won't give up a day's hunting for the sake of an entertainment of this nature, and it is dull work going all alone. Will you play the part of Good Samaritan, and come with me?"

She was a charming woman, and, being her guest, I could not well refuse. The concert was in aid of one of the church's numerous societies—an extension association, a missionary society—I really forget precisely what. I only remember that it was an appeal for funds of the usual kind. A leading lady in the town had taken an active part in getting the concert together, and, thanks chiefly to her exertions, the reserved seats were well filled with the "elite" of the neighborhood. I will not weary the reader with a detailed description of the programme. I had the stout, middle-aged lady with the voice that was gone, but who atoned for all vocal deficiencies by an extraordinary amount of expression. She sighed, she gasped, she gurgled in a way to touch a heart of stone. There was pathos enough for a hundred songs. She was all soul, all sentiment. One felt oneself a churl when one wished for a little more purity of intonation. Then came the inevitable duet for piano and violin, with a Scherzo, an air, an andantino, an allegretto and a bravura. People clapped it as a matter of course, if only to give expression to their unspoken relief when, at length, it came to an end. Next followed the baritone with his "Simon the Cellarer," and "Stirrup Cup," and the wily soprano, whose ambitious high notes and shakes were shakier—no pun intended—in the extreme. The lady delighted in old songs by antiquated composers, with funny little twiddles and flourishes supplying the place of melody. As love was the only word one could hear—love fierce, love treacherous and love drawn out through a couple of octaves, it was safe to assume that these pleasing ditties were of an erotic character. I gave a shudder as the estimable Miss Adela Montmorency wound up with a horribly flat B in Alt. It was enough to set one's teeth on edge. The immortal William says "that music hath charms to soothe the savage beast." It quite ignores that it has an equal power to irritate. If one possesses a tolerably good ear I know no torture greater than listening to singing which is out of tune. My companion smiled at the expression of disgust which I presume, was visible on my countenance.

"Have patience," she whispered, under her breath. Then she ran her finger down along to this end of the first part of the programme, and added: "If I am not much to your liking, your critical taste will be pleased when we come to that. I promise you a treat."

"That," represented a duet by an Italian composer of no small renown. It was simply described, as a romance, and was to be sung by Lady Browning and her daughter—a girl whom, my hostess informed me, was only just out. I confess that indifferent music bores me. I was getting a little tired of the entertainment when at length Lady and Miss Browning stepped on to the platform. The elder woman seated herself at the pianoforte, and she had not struck half a dozen introductory chords before I recognized in her a thorough musician. Her touch was exquisitely firm and crisp. It had the precision which comes not only from long practice but also from an innate love of music. In appearance, Lady Browning was one of those charming women who, without being especially young or good looking, inspire others with a sense of their absolute goodness. She was stout and motherly of figure. Her face was warm, and there were lines about her eyes and mouth, which told that life had not always gone smoothly; but her expression was truly delightful in its kindness and cheerfulness. Her entry was the signal for an outburst of applause, and as she smiled in response one said to oneself: "There is a good, high-spirited and accomplished woman, who, by the force of a thoroughly kindly and sympathetic nature, stands out from the common crowd."

The duet commenced by a solo for the contralto. Lady Browning possessed a magnificent organ. The high notes, perhaps, had lost something of their youthful clearness, but the middle and lower ones were rich and full and sonorous. She sang with the taste and finish of a thorough artist, and it was a pleasure to listen to her. When she ceased singing the echo of her voice seemed to ring through the hall. Then Miss Browning took up the refrain. She stood behind her mother, and with the delightful shyness of a quite young girl, sought to hide her face from the public gaze. Through my opera glass I could see a delicate profile, which, in its paleness, and purity, resembled a marble statue. The complexion was of that creamy whiteness which, to my mind, possesses a peculiar distinction. Her thick, black hair rested in a knot on the nape of her shapely neck. A faint pink slightly tinged her shell-like ear. The eyes were downcast, but I could just see how the dark lashes of the right eye swept her cheek. In figure she was tall and slight. A certain angularity of contour testified to her extreme youth. About her was the charm of an opening bud. Time, no doubt, would mature her attractions. Still I wondered if it could add to them. As she stood timidly behind her mother, as if gaining support from

the maternal presence, she had an air of modesty and virginity which, to a man of the world, proved fascinating in the extreme. I found myself watching her every movement with intense interest. And then she began to sing. Her voice was like her mother's. It was round, and rich, and full, with a steadiness of intonation remarkable in so young a girl. Every note told and fell on the audience like a pearl. She attempted no difficult passages. All was simple and within her power. But the effect produced by that fresh, young, sympathetic voice was indescribable. I, for one, felt an emotion I had never felt before. My heart stirred in response to those penetrating utterances. The duet, ended by mother and daughter, joining issue. Its termination was greeted by a burst of applause, which necessitated an encore. As Lady Browning advanced, leading her daughter by the hand, a delicate, rose-like flush mounted to the girl's face. It was a very pure and noble face, and it wore an expression which somehow recalled to my mind that story of the Sleeping Princess. "That girl's heart has never been touched," I said to myself. "How magnificent she will be when the right man makes it flutter."

And then an odd thing happened. I—I, who for ten years past have been a target for the sniping of marriageable daughters, I—who warily avoided the snares set for me, and who had been wont to scoff at matrimony as a delusion, by some strange, inward metamorphosis took to wishing that I might be that man. My fancy strayed into an unfamiliar channel. I pictured Miss Browning standing in the same shy posture at the altar, clad in a flowing robe of white satin, with a wreath of orange flowers about her brow; and I—I was by her side, nervously fingering a gold ring, the symbol of our union. The voice of my companion asking a question aroused me from my dream. I answered incoherently. She was a woman accustomed to attention, and she looked at me as if I had suddenly contracted a contagious disease. "How absent you are!" she exclaimed. "Is anything the matter with you?"

"No," I responded. "Only that girl's voice put some queer ideas into my head. Where did she learn to sing? She has a talent of no common order."

"I fancy her mother taught her, and she had some good lessons when they went to Italy last summer."

"And profited by them," I remarked, turning over the programme to see if Miss Browning's name appeared again. I saw to my surprise that she was to play a rhapsody accompanied to a song composed and to be sung by her mother.

"What?" I ejaculated. "She plays that most difficult of all instruments? Why? the girl is a heron-born genius!"

I thought so, a few minutes later, when I listened to the pure, rich tones coming from the piano instrument. Lady Browning's little white hands, which were the success of the concert, and I went home longing to make the acquaintance of this talented young girl. I must have bored my hostess unutterably, for instead of doing the polite to her, I found myself unconsciously of Miss Browning. Pretty women are often surprisingly generous to each other. Like a dear, good-natured soul, Mrs. Herbert asked me to stay on and make Ethel's acquaintance. I gladly profited by the opportunity, and made such good use of my time that at the end of a week I went to Lady Browning and asked permission to pay my addresses to her daughter. She looked perplexed, and not altogether as well pleased as I had hoped.

"It is very good and honorable of you, Sir Randolph," she said, "to have spoken to me rather than to Ethel; and I am glad you have done so, for she is very young—only eighteen."

"I hope you have no objection to me," I retorted. "I shall be thirty-one next birthday. As for my means, I have ten thousand a year, with expectations on the death of an aunt. I am not afraid of being unable to make Ethel comfortable. All that riches can confer will be hers."

She turned her honest brown eyes upon me kindly, but critically. "It is best for me to be quite frank with you, Sir Randolph," she said. "I have not any wish for my daughter to marry at present. She ought to see something of the world before being subjected to the cares, and possibly to the disillusion of matrimony. Moreover, I must remind you that a girl like my Ethel does not marry for the mere marrying's sake."

And Lady Browning drew herself up with a little air of maternal pride that became her well. "No, no, of course not," I mumbled, feeling somewhat crestfallen. "I am not such a big ass as to suppose that she would."

"Just now," she continued, "the child has no thought of marriage in her head. She is entirely taken up with her books, her music, her riding, and a thousand and one things besides. And to tell the truth, I am sincerely pleased it is so. Many mothers nowadays desire nothing better than to get rid of their daughters, but," and she gave a pleasant little laugh. "I hate the very idea of parting with mine."

"Do you mean that I may not even try?" I asked, in a despondent voice.

"No," she answered, gravely. "I have not the right to prevent you from speaking to Ethel. But if you take my advice you will wait."

I had been very much run after by London matrons, and, like a young fool, considered myself irresistible. I never shall forget the look of pained surprise that came into Ethel's face when I proposed.

"Oh!" she cried, in tones of genuine distress. "Please—please don't say any more. It is only giving us both needless pain. I don't want to get married. Perhaps I may some day, but I don't yet—not for a very long time. And she turned her face away from me."

Utterly crestfallen, I returned to Lady Browning and told her of my non-success. She heaved a sigh, which I thought was one of relief.

"My dear young friend," she said, "you have been too ardent and impulsive. Don't you understand that a girl like Ethel—a girl who has resources and interests beyond the ordi-

nary run of girls, is not to be won by the first man who happens to pay her a few compliments. Nothing is further from my desire, Sir Randolph, than to hurt your feelings, but believe me when I say that if you would win Ethel you must first woo her."

In order to prove how thoroughly in earnest I was I took a house in the county and transferred my entire stud to it. Luckily the hunting round of Market Corby was famed for its excellence, and many a good run did I enjoy over the glorious grass. In addition to her other accomplishments Ethel was an admirable horsewoman, and once or twice a week we met regularly in the hunting field. Although I paid her every attention I could not flatter myself that I made much way. Not a single tender passage took place between us. Whenever I talked sentiment she changed the conversation in the most skillful manner.

To cut a long story short, I laid siege to that girl for five years. At times a tiny ray of hope would flutter across the darkness of my horizon. At others I relapsed into the very depths of despair. I began to feel that if this sort of thing went on much longer, my youth—or rather mine—would slip away. Lady Browning comforted me occasionally by declaring that she knew Ethel liked me.

It was on the 14th of January, 189—, how well I remember the day. There was a burning scent, and hounds ran like wildfire over the biggest and stiffest part of the Market Corby Vale. The line was simply tremendous. The ditches were like bottomless pits, and the fences were topped with such strong binders that they turned horses over if they did but touch them. Men were tumbling about in every direction. Empty saddles were the rule, rather than the exception. The ladies—bless their dear hearts!—were gallant as usual, though this was no woman's run. Ethel Browning was just ahead of me, riding in a most brilliant and artistic fashion. Her perfect hands and seat served her in good stead. Not a word of complaint was in my mouth every time she jumped, for the fences, mind you, were real snorters. My animal was faster than hers, and I could have passed her again and again had I chosen, but I purposely kept behind her so as to be near in case of accident. The end of the hunt was twenty minutes away. There were not more than a dozen of us left upright with bounds. Ethel's chestnut mare was a good game animal, but the pace had begun to tell upon her, and I could see by the quivering motion of her tail that her bolt was pretty well shot.

"Yelled out, as we neared a huge fence, having a timber paling running along the top. I had already seen that it must be jumped clean, and knew that Ethel's mare was not in a condition to make the requisite jump. The ladies, however, were in a hurry, and one holds a foremost place in a first-class run, and every onward stride brings an increasing sense of exhilaration, prudence flies to the wall. Either Ethel did not hear my warning, or she chose to disregard it. Anyhow, with a courage that made me tremble, she charged the fence. The mare was due to a turn, and scarcely rose an inch. Then followed a hideous crash, and the next moment rider and animal turned a complete somersault. My heart stood still with fright. It was an ugly fall to witness. I took my horse by the head and steering him a little to the right, managed to get over the obstacle with a flounder on landing. Hastily dismounting, I rushed to Ethel's assistance. Meanwhile, in less time than it takes to tell, the blood in my veins, when one holds a foremost place in a first-class run, and every onward stride brings an increasing sense of exhilaration, prudence flies to the wall. Either Ethel did not hear my warning, or she chose to disregard it. Anyhow, with a courage that made me tremble, she charged the fence. The mare was due to a turn, and scarcely rose an inch. FOR YOUNG PEOPLE.

THE EXPERIMENT.

"I've not a single lesson learned, Oh dear, what shall I do?" And Tommy stopped and thought a bit while trying up his shoe. "I guess I'll go. Sober to cough, And have a stomach ache, And grandma'll say when I go down: 'Susan, for money's sake, That boy is sick and isn't fit To go to school to-day!'" I think that grandma was so nice, They always find a way To help a boy when he is fast. In places like I'm in, Oh dear, oh dear, I think it's time To have the pain begin."

But grandma was too old to be Fooled by a clever trick, And so when Tommy coughed and cried And said that he was sick, What do you think that grandma did? She put him right in bed And put a washcloth at his feet And water on his head; And then she gave him castor oil, And pennyroyal tea, And made a plaster that was hot, And big as it could be, And grandma brought his dinner in Upon a little tray. He had just lost and all the rest Had something good that day— Would be too much to tell. Next morn when grandma questioned him He said that he was well. —Jeanette La Plamby, in Woman's Home Journal.

THE UNGRATEFUL FOX.

Story of an Ancient Feud Between the Birds and the Animals.

It was a beautiful spot in which to wander; the park with its long stretches of velvet turf, and avenues of stately trees, and the dim forest carpeted with hundreds of fragrant flowers, and murmuring with softest zephyrs for the happy days summer in the long ago. Very few human beings ever passed through the park or forest; but they had many inhabitants, for all the animals and birds that are found in our country retreats now made their peaceful and undisturbed homes there. They did not dwell all together. The forest belonged to the birds, and the park to the animals; and neither ever sought the other's domain, for the pheasant, who was the head of the birds, and the fox, who ruled over the animals, hated each other. One day, however, a young and foolish fox, roaming about, strayed on and on until he found himself in the forest. Trying to make his way back to his home he became caught in a holly-bush, and there stood lamenting piteously. Very soon a pretty, soft-eyed pigeon flew along. As soon as she caught sight of the unhappy fox she turned to fly away in fear; but the prisoner began to plead for help that she stayed her flight and, venturing close up to him, asked if she could help him.

"Oh! fairest bird, if you would but release me from these cruel brambles I shall be ever grateful," cried the little fox. And the little pigeon, touched by his distress, overcame her fears, and going up to him, tugged so vigorously at the brambles with her beak that in a moment or two the fox was freed. Joyfully he ran off, and soon found himself safe in his own domain. His friends had begun to wonder at his absence, and inquired where he had been. Then, mounting the roof of a tree, the fox bade them all gather round him while he told them his adventure. When he had concluded all the animals declared that he had been nobly treated by an enemy.

"And now, dear friends, let us show that we can be generous to our foes as well," cried the young fox, who enjoyed the dignity of his position on the tree stump. "My father, who rules all, is as you know, very ill, but in his absence I make a decree that any inhabitant of the forest, whoever he may be, shall not be treated as a prisoner of war, but honorably conducted into safety and freedom."

Time went on, the old fox died, and the young one became ruler of the park; but the grandeur of his position made him proud and overbearing. One day, when a great storm had been raging in the park and forest, the youthful ruler hurried forth from his home to preside over a meeting in the stage cave. As he trotted down through a dark avenue of trees he

"MOUNTING ON A TREE-STUMP, THE FOX TOLD THEM HIS ADVENTURE."

heard a soft, plaintive cry from somewhere near, and, looking about, he soon discovered a wood-pigeon, whom the heavy storm had injured, lying under an oak tree.

"What are you doing here?" cried he, haughtily.

"I am sorry to be trespassing, dear sir," answered the pigeon, feebly, "but the high wind and rain blew me hither and brought me to the ground thus; but surely," she went on, "you remember me! Did I not free you from the clutches of the cruel brambles some months ago, in our forest? Repay me now by assisting me to a sheltered spot where I can dry my plumage and then fly home."

"How dare you speak to me in such a familiar manner," said the ungrateful fox. "Do you know I am the ruler of this park now?"

"I meant no offense," said the poor little pigeon. "I only beg you to assist me now."

"What am I to do?" replied the fox, a treacherous thought darting through his mind.

"If you would just drag me gently along out of this rain and wind, to some shelter, I will be your debtor evermore."

The fox bent down as if to comply with her request, but, alas! for all his promises, planted his sharp teeth in her little neck, bit her head off, and in a few moments nothing was left of her but a few feathers.

And then a strange and dreadful thing happened to the inhabitants of the beautiful park and forest. Up to the present they had always lived unmolested by the creature called man, but now Dame Nature put it into men's hearts to come into their peaceful domain, with cruel weapons, to hunt and slay them—some for their beautiful coats, and some because they were good to eat.

Then the animals began to quarrel amongst themselves, and the fox hated the rabbit, the hounds quarreled with the stag, and the poor birds in the forest began to live in fear of the cruel armies and guns of their human enemies. And all the happy days vanished for evermore, which always comes to pass when honor and charity are forgotten. And perhaps the fox was punished severely enough for his bad behavior.—Pall Mall Budget.

GENTLEMAN BROWN.

He Was the Protector of Many a Poor Little Tramp Dog.

Brown was simply a large dog who was so strong, so fearless, so intelligent and so active in affairs that he was considered the champion of the town.

He could thrash any dog round about and always did it when it was necessary.

But he was extremely kind and benevolent. He showed great kindness to tramp dogs and protected many a

wretched little vagabond, and saw him safely out of the town in good condition.

One day he brought a specially bad specimen home with him. He came into the house and into the dining-room, where the family were at dinner, the wretched little tramp dog at his heels.

He looked up at his master, wagging his tail, asking for something to eat. A plate of food was set down and the little dog snatched at it ravenously. Brown seemed to think that it was all right. He did not offer to touch the food. When the little dog was through he asked for another plateful and had his own dinner.

He kept the little dog for quite awhile, always permitting him to eat first. At night he took the dog into his kennel, himself sleeping outside. He was not at all intimate with the dog, but treated him as a visitor, not at any time as a friend. The tramp finally went on his way, strong and well, and as plump and sleek as any dog need be. What was said between these two dogs both at meeting and parting would be very interesting to know.—N. Y. Recorder.

MAKING MAPLE SUGAR.

Description of a Most Interesting American Industry.

Maple sugar, which is made from the sap of the hard maple, is generally manufactured in the months of March and April. When it is time to begin, the men go around and with half-inch bits bore holes a little way into the trees, and drive in iron spouts. In these spouts are hooks on which to hang the buckets. Usually a few years ago every sugar-maker used wooden spouts and buckets, and boiled the sap in huge kettles hung on a pole over the fire. When the buckets are nearly full, the sap is gathered in a large tub on a sled drawn by horses. When this is full, it is drawn to the boiling-plant, and emptied into large vats or storage bins. The sap is then strained and boiled.

There are two methods of boiling now used, viz., long pans and evaporation. In the first case the manufacturer usually has two pans, one called the sap or back pan, and the other the sirup or front pan. The sirup pan is shorter than the other. These are set on huge arches of brick or stone, with a large chimney at the back end. The fire is built at the front end under the short pan. The back pan is kept nearly full of sap, and as it boils down it is dipped out of this pan and strained. Although some sugar their sirup off in the woods, it is usually taken to the house to be canned or cooled. In the evaporation the sap passes from the back to the front of the pan through small tubes so slowly that by the time it reaches the front end it can be drawn off as sirup. This is the more rapid method, and makes whiter sugar.

Sometimes there is such a big run of sap that they have to boil nights in order to prevent the sap from wasting. This is the happy time of sugaring for the boys, whose great delight is to boil at night. They roast potatoes in the ashes, broil meat over the coals and boil eggs in the pan. It is a fine sight to see the flames shoot up and hear the crackling of the wood as it burns.—Edgar S. Pilskin, in Harper's Young People.

TEMPERANCE NOTES.

DRINK AND MORTALITY.

The Evil of Intemperance as Viewed by a Life-Insurance Authority.

It must be regarded, we think, as a fact beyond dispute that intemperance is one of the most prominent evils from which this country suffers. It is a crying evil, in its individual as well as its collective sense, socially as well as commercially; and, while no doubt the last decade has witnessed considerable improvement in this respect among the population at large, and perhaps among the middle classes in particular, still the veriest optimist will hardly deny that much remains to be accomplished. Lively influence which tends to help forward the progress of so desirable a reformation is therefore to be welcomed. The moralist may impress his generation with the heinousness of intemperance as an offense against the happiness of families. The social reformer may show—and he will hardly experience much difficulty in doing so—that this vice, beyond all other causes, fills our jails and finds occupation for the hangman. The economist may prove to demonstration that expenditure on intemperance is a waste of money, leading to bankruptcy and ruin, and that if applied in more rational directions it would lead to comfort if not opulence. These, it must be confessed, are potent arguments, but they are not sufficient to carry conviction to all who are not past praying for. Still, nothing is so to the average man so precious as the sometimes questionable boon of life itself; and, if he can once be convinced that the inevitable result of habitual excess, his tenure of the earth will be considerably curtailed, the argument will appeal to his selfishness with an effect which more generous considerations will probably fail to produce.

Obviously the employment of an argument of this nature lies strictly within the province of the actuary. The physician may hold up a warning finger and point to the probable effects of intemperance upon this or that vital organ. His patient will listen perhaps; but while he thinks that the doctor may be right, he is too apt to conclude that the deductions of his adviser proceed from merely theoretical premises. Nothing, however, is more practical than figures; of all facts, they are the most stubborn. If, therefore, the experience, not of one, but of several assurance companies which keep separate and distinct the results following the insurance of "temperate," as compared with the average of general lives, is that the mortality amongst the latter is largely in excess of that amongst the former, we are here provided with an argument which appeals with unusual force to the selfish instincts of humanity. To those who have observed and studied the circumstances with an unbiased mind, it is no new revelation that such is the fact. The experience of the United Kingdom Temperance and General Institution has been strictly in accord with this—not as an occasional or isolated occurrence, but as an unvarying law applying itself over a long series of years. It is true that for years efforts have been made by some writers to minimize the conclusions to which these results point, on the ground that the "general" section of this class of life office is more or less visited by the infusion of a proportion of excessive drinkers; but, for some years past, the suggestion inadequately or even approximately explains the enormous disproportion between the mortality amongst temperate and that amongst average lives.—Insurance Observer (Eng.).

DRINK IN CLUBS.

A Social Medium of Ruin to Young Men's Lives.

One of the perils for young men, especially at the present time, is club drinking. Many young men who would be ashamed to be seen drinking in the ordinary saloon are tempted to this indulgence in the more select and aesthetically environment of the club. An old New York club man is quoted as saying:

"The bar-room makes drunkards. I wish I could say that the palace of the club was to make men sober, but as I can not do so with truth, I might as well confess among other things that the tendency of the modern club is to intensify the drink habit till it degenerates, and finally with young men, into the disease of indigestion. I know of scores of promising lads—and so does every club man of experience—that have been wrecked by the opportunities for conviviality afforded by clubs. If the stewards of the leading clubs in any of our cities would confess to the number of members they know to be habitual drinkers, or rather habitual drunkards, the report would startle the uninitiated."

Friends of temperance, while laboring for the legal suppression of the saloon, should also exert all possible moral power for the restraint and abolition of club drinking.—National Temperance Advocate.

AFRAID OF WATER.

Travelers Who Will Trust Themselves Only to Strong Drink.

If the average traveler only feared wine or brandy as he does water, it would be a great gain to the cause of temperance. No matter what part of the world he is in, he seems to have an idea that the only really dangerous drink in that vicinity is the water. If he hears the same thing about the water here, a New-Englander going west or south is warned against the water of that region. He must take strong drinks, or die. Nothing in New England, on the other hand, so perils a western or a southern man's life as pure spring-water. Green apples, wilted cucumbers, baked beans, are innocuous, but anything which will bring the "drunk" is the safest thing in the world for the man or woman of delicate constitution. During the centennial year, visitors to Philadelphia were made to understand that the water of the Schuylkill was not safe to drink. More recently, in Chicago, at the Columbian exposition, visitors were similarly taught to dread the water of Lake Michigan. In both places it was deemed necessary to take freely of beer, or wine, or at least to put a little brandy or whisky into the water. Occasionally one of the visitors had satisfactory evidence from his personal experience that his cautious friends had reason for sounding a note of warning on the point. After eating an unripe melon, walking about in the hot sun for three or four hours looking at the exhibits, drinking several glasses of lemonade, and making a lunch of fried chicken and ice-cream, he had a severe case of faintness with twinges of pain, which was satisfied, was the result of his unwisely drinking a glass of water of the region. He "ought to have known better." He "wouldn't try it again." He would therefore stick to the trusty and worthy beer or brandy. If Solomon had only said: "Look not upon cold water when you can get anything stronger to drink," how many followers he would have had!—S. S. Times.

A MODIFIED BAR.

Intoxicants Surprisingly Sold in Patent Drinks.

"You wonder why proprietors of soda-water fountains are permitted to sell liquors without a license?" said the proprietor of one of the soda-water fountains in the city. "Well, it is accomplished in this way: When the strength of an intoxicating wine or liquor is reduced forty per cent, there is no law requiring a person to take out a license to sell it. It is then deemed nonintoxicating. In this way we are able to sell sirups of the flavor of any wine that is made, such as sherry, claret, port, Madeira, etc. In making it up a sirup the strength is reduced much more than forty per cent. No, there are no inspectors for the soda-water fountains. The fact of the matter is that introduction of mixed drinks in which wines and liquors are used is of recent date. Several years ago the only drinks you could obtain from a soda fountain were those consisting of sirup of fruit and carbonated water. Then lemonade was added; then the numerous patent drinks following upon the heels of acid phosphate, until at present there are hundreds at patent drinks upon the market, all claiming to do wonders for the nerves and brain. "The soda-water fountain of to-day is in a bar on a modified scale. We sell almost everything that is dispensed over the bar, only in a modified form—so modified that the intoxicating effects are completely done away with, leaving nothing but the taste. Recently lunches in the shape of biscuits have begun to be popular, especially during the winter months, when hot drinks are being served. This introduction takes many a customer from the restaurants, for numbers of ladies go to a soda-water fountain and find they get just what they want in the way of lunch by procuring a cup of bouillon or hot chocolate with crackers. The soda-water business has progressed wonderfully. Great sums of money are being made in it, for since the prices of patent medicines have been so much the druggist expects to make his profit for the year during the soda-water season."—Pittsburgh Dispatch.

FACTS AND FINDINGS.

Belgium is declared to be the most temperate country in Europe. One liquor dealer to every 272 of the population.

It is stated that one thousand, five hundred and thirty-nine liquor shops are owned by one hundred and seventy-two members of the house of lords.

The following declaration was signed by over two thousand members of the medical profession in the United Kingdom: "That the most perfect health is compatible with total abstinence from all intoxicating beverages, whether in the form of ardent spirits, or as wine, beer, ale, porter, cider, etc."

"ARCEMEDICE FARRAR gives in the London Humanitarian some appalling figures in regard to the effects and prevalence of drunkenness in England: 'The number of drunk and disorderly persons for twenty-five years is no fewer than 4,268,022, though not one twentieth of the drunkards are arrested. Pauperism has extended enormously, but the chairman of the Coventry board of guardians has never seen an abstainer come to the workhouse for relief; the same is true of fifteen other workhouses.'"

In forty years the consumption of alcoholic liquors in France has trebled. In fifteen years insanity has doubled in France, and the statistics of disease and crime prove that the French people must soon meet the liquor question fairly and squarely or go down to shame and disaster from drunkenness. France is a wine country and it has often been used as an illustration of the blessings and benefits arising from a use of light wines. But the facts show that wine-drinking paves the way for the use of other drinks and that wine-bibbers soon demand stronger drinks.

A WRITER in the German Army Journal calls attention to the seriously unsatisfactory physical condition of the army reserve, attributing it, to excessive drinking. Another writer believes that the whole future of the German nation depends upon the solution of the drink question. (Germany is not the only nation so dependent.) One-fifth of all the cultivated land in Germany is devoted to the production of materials for the making of alcoholic liquors. It is estimated that the loss to the country in money through this diversion of land, capital and labor is equal to a sum large enough to keep a laborer's family of eight persons for eight weeks.

MISCELLANEOUS.

For over 100 years St. Helena was a most important calling station for vessels bound for India.

In 1840 the British colonies, excluding India, had a population of 5,000,000; now it is 17,400,000.

Young man, you can't reach the vice presidency by taking stock in vice.

Young Men's Era.

Russia has two vassal states in Asia, Bokhara and Khiva. Both are really governed by Russian residents.

The Spanish colonization period began with the discovery of America, and the first colony was Hispaniola.

Zanzibar is under the protection of Great Britain, though the government is administered in the name of the sultan.

The British governor of Hong Kong receives a salary of \$25,000 a year, with \$7,000 additional added as a table allowance.

Dwell not too long upon sports; for as they refresh a man that is refreshed, so they weary a man that is refreshed.—Palmer.

Important reforms were effected in the charitable institutions of England as a result of the satirical writings of Charles Dickens.

In 1722 there was formed an Austrian colonization society and company to establish trade with the east, but nothing was accomplished.

The man who can not wonder, who does not habitually wonder and worship, is but a pair of spectacles behind which there is no eye.—Carlyle.

Power will intoxicate the best hearts, as wine the strongest heads. No man is wise enough, nor good enough, to be trusted with unlimited power.—Colton.

India is, in every sense of the word, a crown colony. The governor general, in council, has power to make laws for all persons—British, natives or foreigners—in the Indian territories.

As to being known much by sight, and being pointed at, I can not comprehend the honor that lies in that. Whatever it be, every mountebank has it more than the best doctor.—Coville.

The use of Australia as a convict ground was strongly objected to by the population as soon as the country was opened to actual colonists, and the transportation system was given up in 1847.

Holland gets more profit from her colonies, in proportion to their size and population, than any other colonizing country. Almost the whole trade of the Dutch colonies is with the mother country.

When thy brother has lost all that he ever had, and lies languishing and even gasping under the almost extremities of poverty and distress, dost thou think to lick him whole again only with thy tongue?—South.

Cutting off the ears of cats level with the head and removing with scissors the surrounding hairs will keep cats out of the woods. Drops of water will fall in the ear, and after one experience the cat never wants another.

United States Consul Lastresnik, at Manila, who has been concerning himself with the problem of bettering the trade regulations between the United States and the nine million people on the west coast of South America, ascribes to inadequate means of transportation the present small trade relations, and gives some remarkable figures to prove how great is the discrimination in favor of Europe and against the United States under the present system.

The University Club in Boston has decided to build a new set of apartments, consisting of a parlor and dining room into which women will be admitted, while the precincts of the club itself will be exclusively for masculine use as heretofore. These new apartments are to be in the basement under the "deck" on the water side. This deck is a large piazza extending across the rear of the club house, but commanding a fine view of the river, and very breezy and comfortable in summer.

Col. Fred Grant has promised, it is said, to accompany the "Burgess" troops, of Albany, or its projected trip to Japan. All guests will be military and in uniform, and act as the staff of the commandant. The corps will cross the continent on a special train and have a steamer to itself, and for ten days on shipboard, if the weather permit, and drilling will be done to put the command in shape for an exhibition drill before the Mikado. The president of the corps, Col. Elliott F. Danforth, visits Washington shortly to obtain the co-operation of the state department.

Hundreds of mirrors have been ruined by lamps being placed close to them to assist in toilet purposes, and the average glass seems to be exceptionally mean in respect of temperance. Of late years lamp glasses have been made by a secret process which makes them so tough that, even if touched with a red-hot iron, they will seldom crack. Now an inventor has gone a step farther and has produced a glass which will stand a greater heat, without bending or breaking, than iron. If this can be put on the market on a commercial basis it will promptly revolutionize our ideas of building and enable much larger panes of glass to be used than is practicable now.

Australia is greatly perturbed over the emigration movement to Paraguay. The government of Paraguay has given nearly 500,000 acres of good land for settlement to Australian colonists, or others of suitable standing in means and character who join them, and there is an expectation that 10,000 persons may settle on the lands. All who go from old to new Australia are territorial and have a considerable amount saved, and the loss of a few thousand men of that stamp is a serious matter. South Australia has, therefore, passed a village settlement act, under which those who want to cultivate land are very favorably dealt with. Then comes the question whether the Australian land is as good as that in Paraguay, and it is not. But there are disadvantages there as well.

PUNGENT PARAGRAPHS.

The tongue is mightier than the sword when it comes to cutting remarks.—Galveston News.

Sometimes an editor "gets in clover," but it is generally when he gets an odd job to drive up the cows.—Atlanta Constitution.

She—"Jack kissed Mabel last night and she cried." He—"Why did she cry?" She—"For more, I suppose."—Exchange.

"Fauna, may I ask a question?" "Yes, my child." "What did God stand on when he made the world?"—Newport Daily News.

Mr. Softpate—"Do monkeys entertain you, Miss Flypp?" Miss Flypp—"Well, that last story you told I thought was quite amusing, really."—Inter Ocean.

After the Celebration.—Bridget—"Soy, Pat, for why is it they call this our tin weddin'?" Patrick—"Faith! it's becaze we've been married tin years!"—Arkansas Traveler.

Excited Man—"I must have \$100. Can't you lend it to me?" Good Friend—"O certainly; but not all at once. I can let you have 10 cents every two or three weeks."—Texas Siftings.

"Irevery may be the soul of wit," muttered Penner, sadly searching his pockets in vain for the price of a beer, "but I'll be blamed if I can see any fun in being short."—Buffalo Courier.

Taper—"I should like two weeks' absence to attend the wedding of a very dear friend." Mr. Gingham—"It must be a very dear friend, indeed, to make you want that much time. Who is it?" Taper—"Well, sir, after the ceremony she will be my wife."—Vogue.

Mrs. Glimes—"That was a beautiful play, but it wasn't natural, after all, that that man should love a woman so unselfishly as to be willing to give her up to another." "I don't know. There are lots of men who love their wives quite unselfishly."—Boston Transcript.

Editor—"What makes you think you would make a good literary man?" Applicant—"Because I can crowd more into a little space than any man in New York." Editor—"What was your former profession?" Applicant—"Conductor on a cable car."—Exchange.

Five-year-old Flossie had been battling with her mother all day. "There, child," said the latter on putting the child to bed, "sleep well, and don't be so cross when you wake up to-morrow." "I notice," retorted little Flossie, "when it's me you say 'cross' when it's you you say 'nervous'."—Pearson's Weekly.

A Big Crop—"So your dimmy has gone to farming," said Mrs. Blarney. "Yes, indeed. He's sowed down wheat like since he went west. He wrote us just the day before yesterday, that he was having a great time now sowing wild oats. It's a wonderful country where oats grow wild like that."—Arkansas Traveler.

A banker is the possessor of two very bright boys, aged seven and five years. Some months ago a young lady was added to the family, very much to the disgust of her brothers, who saw their influence gradually slipping through their fingers. One day last week the little sister had a violent fit of crying. The eldest brother said: "Say, don't she cry awfully?" "Yes, but you can't blame her." "Why, what ails her?" With great disgust: "She's crying because she is a girl."

TRAMPS IN BYGONE AGES.

Medieval Vagabonds Who Could Give Pointers to the Modern Species.

The tramp is as old as civilization itself. A contemporary suggests that the original ancestor of the modern type of roving ne'er-do-wells was Esau. The professional tramp, however, reached his highest degree of artistic finish in the middle ages when all kinds of rogues flourished and beggars abounded throughout Europe. France, Italy and Spain were the countries in which this nefarious business attained the dignity of a profession, from which condition sprung one of the strangest kingdoms known to history, a kingdom presided over by an elected monarch, himself a beggar and ruling over his beggar subjects. They made their money so much alike that they were hunted down like wild beasts and their tribes broken.

The beggar kingdom was organized for the advancement of rogues, and showed its gipsy origin by the peculiar dialect spoken by its subjects, the jargon being the patois of the argot used by thieves in France at the present day. The monarch, who usually presides in Paris, ruled over this kingdom by virtue of universal suffrage, and was subject to deposition if unfaithful. Stated councils were held at regular meetings, places, taxes were paid and intendants appointed who represented the king in different parts of the country.

The duty of the latter was not only to collect tribute, but to teach members how to beg successfully. As a result of this regime of imposture the French beggar became a master of his art, each individual being a specialist, and, with the exception of a few tricks, peculiar to Italy, the methods of the French beggar included all the impostures practiced in European countries.

Many of these methods were possible only under the peculiar social conditions of that time. For instance, the "Hubins" pretended to have been bitten by a mad dog, and, armed with a bogus certificate, implied that they might journey to the shrine of St. Hubert, in Liège, which pilgrimage was considered a sure cure for hydrophobia in those days.

Another set of impostors simulated epilepsy. By means of a small piece of soap concealed in their teeth they frothed copiously at the mouth. One class of rogues would tie a cord about their upper arms so as to stop the circulation and then fall in the street, as if stricken with a dread disease. Fake merchants, ruined by hypothetical shipwreck or stripped of imaginary robbers, begged on the highways, and pseudo traveling journeymen who never worked wandered about with their backs, imploring aid to help them on their way.—Chicago Post.

The Republican.

Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made otherwise, at the risk of the sender. Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, MAY 31, 1894.

Notice.

Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

WHERE did Mr. Cleveland go fishing yesterday?

WEST VIRGINIA has 65 Democratic newspapers with 57,177 subscribers, and 44 Republican with 48,000 subscribers. The average is 879 subscribers to each Democratic newspaper and 1,092 subscribers to each Republican newspaper. This explains why the Democratic majority in West Virginia has been gradually disappearing in the last dozen years.

THAT epigrammatic statesman, Ex-Congressman Tom Watson of Georgia, thus tersely sums up the difference between Democratic promises in 1892 and Democratic fulfillment in 1894: "Two years ago we were fed upon the ambrosia of Democratic expectations. To-day we are gnawing the corn-cobs of Democratic reality." Tom has not been long in the Populist party but his association with the Grangers has already enabled him to give expert testimony as to the nutritious quality of the corn-cob.

WHAT does Postmaster General Bissell mean anyhow? He refuses to appoint saloon keepers as postmasters on the ground that "any man who is directly or indirectly interested in the liquor business is in a measure unfitted by his occupation for postmaster." This is a severe blow the P. M. G. deals to his party. Where would Tammany Hall be but for the 10,000 saloons in New York City? If the liquor business were divorced from politics in that city, the Democrats never could muster enough votes, by many thousands, "below the Harlem" to overcome the Republican majority in the interior of the state.

THE present is the age of organization and concentration. Financial and trade depression has just now stilled many wheels and rendered ample time to manufacturers generally in which to take account of stock. This stock taking of 1894 is upon an entirely different basis than that upon which ordinary annual inventories are taken. It follows a time when banks by concerted action universally refused to refund the money which had been deposited with them; when the largest and richest corporations employing labor paid the weekly wages in paper promises; when the ordinary manufacturer, dependent in a measure upon borrowed capital, was forced to liquidate with his very last cent and suffer usurious rates upon what he could not pay; when 20 per cent of the population of most towns and half the population of many towns were absolutely without work and, alas, too often penniless.

Depressed values, curtailed consumption and precarious credit were the conditions which confronted every business man as he footed his ledger at the beginning of the year and contemplated his plans for the future. The circumstances which compel all sorts and classes of men to adjust their finances to a severely economical or practically hard-pan basis must necessarily cause many business changes and changes of location in the commercial world. Manufacturers who have heretofore suffered the loss of a small percent-

age by reason of a lack of railroad or power or other facilities will naturally cast about for a place where this percentage can be saved.

The minimum cost will enter more largely into the problem of production for the next few years than ever before, and the town or city which is most alive to its own interests and importance will be most benefited by the changes that occur. It is incumbent upon business men everywhere to organize and act together for the betterment of the several commercial interests which they represent. A board of trade is a necessary adjunct to the welfare of every community. Its objects should be primarily to foster present industries, develop local resources, publish practical information, solicit and encourage immigration, investment and the establishment of new manufactories and to secure to the town and incidentally to its members the benefit of co-operation in the furtherance of legitimate projects. Its work is co-extensive with the particular interests of the city in which it is located. It should have a salutary effect upon municipal affairs if the needs require it and be at once the recognized factor capable of building, sustaining and insuring to perpetuity the best interests of all the people.

"W." Writes Again From New York. ASTOR HOUSE. NEW YORK, May 24, 1894. To the Editor of the Republican.

It some way happens that when I get to New York I always have a long evening on my hands with nothing to do and I invariably fill in the gap writing a letter to the folks in Garrett county through THE REPUBLICAN.

My business, as you are aware, is to look up orders for lumber and to collect outstanding accounts. I find sales and collections more difficult than ever before. In conversation to-day with a dealer who owed me some money he said that in March there was some little movement in lumber which was encouraging, that in April it was worse and now there is scarcely anything doing at all. Glancing at my G. A. R. button, he continued: "I don't know what the country is coming to. If lightning would strike that crowd down at Washington and give the country a rest I think times would improve. I never voted anything but the Democratic ticket." He went on, "until last fall when I found out that the party was composed of the filth and dregs of society, and that the only thing a decent man could do was to join with the better element of the Republicans and snow them under, and now since they seem bent on destroying the business of the country the party will have to make a big improvement in its policy and political methods if I ever vote that ticket again."

Passing along Wall street I entered the Exchange, and what a howling mob it is! The floor was covered with scraps of paper; hundreds of men were figuring on tablets; men went rushing from one locality to another, sometimes tearing off at breakneck speed to a telephone; groups were huddled together in all parts of the room and the whole crowd yelling at the tops of their voices. What were they all doing? Buying and selling stocks, making and losing fortunes. One man with a quick ear hears a certain line of stocks offered at a certain price. He at the same time hears another bidder offer more than was asked. His business is to make a bargain with both and pocket the difference.

But I could hear nothing, could not understand a word. It is very exciting, and when men become addicted to stock gambling, as it is called, it has a wonderful fascination for them.

The papers to-day are all commenting on Mr. Gorman's speech delivered yesterday in the Senate. Perhaps it was the best defense that could be made of a position so utterly indefensible as is that of the Democratic party on the tariff muddle. Mr. Gorman denies that the sugar trust dictated any part of any schedules of the bill and adds in reference to the placing of a tax on sugar, "but let me ask any fair-minded man if it would be just to the people of Louisiana to take from them every shred of advantage foisted upon them against their will by the Republican party for a political purpose, to deprive them, in fact, of their very means of livelihood and give them nothing in return."

Mr. Gorman crowded more inconsistency and demagoguism in the little paragraph quoted above than even his great ability in this direction would lead anyone to expect.

He virtually denounces the Republican party for "foisting" a protective tariff on the products of the Louisiana sugar growers "for a political purpose" and finishes up by declaring that to take it away would "deprive them of their means of livelihood and give them nothing in return."

Just so, Mr. Gorman. That is precisely what Republicans have been saying: that when you strike down a protective tariff you strike down a great many people of their means of livelihood and give them nothing in return.

The reason why Louisiana sugar growers cannot compete with the sugar producers of Cuba, France and Germany is because it costs them more for labor—their labor is more expensive. But how much better is the Louisiana sugar planter than the people engaged in other occupations? What has Mr. Gorman given the wool grower and the lumberman? The wool grower of this country cannot compete with those of Australia for precisely the same reason that the sugar planter of Louisiana cannot compete with those of Cuba: it costs him more than it does them.

They can juggle with the question until the crack of doom, but they will never succeed in making anything more out of it than simply and purely a question of wages.

Gorman knows it and he stands in the breach between the old slave drivers of the south who want low wages and who want to sacrifice the industrial interests of the north to their old pro-slavery prejudices and the Democratic dough faces of the northern states who are utterly helpless in the grip of the brigadiers.

Hill seems to be the only Democrat with backbone enough to stand up to his convictions and the Lord knows what he is thinking about; but his gaze is turned unblinkingly to '96 who can bet your bottom nickel on that.

Mr. Gorman declares himself in accord with Hill on the income tax question but will vote for it, not because he thinks it is right or even necessary but because a majority of his Democratic colleagues honestly differ from him in this matter.

To-day's *Sun* publishes an extract from the *Richmond Times* which places the question of the income tax in a remarkably clear light. The *Times* says: "But are a hundred dollars any more than a hundred dollars in the possession of a millionaire?" Can any reason founded in principle be adduced why a hundred dollars in one man's hands should pay more taxes than a hundred dollars in another man's hands. And if each hundred dollars in a rich man's hands pays exactly the same tax that each hundred dollars in a poor man's hands pays, can it be said that the rich man fails to bear a fair portion of the expense of the Government?"

"It can never be just or right that a man with an income of \$3,999 shall pay no tax, while the man with an income of \$4,000 shall pay one. The poor man suffers no injustice when the rich man pays the same rate that he pays."

The great Democratic leaders all have a weather eye on the chances of 1896. Mr. Voorhees probably thinks that by paring down the duties in the Wilson bill he will commend himself to the Populists and the free traders of the old south. Mr. Gorman has trimmed his sails to sweep the whole heavens and to catch anything from a cyclone to a zephyr. He is a high protectionist, a low protectionist, a free trader, a Populist, and a hard-shell Democrat all rolled into one, while Hill judiciously stands aloof, hoping that when his party gets snowed under this fall—away down deep so that only their ears will be sticking out, and when it comes to look around two years from now he will be the only Democrat in sight and the party will very naturally turn to him and beseech him to take the nomination.

Vaccination a Duty.

The State board of health has issued an address to the people of Maryland urging the importance of vaccination as a protection against small-pox. "A general vaccination," says the State board, "affords complete protection from small-pox for several years, often for life, and partial protection throughout life. It secures like doubtless the intelligence of the people of Maryland to prevent to them proofs of the protective power of vaccination. The long immunity from this disease which we have enjoyed has begotten a disregard of this unrivalled means of safety, and possibly, in some minds, ignorance of its value."

Dentistry.

Dr. I. L. Ritter, of Frostburg, will be at the Commercial Hotel in Oakland Monday and Tuesday June 11 and 12, prepared to do all classes of dental work. Call early and make engagements. Teeth extracted without pain.

GARRETT COUNTY.

Some Interesting Facts Relating to the Oakland Bar.

"T. Jay" in Cumberland News.

OAKLAND, Md., May 23, 1894.

By the terms of the act creating it, Garrett county was made a part of the Fourth Judicial Circuit, and the third Monday in May, 1873, was fixed as the time for holding the first term.

The judges of the Fourth Judicial Circuit at the time were Richard H. Alvey, of Hagerstown, chief judge, and William Motter, of Hagerstown, and George Pearce, of Cumberland, associate judges.

The first term of the circuit court for Garrett county was called on Monday, May 19, 1873, with associate judges Pearce and Motter on the bench; clerk, W. H. Tower; sheriff, Thomas Coddington; and State's attorney Col. James M. Schley.

At that time the new county had no public buildings and the court was held in the ball room of the old Glades Hotel, which was tendered for that purpose by the late John Daily. Subsequent terms of court were held in the dining room of the Glades Hotel, the public school building, Martins' store house and the Methodist church until the court house was completed in 1877.

At the first term of court William Walz was appointed bailiff to the grand jury, and filled the office until incapacitated by the infirmities of old age. E. D. Kepner was appointed in his place, and still holds the office. Wm. Smouse was appointed clerk and held that office until his death, and was succeeded by A. J. Harne, who in now clerk.

Thomas Bosley, who, as bailiff, locked up the first petit jury in Garrett county, still carries the keys of the petit jury room, and in the past twenty-one years has had many important juries in his charge. James Beall was the first messenger to the court. He removed from the county and was succeeded by George A. Spedden, of Oakland.

At the opening of the first term of the court on the 19th of May, 1873, the following attorneys were admitted to practice in said court: Joseph A. Cahill, S. A. Cox, B. Chew Jones, A. H. Blackiston, John B. Fay, of Cumberland; John M. Read and G. S. Hamill, of Oakland, and Thomas J. Peddicord, of Rockville, Md. Of this number, G. S. Hamill and Thomas J. Peddicord only have continuous practice at the bar from that time to the present. John B. Fay is a United States official in New Mexico; S. A. Cox is in Washington, D. C., and Messrs. R. Chew Jones, A. H. Blackiston, John M. Read, have departed this life. Later in the term Messrs. J. H. Gordon, J. W. Veitch, William W. McKaig and J. M. Schley were admitted. These are all dead.

On Tuesday, May 20th, 1874, a jury was sworn to try the first case ever tried in Garrett county. This was an appeal case between W. Lipscomb and Samuel Rodcheaver, and stood No 2 appeals. Joseph A. Cahill and John M. Read represented Lipscomb, and Thomas J. Peddicord appeared for Rodcheaver. The jury rendered a verdict for Rodcheaver. Judge Richard H. Alvey continued as Chief Judge of the circuit court until about a year ago, when President Cleveland appointed him Chief Judge of the Court of Appeals of the District of Columbia. Judge Motter served until his death, and was succeeded by Josiah H. Gordon, of Cumberland, who was appointed by the governor to serve until the next election when Henry W. Hoffman was elected for the full term of fifteen years. Judge Pearce died in office, and was succeeded by A. K. Syester who served until his death, and was succeeded by Edward Stake. Upon the retirement of Judge Alvey, A. Hunter Boyd, of Cumberland, was appointed Chief Judge, and at the fall election, 1893, he was elected for a full term. The court as at present constituted is Chief Judge A. Hunter Boyd, Associates, Henry W. Hoffman and Edward Stake.

W. H. Tower served as clerk until June 9th, 1887, when his death occurred. His son, E. Z. Tower, who had been deputy clerk, was, upon the recommendation of the bar, appointed to fill the vacancy. He has since that time been twice elected by the people, and still holds the office.

The State's attorneys have been J. M. Schley, John W. Wolf, John W. Veitch, W. P. Townshend, John W. Veitch and G. S. Hamill. Mr. Hamill, the present incumbent, is the only surviving State's attorney of the county.

Since the organization of the court many important suits have been determined. In the early days of the county our civil dockets were crowded with ejectment suits. Many of these cases involved the title to large bodies of land. Our land titles however are becoming pretty well settled, and there is not so much land litigation as in former years. Our criminal dockets

never have been large and the judges have frequently congratulated our people upon this fact. There have been but two murder cases tried in this county, and one of these a removed case. Our judges have always had the respect and confidence of the people. No charges of unfairness has ever been made against them. No suggestions of corruption has ever been made against a Garrett county jury. Whilst our people are opposed to litigation they feel that they can expect justice at the hands of our court when they are compelled to resort to legal procedure.

In looking over the test book I was struck with the large number of attorneys who have been admitted to practice here who are no more. Among them I note Josiah H. Gordon, John M. Read, R. Chew Jones, A. H. Blackiston, J. W. Veitch, William W. McKaig, J. M. Schley, A. Beall McKaig, Maurice A. Healey, J. W. Wolf, William Devenom, Thomas J. McKaig, John Ritchie, Richard T. Merrick, William Walsh, H. Wheeler Combs, Wills, Bridenolph, W. P. Townshend, A. K. Syester and M. Bannan.

The present members of the bar are W. A. Daily, A. G. Sturgiss, A. B. Gonder, E. A. Thayer, James C. Peddicord, E. H. Sincell, J. T. Mitchell, G. S. Hamill, Thomas J. Peddicord and E. Z. Tower.

June Forecast, 1894.

In all eastern portions of the continent fair, pleasant weather, tinged by a slight east towards cool at the opening of the month will prevail. However, in the west, eastern and southern air currents attended by storm movement will have a decided influence on the temperature there, which will move on eastward followed by storms later. About the 3rd a wave of disturbance will reach eastern parts of the continent manifesting itself in showers of rain and storms of wind, however, not in excessive rainfall generally, which may occur locally in narrow belts. On or touching the 6th the weather will clear leaving the meteorology somewhat cool and bracing. This will be followed to the 8th when the temperature will grow warm and be attended by thunder showers on the 9th and 10th. The temperature will grow very warm on or touching the 13th, which will be followed by a wave of storm disturbance prolonged to the 17th reaching all sections west and east. Severe storms are likely to occur at many places and locally many extreme rains. The solstice period brings mostly much intensified windstorms and rains. Local thunder showers will be in transit from the 20th to the 23rd. Much thunder and lightning will then prevail and also many hard wind storms. The last storm of the month will centre on the 26th, which doubtless will be very severe in many places accompanied by many severe storms of wind and rain. The weather will clear up about the 28th.

July will have the warmest days, severest storms of wind and rain, and more thunder and lightning than any of the other summer months.

May 21st, 1894. P. R. SMITH.

Signs of the Times.

Hon. John Walker of Howard county, Mo., ventilates a plan which has the merit of originality and probable feasibility also. Mr. Walker says:

"I will give \$1 per acre on every acre of land I own toward the building of a gravel road from Rochepart to Jackman's mill. My farm consists of 450 acres—hence I will take in said road to the amount of \$450. I will also give the same amount for a gravel road from Rochepart to Ashland church or from the church to Fayette.

"If we could get the farmers once interested in such an enterprise, it would be but a few years until we would have the best roads in the west. The building of these roads can be accomplished with less cost in the long run than the present system of road working is now costing the farmer. It must also be remembered that each individual who pays in as much as \$100 becomes a stockholder in \$100. In fact, stock can be issued at \$100 a share, and I will venture the assertion that this money will return a larger dividend than in any other way invested."

This has the right ring. It hits the nail squarely on the head and shows that Mr. Walker knows what he is talking about. Next to railroads, substantial and lasting highways are worth more to a country, including both the farmers and the townsmen, than any other single investment that could be made. The press and citizens of Missouri and Kansas should take this question up and not cease agitating it until the principal towns of every county within the two states are joined by lasting macadam or gravel roads.—Kansas City Times.

Tablets relieve nausea.

MORTGAGEE'S SALE

OF VALUABLE

REAL ESTATE

NEAR OAKLAND, GARRETT COUNTY, MD.

Under and by virtue of a power of sale contained in a mortgage from John H. Parnell and wife dated the 30th day of May, A. D. 1891, and recorded in Liber E. Z. T. No. 17, folio 88, etc., one of the United States Records of Garrett County, Maryland, the undersigned mortgagee will offer at public auction

SATURDAY,

THE 16TH DAY OF JUNE, 1894,

at the hour of 11 o'clock a. m. in front of the West Hotel in the said town of Oakland, at those lots, places or parcels of land situate near the town of Oakland, Garrett county, Md., designated as

LOTS NUMBERS 12 AND 13

on the plat of the subdivisions of military lot No. 286.

Lot No. 12 begins at a post standing at the end of 250 perches on the third line of military lot No. 286 and running thence with said third line north 60° west 75 perches, then north 20° east 42 perches, then south 75° east 75 perches, then south 20° west 42 perches to the beginning.

Lot No. 13 begins at a post standing at the end of 250 perches on the third line of military lot No. 286 and running thence with said third line north 60° west 75 perches, then north 20° east 42 perches, then south 75° east 75 perches, then south 20° west 42 perches to the beginning and lots containing

4 ACRES

more or less.

The improvements consist of two dwelling houses and all necessary outbuildings and said land is in a good state of cultivation.

These lots will be offered separately. Terms of sale—CASH.

MARMADUKE C. BEST, Mortgagee.

E. H. SINCELL, Solicitor.

MILLINERY!

I desire to inform the people of Oakland and vicinity that I am now prepared to furnish them, at very reasonable prices,

Millinery Goods, Flowers, Ribbons.

Stitch and Fancy Goods, Notions, Etc.

Store on Oak street at east end of Davis bridge.

Give me a call, examine my goods, and be convinced that my stock is complete in every particular.

MARIE CUNNINGHAM.

STOCKHOLDERS' MEETING.

Notice is hereby given that the annual meeting of the stockholders of The Enterprise Tanning Company of Garrett county will be held at the principal office of said company, county, Md., on Saturday, June 16th, 1894, at 11 o'clock a. m., for the purpose of electing a board of directors to serve for the ensuing year and the transaction of such business as may properly come before such meeting.

E. G. PALM SR., Secretary and Treasurer.

NOTICE TO TAX-PAYERS.

This is to notify the tax-payers of Garrett county that the Annual Levy for 1894 has been made and published, and to call their attention to the following abstract of Section 45, Chapter 566, Acts of 1880, relating to the assessment to be allowed and interest to be charged on all tax bills:

"All county taxes shall be due and payable on the first day of September next succeeding the date of the levy thereof; and on all county taxes paid on or before the 1st day of September a discount of 3 per cent shall be allowed; and after the 1st day of January all taxes shall bear interest at the rate of 6 per cent per annum until paid; the Treasurer shall make the discount and give for taxes so paid; but the discount allowed on county taxes by this section shall not be given for taxes on person or corporate institution unless the whole amount of State and county taxes due by such person or corporate institution for the current year be paid when the same is made."

E. E. SOLLARS, Treasurer of Garrett County.

NOTICE TO CONTRACTORS.

The Mayor and Town Council of Oakland will receive bids until Monday, June 4, 1894, for the building of plinth forms.

Specifications: Plinth forms to be built of oak board not less than 12 inches thick; 2 feet wide and to be supported by three 3x1 oak stringers. Contractors to make what lumber corporation has at \$12.50 per thousand feet or all bids.

The Council will hear appeals from the above day from 2 to 6 p. m., and from 7 to 9 p. m.

E. E. TOWNSEND, Clerk.

at the Court House door at Oakland, all that parcel of land in the town of Oakland, comprising

LOTS NOS. 60, 61 AND 62

on the plat of Grant's Addition to the town of Oakland, which said three lots are described in gross as follows: Beginning at the end of the first line of lot No. 59 and running thence south 67° west 21 1/2 feet, thence south 67° east 12 1/2 feet, thence north 67° east 26 1/2 feet, and thence north 67° west in the beginning, containing altogether about

Three-quarters of an Acre of Ground

more or less and improved by the well-known and popular, handsome and commodious, first class, three-story, frame Summer Hotel and Boarding House, heretofore kept by Mrs. Jane O. Morgan, known as

"The Rest,"

and also by a stable, ice house, water tank and other outbuildings as well as a

SMALL COTTAGE.

N. B. The whole of Lots Nos. 60, 61 and 62 and so much of Lot No. 59 as is situated south of the division line will be offered with the Hotel and the remainder of Lot No. 60 with the cottage.

TERMS OF SALE. One-third cash and the remainder in two equal installments, payable one and two years after the day of sale and to be secured by notes of the purchaser endorsed satisfactorily to the undersigned. A cash deposit of \$500 on the day of sale will be required as a condition precedent to the acceptance of any bid for the Hotel, and a deposit of \$100 money any bid for the cottage.

MORTGAGEE'S SALE

Valuable Farm of 50 Acres

Near Oakland, Garrett Co., Md.
Known as Military Lot No. 924.
Two Wagons, One Milch
Cow, Five Sheep, and
Other Personal
Property.

Under the power conferred by three mortgages from Ruth Cline and Floyd S. Cline her husband to Gilmer S. Hamill dated respectively the 20th day of December, 1888, the 21st day of February, 1890, and the 21st day of June, 1892, and recorded in Liber E. Z. T. No. 14, folio 222, etc.; Liber E. Z. T. No. 17, folio 81, etc.; Liber E. Z. T. No. 17, folio 221, etc., among the Land Records of Garrett County, Maryland, the undersigned as attorney of the said three mortgages will offer at public auction on

**THURSDAY,
THE 31ST DAY OF MAY, 1894,**
AT 12 O'CLOCK NOON

at the Court House door at Oakland all that valuable parcel of land in Garrett County near Oakland known as

MILITARY LOT NO. 924,

CONTAINING 50 ACRES OF LAND,

which is particularly described in said mortgages and which was conveyed to the said Ruth Cline by George P. White and wife by deed dated the 24th day of March, 1888, and recorded among the Land Records of Garrett County in Liber E. Z. T. No. 13, folio 371, etc.

This property is improved by a

GOOD DWELLING HOUSE, BARN,

and all necessary outbuildings.

Also the following chattels which are included in the above mortgage of June 24, 1892:

1 Milch Cow, 1 Road Wagon, 1 Spring Wagon, 1 Set Double Harness, 5 Sheep, 1 Grain Cradle, 2 Sleds, 1 Mattock, 1 Pick, 1 Mowing Scythe, 1 Sleigh, 2 Plows, 1 Post Hole Digger, 1 Grain Rake, and 2 Broad Hoes.

TERMS OF SALE FOR THE LAND. One-third cash and the remainder in two equal installments payable one and two years after the day of sale and to be secured by the notes of the purchaser endorsed satisfactorily to the undersigned, or the whole may be paid in cash, at purchaser's option. A deposit of \$500 on the day of sale will be required as a condition precedent to the acceptance of any bid.

TERMS OF SALE FOR THE CHATTELS. On all sums under ten dollars the cash will be required on the day of sale on all sums over ten dollars a credit of six months will be given upon the purchaser's note bearing interest from day of sale and with security approved by the undersigned.

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.
T. Jay in Chambers News.
OAKLAND, MD., May 9, 1894.
POSSESSION UNDER VIRGINIA PATENTS.

The said Virginia patentees took possession of and held the lands granted to them respectively by said State, claiming and holding up to said Deakins' line from the date of their respective patents up to the present time. They acknowledged allegiance to the governments of Virginia and West Virginia, paid taxes on said land to said States and voted for officers of the said State governments. A large quantity of the lands lying immediately west of said Deakins' line, have been improved and settled upon by the grantees of Virginia, in some instances for nearly if not more than one hundred years, and in other instances for a less period of time, but long beyond the period of limitation, or prescription recognized and enforced by laws of the State of Maryland, Virginia or West Virginia, and the State of West Virginia respectfully submits that it would be most inequitable and unjust to now deprive them of the property which has been so long held by them as aforesaid, upon a mere claim that in running said boundary line, Frances Deakins, the agent of the State of Maryland, made a slight error in the variation of the magnetic needle, or that the surveying instrument of said Deakins was not as strictly accurate as the progress of modern science enables us to make such instruments now.

BOUNDARY DISPUTE ACT.
In the course of time the marks on Deakins' line became obliterated and destroyed and the true location was lost and unknown in many places, and the act of the Maryland General Assembly passed May 27, 1882, heretofore mentioned, notified this state of facts and provided for the retracing and marking of said line.

The act then provided for the appointment of commissions. This shall cause said line to be accurately surveyed, traced and marked with suitable monuments, beginning therefore at the Fairfax stone. The language of the Virginia act of May 3, 1854, also above recited, is exactly like that of the said Maryland act in providing that the commissioners shall cause said line to be accordingly surveyed, traced and marked with suitable monuments, etc.

OLD LINE WAS TO BE RETRACED.
The State of West Virginia submits that these acts did not contemplate that a new line should be run different from that which had been formerly run and adopted, but that the former line, which said act recited was the lost and unknown, should be found, retraced and marked with suitable monuments. If said old line could not be found it was simply to be traced and marked. It was believed to be the north line, and it was known that it had been originally run as such, hence the commissioners were directed to run due north to the line of the State of Pennsylvania is being merely descriptive of the old line. It was evidently not intended that the line should be changed, in case it was found to vary slightly from a due north course by reason of a small variation in the compass or slight inaccuracy of instruments.

"DEAKINS' LINE THE TRUE BOUNDARY LINE."

Lien Michler found the terminus of the old line on the Pennsylvania line, about three-quarters of a mile east of the point where the line run by him struck said Pennsylvania line. The duty of the said commissioners under said acts clearly was to have had said old line retraced from the Fairfax stone to the point where Michler found its terminus on the Pennsylvania line. If this had been done the great litigation which Michler predicted would follow the adoption of the meridian line run by him, would have been avoided, and the intention of the legislatures of both Maryland and Virginia would have been carried out and exact justice done in the premises. And the State of West Virginia insists that the right which had been acquired by Virginia and by this State, and by the patents of Virginia to the lands lying along the west side of the said Deakins' line, by their long continued possession and exercise of ownership over the same, and by the exercise of jurisdiction over the said territory by the State of Virginia could not be, and were not divested or interfered with by the running and marking of said Michler line in 1859, and she says that none of said rights have been relinquished or abandoned, or become divested by anything that has been done since said Michler line was run, and she avers that said old Deakins' line is the true boundary line between said States, and prays that it may be so declared and established by this honorable court in this case.

The State of West Virginia does not admit that the said old Deakins' line was not correctly run, nor that it does not follow a due north course. Nor does she submit that the said Michler line does follow a due north course. But she says that the said Deakins line was run as a due north line, and had been so regarded and recognized by both the States of Maryland and Virginia and by the citizens of both States for more than half a century before said Michler line was run, and the State of West Virginia pleads and claims that the long continued exercise of jurisdiction by the State of Virginia up to said line and the possession for said long period of her grantees of said territory, have vested in this State as the successor of Virginia, and those claimed under them full and complete title of said lands west of said Deakins line, and constitute a complete and valid defense to any claim of the State of Maryland to the same.

VIRGINIA PATENTS TO DEAKINS.
Among those who received patents from the State of Virginia for lands lying west of or adjacent to said Deakins line, shortly after said Deakins line was run, was the same Francis Deakins who ran and established said line under the authority of the State of Maryland, as appears by several patents to him and to his brother, William Deakins.

NORTH BRANCH OF THE POTOMAC THE BOUNDARY LINE.

The State of West Virginia further answering says that the true northerly boundary line between her and the State of Maryland is the left or northern shore of the Potomac river at low water mark for the whole extent of the shore between Maryland and West Virginia, that is to say, beginning on the division line between the States of Virginia and West Virginia at or near Harper's Ferry at low water mark on the left or northern shore of the Potomac river, and following said shore to the Fairfax stone at the head spring of said river, and she prays that the court will establish said line as her northern boundary with the State of Maryland; that her full jurisdiction and authority of the whole of said river to low water mark on the said northern shore may be fully confirmed and quieted by a decree of this Honorable Court in this case.

The State of Maryland claims that the said Potomac river to the right or southern shore at low water mark is within her territory and jurisdiction, and disputes the said claim of the State of West Virginia. The compact made between Maryland and Virginia at Mount Vernon in 1785, heretofore mentioned, simply provided for the exercise of certain privileges and rights of navigation and fishing in said river and for service of process upon the same and the punishment of crimes committed therein, etc., but did not settle the question as to which State said river belongs, nor as to where the true boundary line between said States along said river is located, and said question remains unsettled to this day.

Glade Valley.
Nice weather now. We hope the cold spell is over for this time. Taking it altogether we call this an early spring and a very favorable one for farmers to put out their crops.

The Rev. S. L. Keller preached at the Red House Sunday.
Mr. John Wotring is working for Mr. Daniel Guey.

Mr. John Rolf contemplates purchasing a new bicycle soon.
Miss Mollie Hollen is on the sick list.

Mr. Samuel Guey, Sr., who was on a visit to friends at Cranesville, has returned home again.

Mr. J. H. Roth is making quite an improvement on his farm by clearing off a large patch of laurel.

The Methodist church at Texas Ridge will be dedicated next Sunday, June 3.

There are still a few bears roaming through the woods along the Great Backbone mountain. Mr. S. C. Mosser, of this place, had one sheep killed and another badly crippled by a bear last Thursday night.

Mr. Joel Guey, of Dobbin, W. Va., made a business trip to the Glade this week.

The outlook for fruit this year is very bad. There will be scarcely any apples through this entire section of country.

J. BIRD.

Rogers' Specific Liniment.
A radical cure for cholera. Sold by A. G. Sturgiss, Oakland, C. F. White, Huttons; The Co-Operative Store, J. O. DeBerry, Corinth; E. A. Weimer, Mellenry, Smith & Callis, Johnston; J. E. Guey, Accident; Jonas Prazee, Young Store Co., R. Liston, Selbysport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

MONEY IN GOOD ROADS.

How Improved Highways in Indiana Have Enhanced Farm Values.

Many persons are accustomed, when approached with a project for good improvement, to put the matter off as they would a luxury—"until better times." While they acknowledge that better public highways would be a very nice thing at certain seasons of the year, it never seems to have dawned upon them that to improve the roads would be an investment just like raising higher grade stock or using improved and labor saving machinery, which would soon pay for itself. Unfortunately this class of people have been in the majority both in town and country, where solid roads are most needed, and their want of progress has seriously clogged many an enterprise of value to the community.

It has long been known in a general way that no better outlay of a few hundred dollars could be made by the farmer or country merchant than in building roads or gravel roads, but attempts to reduce the practical value to dollars and cents have seldom been made. A gentleman in northern Indiana recently undertook to find out what farmers themselves thought of the matter. In answer to his inquiries letters were received from farmers in 40 counties of the state, some of which were provided with turnpikes and some not. Some of them took a very pessimistic view of the road improvement, and some were mildly elated over the possession of splendid highways. The average was taken on the various propositions, however, just as the replies came in, and the result is extremely interesting.

The farmers estimated that by reason of the roads already improved their lands had increased in value an average of \$6.48 an acre, one enthusiast placing it at 100 per cent. If all roads were improved, the increase was estimated at \$9 an acre. So the increase of value alone on each section of land would amount to \$5,760, or enough to macadamize four miles, which is twice as much road as a section contains. That is one phase of the question. The annual loss due to poor roads was placed at 76 1/4 cents an acre, which is manifestly too low. Accepting it as correct, however, the loss from poor roads in five years would amount to \$2,432 for each section, or enough to build two miles of good roads at \$1,216 each, which is considerably more than the average cost per mile in Indiana. The actual money value of good roads, obtained by adding the loss for not having them to the gain if you did, is \$6,000 for every 640 acres, and increases by nearly \$500 every year.

These are facts, ice cold and not possible to contest. With good roads the farmer would make a great economy of time and force in transportation between farm and market. He would be able to take advantage of market fluctuations in buying and selling. He could do the hauling of farm products and commodities in the time of greatest leisure. The wear and tear upon horses, harness and vehicles would be greatly reduced. The market value of his farm would be greatly enhanced, so that, at the lowest estimate, his 300 acres would be worth \$2,880 more, while at least \$250 would be saved every year. These are facts brought out by Mr. W. C. Latta in the journal known as Paving, and they are worthy the closest attention by farmer and townsman alike.

Important to Clergymen.

A change in the law relating to marriages was made by the last legislature. It repealed and re-enacted with amendments certain sections of article 61 of the Code of Public General Laws, and the change is of interest to all clergymen especially and the people generally.

It makes two important provisions. Any minister or any other person who marries persons without a license shall on conviction be fined "not less than one hundred dollars nor more than five hundred dollars." It provides further that if the minister "shall fail to return within a period of thirty days from the date of such marriage to the clerk of the court issuing such license one of the certificates of marriage," he shall on conviction, "be fined not less than ten dollars."

It will be recalled that in the third marriage of Congressman Breckinridge Rev. Dr. Paxton held back the certificate, and the authorities sought to prosecute him, but the law was not clear, and the case fell through. The Maryland law is about as plain as it can be, and, of course, the clergymen will strictly observe it.

SINCELL BROTHERS, Oakland, Md.

Lady Berkeley's Story.

By B. BERKELEY.

Copyright, 1904, by the Author. I WERE a house party of fifteen in a most beautiful part of the Berkshire hills. We had been brought together for a week, and five days had passed most pleasantly. But, alas! the sixth day was cold and rainy, and our poor hostess was in despair to know what to do with her household of guests.

The morning had dragged by its weary hours. The men found occupation in the billiard-room or library. The women tried with fancy work or music to while away the time, but an air of restless despondency had settled over these heretofore gay people.

At five o'clock tea was brought in, and we all gathered around the big fire in the hall.

The first of honor in our party was a Lady Berkeley, lately come to America for a visit, and a very pretty and charming woman.

I had once before met her—two years ago in Rome—but knew nothing about her, though some one had told me she had quite a history.

For the few days we had been together in this country house she had been the life of the party and had won the admiration of all.

Her beauty and her attractions were unusual, but this wretched weather had cast a gloom over even her high spirits.

As we were all taking tea together, Mr. Jonson, one of the party, laid down a book he had been reading and remarked:

"A good story, but so improbable!" "I don't know," said Lady Berkeley; "that might have happened; stranger things have."

"I doubt it," replied Mr. Jonson. "I don't believe in fact ever being stranger than fiction."

Lady Berkeley smiled and said: "Perhaps a very strange plot has never been brought to your notice."

"No," admitted Jonson. "I've lived nearly forty years, and have still to see anything improbable happen in real life."

"Well," she replied, "I can tell you a strange story, the truth of which I can vouch for."

"I should like to hear it," said Jonson, and the other members of the party, having overheard the conversation, drew their chairs nearer to the fire and gave her their attention.

"It is curious," commenced Lady Berkeley, "that I should tell you the story of an American family, living in a small New England town, and for fear some of you might know the people concerned, I shall change their names."

"About twenty-five years ago, there lived in Milford, Conn., a clergyman and his wife and child."

"These two parents worshipped their little girl, for it was late in life that she had been sent to them."

"As the child grew older, they seemed to grow younger, and life seemed to them well worth living."

"The old clergyman was never so happy as when, with his little Imogene on his knee, he told her stories, or taught her his first lessons."

"It was their greatest pleasure to deprive themselves, that they might give more to their child."

"Their income, however, was small, and, though sufficient for the comfort of the family during their daughter's childhood, it was not adequate for their expenses as she grew to womanhood."

"This matter of income troubled these good people for some time, until the father conceived the idea of tutoring college men who had been unfortunate in not passing their class examinations."

"This proved a very feasible plan, and the pecuniary results were most satisfactory."

"Thus matters went on for a year or more."

"It was during Imogene's seventeenth year that her mother was invited to spend the summer in Europe with an invalid cousin, and, as her husband and daughter urged her to go, she finally consented to leave them for three or four months."

"She sailed early in June, and, two weeks later, there came to Milford a young man from Yale, to be tutored for a couple of months."

"He was the son of Mr. Prentice, a well-known New York broker, and a very charming fellow."

our daughter. My only objection is their extreme youth." Then he added that Mr. Prentice, Sr., had been up to see them and was equally pleased with the engagement.

"In the course of ten days came a cablegram from his wife saying: 'Break engagement at once. I sail for home by next steamer.'"

"This message was a dreadful blow to the young people concerned, and greatly bewildered the clergyman."

"However, nothing could be done but await his wife's arrival, and then matters would probably straighten themselves. In the meantime his wife had sailed, and landing in New York the following Saturday had driven directly to the office of the young man's father and asked for an interview with him."

"Mr. Prentice was as much distressed at the broken engagement as the others, and he readily granted her request."

"It is easier for you to imagine, than for me to describe his sensations, as she explained her cable by this story. She began immediately:

"Mr. Prentice, your wife was a very dear friend of mine. We were at school together, and shortly after separating, as schoolmates, she married you and went to the south to live. I heard from her occasionally, and knew she was very happy, and, later, heard that she had a son."

"About four years went by, when, one day, she wrote to me that you were in Europe on business, her little boy was with some relatives, and she was alone and very miserable in a New York boarding house, and asked me if I would come to her."

"My husband was away from home at that time, and there was nothing to prevent my leaving, so I came to New York and joined your wife."

"I had been with her but a few days when another child was born—a little girl."

"From the first I said the mother could not live."

"She knew it also, and called me to her bedside."

"She took my hand, and said: 'Jeanne, you have been my best friend all my life. I have not long to live, and I ask a last favor of you.'"

"I know your great sorrow in life."

"Is that you have no children; I ask you now to adopt my baby."

"My husband is still a young man, and, in all probability, will marry again. In that case, a stranger to me will be the mother of my child."

"My husband has been so kind to remind me of me, but this baby I wish you to take."

"Will you do this for me?"

"I hesitated but a moment, and then I promised."

"She was too weak to say any more, and she died that day, without speaking again."

"The same evening I wrote to you telling you of your wife's death, and added the awful lie that the child had died too."

"I signed the letter by my maiden name, that you might never trace me and discover your child."

"After the funeral I took the baby home, and told my husband I had adopted her, that I was under bond of secrecy not to say where, but that I knew her parentage."

"So my husband asked no questions, and we brought the child up as our own."

"I think he has even forgotten that she is adopted."

"The rest you know; you came home from Europe, settled in New York, became prosperous, and as your boy grew up you sent him to college at New Haven."

"Then, with 'the irony of fate,' during my absence from home, he came into our house, falls in love with our daughter, and, but for my tardy confession, would have married his own sister!"

Lady Berkeley paused in her narrative, and sighed.

She was looking into the fire with her hands clasped on her knee, and I thought her face pathetically sad.

Silence reigned for a minute, but before anyone had chance to speak, Lady Berkeley continued:

"Well, the young people were told the circumstances, and Mr. Prentice went up to Milford and wished to claim his daughter."

"The clergyman and his wife were broken-hearted, but dared not oppose the rightful father after their selfishness in depriving him all those years of his own child."

THE GERMANS AT HOME.

An American Lady's Impressions of Social and Family Life.

Housekeeping, taking it all in all, is easier in Germany than in America, and in many ways we Americans have much to learn here. It is cheaper, not because food costs much less, for, comparing market prices, we see that meat is about the same in both countries, and some staple articles, sugar, flour and lard, much cheaper in America. But the wages are of course much lower in Germany, but it is cheaper principally because everything is used and nothing wasted.

A family here will buy pieces of meat that in America we should think too poor and cheap to use, but they understand cooking them better than we do, and make them very appetizing, and we learn to live more simply and altogether on a smaller scale. Everything is bought in small quantities; for one reason, there are no store closets and poor cellar accommodations in these houses, and it is largely the custom to purchase every day for what is brought into the house. The cook receives every day money to pay for the milk and bread, and meat and vegetables are paid for when ordered. Germans are a people of small incomes, and to pay for each day's needs simplifies arranging for other expenses, which must perforce run long. Servants have quite a different bill of fare from their employers, which is as it should be, and they are perfectly satisfied with it. They do not expect to eat meat every day, and are not accustomed to it in their homes, but they get a strong nourishing soup always, made principally of bread and vegetables, as in France, plenty of vegetables cooked in ways peculiar to themselves, generally with a bit of fat bacon, of which they are very fond, and bread and coffee all plentiful, generally three times a day, but no sugar, and each one-half pound of butter per week. Neither do they expect the choicest of meat and poultry common in American kitchens, yet are well fed and content and excellent workers.

A German servant is always taking little lunches all day long, mostly full, and often a large slice of bread and butter is lying near by, where they happen to be at work, polishing the floor, or ironing, as it may chance.

The difference in feeding servants makes an enormous one in expenses. Wages, of course, are in proportion to other things. A cook who is also a general servant—for very few families keep more than two, even where there are children—gets from fifteen to twenty marks per month (three dollars and seventy-five cents to five dollars) and she is always neatly and cleanly dressed, but she never wears a hat or bonnet, except on Sunday and invariably keeps her own stockings. The housekeeper always has in her stock of household linen a large quantity of aprons for the use of her servants, so many of white and colored being given out each week and returned for when a servant leaves. They wear no fine feathers or silk dresses, and every one of them, men and women, pays a small tax to the government of about twenty cents per month, credited to them in a bank book at the end of each year, and in proportion to the number of children they have to care and support during illness. This small amount is often, though not always, paid by the employer, and credited each month by small stamps issued for the purpose and for sale at every postoffice. These are allowed to a servant leaving, and the name of the owner, and good for one year or more, as it may be, and when full must be presented at the head police office for registration, where they receive credit for it. Arriving at old age or incapacitated from work, each one is entitled to a pension, which, though small, is better than nothing. There is no home-made bread in Germany; but washing day has its own terrors, especially so when it comes but once a month, as in most German families.

Then the servant does not hesitate to say to the visitor, "Nicht die grüde! Frau ist nicht zu Hause, wir haben grosse wasche!" (No, the gracious lady is not at home; we have our big washing); and very likely this servant may be a soldier dressed in his linen suit, with sleeves rolled up and bare red arms, looking bored and discontented. Most ladies help in some way with the washing, and invariably do all the cooking on that day, and on the next they assist in sprinkling and folding the clothes to go to the mangle.

Every German is taught from infancy to be neat and tidy, and to be so the sheets and table-cloths, and it is quite a feat of gymnastics as they stand, one at each end, holding the linen, with the right foot firmly planted forward and the left one back, and then pull with all their might to stretch it; and a very fatiguing process it is.

But the average German woman is very strong; she must be to do all that is required of her. She has little or no time for reading or any accomplishment for amusement, to go out occasionally for a walk with her husband, stopping always for a glass of beer at a restaurant, and this especially on Sunday afternoons. A few balls in winter, with the simplest social entertainments sandwiched in between, is about all she ever sees or knows of the world. A woman is considered well if she is not married before that is dubbed an old maid and set on one side, and what can she have known before that, as they seldom travel and are very strictly brought up?

On the question of bowing Americans would do well to take a few hints from the Germans, who are careful when they bow to friends and acquaintances both men and women, to look one directly in the eye, which seems to emphasize it greatly. Children are taught that at once in the schools, and down on the ground or round the corner, or anywhere except at the person they meet—a custom only too common in America.—Boston Transcript.

NATURAL SCENERY.

A Comparison Between That of England and America—The Former is Affected by Man and Art, the Latter is Primitive and Virgin.

Having lately visited England after a long absence, my mind, both there and since my return, has been busy with the subject of the relations between our scenery and that of the Old World, writes Mr. Nadal. I visited a dull part of Hampshire; on leaving the house where I was staying, it was necessary to get up to an early breakfast to catch a train. Two young soldiers, very pleasant and friendly fellows, who went away at the same time, were in the cab with me. Reference was made to the scenery, and one of them, who had been in America, said: "You Americans may not all say you admire England, but in your hearts you know there is nothing like it." I looked out of the cab window at the flat and very rolled-out landscape, cut up into squares and plots by iron fences, which, however, with its sparse oaks standing here and there, was not without a classic grace, and thought of the fresh and magic attitudes of the Virginian mountains. But the hour was much too early and too drowsy to allow of any expression of dissent. It is an old question, that between the scenery of the two worlds. It is simple enough, however, with an obvious answer. Here it is primitive, of high nature; there, nature affected by man and art.

The difference between European and American trees and woodlands is significant of this. Early in September an acquaintance took me to look at a remarkable oak on his place in Essex, which he knew had been thought by some persons to be a relic of the ancient British forest. This oak, which was not very high, threw its powerful arms straight out in all directions over a wide space of ground. Certainly such a tree could not have stood in the level forest of the Virginian mountains. It has been sufficient sun to produce so great an amount of leafage, and there would have been no room for such a vast lateral extension.

It so happened that only a few months before, in June perhaps, I had seen in Tennessee a good specimen of a tree which was almost virgin. The trees went straight upward to a great height, the boles being clear of branches a long distance from the ground, and the leafage scant, except at the top, where it received the sun. I rode into the middle of this forest, and the trees were often so close together that it would have been hard for a horse to go between them, and my horse followed the bed of a stream which was so shallow that it scarcely more than wet his fetlocks, the rhododendrons being very thick on each side of me. Hailing in the midst of the level floor of the forest, it was an impressive scene which I found. The pale and lofty trunks stood everywhere parallel, and with a stately decorum and regularity, except where, half way up the adjacent mountain side, some tumbling trees, leaning at angles against the straight ones, told of winds which had arrested them in falling, varied the universal propriety with a noble confusion, the gray trunks looking like mighty fallen pillars of a ruined temple.

It is true that our scenery is not very rich in its associations of human history. This source of interest we have been only to a slight degree. But the landscape has its own history. Is it not well to consider that history? Is not scenery made more impressive by the study of those sublime changes which have prepared the world as we see, and have not the disclosures of science, so far as the unlearned are capable of comprehending them, be brought to the service of the sense of natural beauty?

Another contrast there may be in the scenery of the two lands. There is said to be said of England, that it is suitable to the luxury and comfort of the English flesh-pots. There are plenty of country-houses throughout England in which material comforts are of the best, and which at certain seasons contain much agreeable company of both sexes. I had some experience of such a house in Surrey. The library was excellent; for a wonder the weather was good, the ephemeral British sunshine remaining all day on the southern walls, and really lavish among those flowers of the garden. Easily detained by such an evening, you are not inclined to anything more active than some kind of pleasant reading, and are likely to lose your place at that, while your gaze rests upon the hills to the west. To such a vague, soft aspect of the Surrey hills was made suitable—two happlaps, as they seemed, rather than substance or matter, and unreal, save in their gentle, emerald coloring; and they were—always there, quivering as in a dream—a mirage which did not go away.

If there is an agreement between literary and English scenery, my sentiment is that, on the contrary, luxury does not suit our scenery. An iron foundry, strange to say, does no harm; a forge, a factory by the side of a pond filled with water-lilies, I have now in mind the New England landscape—these are not unsuitable, but a fine house in some way is, and my sense of incongruity extends as well to those mansions which a friend describes as Queen Anne in the front and Mary Ann in the rear. Architecture of both private and public, should be such as is suited to the local requirements and history.

A white spire, for instance, marking such a church as New England farmers have built for generations, what an eloquent object in a wide and undulating view!—E. S. Nadal in Century.

The Next Thing.

Miss Single—it is all very well to say that a woman's place is by her own fireside, but suppose she has no fireside?

Mrs. Fangle—Then she should stay by the radiator.—Judge.

A FRENCH ROMANCE.

Mysterious Disappearance of an Officer of the Foreign Legion.

"Who has not heard of the Foreign Legion? Its very name sounds martial and romantic. It recalls stories more exciting and interesting than those of modern novels. It is the one thing we have left, service in which can be likened unto that of the middle ages, so far as adventure and romance are concerned."

The speaker was an old French officer who recently returned to this city from Marseilles. Two saber cuts across his forehead and a little cross worn on his breast told with sufficient eloquence of a glorious past. The colonel went on: "There was a trial before the council of war in Marseilles some time ago, the story of which has excited great interest in France. It is the tale of a deserter."

"About eight years ago a handsome man appeared at the recruiting station of one of the border French towns and asked to be enrolled as a private in the Foreign Legion. He said that he was a Swiss, and gave the name of Ruchonnet. He was sent to Tonquin, where he conducted himself most bravely. His company was one day ordered to take a fort strongly armed and defended by three hundred Chinese. Ruchonnet, whose history, according to custom had not been investigated, had become a corporal in the meantime. In the assault the captain and lieutenant were killed. Ruchonnet stepped to the front, waved his sword apparently in the very face of the enemy, and called to his men to follow him. A few minutes later he was seen to enter the gate of the fort, and then he was master of three hundred captives. He was badly wounded, but soon recovered, to receive the thanks of his superior officers and to be promoted to the rank of sergeant. He continued to distinguish himself, and in 1887 became adjutant of his regiment, and was decorated with the military medal."

"After a stay of three years in Tonquin, his detachment was ordered to Algeria in 1890, where Ruchonnet continued to distinguish himself by exemplary conduct. He was looked upon as one of the coming men of the legion."

"One day he went to his colonel and declared that he had a confession to make. 'Ruchonnet is not my name, I began to the astonished colonel. 'I am Cammetz, formerly marshal of armories and chief of artillery. I was condemned in 1881 by the Fifteenth Army Corps to twenty years at hard labor for wrongs in my military administration. I fled to Switzerland, remained there some time, and then, wishing to rehabilitate myself, assumed the name Ruchonnet, and enlisted in this legion, in a small border town where no one knew me. That is my story.'"

"The colonel induced him to surrender himself to the authorities at Marseilles, and it was his trial which came up when I was there. He told his own story to the court, ending with the words: 'I have committed a grave mistake, but I have tried to make it good by shedding my blood for my country.'"

"His case was won, and the eloquent defense of his advocate, M. Demange, was unnecessary. The court acquitted him, and as Cammetz he will return to Algeria to take up his duties."—N. Y. Tribune.

IGNORANT AND COMFORTABLE.

Some of the Characteristics of the Turkish Peasantry.

The superstition of the Turks is no more apparent as in their fear of the "evil eye." Japs placed around the edge of the roof, or an old shoe filled with garlic and blue beads (blue glass balls or rings) are a sure guard against this illusion. Whenever a pretty child is playing upon the street the passers-by will say: "O, what an ugly child!" for fear of inciting the evil spirit against its beauty. The peasant classes in Turkey are of course the most ignorant. They have no education whatever, and can neither read nor write. Stambul is the only great city of which they know. Paris is a term signifying the whole outside world. An American missionary was once asked: "In what part of Paris is America?" Yet it can be said that they are generally honest, and always patient. They earn from about six to eight cents a day. This is a great deal for them, and they are contented, and have no envies, but they expect. They eat meat only on feast days, and then only mutton. The tax-gatherer is their only grievance; they look upon him as a necessary evil. They have no idea of being ground down under the oppressor's iron heel. Yet they are happy because they are contented, and have no envies. The poorer, the more ignorant, a Turk is, the better he seems to be. As he gets money and power, and becomes "contaminated" by western civilization, he deteriorates.—Century.

Made Him Tired.

A Texas congressman is thinking of resigning, because he is kept so busy by his friends in Texas urging upon the administration the necessity of appointing them to foreign missions, that one of the four-year-old child saying her prayers at her mother's knee. Having concluded as usual with: "God bless papa and mamma, grandpa and grandmamma, uncles and aunts, etc., she gave a great sigh, and said: "O, mamma, dear! I do wish those people would pray for themselves, for I'm tired of praying for them."—Texas Sittings.

Cries of Animals.

The roar of the lion can be heard farther than the sound of any living creature. Next comes the hyena, then the screech owl, the panther and the jackal in succession. The donkey can be heard fifty times farther off than the horse, and the cat ten times farther than the dog. Strange the quiet and timid hare, when she cries in fear, can be heard further off than either dog or cat.—Chicago Herald.

SCIENCE AND INDUSTRY.

The United States Fish Commission has issued a bulletin on the subject of oysters, which states that the annual production amounts to thirty-five million bushels, of which thirty million are Americans, and of these eleven million bushels are from Maryland.

Prof. Dewar, in a course of lectures at the London Royal Institution, exhibited liquid air, liquid oxygen, and frozen alcohol floating on liquid oxygen. The liquefying of air and oxygen is accomplished by extreme pressure and low temperature. Liquid air boils and becomes a gas again at 190 degrees below freezing point of Centigrade scale.

The West Indian Island of St. Vincent has become the principal center of arrowroot culture. The exports of arrowroot from the island grew from 15,438 barrels in 1888, to 21,433 barrels in 1892. This rapid increase of production was induced principally by the enhancement in the price of the prepared product.

Tea growing has become an important and rapidly increasing industry in India and Ceylon. The Indian crop for 1893 was the largest ever produced there, exceeding by twelve million pounds that of the preceding year. The total crop of Ceylon was larger by eight million pounds than that of 1892, the combined crops supplying an increase of twenty million pounds over any previous crop.

A sewage farm of fourteen hundred acres is owned and worked by the city corporation of Birmingham, England. The farm receives the sewage of the city, the population of which is 650,000, and immense crops of potatoes, turnips and other vegetables are raised yearly, besides grass and other forage for the large herds of dairy cows and fattening cattle, sheep and swine. The sales of vegetable and animal products of the farm amount to one hundred thousand dollars per year.

The government of Victoria, Australia, has pursued a very liberal policy in giving bounties for the encouragement of various agricultural industries. Under the influence of the bonus for export butter, the trade grew to large and profitable dimensions. Similar bounties have since been offered for export cheese, fruits and honey, and a considerable sum has been set aside to develop the wine industry by cash loans for the purpose of aiding in constructing wine cellars, stills, etc.

It is said that a German officer has invented a motor in which a stream of coal dust is utilized to drive a piston by explosions in the same manner as the gas in the gas engine. The Krupps are now making the engine in their works at Essen. It has long been known that finely pulverized coal in suspension in the air is highly explosive, and it has been held responsible for some of the most frightful colliery disasters, but this is the first attempt to utilize it in this way.

Gen. Hazen, chief of the government weather bureau, expresses the opinion that all the concussion experiments made for the purpose of producing rain have been failures. Those conducted in Connecticut, last summer, he says, seems to prolong the drought in that locality, while there was plenty of rain in all the region round about. The attempts thus far made have been by charlatans, who really have brought little more of real science to the undertaking than the savage and ridiculous "rain makers" of South Africa. Sometimes, possibly, the effort to cause rain may be rewarded by success, but that time is not yet.

CHILDREN'S GOWNS.

Always Interesting, and Just Now Varied and Very Pretty.

Gowns for little girls never cease to be interesting to those who have to make or buy them, and children require so many changes that every varying phrase of their little dresses is welcome to those who must supply the need. Their styles were never prettier or soft, clinging materials which are so becoming to children, in greater variety. A dainty frock of white China silk, dotted with satin bird's-eye spots, and suitable for a girl of eight years, is trimmed on the skirt with two rows of lace insertion over yellow satin ribbon, which also trims the revers and forms three bands up and down the waist both back and front. A pale green wool crepon, or cashmere if preferred, for it is fashionable again, as a skirt cut basque, a plain waist, and turn-back revers opening over a vest striped with white embroidery. One row trims the skirt and edges the collar.

A simple little sailor costume made of blue wool serge is trimmed with bands, vest and collar of white silk. Square lace collars are a special feature of children's gowns, and the waists are usually full, particularly in wash materials.—N. Y. Sun.

Chinese in Bondage.

Of the two thousand or more Chinese women in San Francisco nearly half that number are in bondage. They may be divided into two classes. The first class is that made up of little domestic servants called money-chay. It is the custom in poor Chinese families where daughters are plentiful to sell one or two of their girls to wealthy families as servants. The price paid depends upon the age and personal appearance of the girl. A good looking, healthy girl of eight or ten years of age in Canton is worth about one hundred and fifty dollars. Before the purchase is completed she is carefully examined to be sure that she has no hereditary taint or infectious disease. If found to be healthy a contract is executed between the parents of the girl and the purchaser, stipulating that she shall be kindly treated and provided with nutritious food and suitable clothing until of marriageable age, when her master is bound by Chinese custom to provide her with a husband. On her marriage she becomes a free woman. If she is sold it is also provided that her purchaser shall bind himself not to sell her or use her for immoral purposes.—Chicago Inter Ocean.

NUMBER 13.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your wool to Sineell Bros.

A pension has been granted John Hare, of Grantsville.

Sineell Bros., are paying big prices for wool.

Prepare for the celebration of the Fourth of July.

Sineell Bros., pay more for wool than other merchants.

Seeds by ounce, pound, pint and peck at H. E. Felty's Grocery.

A choice line of fine candies just received at the Oakland Pharmacy.

Mr. Joe Sineell, of Washington, D. C., is in Oakland visiting relatives.

Ice cold soda and mineral waters of all kinds at the Oakland Pharmacy.

Mr. Andrew Nelson, jr., arrived home from Roanoke, Va., Tuesday evening.

Mr. D. E. Offutt, jr., went to Fairmont, W. Va., Monday night on business.

Rev. J. H. Moore, of Keyser, was in the city Sunday visiting Rev. Dr. Alexander.

Mr. P. H. Keys was appointed postmaster at Keyser Monday by the President.

Mr. John J. Brennen, of Accident, was in the city on Tuesday for a few hours.

Thomas Hay Rakes and Champion mowing machines for sale by J. M. Davis & Son.

Mr. and Mrs. E. M. Spedden and little son were in Deer Park Sunday with relatives.

W. H. Malette has a number of pairs of shoes which he will dispose of at less than cost.

Mr. Walter Yost was the guest of Mrs. Jennie Johnson several days last and this week.

Mr. W. H. Hewitt, of Hewitt Bros., contractors of Cumberland, was here Tuesday on business.

D. L. Conneway has for sale chop, bran, middlings, etc., at the lowest prices. Give him a call.

We have on stock a car load of Ochilla guano and Silvergray for buckwheat. J. M. Davis & Son.

Mr. Will Cleveland has come out with a brand new express wagon, which was built by A. D. Naylor.

Mr. John W. Williams and family, of Philadelphia, are now at their summer home near Deer Park.

Rev. McCauley will preach in St. Mark's church, Oakland, Sunday morning and evening at the usual hours.

Rev. H. P. F. King will preach in the Garrett Memorial Church Sunday June 10th, morning and evening.

Messrs. Geo. O. Miller and E. H. Sineell went to Baltimore Monday night and returned to Oakland this morning.

If you have not seen the line of gentlemen's shirts at Townshend & Son's you have missed it "largely." At hard time prices.

FOUND. — Finest line, latest styles and best bargains in crush, straw and derby hats in town at Townshend & Son's. 10-4t.

J. M. Davis & Son have on hand a few two seated spring wagons and single buggies, and a first-class 8 hoe grain drill at reduced prices.

A lot of mixed paints for sale at the Oakland Pharmacy very reasonable. Give us a call when you are ready to do some painting. 13-3t

John Shartzler will take up wool in Oakland on Monday, June 11; Friendsville, Tuesday, June 12. Will pay in cash the highest prices.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became a Girl, she clung to Castoria.
When she had Children, she gave them Castoria.

Mr. G. H. Pritchard and family, who spent the winter in Ohio, returned to Oakland the latter part of last week and will remain here during the summer.

Mr. E. J. Friger has moved his family from Davis to the Cropp property near Oakland. This is another family that finds no place like Oakland wherein to dwell.

Messrs. M. E. Tally and W. S. Watson, of Parkersburg, both employees of the Baltimore and Ohio Railroad, spent Monday very pleasantly with friends in Oakland.

You will find a full line of dress goods, palmetto crepes, dotted swiss, ginghams, buntinga, etc., all colors, at Townshend & Son's 10-4t

Lately opened, complete lines of gents', ladies' and children's shoes, any style, Oxfords and Bluchers, tan and black. Prices rock bottom, at Townshend & Son's. 10-4t

Mr. W. H. Chadderton, one of the prominent and successful farmers of District No. 10, was in the city Tuesday and made the Republican sanctum a very pleasant call.

John Shartzler will close out his stock of goods at auction on Saturday, June 16, 1894. A large lot of second-hand furniture will be offered for sale in connection with the dry goods, etc. 13-2t.

Brighten the appearance of your cottage by using a few gallons of ready mixed paint which you can buy at the Oakland Pharmacy very cheap. Guaranteed the best quality. 13-3t

The attention of our readers is called to the advertisement of the Oakland Pharmacy, Drs. McComas and Hinebaugh, proprietors, which will be found on another page of this issue.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-lyr

Mrs. John B. Fay and daughter Helen left Oakland yesterday morning for South Dakota where they have gone to join Mr. Fay who has been there a number of months in the service of the Government.

Mr. William Reynolds, a prominent attorney of Baltimore, was here last Thursday attending the sale of The Rest, which sold to Mr. Chas. J. Bonaparte, of Baltimore, for \$5,700.

Mr. John Shartzler has moved to Oakland the remaining stocks of goods of three different stores and will sell them out for less than their cost. Auction every Saturday afternoon and night until goods all disposed of.

Mr. Martin Hughes, of Hanton, who has been suffering some weeks with a tumor in his side, went to Baltimore Tuesday night to have the growth removed. He was accompanied by his brother.

Unknown parties affected an entrance into the depot at the Park last Thursday night and robbed it of \$5 in cash, broke open two trunks and destroyed the telegraph instruments. There is no clue to burglars.

Miss Jennie Johnson is on a visit to friends at Martinsburg, W. Va., and Hagerstown. She will remain in Hagerstown until after the commencement exercises at Kee-Mar College, of which institution she was a student two years ago.

Capt. J. M. Jarboe and his force of workmen have been engaged this week in raising the frame of Mr. Geo. M. Mason's new flouring mill. The timbers in the building are very heavy and considerable hard work is connected with the construction.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. McNeal building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

The old house at the corner of Main and Oak streets, which has been standing there for the past thirty years or more, was torn down Tuesday by Mr. David Durst. On the site will be erected a dwelling house by Mr. Lewis Gortner, who owns the lot.

Mr. James Allen and family, who were to have gone to Scotland on last Monday did not get away from Oakland until Monday night of this week. They embarked for their journey yesterday morning on the American vessel City of New York, which will land them in London in about six days.

Sometime ago I was troubled with an attack of rheumatism. I used Chamberlain's Pain Balm and was completely cured. I have since advised many of my friends and customers to try the remedy and they all speak highly of it. S. W. GOLDBAUM, San Louis Rey, Cal. For sale by Oakland Druggists.

Children's day will be observed at St. Paul's M. E. church next Sunday morning at 10:30. There will be music, and flowers, and bright happy children. An interesting service has been prepared. There will be a song service in the evening followed by a brief sermon and reception of members into the church. The public cordially invited.

The famous old Second Battalion Maryland National Guard, has been disbanded—Companies B, at Oakland and D, at Frostburg, being attached of the First Regiment, commanded by Col. L. A. Wilmer. Companies A and C at Cumberland have been mustered out of service, but will be reorganized into one crack company and attached to the same regiment.

While at Peekskill, N. Y., Mr. J. A. Scriven, a prominent manufacturer of New York City, purchased a bottle of Chamberlain's Cough Remedy. Such good results were obtained from its use that he sent back to the druggist from whom he had obtained it for two more bottles of the same remedy.

When you have a cough or cold give this prescription a trial and like Mr. Scriven you will want it when again in need of such a medicine. It is a remedy of great worth and merit. 25 and 50 cent bottles for sale by Oakland Druggists.

On last Thursday morning about six o'clock two young men named Charles Welling and William Broderick engaged in a fight on Railroad street when Broderick threw a stone at Welling, who dodged the missile. John Rice, a lad about twelve years old, was standing near and was struck in the head by the stone, making a very serious and at one time thought to be a fatal wound. Broderick was locked up but later was released upon bond to appear before the grand jury in September.

I have two little grand children who are teething this hot summer weather and are troubled with bowel complaint. I gave them Chamberlain's Colic, Cholera and Diarrhoea Remedy and it acts like a charm. I earnestly recommend it for children with bowel troubles. I was myself taken with a severe attack of bloody flux, with cramps and pains in my stomach, one-third of a bottle of this remedy cured me. Within twenty four hours I was out of bed and doing my house work. Mrs. W. L. DUNAGAN, Ban-ana, Hickman Co., Tenn. For sale by Oakland Druggists.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and pastures, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-3m

Notice.
Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

THE RAMBLER.

A New Correspondent Who Will Furnish Weekly Letters to This Paper.

To the Editor of The Republican.
I salute you, readers of this paper, and hereafter you may look for letters from me each week.

In the beginning, I want to state that I do not intend to be partial in my letters, but that I will treat all alike, how close to the line and let the chips fall where they may.

Last Wednesday, Decoration Day, I was about town and noticed the array of bunting and flags that met the view at every turn, but was surprised to see the postoffice building with its every day attire on. Above all, that building should have worn the gayest colors.

I also noticed the old soldiers who wore the blue. They are getting fewer as one Decoration Day follows another and in a few years they all shall have been laid to rest where their bones will mix with mother earth, but the resurrection day will come and then the reward they all deserve will be granted them—a home where there will be no battles to fight, no foes to defeat, no hardships or privations to endure, but all peace, rest and pleasure forever.

On Wednesday I accompanied the Uniform Rank, Knights of Pythias, to Deer Park, where they went to pay the only respect they can to a departed brother—decorate his grave. The boys presented a fine appearance in their uniforms; they executed the movements in a masterly manner and were very decorous. Not so, however, with a number of ladies who accompanied them from Oakland, and I desire to impress upon their minds that a march to the "city of the dead" to decorate the graves of the deceased is a very different matter from a Fourth of July picnic. No doubt it was thoughtlessness on their part, and that may excuse them this time.

I was standing at the Central Hotel corner the other evening with a number of gentlemen discussing the weather we have been having. Some of them could not remember of such cold weather at this time of the year, but about forty years ago, if I remember correctly, snow fell about the middle of June to the depth of several inches. Vegetation of every kind was killed and the gardens had to be replanted, which was done. The yield was something impense and it very seldom occurs now-a-days that we have as good gardens from the first planting. On June 12, 1875 or '79, we had a light fall of snow but by which no damage was done.

It is astonishing to note the number of bicyclists in Oakland this year, and more astonishing to see what rapid progress some of the amateurs are making in hill climbing and like feats. Boys, I am not one of you—but I would like to be, and as soon as the "fake" Congress adjourns and goes home, I may be. Recognizing this fact, perhaps you would not make any objection should I suggest that you form a club, procure uniforms, a book of instructions and go to drilling for the Fourth of July celebration.

This impresses my mind that I have not said anything of the proposed celebration to be held in Oakland on the great National holiday. There is nothing in the way to make that occasion one of the grandest efforts and the greatest success of anything heretofore attempted by our people. Let everyone work together in harmony and my word for it, you will have a bigger crowd than John Robinson ever had at his show when it visited Oakland in years gone by. Pull together, boys, and success is assured.

There are two or three other things I wanted to write of this week but I am afraid that already I have trespassed on the space that belongs to someone else, so I will stop.

THE RAMBLER.
If you want fresh bread free of alum and white corn meal get it at B. Frieze's, next door to postoffice. He has been in Oakland for more than nine years and all his bread is stamped with his name on top of the loaf. See that you get the above. It will not cramp you after eating.

Decoration Day at Hoyes.

On the morning of May 30th, a large crowd of people gathered at Hoyes, and to the delight of all the senior Accident band gave us excellent music, followed by the junior Accident band and Friendsville band.

The G. A. R. came from Friendsville, accompanied by many of our friends, and in front of a large train of wagons loaded with human beings, was the stars and stripes floating in the breeze.

At about eleven o'clock the old soldiers and citizens proceeded to the M. E. church, and in a few minutes the house was filled and others desiring to get in. We were entertained for one hour with music rendered by the choir and a touching address by Rev. Hart, who knew what it meant when the command was given "On to Richmond." From 12 to 1:30 was taken up with social greetings, dinner and band music. From 1:30 to 3 o'clock was taken up with music, decoration of graves and an address.

The old soldiers formed in line at the cemetery, also the Uniformed Junior Order, witnessing the consecration of flowers, and decorating the soldiers' graves, after which we took up the line of march in the following order, each column led by a band of music: 1st, old soldiers; 2d, Junior order; 3d, school children and young ladies and gentlemen. After a short march we proceeded again to the church, but only a portion could get in. Rev. C. W. Cox ably addressed us by showing that "On to Richmond" was needful, but the younger people now have a sacred trust given them that needs thought, courage and manliness to face in order to maintain the goodly heritage given us.

Much credit is due the community for the hearty welcome given the old soldiers and their friends, for the gratuitous offering of the bands, for cheerful manner of the speakers, for the assistance rendered in the vocal music, etc. Committees were appointed to decorate the soldiers' graves at the various other cemeteries. The benediction was pronounced by Rev. Cox.

Tax Rate in Washington County.

The county commissioners of Washington county have decided upon a tax rate of seventy-five cents on the \$100 for the coming year. This is an advance of five cents over last year's rate. The taxable basis for the coming year is \$19,760,048, an increase of \$404,015 over last year. The appropriation for school expenses is \$46,500, or \$1,500 over last year, and for school buildings and grounds \$4,876, also an increase over last year. The school board had asked for \$51,400 for expenses, and \$5,175 for buildings and lots. They had also asked for provision for a deficiency of \$5,000 incurred by the past year's expenses exceeding the appropriations. The county commissioners granted the request.

Dr. J. C. T. Dolan relieves nausea.

Escaped From Jail.

The ingenuity of man is great, especially he who has a long term of imprisonment in the penitentiary staring him in the face.

Albert O'Hare, of near Friendsville, this county, who has been in jail since last March awaiting his trial on the charge of rape, escaped from Castle Wegman Tuesday afternoon in an unusual manner. He called Sheriff Wegman into the jail about one o'clock and said that his bed had been broken and that he wanted it repaired. The Sheriff went about repairing it, and while thus engaged O'Hare slipped to the door, closed it, threw the combination and sped away. Another prisoner, Wayman Kitzmiller, who is serving a term of ninety days, gave the alarm and the Sheriff was released in a few minutes, who mounted his horse and went in pursuit of the fugitive. He was followed to the Park where all trace of him was lost.

Sheriff Wegman has always been very careful and regrets very much that this man should have gotten away. He has offered a reward of \$25 for the arrest of O'Hare.

Colored Society Notes.

Miss Fanny Flanigan, of Charlottesville, Va., is here for the summer.

Mr. Win. Jones, of Baltimore, is here and expects to remain during the summer months.

The A. M. E. Sunday school met in Hamill & Little's hall in last Sunday where they expect to hold services during the summer.

Mr. W. H. Walker spent the 30th in Grafton.

I do wish some of our people would walk straighter on the streets.

What Bad Roads Lead To.

Bad roads lead to profanity; they make men swear. Bad roads lead to intemperance; men think it is necessary to fortify the inner man with a few drinks to enable them to stand a long journey through the mud. Bad roads lead to cruelty; the kindest hearted driver often has to stimulate a willing team with the lash. Bad roads lead to poverty; the wear and tear on wagons, harness and animals knock off a large per cent. of profit.—Homer Times.

While in Topeka last March, E. T. Barber, a prominent newspaper man of La Cygne, Kan., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life. Every family should keep this remedy in their homes at all times. No one can tell how soon it may be needed. It costs but a trifle and may be the means of saving much suffering and perhaps the life of some member of the family. 25 and 50 cent bottles for sale by Oakland Druggists.

Put the Dollars Where They do the Most for You!

We have just received a full line of New Jewelry, Watches, Clocks, etc. The latest designs in Ladies' Breast Pins, Hair Pins, Ear Drops, Rings, etc. Also a full line of novelties in Gold and Silver. We are offering everything at the lowest figures to keep pace with the times. Don't fail to see our window on Railroad Street filled with novelties of the season. For Economy, Elegance and Style our line cannot be excelled. We keep on hand constantly a full line of Silverware, such as Castors, Butter Dishes, Berry Dishes, Sugar Bowls, Pickle Dishes, Water Pitchers, Cream Pitchers, Knives, Forks, Spoons, and many other novelties suitable for Wedding Presents, etc. We can suit you in style and price. Try us.

SPECTACLES AND EYE GLASSES.

We have also put in a full line of Spectacles and Eye Glasses. Our facilities for fitting glasses are the best. We can give you any kind of frames and lenses to suit you. We guarantee all glasses to give satisfaction.

Fancy Groceries, Fruits and Vegetables.

In our Grocery Department we can furnish Fine, Staple and Fancy Goods at prices to suit all. In Vegetables and Fruit we cannot be beaten.

HIGH PRICES THESE TIMES A STUMBLING BLOCK.

An awful obstacle it is, too! What a source of great pleasure would it be to man in these distressing times "Could he but overtop it."

Prevents Many a Man from Well Dress!

Makes Many a Man Unpleasant!

Compels Many a Man to Want!

We've Overcome This All!

Popular Prices Within Reach of All!

Rule the Order of the Day!

Don't claim to sell all the goods in the city but do claim to sell at the lowest prices offered in Oakland. Our motto is

"QUICK SALES & SMALL PROFITS."

We only ask a trial and a call at

W. H. MALETTE'S,

The Cheap Cash Grocer and Jeweler.

A FARMER'S DAUGHTER.

A slight discerning heart to bliss,
In peace-drenched wholeness loveliness,
Is the country girl who long has toiled
In a tireless round—yet all unspoiled.
From morn till night with a heart so light,
She answers the carols of blithesome birds,
As she toils content with a kitchen task,
Or with diaphanous arms in the creamy curls.
Perhaps she gathers the gentle knee
Mid odors of hawthorn hedge and clover;
Perhaps she sits in a fairy race
Under the rattle fence or over
Not in the city will all men find
The stalwart lass of this good kind,
The rosy cheek and the dancing eye,
The staid form and the teeth of pearl,
The strength—with sense—of the farmer's
girl.

Her soul is clear as her eyes are clear,
She fills the house of her homely sphere,
Caring but little for hoarded wealth,
Her heart and cheeks have the hues of
health—
Rich in the joys without alloy
In touch with nature, the flowers and trees,
Her mind content is the wholesome peace,
Absorbed in blisses from such as these,
Her life is lived, her words are true,
Her heart as light as a dancing feather,
Her soul's horizon as good to view
As highland's tinted with purple heather;
The frankest eyes and hair as auri,
The lithest motion—our pet and pearl—
The red cheeked, wholesome farmer's girl.
—L. Edgar Jones, in Prairie Farmer.

A LONE FISHERMAN.

Tranquil Fishing, Donkeyback, His
Years of Adventure Round.

"The picture of a man sitting on a
barro in mid-stream, in the heart of
the southern Sierras, miles from any
where, has nothing remarkable in it,"
said the naturalist, "but when you con-
sider the barro asleep, and the rider
holding a fishing line with one hand
and a well-thumbed copy of *Edipus*
with the other, which he is reading
through clouds of smoke from a well-
filled pipe, the scene takes on another
phase.

"Such a man I met one day in the
great river of verdure known as the
Arroyo Seco, that winds away from
Los Angeles up through the San Gabriel
valley, entering the Sierras at Pasadena
and for miles passing through a region
of varied delights.

"Senior—," I began.

"Sebastian," he replied, without
looking up.

"Senior Sebastian," I continued, "I
regret, in these solitudes, to be obliged
to inform you that you are infringing a
patent right of mine."

"How so?" retorted Senior Sebastian,
glancing up from the book, which he
now dropped into the pocket of his cor-
dony coat.

"In this I was the originator of
fishing on horseback."

"Ah," said the senior, "you may be
the inventor, but I am the improver,
see?" And for the first time I noticed
that the line was fastened to a hole in
the tip of the barro's ear. "If you have
ever observed," said the fisherman, "the
habits of the barro, or we will say his
head, you will have noticed that the
ears are always moving back and forth.
It's just the motion I want in fishing,
so I adopted it, and see—"

"As he spoke the line stiffened out,
the barro's ear, or, to be exact, his
right ear, bent forward suddenly, and
the barro himself awoke with a start.

"Watch him," said the fisherman.

The barro's eye had first settled on me
in an inquiring way, then realizing
that something was tugging at his ear,
he drew the member up to the hori-
zontal, at which the trout, for such it
was, left the water with a bound, and
in its return to the ear down again.

The barro now seemed to concentrate
all his energies in the contest, and the
ear gravitated between the upright and
the horizontal. "You see," remarked
Senior Sebastian again, "the barro plays
the fish, and I, suiting the action to
the word, 'pull him in.' And, with the
aid of the philosopher he was, the
speaker unhooked the trout, dropped it
into a pocket of his coat, and having
impaled a fresh worm and cast the line,
the fisherman felt for his *Edipus*, and
the barro fell asleep.

"I deem it," continued the senior,
after resigning his pipe, "the privilege,
if not the duty, of man to take life at
the normal angle, or as near it as pos-
sible; in other words, take solid com-
fort. I have seen the hard side of it
right in sight of these mountains. I
came here forty years ago, when I
whole country was a sheep ranch. I
walked across the Mojave desert in Au-
gust, and I see now that men dead
and have tried it. Yes, I was after
gold and adventure, and got both.

"It came about in this way," and the
senior, getting no further bites, rolled
up his line and joined with the trout
up the arroyo. "I was living in Santa
Fe in the fifties, trading mostly, and
one night a man rushed into the saloon
where I was and said a man was dying
and wanted to see a priest. I was a
Catholic and the next best thing, so I
went along. You know where the old
palace is to-day in Santa Fe? Well, he
took me down a street back of that,
and in an old adobe I found a man, a
half breed, with death in his face. He
had been stabbed in a brawl an hour
before, and was so near gone that I
didn't have the heart to tell him I was
not a priest. He sent the others out of
the room, then bade me lock the
door, and with his mouth to my ear
told me to remember what he said. He
had been a bad man, had killed sev-
eral men, and wanted to do something
to expiate his crime, so told his secret
to the church. He told me to pull off
his belt, which I did, and in it was
a row of some of the biggest clunkers
of gold I ever saw in this coun-
try. In another part was an old piece
of sheepskin, and on it a map, rude,
but good enough, of these very moun-
tains. He said that he and two others
had discovered a valuable placer in the
mouth of a canyon where you could
pick up pieces like those, and confessed
that he had killed his partners to get
control of it all. The murder was
done on the desert at Coyote Springs,
and after he had covered the bodies in
the sand he started back to the placer.
He got there at night. Said he: 'I
don't know how it happened, but the
next I knew I found myself in a herd-
er's cabin, and he said he found me
crazy on the desert. I got better and

I never went back to the place, but I
want to leave the gold to the church.'
I took the map, then wrote down the
directions, and to prove his story he
told me where he had buried the men,
and made me promise to erect a cross
over them.

"Well," continued the senior, after
a short pause, "the man died, and a few
days later I started for the Sierras
across the desert. I found the place
where the bodies were, as it was near
water. I didn't waste much time there,
but pushed on, and in three days, as
near as I could reckon, was somewhere
near the spot. The map called for sev-
eral mountains to be in a line, then the
canyon, and there were other direc-
tions. My friend, to make a long
story short, I'm hunting that placer yet,
and if there is one, from Mojave to
Warner's ranch, that I don't know I'd
like to see it. That was forty years
ago, and I've made up my mind that
the man was mad. That he had killed
the men there could be little doubt,
but the placer must have been in his
imagination. But here is my shanty.
I'll show you the map."

"The shanty was a rough board af-
fired set back against the mountain, and
so partook of its general color that it
might have been passed unnoticed by
the stroller up the arroyo had it not
been for the score or more of white
beehives scattered over the space in
front of it, from which rose an ominous
humming. The shanty contained but
two rooms, one a kitchen, the other a
library. The sleeping room was out of
doors when it did not rain. The books
were few, but to the point, their selec-
tion telling of a man of taste; and con-
spicuously hung on the wall, in an old
looking glass frame, was the gold seek-
er's map.

"You can have half the output if
you can find the placer," said the ova-
tor of the map.

"The map was on a piece of sheep-
skin, carefully drawn in what had been
red ink, and bore the appearance of
having been made in goodly haste.

"No, I don't get lonely here," said
the old man in reply to my question;
"there is plenty of company of a de-
cided variety. I generally sleep out
yonder in a hammock swung between
two trees. I like plenty of air, and
one night I awoke, as one will some-
times, feeling that some one is around
me. I kept perfectly still, and soon heard
a step as soft as a cat could make, then
another, and then two fiery eyes looked
into mine. My rifle was in the house,
so I waited. The animal soon turned
and walked off, and a few moments
later I heard a rush, then a scuffling
in the brush. I ran for my rifle, and got
back in time to hear something leap
into the bush. I found my burro
badly wounded, his side cut and torn,
but I believe to this day that he kicked
the mountain lion over the fence; he
was equal to it. We trailed the lion
the next day, but lost it in the canyon.

"Bees frequently come down and
try conclusions with the bees. One
night, hearing a loud noise, I went out,
rifle in hand, and there stood a big
grizzly not ten feet away, in the moon-
light, looking twice as big as he was.
He had a beehive under his arm, and
was having bees off with the other.
The moment he saw me he began to
growl, and I wasted no time, but let
him have it just where I thought the
heart was. He dropped on all fours and
made off, and I fired several times. And
difficulties were found in the animal the
next day five hundred yards away up
the side of the canyon dead, with a ball
through his heart. I have known them
to go even further with the heart blown
to pieces."

"Senior Sebastian was a type of men
who live in the remote and corners of
the great range. There are several liv-
ing the lives of hermits, some of high
education, who have filled places of
honor in the world at times. All have
a story. Something occurred in their
lives to drive them away from their fel-
low men.

"The hermits of these hermits are be-
coming known to the public, and mod-
ern science and engineering will soon
throw open all the nooks and corners
of the great range."—N. Y. Sun.

SHARP SENSE.

Quickness of Snell in South American
and Frontier Herds.

Most animals have at least one sharp
sense. A dog and a cat, according to
the fable, lay in a dark room. "Hark!
I heard a feather drop," said the dog.
"Oh, no," said the cat, "it was a
needle, I saw it." Whatever may be
the sense of domesticated horses, the wild
horse of the South American pampas
possesses a most acute and far-reach-
ing sense of smell.

Mr. Hudson, says Youth's Compan-
ion, speaks of it as a common occur-
rence for the horses of a district, in
seasons of drought, to migrate sudden-
ly to some distant place—fifty miles
away, perhaps—where rain has fallen.
A slight breeze from that quarter is
enough to set them off.

A still more striking phenomenon is,
he says, familiar to every frontiers-
man.

The gaucho horse has the greatest
terror of an Indian invasion, and long
before the marauders reach the settle-
ment—often when they are still a fair
day's journey from it—all the horses
take the alarm, and come flying wildly
in. The horned cattle quickly feel
the contagion, and a general stampede
ensues.

The gauchos declare that the horses
smell the Indians, and Mr. Hudson be-
lieves they are right. When passing a
distant Indian camp, from which the
wind blew, all the horses driven be-
fore him have taken fright and run
away.

"I see by the paper," said Mrs.
Hicks, "that you can buy a seal skin
from the Esquimaux for two iron hoops
and a tennipny nail." "Very true,"
returned Hicks. "But I can't spare the
time to take the hoops and the nail to
the Esquimaux, and my bank wouldn't
honor a check for two hoops and a ten-
nipy nail, so I don't see how we are
benefited by that state of affairs."

TEMPERANCE NOTES.

MODERATE DRUNKARDS.

Alcohol Produces Conditions Which Bring
About Serious Consequences.

We are indebted for the phrase, "mod-
erate drunkard," to Mr. Josse, a natu-
ralized Frenchman, who was at one time
M. P. for Grimsby, and died last sum-
mer. When occasion required him to
explain that he was not a total abstin-
ent, he did so by saying that he was a
"moderate drunkard," and, while "su-
perior" persons smiled at the ingenious
Frenchman applying to himself the
name of drunkard, the no doubt he
was right. The fuller and more cor-
rect knowledge of the effects of alcohol
on the tissues of the body and brain,
which every day's investigation is put-
ting us in possession of, is proving to
the world that the phrase "moderate
drunkard" more correctly expresses the
condition of everyone who takes al-
cohol, than the more euphonious "mod-
erate drinker," which is preferred be-
cause it claims to be not only compati-
ble with, but actually indicative of, re-
spectability. It is proved beyond doubt
that the smallest quantity of alcohol
causes a disturbance in the system; that
the disturbance increases according to
the quantity ingested, and that there is
no point in the process of drinking al-
cohol at which a line can be drawn, and
it can be said: "Up to this point mind
and body have been injuriously affect-
ed; the functions of neither have been
impaired, but the next drop makes the
sober man drunk." No; drunkenness,
which simply means the disturbance of
the system through the drinking of
alcohol, begins with the first drop in-
bibed, and develops, according to the
quantity and temperament of the
drinker, physical, mental and moral
alterations of which the victims may,
and generally do, remain unconscious,
although these alterations may be in-
terfering the attention of strangers, and
deeply grieving the hearts of friends.

And thus it comes to pass that persons
who are called "perfectly sober," say
and do things they would neither say
nor do if they had not been having
some drink. Instead of being spoken
of as "perfectly sober," such persons
should be spoken of as "partially
sober," but this, their real condition,
is almost never than expressed by
the phrase they use in describing them-
selves, that of "moderate drinkers."

We live in an age when nobody de-
fends drunkenness. The representa-
tives of the liquor interest are even
more emphatic than the temperance
party in their denunciations of the
evil. They do it with such an air of inno-
cence as would almost persuade one to be-
lieve that the drunkard wrongs them
by consuming so much of their liquor
and adding so much to their profits.

They repudiate all responsibility for
the drunkenness, then, the temperance
party, who are the only ones who
stand on the platform occupied by the
persons who drink so as to become only
partially drunk, and claim these
"moderate drunkards" as the persons
for whom they care, because they are
thought to do no harm, and are
the only ones who are not the cause
of their blindness. The liquor
interests are quite willing, yet, clamor-
ous, that the temperance party should
turn their attention, and by some
means get rid of them, so that they
may be kept clear for the drinkers who
have not yet become drunkards, going
on drinking with as little as possible
of the fear of consequences before their
eyes. Drunkenness, meaning thereby
the condition that is universally ac-
knowledged as such, being the utterly
discredited, it is most important that
the evil effects of the drinking which
has not yet resulted in this drunkenness
should be insisted upon, until they are
thoroughly understood and their sig-
nificance is grasped. And as a prelimi-
nary consideration it is very desir-
able that all drinkers of liquor should bear
in mind what Dr. Coley says: "Those
persons who are in the greatest moral
and physical danger from alcohol are
just the one who are most ready to per-
scribe for themselves, and the least
ready to believe that they can not stop
whenever they please."

The drinking of alcohol produces a
disturbance in the system; and Dr.
Clouston, of Edinburgh, says the al-
cohol "affects more strongly the high-
est brain functions of emotion and con-
trol." He also remarks that "it is now
generally recognized that as the moral
faculties were the last to be affected,
they are commonly the first in brain
disease to disappear." The first effect
that alcohol produces on the drinker is
that of weakening his self-control, and
paralyzing the moral will that would
guide him aright. A very common
symptom of this evil effect is seen in
the drinker being puffed up with an
overweening sense of his own impor-
tance. When sitting with his tap-room
companions he lays down the law
with a confidence that infallibil-
ity itself might envy. At home he
asserts his mastery with a de-
cision and sternness under which
wife and children cower.

At work or in business he despises those
who would instruct him, or tender him
advice; and, as an employer, he is ex-
acting as one who feels what a mighty
man he is. The result of this state of
sarcasm in the quarrels that are
common between persons who have
been drinking, but are declared to be
perfectly sober. Two such meet,
neither of whom can brook the pres-
ence of an equal, and words of hauteur
or contempt on one side or the other
excite anger which finds expression in
blows.

Now, this is an alcohol-produced con-
dition that has its foundation in obliviousness
of danger. Take the case of an engine
driver on a railway. The alcohol that
puffs him up with an exalted sense of
his own importance blunts his appre-
hension of danger, and at the same time
impairs the clearness of vision, and
steals his hand on which safety de-
pends, and he is thus placed in

a position to do, and to dare,
what he had not had not
touched drink would shrink from
doing. Who can tell the number of ac-
cidents that have been caused through-
out those on whom the safety of trains de-
pend being unbalanced by drink, and
so rendered heedless of danger and for-
getful of duty? Then, there is a furor
driving on highways and on crowded
streets, resulting in numerous ac-
cidents. Some are acknowledged to be
the result of drunkenness in the
drivers; and the recklessness to which
the majority are attributed is no doubt
largely the result of the liquor that has
made the drivers heedless of danger,
while leaving them to all appearance
"perfectly sober." Then there is the
seafaring world, the members of which
have the reputation of an unhappy
penchant for liquor. The
number of a ship holds a position of
the very greatest responsibility, and in
virtue of that responsibility he is en-
trusted with autocratic power. The
safety of precious lives and of a valu-
able ship and cargo, depend on the
sound judgment which a very little al-
cohol impairs.

The "moderate drunkard" stands in
great danger of becoming a helpless
and hopeless drunkard; and, in the
meantime, his potentiality for mischief,
volving injury to others as well as
to himself, is very great, and is not at all
adequately realized by those who en-
courage by their example the use of al-
cohol as a beverage.—Dr. Rae, in Tem-
perance Record.

VICTIMS OF MORPHINE.

Startling Revelations Concerning New
York Shows.

It has long been known to medical
men that a great many more young
women resort to the use of morphine as
a stimulant than is generally suspected.
The habit has for a long time made
havoc among the ranks of the girls in
the theaters. But no one knew until
Mrs. Vanderhoff, president of the
Kings county Christian Temperance
union, announced the other day that
the class of young women known as
"shop girls" had taken to it. She states
that in one large New York store the
hypodermic syringe is passed around
among the girls, and that every girl
in the place is in the habit of bracing
herself by injecting this drug into her
arm. I hope this is an exaggeration.

It is hardly credible that the practice
could be carried on to that extent with-
out attracting attention. In speaking
with a physician, a former student of
the Kings county hospital, who has a great
deal of experience with morphine pa-
tients, he told me that he did not doubt
the story. "So strong is the initiative
habit on these girls," he said, "that
they only need the example placed be-
fore them, and morphine has a strange
fascination for a certain female tem-
perament."

Not long ago a large girls' seminary
was invaded by a young woman with a
little syringe, and in three months, to
the utter consternation of the principal,
two-thirds of the girls had supplied
themselves with similar implements. It
appears to me that this is a case of ab-
solute girl ignorance. Surely no healthy
young woman with any degree of will
power would voluntarily enter into this
slavery if she clearly understood all the
after-effects of it. It is a startling
sign of the times, nevertheless, solving a
temperance problem, and showing a way
against the alcoholic habit in men to
fight the morphine habit in girls.—N. Y.
World.

GENERAL GLEANINGS.

DRINK causes neglect of business;
neglect of business causes poverty. It
takes but a little while to be numbered
among the "very poor."

The Manchester Times publishes un-
der the head of "The Roll of Honor" a
list of eighty-two towns in New Hamp-
shire which are free from intoxicating
beverages.

THERE is an organization of girls in
Cromwell, Ia., the members of which
have pledged themselves never to mar-
ry a man who is not a total abstainer
from liquor, tobacco and profanity.

DR. PAUL GARNIER, chief medical of-
ficer of the Paris prefecture of police,
is authority for the statement that in
Paris during the past sixteen years,
Intemperance has increased thirty per cent.
The alarming feature of this alcoholic
insanity according to another eminent
authority is the marked homicidal
tendency.

As expert, Sims Reeves, gives it as his
opinion that "the timbre of the voice is
damaged by indulgence in strong drink,
and that to abstain altogether is to
give it that force, precision and char-
acter which ever make singing a suc-
cess." It is his opinion to the valu-
able lesson of which not only profes-
sional and amateur singers, but all who are
in the habit of using intoxicants, would
do well to heed.

SIR ANDREW CLARK said: "I call per-
fect health the luckiest thing in this
world, and alcohol even in small doses
will take the bloom off, will injure the
perfection of loveliness of health, both
mental and moral; I go still further and
say, alcohol is not only no helper of
work, but a hinderer of work, and
every man that comes to the front of a
profession in London is marked by this
one characteristic, that the more busy
he gets the less in the shape of alcohol
he takes, and his excuse is 'I am very
sorry, but I can not take it and do my
work.'"

In a treatise on the subject of al-
cohol, Mr. Lawson Tait exonerates the
human race from the imputation of be-
ing the only creatures that naturally
take to drink. Wasp, he says, have
the same proclivity. Mr. Tait has
watched the wasps eagerly attacking
overripe fruits, when the sugar had in
some degree been converted into al-
cohol. Around such fruits, especially rot-
ten plums and grapes, the wasps may
be seen fighting and struggling for
preference; and afterwards, when they
are absolutely drunk with the spirit,
they crawl away in a torpid condition
and hide themselves in the grass till
they have slept off the orgie. The
they have even more quarrelsome than
usual in his cups, and will sting most
venomously on the slightest provoca-
tion.

UNITED STATES SHIP "CINCINNATI."

Built at a cost of \$1,000,000, exclusive of armament. Every bit of material used in her is of American manufacture. Her principal dimensions are: Length, 300 feet; extreme width, 42 feet; main draught, 18 feet; displacement, 5,185 tons. The engines are two triple expansion cylinders, indicating 10,000 horse power, which will develop a speed of fifteen knots per hour. Her armament consists of one 6-inch breech loading rifle, and ten 6-inch breech loading guns in the main battery. The secondary battery consists of six machine guns and six torpedo tubes. The torpedoes used will be of American manufacture.

No Wonder.

"The most disgusted man I ever saw,"
said Uncle Allen Sparks, who was in a
reminiscent mood, "was a divorce law-
yer. He attended a sale of unclaimed
express packages and bought for two
dollars and fifty cents what he supposed
was an oil painting. When he took it
to his office and unwrapped it he found
it was one of these framed mottoes:
'God Bless Our Home.'—Chicago Trib-
une.

What He Remembered.

Bright Boy—Uncle George took me
to hear a lecture on phrenology.
Father—Let me see if you can tell me
what you learned?
Bright Boy—Some smart men have
high foreheads, and some smart men
have low foreheads; and some big fools
have high foreheads, and some big
fools have low foreheads. That's all I
can remember.—Good News.

Might Change Her Views.

"Emily," said the young man, ten-
derly, "what do you think of my new
novel?"
"Reginald," responded Emily, with a
voice of which every tone spoke elo-
quently as to her feelings, "Reginald,
I have far too high a regard for you
now ever to read any of your books."—
Chicago Record.

Matrimonial Item.

"Is marriage a failure?" asked the
elderly Spinster of a former flame, who
had been a party to a May and Decem-
ber marriage.
"No," she replied, with a glance
toward her husband, in the next room.
"Not a failure. Only a temporary em-
barrassment."—Alex Sweet, in Texas Sit-
tings.

Where He Kept His Property.

At a church meeting in one of the
suburbs of Chicago the inquiry was
made whether a certain lawyer of the
congregation, whose financial affairs
were somewhat involved, had "got
religion." To which another lawyer
present responded: "No, I think not,
unless it's in his wife's name."—Argo-
naut.

Where Is He?

Breathes there a man with soul so dead,
Who fails to take good care of it,
Who's handsome or accomplished, and
Is thus far not aware of it?
—Detroit Free Press.

SIMILAR DESIRES.

Mrs. Mulligan—I'd rather hev the
bull family sick than you!
Mr. Mulligan—So would I—Hullo.

Not One.

All lovers plead for just one kiss,
But when they're badly gone,
Is their bright lexicon of bliss
There's no such word as one.
—Truth.

No Use for Fire-Light.

Mrs. Percushing—Henry, I smell fire,
I tell you!
Mr. Percushing—Well, I can't find
any fire, and I've been all over the
house.
Mrs. Percushing—Well, light the
candle and take another look. How
could you find it in the dark, you idiot?
—Judge.

Mrs. Mulligan—I'd rather hev the
bull family sick than you!
Mr. Mulligan—So would I—Hullo.

Was That It?

"What little boy will tell why Lot's
wife was turned into a pillar of salt?"
asked the Sunday school teacher.
Freddie Filkins' hand went up, and
the good lady nodded to him to give
his answer.
"Because she was too fresh."—Truth.

With a Marked Accent.

Friend—Does the baron, your son-in-
law, speak with much of an accent?
Richpurs—He did when he discov-
ered how I had fixed his wife's dowry.
—Puck.

A Fishing Disaster.

Mr. Jackson—Hullo, uncle! I thought
I met you about half an hour ago, row-
ing toward the millpond for a day's
fishing.
Uncle—Dat was me, yassir.
Mr. J.—Why are you returning so
soon?
Uncle—I done lit up wid a 'zarter,
sah. Yo see I was givin long mighty
careless wid me monst full of worms,
an' Sam Osler done come erlong an'
gimme a suddint slam on de back an'
knock dem worms down me soggy.
Now I gotta go ter de potterman an
an' see if he kyan gib me sumpin' ter
brustap dat bait. Is a bleedin' ter
hab dat bait to do any fishin', sar?—
Yonkers Gazette.

Femininities.

Mrs. Gadders—I have so much trouble
keeping a cook. I can't get one that
will stay more than a week.
Mrs. Sangers (loftily)—My family is
just the same size as yours, and I have
no trouble.
Mrs. Gadders—Yes; I've heard that
your cook had an easy thing of it. She
told my chambermaid that she had
hardly anything to do except when
company came.—Puck.

WHAT DOES HE MEAN?

Miss Oldgirl—You must promise not
to kiss me while I am unconscious.
Dentist—I shall do nothing of the
kind.
Miss Oldgirl (with a happy sigh)—
Turn on the gas.—Judge.

No Laughing Affair This.
We may smile at ladies smoking.
But when they're badly gone,
When the garden damasks touch us
For a fifty-cent cigar.
—N. Y. Herald.

Know How It Was Himself.

Col. Yergor does not think it is right
to bestow promiscuous charity. A few
days ago a beggar met him, and ap-
plied to him for pecuniary assistance.
After considerable reflection Col.
Yergor responded with a reluctant
quarter and an expression of sympathy.
"Thank you, colonel," said the
tramp, "I reckon you knows how a fel-
low feels who has no education and
has to denude his way through the
world."—Alex Sweet, in Texas Sit-
tings.

Familiar to Americans.

Boy—What does federal mean?
Teacher—Under the old federal sys-
tem one man had authority over a
whole community, appointing his fa-
vorites to rule over the people and
levying tribute on all citizens when-
ever he pleased. Do you understand?
Boy—Yes'm. He was a boss.—Good
News.

Was That It?

"What little boy will tell why Lot's
wife was turned into a pillar of salt?"
asked the Sunday school teacher.
Freddie Filkins' hand went up, and
the good lady nodded to him to give
his answer.
"Because she was too fresh."—Truth.

With a Marked Accent.

Friend—Does the baron, your son-in-
law, speak with much of an accent?
Richpurs—He did when he discov-
ered how

The Republican.

J. H. SINCELL, Editor and Proprietor.

RATES OF SUBSCRIPTION:
This Republican is published every Thursday morning at the following rates:

One copy per year.....\$ 1.50
One copy six months......75
One copy three months......40
One copy one month......15
Single copies......10

ADVERTISING RATES.
First insertion for space of ten nonpareil lines, each additional insertion after first day, one cent per square of ten nonpareil lines. Subsequent insertion will be made from above rates.

REMITTANCES.
Remittances made by money order, postal note, registered letter or bank draft will be at our rate, if made a year in advance, at the risk of the advertiser. Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, JUNE 7, 1894.

Hosser's Mouth.
Gen. Rosser, who is possibly the most unconstructed citizen of the south, now that Bob Toms, of Georgia, is dead, sends these words in his speech at Richmond last Wednesday:

"The army that devoured us was an army of substitutes. We killed all the substitutes, and the men whom they presented stopped at home and made money and now draw pensions."

"I despise the man who gives United States money to a pensioner. The country can't stand when it makes one citizen support another. I shall never vote for a congressman who is in favor of government pensions."

It is not to the credit of Gen. Rosser's audience that they applauded these sentiments, for it is with evidence that they sympathized with him in this hatred of the union veterans. So long as men of Rosser's stamp are permitted to vent their feelings in public, so long will be delayed that complete reunion which is the hearts desire of every brave man who fought on either side.

An Expensive Vote.
How much more do the managers of the tariff bill expect to pay for Senator Allen's vote? A week ago this Nebraska Populist demanded that barbed wire for fencing be put on the free list, and the Finance Committee put it there. Senator Hoar intimated at the time that free barbed wire was to be the price of Senator Allen's vote for the tariff bill. This was met by an energetic denial, and now it appears that the denial had a substantial basis. Free barbed wire was not the payment for Senator Allen's vote. It was only a partial payment. Another installment of the price was paid last Friday, when Mr. Allen's amendment placing lumber on the free list was accepted by Senator Vest in behalf of the committee. The question now arises: How much is Senator Allen's vote worth? It is a very expensive piece of brie-a-brac as it stands, and there is no evidence that the second installment completes the purchase. Would it not have been cheaper to have purchased Mr. Allen's vote outright, instead of paying for it on the installment plan?

MAY the saints have pity on a town or city with a croaker in it! If it has two, three or half a dozen croakers living in it, it is to be commiserated that much more. The croaker comes in two forms—dead and alive. The croaker has moss on the north side of him, no matter whether the winter be mild or severe. The moss indicates nothing especially, except that he should be removed from the community at once. The croaker always views his own town from a pessimistic point of view. He has no word of praise for anyone or anything that tends to assist in the progress of the community. You tell a croaker that much is going to be done toward booming the town and exploiting its superior advantages, and he will say: "Well, you go ahead—advertise it, boom it. I'd like to see you do it," with a shrug of the shoulders. "You'll never boom this town."

The croaker is generally too lazy to labor under an impression. He may have had some money in his life, but he does not live—he simply exists. If he is in business and is asked to advertise, he says his goods do not need advertising, and

besides he is located on a prominent corner, and everybody sees his goods as they pass. Yes, "as they pass," for they rarely go in. The croaker never gives his neighbor or fellow man credit for anything he accomplishes.

If you go to a local merchant and show him a plan or suggest to him an enterprise which if carried out will be of great benefit to all concerned and ask his co-operation, and he says: "Well, who is in this? Go and see the other business men, and if they go into it I may do so, too," look out for him. He may not be a croaker, but he has dangerous symptoms. He is vaccinated, and the probabilities are that he will take unless something is done for him. He needs a hypodermic injection of "enterprise" to cure him of the "follow your leader" habit.

He is the first to expect benefits that accrue from the united efforts, energy and enterprise of others, but is the last to lend a hand. The croaker is a pusillanimous, insignificant, inconsistent ennuibrance.

Save This Great Industry!
No intelligent person can doubt that with protection maintained for wool the United States would in the course of a few years become the leading wool producing country of the world. Only Australia and the Argentine Republic at present exceed the United States in wool production. Russia, with its vast extent of pasture land, being next in order. This country produced in 1893 364,000,000 pounds of wool against 550,000,000 pounds of annual production in Australia and 400,000,000 in Argentina. Neither Australia nor Argentina are wool consuming countries to any great extent, and their wool product is therefore nearly all exported. Even under protection the annual imports of wool have been equal to more than one-half the domestic product, and with free wool the sheep raisers of Australia and Argentina would have no difficulty in driving American wool out of the market altogether. The mongrel bill for the destruction of Northern industries would close numerous establishments that now consume wool, and those that remained open would find the foreign wool supply sufficient for their requirements. The forty-five millions of American sheep would be disposed of as rapidly as possible, and the Western sheep raisers would find an important source of profit and income cut off at a stroke.

It was eminently fitting that Senator Sherman, representing the great wool producing State of Ohio, should have voiced the protest of the Western farmers against what he truthfully denounced as the "enlightening atrocity" of the Bourbon-Cleveland abomination. While Sherman spoke in defense of a great American, and especially of a great Western industry, not a word was uttered in behalf of wool by his Democratic colleague, Brice. It remains to be seen whether the Democratic Senator from Ohio will go so far as to vote for the bill which would sweep away Ohio's four millions and a half of sheep and destroy one of the most important industries of that State, and whether the only Democratic Senator from the Pacific coast, Mr. White, will prove recreant to the interests of that section, where wool growing is a rapidly increasing industry, California being in a fair way, with due protection for wool, to overtake the figures of Ohio.

However hostile Democratic Senators from states now overwhelming Republican may prove to the welfare of their constituents and to the demands of the people as expressed with unprecedented emphasis at the ballot boxes in the Northern States, the Populist Senators, Messrs. Allen, Kyle and Peller, are bound by the highest obligations to protect their constituents to vote against free wool. Republicans can be depended upon to oppose strenuously, unceasingly and by every means in their power the consummation of the treasonable and sectional plot for the degradation of Northern wage earners and the destruction of Northern industries, and especially to defend the great wool industry from the sweeping calamity the enactment of the mongrel bill would involve. In this task they should have the aid of the Populists.—N. Y. Press.

SOLDIERS ON GUARD.

The Mines in Possession of Maryland Militiamen.

The culmination of the trouble at the mines in Allegany county was reached Tuesday morning when Sheriff King telegraphed the Governor for help, who promptly ordered the Fourth and Fifth Regiments to Frostburg. He also ordered the balance of the Maryland National Guard to hold themselves in readiness to move at a moment's notice.

Monday afternoon the strikers had been parading through Eckhart, and at night they occupied Ravenscraft's Opera House as headquarters. There were many strange faces among them and there is no doubt that men from Pennsylvania and West Virginia were on the ground as reinforcements. Quiet reigned all night at Frostburg, while the rain patted and the raw winds blew across the crest of the mountains.

At four a. m., the rain ceased and the strikers filed out toward Eckhart. In a short time every alley, street, lane and path of that village was filled with striking miners, and it was but the simple truth to say the town was terrorized. There was no road to the mouth of the mine unguarded and the men who wanted to work were met at every point, and compelled to halt, listen and be "persuaded" to turn back. In some cases violence was offered. An old man and his son were jostled along the gauntlet of strikers until he was finally knocked down. His son shared a like fate, while three or four deputies were standing in plain view of the outrage and made no attempt to arrest the perpetrators.

A man who lives in Frostburg named Murphy and who works at Eckhart ran the entire gauntlet of strikers from his home down the Eckhart pike to the mine. He was insulted at every step and headed off here and there but he persevered and finally reached the mine in safety. His nerve gave away when the danger had passed and he faltered, stopped and sat down to recover his equanimity. It was of no use. He was unable to work and returned home.

Another man who was assailed at the railroad cut leading to Hoffman and here another arrest was made. In an instant a mass of strikers surrounded the deputies and for a few minutes it looked as if a collision was inevitable.

The crowd surged around in overwhelming numbers demanding the man's release, and declaring they "had come there for business, and were ready for anything." The man arrested declared he had not offered any violence, and did not intend to break the law. He was released, which prudent course probably prevented bloodshed. Sheriff King then saw that it was useless to try to cope with the immense mass of angry and excited men. But he never lost his head, and after telling the men that if they were determined to defy this authority and continue to violate the law he would be compelled to turn them over to the governor, and that when he next returned it would be with bayonets and not deputies behind him. He then held a consultation with State's Attorney Sloan who had been summoned to the scene, and at six o'clock, a. m., called upon the governor for troops to maintain the peace and uphold the law in the coal region.

A few brave men of Eckhart forced their way through the lines and went to work, but a large majority were forced to remain at home, or were turned back while on their way.

At Hoffman only a few men were at work. At Allegany nearly the entire force was in the mine. The output of coal shows a great falling off, however, it amounting to only 800 tons for the day.

The news of the call for troops was early noised about the city, and at three o'clock a special was bulletined to the effect that Governor Brown had ordered Adjutant General Douglas to send the 4th and 5th Regiments Maryland National Guards to the county, and directed him to assume command of them. A later dispatch stated that the troops would leave Baltimore at 2:10 p. m. This proved to be erroneous, as the trains did not leave until 6:30, 7 and 7:30 o'clock p. m.

The troops arrived in Frostburg and marched to the different mines to protect the men that wanted to work. This had a quieting effect upon the strikers and everything moved along smoothly.

This morning everything is quiet in the region and it is only a question of a few days until the strike is ended.

Bucklen's Arnica Salve.
THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Itch, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists.

A Brief Catechism.

Do you see the man?
I do see the man.

Who is the man?
He is a Democrat.

What is a Democrat?
The unknown quantity in the equation of the party in power.

What is it equal to?
Equal to everything if it gets a chance.

Doesn't he get a chance?
Not if he can be choked off.

What is this?
The trimmers won't have it.

What are trimmers?
Cowards, mostly.

What do they want to do?
They want to "do" the party.

Aren't they part of the party?
They think they are the whole of it.

How did they get their grip?
By promises.

What kind of promises?
Chicago platform promises.

What's the Chicago platform?
A plaukless platitide.

I don't quite comprehend.
Neither does anybody else.

What is a plank?
Tariff reform.

Aren't they reforming it?
Yes, re-forming it on a magnificent McKinley model.

What's McKinley?
In the platform parlance he is the Napoleon of unconstitutionality, fraud, and oppression.

That's the theory, is it?
Yes.

What is the condition?
He is the guide, counsellor, and friend.

What is this thus?
They think they can pull the leg of McKinley pulled.

Whose leg is that?
The leg of the tariff beneficiaries.

Isn't the party in power in full control?
It controls everything except itself.

And why not itself?
Because they are trying to run it backward, and it isn't built that way.

Can't anybody steer it right?
The President might.

Who is the President?
Grover Cleveland.

Isn't he a Democrat?
Rats!

Weather Crop Bulletin.
The bulletin issued by the Maryland State Weather Bureau for the week ending Monday, June 4, 1894, contained the following reports from this section of the State:

Western Maryland.—Farm work delayed on account of wet weather. Wheat sowing; indications point to a very early harvest. Oats looking better. Corn looks poor. Grass somewhat improved, but hay crop will be below average. Potatoes look well, and early potatoes and peas being marketed. Apple crop will be light, and cherries few. Strawberries are redening slowly.

Bittinger.—The weather the past week has been very cool and wet, and with but little sunshine. A heavy frost on May 20th killed all garden truck, and set back all crops except grass and wheat, which do not appear to have been injured. It is feared that cherries and apples are all killed.

P. P. Lohr.
St. Lake Park.—Cold and wet all week. A heavy frost the 29th of May killed nearly all the corn, potatoes, tomatoes and cabbage. Ice one-fourth of an inch thick.

CHAS. J. BUNCE.
Sunnyside.—Frost May 29th damaged corn and garden vegetables. Grass and oats looking well. Hail on the 21st, but no serious damage reported.

C. W. SLABACH.
Thayerville.—Frost during the early part of week killed all garden vegetation. Rain and cold weather prevailed. Farm work at a standstill. Sheep not all shorn yet on account of bad weather.

R. BECKMAN.
Support of Local Newspaper.
The immense power a local newspaper possesses in attracting trade to the town in which it is published or diverting it into other channels can hardly be estimated. Further, it is a matter that is seldom considered as an important factor in a town's prosperity, for the simple reason that business men generally do not give it a thought. He who will impartially consider this assertion will be convinced of the truth of it. The local paper is very naturally biased in favor of the place of its publication, and if given a fair living patronage by home business men will guard well their interests, just as the merchant guards the interests of his individual customer. But if a niggardly support is doled out to it, and it is compelled to solicit custom from neighboring cities, it cannot in justice to those patrons exert itself in behalf of its own town as it otherwise would. Try a system of liberality in the matter of advertising expenditure and mark the result.

Sinclair Bros., are buying wool at high prices.

FOR IMPROVED HIGHWAYS.

The Movement For Better Roads is Steadily Progressing.

Among many signs of interest in the movement for good roads, perhaps none is more noteworthy than the attitude of college presidents and other officers, as disclosed in the replies made by a large number of them to a letter of inquiry sent out by an earnest promoter of road improvement. It is undoubtedly the fact that the importance of good roads has not yet been appreciated by those who ought to show the deepest interest in this matter—namely, the farmers, who would be among the first to feel the direct benefits of good roads were they once built.

But such a reform must inevitably move slowly. That is it making steady progress in the right direction is the main consideration. The interest shown by the educators of the country is extremely important, and some of our institutions of learning have already made special arrangements for stimulating the study of the road question and imparting proper instruction on the subject of road building.

The Massachusetts Institute of Technology may be cited as an example. It began this work in 1890, and an instructorship in this department is now filled by a competent engineer, while a large road library has been collected, road materials have been gathered for examination and apparatus has been devised for tests of these materials, and during the last two years some special instruction has been given to the students by experts in special lines of road building or highway engineering.

It is coming to be understood that there is a science of road construction, and it may be hoped that the day is not far distant when the truth will be recognized that carriage road engineers are as essential as railway or bridge engineers. President Andrew of Brown University says that he would establish a regular professorship of road engineering at once if he had the funds for it.

All this is encouraging and significant in one direction. In the other, however, not much progress is to be noted. The legislature of this state last winter passed a law permitting the board of supervisors of any county, by a majority vote, to adopt the county road system, and then designate as county roads such highways as it might deem best for the purpose, outside of incorporation cities and villages, such roads thereafter to be properly maintained at the expense of the county at large.

The rural counties have not been eager to avail themselves of the privileges thus conferred. In fact, we believe that none of them has yet adopted the county system. Nevertheless the law was a step in the right direction, and will undoubtedly bear fruit. Certainly the system of road maintenance that now prevails is antiquated, and its results are most unsatisfactory. Most county roads are an abomination during a large part of the year. Good roads will cost a good deal at the start, but will pay large dividends in the end.—New York Tribune.

Deer Park.
Mr. and Mrs. Edward King, of Terra Alta, are visiting at Mr. Abe Freeland's.

Mr. John W. Williams and family, of Philadelphia, are in their cottage for the summer.

Mr. Isaac Brashears and family, of near Cumberland, have located near here. Mr. Brashears is farm manager for Mr. John W. Williams. We are glad to have him among us.

The Garrett boys have moved into their new house. This house was built by Solomon Hogg, and is a credit to the builder.

Mr. and Mrs. Joseph McRoby have moved into their property at the corner of Main and Railroad streets.

A fine little daughter was born last week to Mr. and Mrs. Frank Thrasher.

Mrs. Wm. Clary, of Berkeley county, Va., is visiting her daughter, Mrs. Frank Thrasher.

Rev. Q. C. Davis, of Cumberland, Md., was the guest of Mr. and Mrs. W. H. Chadderton on Saturday.

Miss E. K. Nevins, of Philadelphia, is located in her cottage for the summer.

Mr. and Mrs. C. K. Lord and family arrived at their cottage on Friday last.

Mr. Abe Freeland lost a valuable cow last week.

D. F. Graham, of Piedmont, was here a day or two last week.

Miss Isa Marley, who spent the winter in Baltimore, is here with her parents.

Dr. and Mrs. J. W. Laughlin and their daughter have just returned from an extended visit to friends in Pennsylvania.

Mr. C. M. Miller, of Swanton, was on our streets last week. Our blacksmith has built quite an addition to his shop.

MORTGAGEE'S SALE

—OF VALUABLE—

REAL ESTATE

NEAR OAKLAND, GARRETT COUNTY, MD.

Under and by virtue of a power of sale contained in a mortgage from John H. Barnett and wife dated the 9th day of May, A. D. 1891, and recorded in Liber E. Z. T. No. 15, folio 88, etc., one of the Chancery and Mortgage Records of Garrett County, Maryland, the undersigned mortgagee will offer at public auction on

SATURDAY,

THE 16TH DAY OF JUNE, 1894,

at the hour of 11 o'clock a. m., in front of the West Hotel in the said county of Garrett, all those lots, pieces or parcels of land situate near the town of Oakland, Garrett county, Md., designated as

LOTS NUMBERS 12 AND 13

on the plat of the subdivisions of military lot No. 80.

Lot No. 12, begun at a post standing at the end of 52 1/2 perches on the third line of military lot No. 80 and running thence with said third line north 65 1/2° west 7 1/2 perches, then north 25 1/2° east 42 perches, then south 75° east 7 1/2 perches, then south 25 1/2° west 42 perches to the beginning.

Lot No. 13, begun at a post standing at the end of 62 1/2 perches on the third line of military lot No. 80 and running thence with said third line north 55 1/2° west 8 perches, then north 25 1/2° east 42 perches, then south 75° east 7 1/2 perches, then south 25 1/2° west 42 perches to the beginning, and lots containing

4 ACRES

more or less. The improvements consist of two dwelling houses and all necessary outbuildings and well located in a good state of cultivation. These lots will be offered separately. Terms of sale—CASH.

MARMADUKE C. BEST,
E. H. SINCELL, Solicitor.

MILLINERY!

I desire to inform the people of Oakland and vicinity that I am now prepared to furnish them, at very reasonable prices,

MILLINERY GOODS, FLOWERS, RIBBONS.

Store on Oak Street at east end of Davis bridge.
Give me a call, examine my goods, and be convinced that my stock is complete in every particular.

MARIE CUNNINGHAM.

STOCKHOLDERS' MEETING.

Notice is hereby given that the annual meeting of the stockholders of The Enterprise Tanning Company of Garrett County, Md., held at the principal office of Hutton, Garrett county, Md., on Saturday, June 16th, 1894, at 11 o'clock a. m., for the purpose of electing a board of directors to serve for the ensuing year and the transacting of such business as may properly come before such meeting.

C. G. PALMER,
Secretary and Treasurer.

NOTICE TO TAX-PAYERS.

This is to notify the tax-payers of Garrett county that the Annual Levy for 1894 has been made and published, and to call their attention to the following abstract of Section 15, Chapter 260, Acts of 1886, relating to the amount to be allowed and interest to be charged on all tax bills:

"All county taxes shall be due and payable on the first day of September next succeeding the date of the levy thereof and on all county taxes paid on or before the said 1st day of September a discount of a per cent shall be allowed; and after the said day of January all taxes shall bear interest at the rate of 6 per cent per annum until paid; the Treasurer shall take receipt from and charge interest on all tax bills for county purposes regularly by the manner aforesaid, and shall note the same upon the receipt given on taxes so paid; but the discount allowed on county taxes by this section shall not be made to any person or corporate institution unless the whole amount of said taxes and county taxes due by such person or corporate institution for the current year be paid when the same is made."

E. E. SINCELL,
Treasurer of Garrett County.

NOTICE TO CONTRACTORS.

The Mayor and Town Council of Oakland will receive bids until Monday, June 4, 1894, for the building of platforms.

Specifications. Platforms to be built of oak board not less than 12 inches thick, 3 feet wide and to be supported by three 4x4 oak struts. Contractor to take what number of platforms he may desire, but not more than 100, and to erect them at his own expense.

The Council will hear all appeals on the above day from 2 to 4 p. m., and from 7 to 9 p. m.

L. E. TOWNSEND,
City Clerk.

A NEW STORE.

I HAVE A FULL LINE OF

BROWN'S IRON BITTERS

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.

T. Jay in Cumberland News.

The State of West Virginia bases her claim that the said river is within her territory and should be subject to her exclusive jurisdiction and control upon the following considerations:

THE POTOMAC THOUGHT TO EXTEND ABOVE 40°

First—It was manifestly the opinion and belief of the King when he granted the charter of Maryland to Lord Baltimore in 1632 that the first fountain or head spring of the Potomac river was north of the 40° of north latitude, and that consequently a meridian line drawn through said head spring would run west of said river, and that the 40° of latitude would have to cross said river to intercept said meridian line. Hence he provided in said charter that the line from the point of intersection of said parallel and meridian should tend southward to the farther bank of said river. In that case the farther bank of said river from said point of intersection would have been the northern bank. It was believed that said river continued in a northwesterly course. Neither the King nor any one else connected with said matter had any idea that said river made a bend southward, as was discovered nearly a century later. It will be remembered that even as late as 1736 in the instruction given to the surveyors of the King, who were to survey Lord Fairfax's grant, said surveyors were especially charged to take observations and note where the Potomac river crossed the 40° north latitude. The charter will be construed in the light of the knowledge of the parties to it at the time it was granted, as this is the only way by which their intention can be carried out.

POTOMAC RIVER GRANTED TO LORD HOPKINSON AND OTHERS.

That King Charles II understood that the Potomac river was not granted to Lord Baltimore by his father, and that he believed said river belonged to his royal province of Virginia, is clearly shown by his grant of the northern neck of Virginia, in 1649, and afterwards confirmed in 1663, to the Earl of St. Albans and others. By his said patent and the subsequent confirmation thereof he granted: All that entire tract, territory or parcel of land situated beyond and being in America, and bounded by and within the head of the rivers Tappanhook or Rappahannock and Quirongh or Potomac rivers, and the courses of said rivers as they are commonly called or known by the inhabitants, and description of those parts and Chesapeake Bay, together with the rivers themselves, and all the islands within the banks of these rivers. And all woods etc. Here is a distinct grant of the Potomac river, and all the islands within its banks to the said Earl of St. Albans and others by the King, and this grant, these grantees, and the inhabitants in the territory granted were to be and remain, in all things subject and obedient to such laws and constitutions as are or shall be made by the said Governor, Council and Assembly of Virginia.

These charters were also granted after reference to recommendation by the council, or the Lord's committee of plantations. There had been a bitter controversy between Lord Baltimore and the authorities of Virginia in regard to his charter and to the limits of his territory, especially on the lower Potomac and across the Bay, ever since said charter was granted, and this controversy had been granted by the King and Council in various ways, and it cannot be doubted that the whole matter as to whether the Potomac river was within said charter limits was fully discussed, and therefore that King Charles II, in granting the Potomac river to the Earl of St. Albans and others, acted upon full information and advisedly.

TREATY OF PEACE OF 1763—MAP FILED.

Again, by the treaty of peace between Great Britain and France at Paris, concluded on the 10th day of July, 1763, the boundaries of the various provinces of the respective sovereignties in America, were fixed and determined. Mr. DeJarnette, who was sent to England by the State of Virginia in the year of 1872, to procure documentary evidence with Maryland, regarding the southern boundary, procured a photographic copy of a section of the English maps made under that treaty, by "Eman Bowen, geographer to his majesty, and John Gibson, engraver." This map contains a number of articles of said treaty printed on its face. Its title is: an accurate map of North America describing and distinguishing the British and Spanish dominions on the great continent, according to the definitive treaty, concluded at Paris on the 10th of February, 1773, also all of the West India Islands, belonging to and possessed by the several Euro-

pean Provinces and States. The whole laid down according to the latest and most authentic improvements. On the face of the map is the following inscription:

The limits of his majesty's several provinces are here laid down, as they at present exercise their jurisdiction. But the limits of the Massachusetts province with New York, New York with New Jersey, Connecticut with New York, Pennsylvania with Maryland, are not yet fully determined.

But the boundary between Maryland and Virginia was settled, and an inspection of this map will show that the boundary line between these provinces is distinctly laid down on the left or northern bank of the Potomac river. This was done by the authority of Great Britain, exercising the treaty making power. It cannot be claimed that Great Britain did not know the boundaries of her colonies, and especially must she be held to have been acquainted with the boundaries of these two of her oldest colonies, between which there had been so much controversy and discussion as to their true boundaries before the king and council and lords committee of trade and foreign plantations.

Besides, it was a matter of great importance, that in this important treaty with France the boundaries of these provinces should be announced and determined. All the provinces varied from each other in many particulars of the regulations of commerce and trade and navigation. The vessels of France required information as to ports of what provinces they entered and what regulation they were to observe. It was especially important that it should be known which province had jurisdiction and control over so important a navigable river as the Potomac, and so it is here definitely determined and announced to the world that this great river, this commercial highway, belonged to and was under the dominion, jurisdiction and control of the colony of Virginia. That the treaty making power of Great Britain, had the power to make such determination, even had it been unsettled before, cannot be questioned.

But this was strictly in accordance with the understanding which the crown of Great Britain and its foreign office from the first had of this matter and with the action of Charles II in making the grant of the northern neck of Virginia, and it is also worthy of notice that this treaty was made not many years after the survey and settlement of the boundaries of said northern neck as hereinbefore set forth.

Accident. Accident has not been heard from for a long time, so we concluded a few items from here might be of interest. Although silent, we have not been idle. Since under Democratic rule it makes us hustle to keep on top, and we can find no time to go visiting or even write to our friends.

Miss Christina Richter, of this place, who has been in Baltimore since last fall, returned last week.

Weddings are becoming epidemic in Accident. Two occurred on last Sunday, and several more are looked for in the near future. This time the contracting parties were Miss Clara Gnagay and Mr. John Fike, of Illinois, and Miss Lizzie Kahl and Mr. Gust Kolb. May happiness and prosperity attend them.

Mr. John Menhorn, of Oakland, was visiting his parents on Sunday and Monday.

Our friend, Dr. F. W. Ravenscroft, who has been with us the past winter taking care of his brother's practice while he was in Annapolis representing us as State Senator, has located at Cranesville, W. Va. The Doctor is a fine man and an excellent physician, and is missed very much by the people of Accident. He has our best wishes for abundant success in his new field.

Mr. Ed. Gnagay and sister, of Grantsville, were guests of J. E. Gnagay Sunday and Monday.

We are glad to know that Prof. Sumner is to take charge of our Normal again this summer. We had an excellent school last summer and trust it may be even better this year. With Prof. at the head we look for nothing else. His schools are always a success.

We are glad to note that Mr. and Mrs. G. F. Knight, of Grantsville, are moving to our town to spend the summer with us.

Decoration day was observed on a large scale at Hoyes. Both our bands, together with many others from here were present, helping to furnish music and swell the crowd. They report a good time.

Examiner Hinebaugh and Messrs. Hamill and Hoye, Garrett County School Commissioners, were among our visitors on Monday.

The young people here have organized a literary society. The meetings thus far have been well attended and interesting. Following is the question for debate on next Friday evening: Resolved,

That the late strike was not a proper proceeding. Last week we had the Coxy question. All are invited to meet with us.

Lake View.

Professor Sumner will leave soon for Accident, where he will teach the Normal school. His family will remain here.

Mr. W. Walters, of Wheeling, is here working for the planing mill company.

Mr. Jos. Spiker's house is nearing completion.

Mr. John O'Donnell has opened a general grocery and confectionery store in Mr. R. E. Barley's building across from the depot where he will be pleased to see you.

Mr. C. J. Bunce has gone back into the depot as baggage master.

On Thursday night unknown persons broke into the depot. They got about \$5 in money, a bunch of keys and broke open two trunks but nothing was missing from the trunks.

Miss Katie Rader, who has been with Mr. and Mrs. C. M. Rathbun, left for her home in Wheeling yesterday.

We hear that we are going to have a boom in real estate. We are to have a sale of lots on the 11th of August. Mr. Jas. L. Barley will start immediately surveying lots.

Mr. Hans Larsen, the turner who formerly worked for the mill company, came back Tuesday evening to resume work.

North Glade.

Mrs. Lon A. Moon was visiting her sister Mrs. Herb Ferguson, of Mountain Lake Park, last week.

James W. Hardesty was in Terra Alta two or three days last week.

Henry Paugh and Chas. Harvey went to Oakland on Saturday.

J. W. Moon, who was paralyzed recently, is slowly recovering. We are glad to see him out again.

Sheep shearing is about done at last, but alas for the poor sheep. We fear he must go, unless the advice of Mr. "W" is heeded very soon.

The revival held here last month by Rev. C. E. Feathers resulted in 38 conversions and 34 accessions.

Rev. Geo. W. Kepler addressed a large and attentive audience here on the 26th ult., upon the object, plan, etc., of the Epworth League, after which a chapter was organized. Rev. Feather was present and assisted in the organization. The following officers were chosen, president, Geo. W. Moon; vice presidents, A. Fitzwater, Chas. Rhodes, Miss Lillie Garlitz, Mrs. Hattie Pritts, Miss Elsie Howell and Miss May Fitzwater, who all entered into the work enthusiastically. We congratulate the League on its happy surroundings and its good prospect of success.

Mountain Lake Park.

A prettier Sabbath than yesterday was never enjoyed at the Park. It was the first of the season. At 11 o'clock a large audience gathered in the hall to hear the Rev. Harry Moore, pastor of the Presbyterian church of Keyser. The sermon was forcibly delivered, interesting from beginning to end, practical and pointed. The audience was delighted. At 8 p. m. Supt. Rudisill preached.

J. J. Miller came up from Cumberland Saturday and spent the Sabbath with his family.

Mrs. J. J. Heitzel, of Cumberland, was here Saturday looking after the extensive improvements being made on their pleasant home.

Mrs. Hanks and her mother, Mrs. Blake, of Martinsburg, Rev. Lee and family, of New York city, were among the arrivals Saturday evening.

Hon. Geo. C. Sturgiss and wife, of Morgantown, W. Va., spent a day at the Park arranging to enlarge their cottage.

Zanesville, O., parties have rented Miss Emma Lash's cottage for the summer.

A Mr. Warnick, of Westport, and Mr. William Murphy, of the Park, have opened up a meat shop in one of P. T. Garthright's buildings.

Mrs. Mamie White, of Cumberland, is in her cottage. She expects to open ice cream parlors in a few weeks.

Rev. Dr. King, of Washington City, and Rev. Dr. Alexander, of Oakland, attended services at the Park Sabbath morning.

Mrs. Earlongher, of Arkansas City, Kansas, is here putting the Mountain Lake Hotel in order for guests.

The many friends of Miss Addie Sherman will be sorry to hear of her continued illness.

Geo. L. Richardson and wife, of Baltimore, have moved into their cottage.

Mr. Harned and a force of men have been making an addition survey of the Park.

Miss Swan, of Briarland seminary, Miss Mamie Swan, of Milwaukee, Wis., and Miss Nellie Alderson, of the Park, dined with

Supt. Rudisill's family on the 3rd. The Sunday School Workers' convention will meet June 15, 16 and 17. A very interesting program has been arranged for the occasion.

The closing exercises of Briarland Seminary take place on Thursday, at 11 a. m.

Mrs. J. C. Alderson is visiting in Wheeling, and Miss Nellie is a guest of Miss Swan.

Rev. McCauley, the pastor of the Lutheran church at Oakland, made a pleasant call at the Park the first of the week.

Electric Bitters.

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise. A purer medicine does not exist and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove Pimples, Boils, Salt Rheum and other eruptions caused by impure blood—Will drive Malaria from the system and prevent as well as cure all Malarial fevers. For cured Headache, Constipation and Indigestion try Electric Bitters. Entire satisfaction guaranteed or money refunded. Price 75 cts. and \$1.00 per bottle at all drug stores.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-tf.

For Sale Cheap.

The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre.

FRED. A. THAYER.

Office in Felty Building opposite postoffice.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sturgiss, Oakland, C. F. White, Huttons; The Co-operative store, J. O. DeBerry, Corinth; E. A. Weimer, McHenry, Smith & Callis, Johnstown; J. E. Gnagay, Accident; Jonas Frazee, Young Store Co., R. Liston, Soltsport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

OAKLAND, GARRETT CO., MD.

ON THE REEF.

BY KIRK MUNROE.

A MILL white beach of coral sand, on which were strewn thousands of exquisite shells and strange sponge forms.

In front, the dancing blue waters of a southern sea stretching away into infinite space and ruffled into flashing whitecaps by the strong breath of the trade wind. Back of the beach stood a dense grove of cocoanut palms, stately and most graceful of trees.

On the ground lay scores of the great, brown, ripened cocoanuts of so little value in that tropic land that no one cared to pick them up. They were protected by tough three-cornered husks so thick as to more than double their actual size.

On one of them, turned on end, sat a boy wearing a broad-brimmed, high-crowned hat of palm-leaf braid. His face, generally bright and happy, was clouded as he sat, with elbows on his knees, resting his chin in his hands, and gazing out over the glittering waters.

The month was March, and the beach was that of one of those low-lying fertile Florida keys that form the southernmost limit of United States territory.

The boy was Johnny Albury, commonly called "Grit," to distinguish him from the many other John Alburys of that region.

For many years, while he was a widower, Mr. Albury had only occupied his home on the key at long intervals, spending most of his time with his boy and girl, Grit and Matey, on board the schooner Polyanthus, wrecking, sponging, fishing, while waiting for his cocoanut grove to come into bearing and, as he finally hoped, yield him an income.

This life proved a very happy one for all three, and it was a sad day for the children when it was ended by the appearance of a stepmother, who, coming from inland on the mainland, had no knowledge of, nor love for, boats or the water.

Mr. Albury was persuaded to clear land and put in a crop. Grit weeded

catch her a mess of fish, and says I can go with you."

The lad only answered: "All right, sister, come along," but a sudden resolution, that he did not put into words, flashed into his mind.

Two minutes later a single skillful throw of a cast net into the school of sardines, always swarming alongshore, had provided a sufficiency of bait, and a light skiff was dancing merrily out over the blue waters.

"Why, Grit, where are you going?" demanded Matey, as the skiff was headed directly for the Polyanthus.

"Out to the reef after fish," was the answer. "Mother said fish, but so far as I have heard she didn't say what kind of fish, and so, of course, meant the best fish, such as Spanish mackerel, king fish, yellow tail or drum."

Of course this was convincing, for Matey not only dearly loved to sail, but was firm in her belief that whatever Grit said or did was right. Thus an hour later saw the little schooner, after a run across the broad Hawk channel, anchored just inside the great coral reef that borders the Gulf stream for more than two hundred miles, and on which huge breakers were dashing themselves into showers of glistening spray.

When at length they were ready to go and attempted to get up the anchor, all their strength on the windlass failed to budge it. A fluke had caught beneath some great bunch of coral, and with boylike carelessness Grit had neglected to provide a trip line.

It was quite dark before he abandoned the attempt to recover their anchor, and said, cheerfully: "Never mind, Matey, girl. It won't hurt us to stay out here over night, and as soon as it comes light again I'll dive down there and see what is the matter. I'm not going to cut the cable and lose that brand new anchor unless I have to, that's sure."

So soundly did they sleep that night that not until he was flung from his locker on to the cabin floor did Grit awaken to the fact that the "Poly" was pitching madly and that the gale was shrieking through her taut rigging.

There was an instant of quivering strain. Then something gave way, and Grit knew what had happened. The tense cable had parted and they were helplessly drifting at the mercy of the storm.

Minutes passed, and still they swept on. Suddenly Grit uttered a great cry of relief that was almost a sob.

"We've passed the breakers! We're clear of the reef! We're out in the Gulf! We're safe, Matey, girl!" he shouted.

The next change of scene was most surprising. Daylight had come, the sun was rising. Before a gentle breeze, with all sail set, the Polyanthus was approaching a greater steamer that had struck on an outlying spur of the reef during the blinding bewilderment of the recent squall.

"I do believe it's a wreck!" Matey

to try. If things are as I think. If you'll help me carry it out I'll give you five hundred dollars for your hour's work, provided you get the ship off within that time. Is it a bargain?"

"Put it in writing and have it witnessed, cap'n," replied cautious Grit, "and I'll sign the paper. It only holds for one hour, though. Then if you're not afloat we'll make a new bargain, and if repeated this operation four times without telling what he had discovered. Meanwhile the passengers and crew of the steamer crowded her rail and, leaning far over, watched his operations with breathless interest.

Finally the young diver clambered aboard and related to the captain that his ship had struck, well forward, on a narrow ledge with deep water on both sides, and that she was afloat, with the exception of a space about ten feet long near her bows.

"That is just about what I gathered from soundings," replied the captain. "Now, I want you to go down again, taking a lead line with you, and locate some good-sized hole or crevice as near the bottom of the ledge as you can get. Leave the lead behind to mark the spot where you come up."

"I'll be back in this strange order, but did as directed, and after several descents into the clear waters, finally located a deep fissure nearly twenty feet beneath the surface.

"Is the hole large enough to hold this wreck?" asked the captain of the young diver. "He spoke the former held out a square tin canister to which was attached a reel of slender copper wire.

"Yes, sir," replied the boy. "It's big enough to hold me."

"Very good. Now if you will go down once more, taking this can with you, and thrust it as far as possible into that hole, I will not ask you to go into the water again."

"Take care of this can as you would of your own life," he said, earnestly. "Don't let it hit against anything, and don't let it get so far in the crevice as you can reach."

These words were so strange and the whole business was so different from the usual proceedings in connection with a wrecked ship that even as Grit worked at his novel task, far beneath the blue surface, the time thought that filled his mind was: "He is as crazy as a cat."

However, he carried out his instructions, and when he regained the schooner's deck found it occupied by all the passengers of the stranded steamer.

"Take them off on a five minutes' cruise," ordered the captain, as with his own hands he cast off the lines holding the schooner.

At the end of five minutes the Polyanthus was nearly a quarter of a mile away, and her young skipper, who was trying to answer a hundred questions at once from the bewildered passengers, was also wondering what he should do next.

All at once it was noticed that the propeller of the great ship was working furiously backwards.

There came the most surprising thing that has ever happened in all the annals of wrecking on the Florida reefs. There was a heavy vibratory explosion, accompanied by a muffled roar.

To those who happened to be looking toward the ship at that time it seemed to be bodily lifted from the water. The next instant she was enveloped and hidden from view in a vast, fountain-like column of foam.

Directly afterward the ship reappeared, floating as steadily as ever in her life on the great billows of the mysterious submarine disturbance, and running rapidly backward.

Late that afternoon the schooner Polyanthus again picked up her moorings off the glistening coral beach and the young wreckers made their way to the little house beneath the cocoanuts in which their steps had yet again been directed by their return, sat nearly distracted by a sudden accumulation of troubles.

She was wild with anxiety over Grit and Matey. A man had come from Key West to look at the Polyanthus with a view to purchasing her, but finding her absent, and being pressed for time had gone away again.

He had, moreover, left behind him a letter from the northern commission house to which Mrs. Albury had sent her tomatoes, stating that the entire shipment had arrived spoiled and unsalable, so that instead of being entitled to return from them she was indebted for freight charges.

Grit and Matey rushed in alive, well and breathless with excitement.

"Hurrah, mother!" cried the former, as he wildly waved a slip of paper above his head; "we've got your fish, and only stayed out a little longer to give the old 'Poly' a chance to earn this five hundred dollars, just to show you what she was good for!"

"Yes, we've been wrecking!" chimed in Matey, "and we've wrecked a big steamer. Grit and I and the 'Poly' have, and got her off all right, and you won't sell the dear old boat now, will you, mother?"

"What on earth do you crazy children mean?" exclaimed Mrs. Albury, slowly, as she took the New York draft for five hundred dollars from Grit's hand to examine it. "How could a mere boy and a still younger girl like you two wreck a big steamer and get her off?"

"Ma," replied Grit, with a mischievous twinkle in his eyes, "I don't exactly understand myself how we did it, but I think we blew her off with dynamite."—Boston Globe.

MISCELLANEOUS.

—All kinds of insects, so far as known, are afflicted with some sort of parasite. —An elephant is fifty to sixty years in attaining maturity, and will live a century and a half.

—A Roman shoe or sandal-maker was assisted in his business by twenty different deities.

—Many African tribes pay to snake doctors, having to conciliate them and so not be bitten.

—There may be many good qualities in a miser, but his love for money kills them all.—Rams Horn.

—Empires are broken down when the profits of administration are so great that no one is satisfied with obtaining them.—Dr. Johnson.

—The nests of the termites, or white ants, are proportioned to the size and weight of the builders, the greatest structures in the world.

—Giles: "Did he tell you he couldn't speak French?" Merritt: "No." Giles: "Then, how did you know?" Merritt: "He spoke some."—Life.

—Talent is the capacity of doing anything that depends on application and industry; it is a voluntary power, while genius is involuntary.—Hazlitt.

—Judge Holt: "Well, Rob, are you going to do any better in arithmetic?" Rob: "I should say so. The boy that sits with me knows his lessons always."—Inter Ocean.

—Where ambition can cover its enterprises, even to the person himself, under the appearance of principle, it is the most incurable and inflexible of passions.—Hume.

—Freddy: "Have you—how—such a thing as—how—a fall dress eigh?" The Telephone: "No, sir; but we have some in very elegant wrappers."—Pink 'In, London.

—At the Police Court.—Magistrate: "Tell me under what circumstances you committed the robbery." Prisoner: "Under extenuating circumstances, your worship."—Tit-Bits.

—It is better by a noble boldness to run the risk of being subject to half of the evils we anticipate, than to remain in cowardly listlessness for fear of what may happen.—Herodotus.

—On anniversary days the Chinese place food on the graves of their ancestors. In a day or two it always disappears and of course the spirits of the deceased must have devoured it.

The East Indian shipworm will in a few months destroy any vessel by eating out the interior of the beams and planks. They will be left a mere shell that can be shattered by the fist.

—Hundreds of experiments have been made to determine whether toads could live when inclosed in blocks of stone, and in every case the toads died before the end of the second year.

—Since the beginning of this century no less than fifty-two volcanic islands have risen out of the sea; nineteen disappeared, being submerged by others, and ten are now inhabited.

—Young girls in Greece and Italy worshipped Diana until they were of age, when they dedicated their girdles to her by hanging them up in her temple or grove, and turned to Aphrodite.

—Five-Year-Old-Boy: "We've got little chickens at our house." Clerk: "Have you and when did you get them?" Five-Year-Old: "Why, our old hen put hair on a nestful of eggs and made chickens of them."

—Prof. Milton Whitney, of Johns Hopkins University, has determined that in an ordinary wheat soil there is at least ten thousand million soil grains in a gram (about a pint), and in some of the finest soils this number has reached twenty-four thousand millions.

—An Egyptian shopkeeper had a duty to whom he offered merchandise every morning, and whose duty it was in return for this reverence to stand in front of the shop during the day, a sort of celestial "barker," and direct the attention of the people passing by to the shop and its contents.

—There is an exceedingly able woman in Boston who can report a speech delivered rapidly in German, she first translating the speech into English and then recording it in stenographic characters. Such celerity of thought is only approached by the tradition respecting Kossuth, who is said to have caught in Hungarian, translated into Latin and retranslated and uttered at a rapid rate the choicest English, born of a study of the Bible and Shakespeare.

—Persons accustomed to see only one form of macaroni on their domestic tables are astonished at the many varieties shown by macaroni dealers. There are at least forty forms of the article, as the macaroni and egg, in which the paste has a yellow hue, is formed into discs two and a half inches in diameter and stamped with various ornamental devices. This retails at ten cents a pound. There are half a dozen others quite as distinctive.

—When the postage stamp was first resolved upon the post office authorities issued a prospectus, and offered the sum of \$2,500 for the best design and fewer than 2,700 designs were submitted by the "artists, men of science and the public generally," to whom the proposal was addressed. The penny stamp came first, and in July, 1840, a two-penny stamp was issued, and subsequently a complete series ranging in value from a half-penny to five shillings.

—Vesta was the Goddess of Life and of home; her altar stood on every hearthstone, her fire burned on the floor of every public building; emigrants, when leaving their country, always carried with them fire from the public hearth. The Vestal virgins spent thirty years in service—ten in learning their duties, ten in practicing them, ten in teaching novices. After this term had expired, they might, if they choose, leave the service of their divine mistress or marry, but few did so. Home was devoted upon them. They rode in chariots, a privilege in Rome accorded only to royalty; the best seats in the Amphitheater were reserved for them; they pardoned or condemned the gladiators. If a criminal died by execution and a Vestal he was instantly released, no matter what his crime.

TOO SOON FOR DINNER.

Theophile Gautier's Amazing Mistake—His Good-Natured Host.

A wealthy manufacturer of Sheffield, Matthews by name, was an appreciative member of a London club of clever men. For though he was no literary man, he loved literature, and there he heard it discussed to his heart's content. One night Theophile Gautier was the guest of the club, and Mr. Matthews invited him to dine at the Salisbury hotel with a party of choice spirits. One of these, J. C. Jeaffreson, arrived at the specified hour, 7 o'clock, and found an amusing complication of circumstances. The head waiter at once met him with an effusive welcome, for which he was quite unprepared.

"O, sir," he cried, "I'm glad to see you, and only wished you'd come an hour and a half sooner. Our illustrious Monsieur Gonty has been here for nigh upon two hours."

"He came at ten minutes to five, and he and Mr. Matthews have been in a pretty fix. Mr. Matthews speaks no French, the illustrious Monsieur Gonty don't speak English, and there isn't a soul in the hotel capable of acting as interpreter. I ran out for a Frenchman who does the interpreter in the hotel when an interpreter is wanted, but he had gone into the country for a Sunday's holiday. I have a half French man who is half French and can puzzle you fairly well, but this is his Sunday out."

Mr. Matthews looked worn with distress when his friend entered, and Gautier was equally miserable.

"Talk to the illustrious Gonty," ejaculated Mr. Matthews, snapping and fanning his face with a big silk handkerchief.

"Don't pay any attention to me," he added, "I shall soon be better now you have come. Please explain to him that if I had known it was the fashion of illustrious Frenchmen to arrive two hours before dinner, I would have asked the others to be here by 4:30. Go at him quick and sharp, in the language of his country! Pitch into him hot in the way of compliments!"

"Tell him I admire his country and honor him, and though I shan't be able to read a line of French, I want to buy all his works. And now I'll be mum. What a blessing it is you've come at last!"

A short conversation with the "illustrious Gonty" disclosed the fact that he had, in some way, mistaken the dinner hour for five, and, assuming a growing and an unrestrained and animated evening.

The conversation was entirely in French, and the host sat beaming at his guests, throughout the dinner, and only spoke in answer to the sympathetic request of one gentleman that he should include in the conversation by continuing it in English.

"No, no, sir, not a word of English, so long as the illustrious Monsieur Gonty honors me with his company," he cried. "I shall be silent, but I shan't be dull. I shall sit here thinking how I have brought about the meeting of the brightest spirits of the age. Not a word of English if you please!"

And so the talk was continued and ended, to his absolute bewilderment and satisfaction.—Chicago News.

NOTES OF THE FASHIONS. Items of Interest to Women Who Keep Pace with the Styles in Dress.

Satin ties that have become soiled may be cleaned by rubbing them with bread crumbs a day old.

Black flowers are the latest things for hats.

The woman who loves to wear bows may gratify her fondness to its fullest extent this spring, for they are allowed by fashion to an almost unlimited extent.

The most fashionable ribbons are made antique with a satin stripe down the center, and plain moire ribbons spangled with jet sequins in wavy lines.

Wide-ribbed pique is one of the most popular fabrics for cotton gowns. They come in pale colors as well as white, and are made up in fanciful styles, trimmed elaborately with lace and ribbon.

Something new is the plain black Hindoo cloth, which takes the place of plain black lawn. Hindoo cloth much resembles black lawn, is of perfectly fast color, and has a very soft finish.

There is a new economic side to the big sleeves of the other day, "for they make over heartily into frocks for the children."

The best brush for velvet is a perfectly new hare's foot, such as is sold for the application of face powder, and next to it a tight roll of soft threaded cloth, frayed out for two or three inches.

All rugs when shaken should be handled by the middle, not by the ends. Lamp glasses that have become badly stained by smoke can be cleaned by rubbing with common salt.

The latest caprice in hairdressing is the bowknot. The hair is made into a bow, is set high on the head, and is apparently held in place with a tortoiseshell dagger. The front hair is parted in a demure fashion and arranged in light curls on the forehead.

Silky waists of pongee silk in the natural cream shades are imported to wear with blazer suits. For wear with navy blue suits the waists are bright-stitched with navy blue silk. A navy blue necktie and a belt with a pearl buckle give a further dainty effect.—Boston Traveler.

Internal Temperature of Trees. The internal temperature of trees has been observed for some time past by M. Prinz, of Leelle, in Belgium, who finds their mean annual temperature at the heart of the trunk the same as that of air, but the mean monthly temperature of the trees sometimes differs from the grade. On certain days the difference in question may be as much as ten degrees centigrade. In very cold weather the internal temperature falls to a few tenths of a degree below the freezing point and then remains stationary. In very hot weather the temperature of the tree stays at fifteen degrees centigrade or thereabouts. A large tree is therefore colder in hot weather and warmer in cold weather than air.—London Globe.

Clarence Dale Crockett

Murfreesboro, Tenn.

Almost Blind

His Head a Mass of Corruption

Blood Purified and Sight Restored by Hood's Sarsaparilla.

"Three years ago Clarence, three years old, was taken with serious skin trouble which gradually spread until it covered his face and he became almost blind. We did everything that could be done with the assistance of a skilled physician, but nothing did him any good. His head and neck were one mass of corruption, and we thought he would lose his eyesight."

It was then that we commenced to use Hood's Sarsaparilla, and in less than three weeks his eyes began to improve. In a short time the sores look on his face disappeared and gradually healed, and now all are gone, and Clarence is a bright and healthy boy again."

Hood's Pills cure Constipation by restoring the peristaltic action of the alimentary canal.

Healthy child, with clear beautiful eyes. We are satisfied that Hood's has made a complete cure. D. M. CROCKETT, JR., Murfreesboro, Tenn.

Hood's Sarsaparilla Cures

Easily Taken Up

Cod Liver Oil as it appears in Scott's Emulsion is easily taken up by the system. In no other form can so much fat-food be assimilated without injury to the organs of digestion.

Scott's Emulsion

of Cod Liver Oil with Hypophosphites has come to be an article of everyday use, a prompt and infallible cure for Colds, Coughs, Throat troubles, and a positive builder of flesh.

Prepared by Scott & Bowne, N. Y. All druggists.

Unlike the Dutch Process

No Alkalies

Other Chemicals

are used in the preparation of

W. BAKER & CO.'S

Breakfast Cocoa

which is absolutely pure and soluble.

It has more than three times the strength of Cocoa mixed with Sugar. Arrowroot, Starch, and is far more economical, costing less than one cent a cup.

It is delicious, nourishing, and EASILY DIGESTED.

Sold by Grocers everywhere.

W. BAKER & CO., Dorchester, Mass.

On the face

and back of every card of genuine De Long Pat.

HOOKS AND EYES will be found the words:

FOR YOUNG PEOPLE.

THE CLEVER PARSON.

My children, come tell me now if you have ever been told of the parson who was so clever? So clever, so clever, so clever was he. That never a cleverer parson could be.

The parson loved children; he also loved walking. And off to the woods he was constantly strolling. To smell the sweet air, and to see the green trees. And to do just exactly what he might please.

Some children they went with him once to the wood. (They loved the good parson because he was good.) They followed him eagerly for many a mile. To let him hear his voice and to look on his smile.

At length the children cried: "Oh—dear—Mr. P! We're tired—as tired as tired can be! 'Tis supper time, too, while far thus we roam—Oh, pray you, dear parson, do carry us home!"

The children were six, and the parson was one. Now, goodness gracious! What was to be done? He sat himself down in the shade of a tree. And pondered the matter most thoughtfully.

At length he exclaimed: "My dear little chicks, I might carry one, but I can't carry six. Yet, courage! your parson's good care will provide. That each of you home on a fine horse shall ride!"

He drew out his jackknife, so broad and so bright. And fell to slashing with main and with might. "Till ready there—one, two, three, four, five and six—Lay, stout and smooth-polished, some excellent sticks."

"Now mount your good horses, my children!" he cried. "Now, mount your good horses and merrily ride! A canter, a trot and a gallop away. And we shall get home ere the close of the day."

The children forgot they were dreadfully tired. They sat on the hobbles, with ardent inspiration. "Gee, Dohlin! whoa, Dohlin! come up, Dohlin! do!"

Oh, parson, dear parson, won't you gallop, too?"

Away went the children in rollicking glee. Away went the parson, as pleased as could be. And when they got back to the village they cried: "Oh, dear! and oh, dear! what a very short ride!"

—Laura E. Richards, in St. Nicholas.

CARPENTRY FOR BOYS.

How to Make a Neat and Convenient Kennel for Their Dogs.

There are undoubtedly a good many boys who have a dog, but perhaps have no kennel. Almost any kind of a kennel will do for a dog. A box with four sides, a bottom and a top, and provided with a hole large enough for him to go through, is better than nothing, but the drawing shows a kennel of neat appearance. Any boy can make one from an old dry goods box or from some boards.

Its size depends, of course, on the size of your dog, but for the average dog of medium size a kennel thirty inches long, eighteen or twenty inches wide and twenty-six inches high to the top of the peak will be good proportions.

First, make the front and back with a peak top, then the sides and bottom; in the front piece cut a round hole

A DOG KENNEL.

large enough for the dog to crawl in and out, and above it bore four holes, and with a keyhole saw cut the wood away between the holes, so as to make a ventilator, for dogs as well as other animals need pure air.

Now nail the sides to the bottom, and the front and back to the bottom and sides. Between the two peaks nail a slip of wood to form a ridge pole against which the upper ends of the top boards are to be nailed, then put on the top, nailing it securely to the ridge pole, the top edges of the front and back, also the sides, and the carpenter work of the kennel will then be completed.

Now putty up all the cracks and nail holes, and give the outside a few coats of paint of some desirable color to finish the kennel nicely.

A staple with a chain, attached to the end of which may be a snap, can be driven in at one end of the kennel, and to this chain the dog can be fastened.

A door might also be arranged to close the hole in the front at night, so as to keep the dog warmer in winter, but you must not forget to open it in the morning, as it would be unpleasant for a dog to be shut up in such a small house when there is daylight and he is awake.

Always place plenty of straw on the bottom of a kennel, so as to make a soft bed for your dog, and he will be more grateful to you in his canine way for the kindness shown him than you have any idea of.—N. Y. Recorder.

A WRESTLING FROG.

It Possesses a Well-Developed Weapon of Offense.

Every animal has its own means of defense or a cape. Frogs save themselves by jumping—an art in which they probably excel all other forms of vertebrates. But Mr. W. H. Hudson once encountered a frog which, as he says, was not like other frogs in that it possessed weapons of offense. It was snipe shooting, and peering into a burrow saw a burly-looking frog sitting in the entrance. With the instinct of a naturalist he set about capturing it. The frog watched him, but remained motionless. What followed is thus described by Mr. Hudson.

Before I was near enough to make a grab, it sprang straight at my hand,

and catching two of my fingers with its fore legs, administered a hug so sudden and violent as to cause an acute sensation of pain. Then, at the very instant I experienced this feeling, which made me start back quickly, it released its hold and bounded out and away.

I flew after it, and barely managed to overtake it before it could gain the water. Held firmly pressed behind the shoulders, it was powerless to attack me, and I then noticed the enormous development of the muscles of the fore legs, usually small in frogs, bulging out in this individual like a second pair of thighs, and giving it a strangely bold and formidable appearance.

I held my finger within its reach, and it clamped the barrel with such force as to bruise the skin of its breast and legs. After allowing it to exhaust itself partially in these fruitless lunges, I experimented by letting it seize my hand again, and noticed that after each squeeze it made a quick, violent effort to free itself.

Believing that I had discovered a frog differing in structure from all known frogs, and possessing a strange and unique instinct of self-preservation, I carried my captive home, intending to show it to the director of the National museum at Buenos Ayres. Unfortunately, it effected its escape by pushing up the glass cover of its box, and I have never met another like it.

That this strange frog can seriously injure an enemy is, of course, out of the question, but its unexpected attack must be of great advantage to it. The effect of the sudden opening of an umbrella in the face of an angry bull gives, I think, only a faint idea of the astonishment and confusion it must cause by its leap, quick as lightning, and the violent hug it administers; and in the confusion it finds time to escape.

AN AEOLIAN HARP.

Directions for Making One with Telephone Attachment.

There are many of our young readers who have heard of the sweet tones of an Aeolian harp, but when they attempt to make one they find the principal difficulty seems to be that the noise of the wind deforms the music of the harp. There is a solution of this problem. Below we give a draught of an Aeolian harp. The sounding-box is constructed of the best seasoned pine one-eighth of an inch thick, and free from knots and checks. The top and bottom measure 21x30 inches, the sides 2x23 inches, the ends 2x6 inches. In the center of the upper board saw out a circle 2 inches in diameter. This opening allows the vibrations of the strings to escape from the box.

Now take two pieces of pine, each measuring 3x2x23 inches, shape it so that one side will be perpendicular and two sides horizontal, and one side an angle (see draught interior of box) when the glue is in the liquid state. These form the braces at the rear of the sounding-box to resist each side of the strain of the strings, and are placed at the extreme ends of the box on the inside. When putting the box together fasten the top on last. Every contact surface should receive a liberal coat of glue, and small brads driven home when the glue is in the liquid state, the box being air-tight, except the two-inch hole. Two bridges, triangular in shape, 5 inches in length, and half an inch on each side of the triangle, are fastened half an inch from the tail and 4 1/2 inches from the head. Four notches are cut in each of the bridge strings. In the head are placed four screws, each screw being 1 1/2 inches long in the tail end are four strong wire nails (always use a round surface nail, to prevent the cutting of the strings). Procure a spool of mandolin-wire strings, and a string of a banjo (celluloid body). Loop them on the wire nails at the tail, and wind the other end around the screws; first passing it through the slot of the screw by taking a single hitch around the standing part of the wire insures its not slipping. Three logs on the harp are preferred, as they may stand on an uneven surface. Give

the outside a good sand-papering (finest grade) and two coats of varnish. The telephone attachment can be added in the following manner: Find a good-sized (one-half pound) baking-powder box, remove the cover, and punch a very small hole in center of bottom. In this hole fasten a long string free from knots. Put a very small hole in the center of the side of the harp. Hang the harp by strings attached to its legs, and hold in place by the baking-powder can held close to your ear. An Aeolian harp will not play unless placed in direct contact with a good breeze. If placed on a window sill without telephone attachment the harp can stand on its legs; but if suspended in a tree in the back yard, it could be bottom side up, and thus in case of rain or snow the strings and interior will be protected. The bass string will not rust, being covered with fine copper wire. The other strings and screws can be coated with machine oil, which will protect them from the weather. The higher the harp is tuned the stronger must the breeze be required to make the sound vibrations.—H. Percy Ashley, in Harper's Young People.

THIS IS AN AGE OF BLUFF.

Even the Most Magnificent of Us Disguise Our True Feelings.

An immense amount of bluffing goes on in the world, but only each individual knows in the recesses of his own heart how deep or how shallow is the substance beneath the show. We all have to make as good an appearance as we can when in the fight with our circumstances. The bluffing we do in this way to make ourselves look formidable to the adversary, and a little lamb stamps defiantly on the ground when roused to that kind of wrath, which is but another name for fear by the presence of an intruder by whom it would never do in this world, with all its shams and make-believes, if we conducted ourselves with no admixture of bluff in our behavior. We need not go to the length of the painted cardboard fortresses or the cardboard monsters of the Chinese, nor think that we shall insouciantly and more surely the more extravagant our assumptions. But we must do something toward that kind of self-magnifying which the Greeks expressed by the tragic mask and the heightened blink.

Whether the poverty of the land nor the weakness of the soul must be shown to the prying eyes of the world. Spies are all around us, anxious to know whether those flowers have roots or are only made of paper—whether those glazes pressed shining lengths are the honest truth, or whether they are the glazes of the latter is not given. The German manufacturers hope that last year's figures will be largely increased in 1914, chiefly on account of the new treaty with Russia.

Mr. Max Scherer is said to have discovered in the joints of persons attacked with chronic articular rheumatism, bacteria, which are always identical in like cases. These bacilli are short and thick, having at each end bright grains which aniline colors make still more evident.

With the most transparent and the most sincere of us all, some magnificence of disguise is necessary; and what human being ever attained the stature of a god with whom no high-souled bluntness was needed? How much of moral bluffing is there in the conduct of human beings? The philosopher who gives them forth as guides and rules for the young knowers are practically impossible and incapable of rational application? Do we not confess this ourselves when we say that, if we did not hold a higher moral standard than was attainable, we should get nothing done on the lower levels?

And what is this bluffing with virtue on one side and vice on the other? As for that vice, it puts forward its own bluff in its plea for the unavoidable weakness of human nature. The philosopher who gives them forth as guides and rules for the young knowers are practically impossible and incapable of rational application? Do we not confess this ourselves when we say that, if we did not hold a higher moral standard than was attainable, we should get nothing done on the lower levels?

THE AGE OF WINE.

The increase of the strength of wine by keeping depends upon whether it is kept in cask or bottle. If stored in cask there is a loss of alcohol, and the wine is consequently weaker. The ancient Greeks knew that wine improved if kept in leather bottles, and the same result is obtained by keeping it in wooden vessels, for both leather and wood are more easily penetrated by water than by alcohol; evaporation ensues from both, but the leather cask, and the wine consequently becomes richer in alcohol. On the other hand, the opinion that wine has grown old in bottles, and has, therefore, become stronger, is thoroughly false. Evaporation is very much hindered by the cork, even when it is in the liquid state. The explanation of our finding old bottled wine rich in alcohol is that only the stronger wines can be preserved and weaker ones can not resist the effects of time. At the same time, although weaker wines eventually be spoiled and weaker kinds require, as a first consequence, of that cause which afterward destroys them and which is neither more nor less than the chemical action in their constituents, properties which render them more agreeable both to smell and taste.—Brooklyn Eagle.

Boulevards of Napoleon III.

When Napoleon III. undertook to build a boulevard he did not simply cut a street through narrow blocks. He had sense enough to see that by doing so, under the limitations presented by existing streets, he would get triangles too small for building purposes and a rear view of most of the houses through whose back yards the boulevard should be cut. Not desiring to have a grand avenue lined with back fences, he reconstructed the whole neighborhood, laid out his boulevard so that it would have available building sites on either side, and wiped out of existence such cross streets as would have cut the abutting properties into small parcels. He had no objection to triangles or trapezoids as such, but he did object to triangles and trapezoids too small to serve as a site for anything but a fruit stand.—Philadelphia Ledger.

SCIENCE AND INDUSTRY.

A report from the Belgian consul at Noumea states that two-fifths of the total area of New Caledonia contains nickel, and one-tenth of this has been conceded to mining companies, about 120 square miles being already worked. The ore is said to contain 8 to 10 per cent. nickel.

Henry S. Huntington, United States consular agent at Castellonara, Italy, reports to the state department that the grape produced in that country during the past two years has been so enormous that in many districts in southern Italy there were no barrels and demijohns sufficient to hold the pressed juice, and cisterns were emptied and filled with wine.

The production of wool in the United States in 1902 was 294,000,000 pounds, and the amount imported in the year ending June 30, 1903, was 172,500,000 pounds. The production and the importation have increased steadily for a series of years. The wool production of the world is estimated at 2,456,775,600 pounds annually. The largest foreign producers are Australia, Argentina and Russia, in the order mentioned.—N. Y. Recorder.

Germany exported 87,300 metric tons of rails, against 113,713 tons in 1902. The exports included also 37,348 tons of rail fastenings and 1,000 tons of iron wire. The value of the latter is not given. The German manufacturers hope that last year's figures will be largely increased in 1904, chiefly on account of the new treaty with Russia.

Mr. Max Scherer is said to have discovered in the joints of persons attacked with chronic articular rheumatism, bacteria, which are always identical in like cases. These bacilli are short and thick, having at each end bright grains which aniline colors make still more evident. The discovery has led to the cultivation of these bacteria in bouillon, on gelatin, or on a piece of potato. Their culture requires a temperature of at least 25 degrees, and darkness is indispensable.

The latest form of madness is reported from the asylums of France. The patient so affected is regarded as entirely sane in all respects but two. One, an uncontrollable impulse to bark like a dog, and to otherwise imitate "all the modulations of the canine voice." The other, a passion for the number three. The barking, however, is not quite exceptional, for it is not unusual for epileptics and idiots to mimic dog barks, and the passion for the number three is by no means uncommon among the sane.

Dr. Oliver Wendell Holmes observed how frequently men think in terms of the number three. The barking, however, is not quite exceptional, for it is not unusual for epileptics and idiots to mimic dog barks, and the passion for the number three is by no means uncommon among the sane.

Two Italian horticulturists propose to prevent the loss of ammonia from stable litter and other organic manures by means of sulphuric acid, employing the form of a composition which they call "mrotol." This is formed by pouring sulphuric acid on dry sawdust, chopped straw or similar vegetable substance. Great heat is evolved, and when that subsides the charred vegetable matter or charcoal is dried and reduced to powder. This powder is freely sprinkled on the manure, and arrests fermentation. Strict precautions are necessary in its preparation to guard against the corrosive action of the acid.

Changes of form are very slow—though rapid enough to explain the formation of glaciers—but pressure increases their speed. Trescott, of the French Academy, has proved by his beautiful and varied experiments that under a certain pressure all solids "flow" like liquids, and that their molten obey in such cases the laws of fluidity. A block of lead, or a piece of steel, or of ice, placed in a cylinder and pressed upon is made to flow out of a hole in the cylinder exactly as a jet of water. It remains a solid all the time, but its molecules, whose paths are rendered invisible by a special arrangement, are seen to have acquired a certain freedom of motion, and to flow in the very same way as molecules of water flow from a hole in a pail.

The Evolution of Styles.

It is really a curious study to observe how fashions in raiment gradually shape themselves from what has preceded them. The change is seldom sudden or violent. We do not jump, for instance, from the prevailing sleeve to the immense balloon structure. We do not go from the plain fall skirts to the bouffant effects of drapery, with no intermediary stages. But as the slang phrase has it, "we're there just the same," and we are well on the way to this last-mentioned consummation already. The first stage was the trimming put on in rows high up on the skirts, now come pompons and double skirts, and even pailers, all of which are scarcely straws so much as which waving fields of grain to show which way the wind of fashion blows.—Philadelphia Press.

The Dogwood Tree's Signal.

Every lover of good salt water fishing keeps his eye on the dogwood tree. So does every blackfish from his secluded abiding place among submerged rocks. When the dogwood begins to put out little whitish green buds the blackfish fisherman, who is quite distinct from any other species of fisherman, gets out his tackle, fixes up his lines, pulls out his old clothes, and makes arrangements for boat and bait. Simultaneously the blackfish pokes his head out from under the rocks, takes a long breath of green water and begins to feel that the spring has come and that he is developing an appetite. But he knows that he must fast until the dogwood signals.—N. Y. Sun.

Never Got So Far.

"You say that you have played Macbeth?" said a New York theatrical manager to an applicant for a position. "I have acted the role of Macbeth fourteen times."

"Well, let me hear you repeat his defiance to Macduff."

"I never got so far as that. The audience always made me quit before I got to that part."—Texaco Siftings.

THE HISTORY OF QUININE.

How It Was First Discovered—Named After a Spanish Princess.

His grace the Duke of Eife, who is a chemist as well as a politician and a banker to boot, has recently communicated to the world all that he knows, and practically all that is known, concerning that life-saving alkaloid, quinine. As was befitting such an interesting subject and such an interesting lecturer, the duke was accorded the Royal Institution, London's scientific holy of holies, in which to expound his theories and disseminate the fruits of his research. The Marquis de Lorno runs Eife very close in the digging up of popular subjects and it is a race between them as to who is the better hand in working up a paper which is both interesting and couched in language understood by the masses. Eife, however, has held his own so far and the British public has quite come to regard him as a good all-round man, who, although a royal princess's husband, walks about with his eyes open and allows few matters of interest to escape him.

On the subject of quinine the duke says that if it is not exactly a "household medicine," during the past few years it has certainly become a household word. And perhaps no other drug has a history more varied and interesting. Peruvian bark first appeared in the London pharmacopoeia in 1677. It was, however, used in England at least as early as the year 1655, as "The excellent powder called by the name of Jesuits' powder, brought over by one James Thon, a merchant of Antwerp."

But what is now universally known as quinine—one of the most important of the alkaloids—was not discovered till 1811; nor was it obtained in a pure state by complete separation from the other constituents of the bark until ten years afterward. Quite an ancient medicine, quinine may be described as the base, or essential principle, of the bark of certain individuals among the cinchona family of trees. This bark was first introduced into Europe in 1632, though it is generally said to have been unknown there before the return of Madrid of the Countess of Cinchou, the wife of the Viceroy of Peru, in 1640. This lady, from whom the bark-producing trees derive their botanical name, had been cured by it of a fever contracted in Lima in 1638, and her physician, by whom she was accompanied to Europe, not unnaturally made much of the wonder-working medicine.

But the Jesuits who had settled in Peru were quite aware of its virtues at an earlier date. They were, at all events, the chief agents of its distribution in Europe, the powder obtained from the bark being then generally known as "Jesuits' powder." In Madrid it was called Countess powder, and in Rome Pulvis Patrum. From the latter city it speedily found its way to Brussels and Antwerp, where it was sold for its weight in silver, or about ten times the price of opium. In 1685 twenty doses of the powder were sent from Rome to Paris at a cost of £250, and Cardinal Mazarin recommended its use in a dangerous illness of Louis XIV. That Peruvian bark was administered to the French king is undoubted, but an interesting piece of historical evidence points to a different source as the means of its introduction to that court. In 1679 a well-known London physician named Talbot cured Charles II. of a tertian fever, with the now famous bark, which he regarded in the hands of skilled persons "as a noble and safe remedy for the cure of the nature of the 'elisor' which had been in all good faith compounded for James I. for a similar distemper, the new drug was indeed worthy of admiration. The fame of Charles' physician extended to France and Louis XIV.'s surgeon published an account of Talbot's treatment, which was translated into English, entitled 'Talbot's Wonderful Secret for Curing of Agues and Fevers.'

The prevalence and severity of these diseases, down to the end of the seventeenth century, caused them to be regarded as national scourges for which the "fever bark" was accepted as almost a miraculous power. Nor does this estimate of its powers appear extravagant when the ludicrous and often barbarous nature of the remedies which it gradually superseded are taken into consideration. "Tasters and possets" were the prevailing remedies, but their ingredients were rather suggestive of the contents of a witch's cauldron than of the beneficent applications of later days. Fever was to be cured by music and ague by electricity, while the placing of the fourth book of the Bible under the long-suffering patient's head was supposed to be of magical value in both disorders. Above all, fear was thought to be especially necessary in the treatment of ague, and the description of many of the methods then used seems to have been well calculated to inspire it.

Humboldt doubted whether the curative nature of the bark was originally known to the Peruvians, but the probability seems to be that its qualities were fully understood by the natives long before the Spaniards landed on their shores. There is a tradition that the properties of the bark were first practically realized by a fever-stricken Indian, who, being left behind in the forest by his companions, drank of a stream which flowed through it, and which had been impregnated by the bark of the over-hanging cinchona trees. His cure was so speedy that it was looked upon as miraculous, and the Indians flocked to the stream to partake of its supposed occult virtues. It also asserted that the punas and jaguars of the mountain forests are in the habit of gnawing the cinchona barks as it is known that the instinct of many domestic animals, as probably of all wild ones, leads them to seek particular herbs for medicinal purposes. Moreover, savages of the lowest type resort specifically to various kinds of vegetable "bitters" as a cure for fever and ague.—Chicago Herald.

PUNGENT PARAGRAPHS.

"She—'Riches have wings, they say.' He—'Yes, but it is not until a man loses them that he is said to 'go up.'"—Yonkers Statesman.

"A Friend—'I hear your son is sowing his wild oats.' Mr. Wayback—'Burned if the farmer in him ain't bound to show.'—Detroit Tribune.

"At a juvenile ball,—He (with nascent down on upper lip)—'Have you often wished your son was a man?' She (sweet sixteen)—'Ah, yes; and you?'—Tid-Bits.

"—Judge Guffey—'What passed between yourself and the complainant?' O'Brien—'I think, sir, a half a dozen bricks and a piece of paving stone.'—Raymond's Monthly.

"—Doctor—'Have you followed my advice in regard to eating plain food and keeping quiet at home?' Patient—'That's all I've been able to do since you sent in your bill.'—Yale Record.

"—Teacher—'I've explained to you the nature of a fixed holiday. Now give me an instance of a movable holiday.' Class (omnibus)—'May I—Buffalo Courier.

"—Ragged Richard (famously)—'Say, mister, have yer got enny suggestions ter make ter a feller wat ain't able ter raise er dime ter git shaved with?' Grumble (passing on)—'Yes; raise whiskers.'—Buffalo Courier.

"—Judge—'Was there any particular mark by which you could identify the dog which you say this man stole?' Sam Johnson—'Yes, yer honor; he had a red spot on his nose jess like de one on yer honor's.'—Tid-Bits.

"—Miss Landlady (at the dock)—'I don't see what keeps those funny steamboats from tipping over. Can you explain it?' Kidder—'Er—certainly. It's the big hold each one of them has on the water.'—Buffalo Courier.

"—Mrs. Upton Platte—'My nursemaid left me without a moment's notice. I'm going to advertise for a girl tomorrow.' Flossie—'And please advertise for a boy, too, mamma. We wants a little bruzzer erful.'—Kings Jester.

"—Mistress—'Now, Jane, clear away the breakfast dishes and then look after the children. I'm going around the corner to have address delivered.' Faithful Servant—'Yes, mum. I will up yer hatch box, or shall I wait up yer?'—Town Topics.

"—Little Tommy goes to school now and is getting some new ideas of things. The other day he discovered that his father was wearing a big overshoe to help nurse a sore foot. 'Pa, pa,' he exclaimed, 'one of them feet is spelled wrong.'—Buffalo Express.

"He had looked over the bill of fare without apparently finding anything that suited his taste, and then turning to the waiter he asked: 'Haven't you anything hot?' 'Yesser,' replied the hush slinger, 'What is it?' 'Mustard.'—Buffalo Enquirer.

"—Weary Watkins—'I knowed this Coxey business would fizzle out.' Hungry Higgins—'I don't see how you knowed so much more than anybody else.' Weary Watkins—'W'y, the name of it was enough to hoodoo it. Wot could you expect of anything called a 'movement'? W'y didn't they call it the Coxey 'rest'?—Indianapolis Journal.

FRUIT AS A FOOD.

Urgent Reasons for Simplicity in Diet Among All Classes.

It is a great mistake to regard fruit as a relish and a luxury, instead of a necessary article of food. Bananas, figs, and dates are quite rich in elements of nutrition, while the more plums, grapes and berries contain large percentages of organic acids and salts, which are very essential to the proper nourishment of body and brain. Of our northern fruits, the apple deservedly takes first rank. During the long season which, in this climate, apples are had, they should be placed on the bill of fare at least for one month of the year, preferably raw or baked. It is not objectionable to stew them and serve with a very little sugar, but do not do violence to a fruit so luscious, nor to your digestion so precocious, by disgracing it with heavy sauces, or by adding its sugar and pungent pieces, a killing for the inevitable pie. What a multitude of culinary abominations that small word covers, and for how many ills of the flesh it is commonwealth! Tropical fruits are now abundant in the markets, and at prices so reasonable enough to bring them within the reach of all. Taken in their natural state, there is no danger of eating too many of them.

Among the numerous reasons to be urged for simplicity of diet, the following are the most prominent: It is well known that the rich and poor more nearly on the same level and so save needless heart burnings and rivalries. Emulation would give way to brotherly kindness and love. The money saved to both classes could be thus freed to promote good works in the earth. It would be a great saving of time and labor, and the overworked housekeeper would find half her burdens rolled away, and she could thus minister more perfectly to the higher nature of her household. Women are proverbially the slaves of their own appetite, and that of their families. Simplicity in diet can be a great saving of vital energy, and a sure sign of a strong and a prompt form of health and happiness. The only classes that would suffer by a widespread reform of this nature would be the doctors and druggists, and it is quite probable that the majority of these would find their way into other professions and trades, and the world would be the better for the change.—Helen L. Manning, in Good Health.

The Mother's Tenderness.

"Poor Tommy is in disgrace," said Mrs. Fleg to the friend of the family who had dropped in. "I have just had to give him a whipping. You can see no idea how much I hate to do such a thing. I am so tender-hearted." "Well," said Tommy, "that you was ten-phantied 'stead of tender-hearted."—Chicago Herald.

OUR WASHINGTON LETTER.

(From the Associated Press.)
WASHINGTON, June 1, 1894.

The Democratic Senators already deeply regret having allowed the two newspaper correspondents who declined to tell the sources of the information they published in connection with the sugar trust scandal, to even stand a chance of being indicted by the grand jury. The correspondents would like nothing better than a trial in court, which must follow if they are indicted, as it would enable them to have witnesses called and made to talk who would make it plain that their charges represented only a small part of the crookedness which has been going on among Democrats, and who will never be called by the investigation committee and some of whom would refuse to answer questions for the committee if they were called.

Even with easy methods of the investigation committee, which seems to be largely dependent upon volunteer testimony, the substantial facts in the charges made by the newspaper men have been shown to be true. Notwithstanding the copious explanations with which the admissions were accompanied, there is no getting around the fact that Senator McPherson, of New Jersey, speculated in sugar stock and made money out of it; that the sugar schedule in the present tariff bill was mostly written by Secretary Carlisle. These facts as well as that heavy Democratic influence was brought by agents of the sugar trust to bear on Representative Warner, of New York, to make him stop working to have sugar put on the free list have been testified to by the men named. This week some sensational testimony is expected from the widely advertised wire manufacturer, Senator Hill's resolution for open sessions of the committee has stirred up the Senators, but it is not probable that it will be passed. When the Credit Mobilier scandal was being investigated, more than twenty years ago, the Senate adopted a resolution instructing the committee, which have been working behind closed doors, to conduct the investigation openly, but that is the only similar case known.

Senator Manderson, of Nebraska, while making an earnest speech in favor of the continuation of the sugar bounty of the McKinley law, used language that should be committed to memory by every member of Congress, and which was all the more striking because it followed the ringing apology of Senator Blanchard, of Louisiana, for supporting the Wilson bill in the House with its free sugar clause, and then after getting in the Senate demanding protection for sugar as the price of his vote. Senator Manderson, after expressing the hope that selfish protection sentiment of the Louisiana Senator, which proposes merely to benefit a locality, would one day grow into a sentiment broad enough to favor protection for all industries said: "I vote here, not only for protection on beet sugar and the products of the farm, but I vote for protection to the loom, to the factory, to the foundry, to the lumberman and the miner. I do not represent on this floor simply a part or the whole of the State of Nebraska. I AM A SENATOR OF THE UNITED STATES. And whether I am in the other House as a Representative, or here as a Senator, no pent up Utah like district or like state can contract my legislative powers."

Democrats are pretending to be very much surprised because of ex-Speaker Reed's assertion that silver and the tariff are questions which ought to be settled together, but there is no occasion to be surprised, as the same idea has been advanced by prominent Republicans before now. It is well known that it was entertained by the late James G. Blaine, and that it was included in the results he expected from his reciprocity policy. Senator Lodge in a strong speech against the tariff bill took the ground that the two questions were closely allied, and Senators Cameron and Pettigrew have also referred to the matter in their tariff speeches. So it is nonsense to pretend that Mr. Reed has made a new departure to please anybody. He is traveling in good Republican footsteps, as he usually does.

The Democratic Senators will be on pins and needles until they see the sugar schedule of the tariff bill formally adopted, and in order to hurry up the vote Senator Harris has ordered that the daily sessions be continued into the night. It is probable that a vote will be reached by the middle of the week; also, that the schedule will be adopted, all attempts to make any serious breaks in the Democratic line have failed, although more than half of the Democratic Senators will vote directly against their personal opinions when they support the sugar schedule; but the bargain has been made and the dose will be

swallowed. A report obtained yesterday a day or two ago that Mr. Cleveland was about to publicly repudiate the tariff bargain engineered by Gorman and Bruce, but there was no truth in it, as Mr. Cleveland has been about as deep into the bargaining as either of the Senators.

Notice to Trespassers.
All persons are hereby warned not to trespass upon that part of Military Lot No. 1899, lying on the south side of the B. & O. R. R. at Albemarle, and owned by the undersigned. All persons so caught trespassing will be prosecuted to the fullest extent of the law.
Mrs. MARGARET E. McCORMIE,
H. McCORMIE, Agent.

Property for Sale.
The undersigned offers at private sale his house and lot at east end of Oak street, Oakland, Md. This is a desirable property, and will be sold on reasonable terms. Good well and all necessary outbuildings attached. Call on or address,
THOMAS SAMPFIELD,
13-14
Oakland, Md.

The Butter Was Old.
Strange things happen right at home while we are looking in every direction for novelties. A few days ago a Pittsburg citizen cut into a pound of butter, which he had purchased at a grocery whose proprietor does not advertise, and found therein a small tin box, which contained a piece of paper, bearing the following written in a neat feminine hand:
"I am a girl 18 years old, good looking and an excellent housekeeper. Should this be found by some unmarried Christian gentleman will be please write to the following address, etc."

The finder, being a bachelor, decided to unravel the affair, and succeeded only to destroy the romance. The girl who had written the note had died many years ago, leaving an aged husband and grown family to mourn her.

Notice.
To the farmers of Garrett county. Having occupied the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to
MICHAEL W. DUBST,
7-291,

A Card.
I have resumed the practice of law; office in the Felt Building opposite the postoffice, where I will be pleased to see all my former clients and any others who choose to entrust their legal business to my care.

Will be assisted in all important cases by Benjamin A. Richmond of the Cumberland bar.
FRED. A. THAYER.

Notice to Trespassers.
All persons are hereby notified not to trespass on my land known as "Swanton," by cutting timber, clearing land or by farming of pasturing land that is cleared on my premises, fishing, or in any other way trespassing, as I have instructed my agent to prosecute all trespassers to the fullest extent of the law.
M. M. ARMSTRONG,
CHAS. A. WILT, Agent,
911
Westernport, Md.

Two Lives Saved.
Miss Phoebe Thomas, of Junction City, Ill., was laid by her doctor as lost Consumption and that there was no hope for her, but two bottles of Dr. King's New Discovery completely cured her and she says it saved her life. Mr. Thos. Rogers, 129 Florida St., San Francisco, suffered from a dreadful cold, approaching Consumption, tried without result everything else then bought one bottle of Dr. King's New Discovery and in two weeks was cured. He is naturally thankful, and sends results of which these are samples, that prove the wonderful efficacy of this medicine in Coughs and Colds. Free trial bottles at all Drug Stores. Regular size 50c. and \$1.00.

Dentistry.
Dr. L. L. Ritter, of Frostburg, will be at the Commercial Hotel in Oakland Monday and Tuesday June 11 and 12, prepared to do all classes of dental work. Call early and make engagements. Teeth extracted without pain.

SHERIFF'S SALE.
Under and by virtue of a writ of fieri facias issued out of the Circuit Court for Garrett county, at the suit of Thomas A. Nettlin against Adam S. Sell, the same being No. 7, do hereby sell to satisfy said writ, the undersigned sheriff did seize and take in execution the following described property of the said Adam S. Sell by levy upon the same the 18th day of April, 1894, to wit:—One two horse wagon, one white mare fourteen years old, one bay horse eleven years old, one sorrel mare, one red cow eight years old, one spotted cow seven years old, one bull calf, one heifer, and the following described parcels of land situated about six miles north of Oakland in Garrett county, to wit:—A tract of one half acre, land called "Good Hope" containing one hundred and twenty-six and a half acres, which is described in a deed from F. R. Nettlin and wife, dated the 27th of April, 1892, and duly recorded in Liber E. Z. T. No. 19, folio 46, one of the Land Records of Garrett county. Said parcel of land will be sold subject to a mortgage due F. R. Nettlin, which is now owned in Garrett county, on the premises above described, near the public road leading from Oakland to Snow Hill, the said Sheriff will offer at public auction to the highest bidder on

Saturday, the 23rd day of June, 1894,
at ten o'clock a. m., of said day, to satisfy the above writ execution and costs. Terms of sale cash on the day of sale.
CHARLES WEIMAN,
Sheriff of Garrett County.

SAW MILL AND ENGINES.
The undersigned has for sale a new and complete saw mill and engine, capable of cutting all kinds of lumber, and is for sale at a low price. For particulars apply to
WENCH & DROMGOLD, Manfrs., YORK, PA.

CAUTION.—If a dealer offers W. L. Douglas shoes at a reduced price, or says he has them without name stamped on bottom, put him down as a fraud.

W. L. DOUGLAS \$3 SHOE THE WORLD'S BEST.
W. L. DOUGLAS shoes are stylish, easy fitting, and give better satisfaction at the price advertised than any other make. Try one pair and be convinced. The stamping of W. L. Douglas name and price on the bottom, which guarantees their value, saves thousands of dollars annually to those who wear them. Dealers who push the sale of W. L. Douglas shoes gain customers, which helps to increase the sales on their full line of goods. They can afford to sell at a low price, and we believe you can save money by buying all your footwear of the dealer advertised below. Catalogue free upon application. Address,
W. L. DOUGLAS, Brockton, Mass., sold by D. E. Offutt, Oakland, and Wm. Ryland, Friendsville.

Ripans Tabules relieve nausea.

The Board of County Commissioners were in session this week transacting routine business and auditing the accounts of the road supervisors.

Mrs. Henry Kamp, widow of late Judge Kamp, of Accident, accompanied her sons to Oakland last Sunday and returned home Tuesday morning.

Mr. Geo. W. Clary and family left Oakland last Friday night for Independence, Kansas. Mr. Clary's former residence, where they have gone to reside permanently.

Mr. Ebenezer Kitzmiller, of Blaine, who has been a resident of Garrett county since 1849, was here Monday and Tuesday on business before the County Commissioners.

Mr. J. Z. Browning, of near Deer Park, was in the city Saturday. He reports that the frost did no damage to his crops but that his immediate neighbors suffered some loss.

Brighten the appearance of your cottage by using a few gallons of ready mixed paint which you can buy at the Oakland Pharmacy very cheap. Guaranteed the best quality. 13-3t

I have taken the agency for the Frederick steam laundry. All work guaranteed to give satisfaction. Goods called for and delivered free of charge. J. Ed. Miller, Oakland, Md.

John Shartzler will close out his stock of goods at auction on Saturday, June 16, 1894. A large lot of second-hand furniture will be offered for sale in connection with the dry goods, etc. 13-2t.

Dr. and Mrs. Benjamin Ison and daughter Miss Ella, who spent the winter in Washington with relatives, returned to Oakland for the summer Thursday night. They are occupying their residence on the hill.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

The advance guard of Frey's army passed through Oakland Tuesday evening last and went into camp at the old wooden mill lot on the outskirts of town. The contingent was composed of two wagons and twenty-eight men.

The electric lights at the Park were turned on last Thursday evening, a week later than the time named on account of the non-arrival of the lamps. The construction of the line was superintended by Mr. C. E. Rixford.

The barn on the farm of Mr. Cornelius Friend, son of County Commissioner Ira E. Friend, Esq., was burned with all its contents on Monday night of last week. The structure was a large one and was filled with grain, hay, etc. The origin of the fire is a mystery.

A picnic and dance will be given at McHenry in McLane's grove on July 4. Music will be furnished by the Accident bands and the DeWitt string band. Nothing but temperance drinks allowed on the grounds. Bring your basket and stay all day. By order of COMMITTEE.

Sometime ago I was troubled with an attack of rheumatism. I used Chamberlain's Pain Balm and was completely cured. I have since advised many of my friends and customers to try the remedy and they all speak highly of it. S. W. GOLDEN, San Louis Rey, Cal. For sale by Oakland Druggists.

Mr. Perry H. Rock has purchased the barber shop formerly belonging to Mr. Geo. W. Clary, and will be pleased to see all who may call. Mr. Rock is a first-class barber and does excellent work, and we have no doubt but that he will make a success of the business. He will be assisted in his shop by Mr. George Crim, who is also a good workman.

Garthright has just received the largest and cheapest line of goods ever brought to Garrett county and is selling them at panic prices. The bottom is out of muslin and prints; 25c. satens at 13 cents; lace curtains at 40 cents per pair or 12 1/2 cents per yard; 75 cent shirts at 45 cents; 8 cent muslins at 6 1/2. Come one and all and be convinced. Still taking choice butter and other kinds of produce at highest market prices.

The Proposed New School Building to be Erected at Oakland.

The above cut represents the proposed new school building at Oakland, bids for the construction of which will be open until June 21st, when the contract will be awarded by the Board of County School Commissioners. As soon as the contract is awarded and signed a full description of the building will be published in these columns.

Trinity Reformed church as New Germany has been neatly repaired and painted and will be reopened Sunday, June 24th, at 10.30 a. m. Rev. J. M. Evans, former pastor, is expected to be with us at that time. All are cordially invited to be present on this occasion.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

While at Peekskill, N. Y., Mr. J. A. Scriven, a prominent manufacturer of New York City, purchased a bottle of Chamberlain's Cough Remedy. Such good results were obtained from its use that he sent back to the druggist from whom he had obtained it for two more bottles of the same remedy. When you have a cough or cold give this prescription a trial and like Mr. Scriven you will want it when again in need of such a medicine. It is a remedy of great worth and merit. 25 and 50 cent bottles for sale by Oakland Druggists.

While in Topeka last March, E. T. Barber, a prominent newspaper man of La Cygne, Kan., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life. Every family should keep this remedy in their homes at all times. No one can tell how soon it may be needed. It costs but a trifle and may be the means of saving much suffering and perhaps the life of some member of the family. 25 and 50 cent bottles for sale by Oakland Druggists.

I have two little grand children who are teething this hot summer weather and are troubled with bowel complaint. I gave them Chamberlain's Colic, Cholera and Diarrhoea Remedy and it acts like a charm. I earnestly recommend it for children with bowel troubles. I was myself taken with a severe attack of bloody flux, with cramps and pains in my stomach, one-third of a bottle of this remedy cured me. Within twenty four hours I was out of bed and doing my house work. Mrs. W. L. DUNAGAN, Ban-aqua, Hickman Co., Tenn. For sale by Oakland Druggists.

Notice to Trespassers. All persons are hereby notified not to trespass on my land known as "Swanton," by cutting timber, clearing land or by farming or pasturing land that is cleared on my premises, fishing, or in any other way trespassing, as I have instructed my agent to prosecute all trespassers to the fullest extent of the law. M. M. ARMSTRONG.

CHAS. A. WILT, Agent, 9tf Westernport, Md.

For Sale Cheap. The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre. FRED. A. THAYER.

Office in Felty Building opposite post office.

A Card. I have resumed the practice of law; office in the Felty Building opposite the postoffice, where I will be pleased to see all my former clients and any others who choose to entrust their legal business to my care.

Will be assisted in all important cases by Benjamin A. Richmond of the Cumberland bar. FRED. A. THAYER.

Married. J. S. Meyers, Esq., then delivered an introductory address on the church of the future. A number of addresses and dialogues then followed showing the spirit and qualities of the coming and the conquering church. The exercises from beginning to end were very interesting, and the young people who took part in them acquitted themselves splendidly.

The Terra Alta Band Concert. Tuesday evening the Terra Alta Cornet Band gave a concert in Offutt's Hall for the benefit of Smith's Military Band of Oakland. The affair was not a brilliant success, either financially or dramatically. The band, under the leadership of Prof. C. H. Austin, played several selections on the street before the performance began. Our boys were also out and rendered some of their fine pieces. The people were somewhat disappointed in a number of the performances, although some of them were very well rendered. Among those worthy of note were vocal solos by Mrs. Elliott and Mrs. G. A. Bolden, and a cornet solo by Mr. Frank Zeller. The band music on the program was very good, although the selections were not altogether suited for indoors, they being too loud and noisy. We might also add here that their band conductor made rather too much display of his muscular powers to suit the fastidious. It has always been our custom to see the curtain dropped between acts, especially when the stage had to be cleared for the next performance, but this was not the case at this entertainment, and every man would gather up his music, instrument, music holder and chair and get off the stage with these in as graceful a manner as possible. And also it is usually the custom for the actors who do not have any part in a particular act to stay behind the scenes while that act is being performed, but then we suppose those who continually looked out had a strong desire to see how the performance was progressing or else there was some great attraction in the audience.

New Money Order System. Everybody who sends or receives cash through Uncle Sam's mail will be interested to know that on the 1st of July next a new money order system will go into effect by which both large and small sums can be readily transmitted by letter with absolute safety and at rates much less than the present. With the issuance of the new money order, the postal note will be abolished since there will no longer be any need of it. The form of the new order is both artistic and beautiful, and, without of convenient size for handling. The schedule of fees is as follows: For \$2.50 or less, three cents; \$2.50 to \$5, five cents; \$5 to \$10, eight cents; \$10 to \$20, ten cents; \$20 to \$30, twelve cents; \$30 to \$50, eighteen cents; \$50 to \$75, twenty-five cents; \$75 to \$100, thirty cents.

Children's Day. Children's day was observed by the congregation of St. Paul's M. E. church Sunday morning. The church was handsomely decorated with beautiful flowers and evergreens for the occasion. An elaborate program of music, dialogues

and declamations had been prepared which was rendered in excellent style. The church was packed to its utmost capacity. The celebration was a magnificent success and reflected great credit upon the pastor, Rev. G. W. Kepler, and his co-workers among the children.

The observance of children's day was explained by the pastor as an annual festival, the principal object of which is a collection for the educational interests of the church. The choir rendered old coronation in splendid style, after which responsive readings were conducted by F. A. Thayer, Esq., vice superintendent of the Sunday school. The opening prayer was made by Rev. Benjamin Ison, D. D. A very impressive part of the exercises was the administration of the ordinance of baptism to Susie Shirer, infant daughter of S. E. and M. Shirer, by Rev. Kepler assisted by Rev. J. M. Davis.

J. S. Meyers, Esq., then delivered an introductory address on the church of the future.

A number of addresses and dialogues then followed showing the spirit and qualities of the coming and the conquering church. The exercises from beginning to end were very interesting, and the young people who took part in them acquitted themselves splendidly.

THE RAMBLER.

He Writes on Subjects of Local Interest and History.

To the Editor of The Republican.

To judge by the number of people coming to Oakland from the different cities of the Nation so early in the season and see the smiling faces of the hotel keepers I am led to believe that Oakland is regaining her old-time popularity as a summer resort and that before many years shall have gone by she will again be known as the "Queen Summer Resort of the Alleghenies." For this I am truly glad and I know that there are many people in Oakland who are equally pleased.

One day last week I was standing in a store in Oakland when two old soldiers met, one who wore the blue and the other the gray. They both walked with the aid of crutches and this is the way they saluted: "Where did you lose your leg?" asked by the one who wore the blue. "At the battle of Winchester," answered the ex-Confederate. They then fell to conversing and talked of the battles they had been in, their capture, etc. By the way they were both brave staff officers, the one under Early and the other under Grant.

I heard the other day that some one had threatened me with all sorts of punishment for something that appeared in my letter last week. I did not intend to make enemies but a letter addressed care of THE REPUBLICAN office will reach me and perhaps I can manage to fix things up and save gore.

I was in the School Commissioners office on last Saturday looking over the plans for the new school building which is to be erected in Oakland this summer. I think the board has made a wise selection in adopting the plans they did and when the building is completed it will not only be a credit to Oakland but to the whole county. In speaking of the probable lowest bidder, should he not live in Oakland, Mr. Hinebaugh stated that in the contract a clause would be inserted compelling the employment of home mechanics and labor. This is a good thing and will keep the money laid out for labor right at home. The sanitary plans adopted for the proposed building are perfect being the Smead system of heating and ventilating.

My suggestion last week regarding the formation of a bicycle club in Oakland seems to have taken root for already I have heard some of the wheelers discussing what color uniforms they adopt. Blue is pretty, gray is nice and black is becoming to all.

The demolition of the old building at the corner of Oak and Second streets removes one of the first structures ever erected in Oakland. In this building nearly every kind of business with varied success has been carried on. Here it was that the first and probably the only murder committee in Oakland was enacted. The man killed there was Dr. Conn, the first practicing physician to locate here. It was supposed that a man named Johnson fired the shot, who was tried but acquitted by a jury in Hagerstown, where the case was heard.

THE RAMBLER.

Why Pay More When You Can Get Them For Less?

Look at These Prices:

25 lbs. granulated sugar, \$1.00; all package coffee, 25c; Mocha and Java coffee, 35c; good green or black tea, 25c; Baker's chocolate, 45c; per pound; Baker's cocoa, 45c; Van Houten's cocoa, 50c; California prunes 12c; evaporated peaches, 15c; 4 lbs. choice raisins, 25c; 5 lbs. c. Joe currants, 25c; Lenox soap, 4 cents per bar; 2 cans choice pie peaches, 25c; 3 cans choice table peaches, 30c; 3 cans corn, 25c; 3 cans beans, 25c; 3 cans tomatoes, 25c; early June peas, 11c; per can; French peas, 20c; per can; fine baking powder, 30c; per pound, guaranteed to be as good as Royal.

A LITTLE POST GIRL.

The Trouble a Love Letter Made for Her.

One rainy Saturday morning in the early spring two wagons drew up, almost at the same time, before the post office at Denville, and out of each clambered a little girl. The ground was "breaking up" after a long, severe winter, and as a warm rain had been falling for several days, the roads were almost impassable, so that the two children had to wade through the deep mud before they met at the door. The younger entered first, and, running forward, exclaimed:

"There's a letter in Miss Dorian's box!"

"Yes; but you know very well, May West, that mail Saturdays," answered the other.

"Well, I'm going to take it this Saturday; for it's so bad out, teacher will never come down to-day, and I'll give it to her the first thing Monday," May declared.

Her feelings may be better understood when it is explained that these two girls took turns on school days in going for Miss Dorian's mail. At the beginning of the fall term there had been some rivalry in the district school as to who should take the post office at noon recess for the new teacher, who seemed eager to get her letters. The honor had at last, by common consent, been yielded to May and Anna, and these two girls had fairly earned the right by their devotion and zeal, which took them on their errand in the face of bitter cold or driving rain, and despite any game, however delectable, the other children might be enjoying in the playground.

Had the post office not been quite out of her way as, three with the day's teaching, Miss Dorian walked up the long hill to her boarding place, she would doubtless have called for her own mail, for she felt that neither of her young messengers could know how precious to her were many of the letters they brought. What all the children did know was that their teacher was going to marry Mr. Allen, the young man who came out from New York to see her and who sometimes came to the school, and Anna at least was old enough to guess that the handwriting she saw so frequently on Miss Dorian's envelope was his. Seven-year-old May only knew that she would rather suffer almost any misfortune than lose one of the teacher's letters, and was more proud of her trust than anyone could imagine. Yet Anna, who was several years older, and who said that Miss Dorian would be sorry some day she had permitted such a baby to fetch her mail.

Until the morning that Anna and May met in the post office, however, all went well. Then it did not occur to either of the girls that Miss Dorian might be expecting the very letter they were discussing, and they did not know that in a letter May had handed her teacher a few days before Mr. Allen had written:

"If you don't hear from me Friday, go to the post office Saturday morning ready to take the post-train. You will find a note telling you where to meet me."

On eyes, and perhaps she could not help feeling provoked at the child who had caused her so much trouble. At all events she followed May into the ante-room and said to her, in a voice which sounded unlike her own: "You may leave my mail alone after this. You should have known better than to take it on Saturday." Then, relenting as she looked at the pale, grief-stricken face, she added, more gently: "You are too young, anyway. I know you didn't mean any harm, but—it made such a difference."

Miss Dorian opened the letter, and as she read tears came into her eyes and dropped on its pages. It told her, of course, when and where Mr. Allen had wished her to meet him on Saturday.

"He's gone, and he'll wonder why I didn't come," she said to herself. May watched her in silence. When the teacher told her that she could not get the mail any more she felt that nothing worse could happen—the pride of her life was gone; but the words, "You are too young, anyway," added a sting which was sharper at the thought of Anna. And now Miss Dorian was crying! It was more than May could bear to see. Quietly she went back to the schoolroom and sat down in her place. The children looked at her and whispered to each other. And Anna—I shall not try to give words to the passion of resentment against Anna which added to poor May's misery. But she did not cry. The teacher's tears seemed to have avelled hers away. Something dreadful must have happened because she took the letter if she could only run away somewhere, was her thought.

Just as the clock struck the noon hour there was a step outside the door and some one entered. Miss Dorian started and gave a little cry as Mr. Allen walked quickly through the room and came to her. May heard the teacher say: "I never got the letter until this morning," but she did not hear Mr. Allen answer: "It is just as well, for you would have had your trip for nothing." If she had heard it might have made no difference; for when May saw Mr. Allen come in, an unreasoning fright took possession of her. He seemed to have appeared as an awful judge coming to avenge some dreadful thing which she had done, and her only thought was flight. Miss Dorian's words, "I never got the letter until this morning," confirmed her fears that they were talking about her.

As some of the children were going out to play May left the room unobserved. If she had glanced back she would have seen that the teacher and her friend were laughing together and seemed very happy, or if they had noticed the little girl going away Miss Dorian would certainly have called her back to make sure she grieved no more over the letter. Indeed, it was hardly five minutes after May had disappeared that Miss Dorian said: "The poor little thing felt badly, and I fear I was harsh with her because I felt so badly. I shall ask her to forgive me and to go for my mail now, to show her I do trust her as much as ever."

But May was gone, and when Anna came up and said, very pleasantly: "I am going for your letters now, Miss Dorian," the teacher answered: "No, Anna, please do not trouble yourself," so coldly that Mr. Allen looked at her in surprise.

When May did not return to school for the afternoon session the teacher felt somewhat uneasy, and wished to send to the child's home to see if she was there; but Mr. Allen said: "Oh, don't worry. She just ran home because she didn't like to see me after I got her into trouble. We'll call on her after school and make friends."

But when Miss Dorian and Mr. Allen went to May's house they found that the little girl had not been there since she started for school in the morning. Then the teacher went in to stay with the now distracted mother, while Mr. Allen hurried away to tell Mr. West, who was plowing in a field near the house, of his daughter's disappearance. While her friends were thus looking for her and distressing themselves beyond measure with vague fears of harm and danger, foolish, frightened May was finding out what the world was like away from home. When, without being noticed by anyone, she had slipped out of the yard at recess and run down the road a fear lest some one in the village should detain or take her home had turned her aside into fields and led out at last into a lonely, unfamiliar road. Hardly noticing her surroundings May trudged on, often nearly mired in some muddy places, often stopping to rest, until after two or three hours' wandering, she found herself at a railroad track. A little farther on was a small station with a few houses clustered around, and May, beginning to feel lonely, perhaps, went on toward the little depot. A train was just drawing in as she reached the platform, and several people came out of the waiting-room. Here was just what was needed—a train to take her far away. With the other passengers she mounted the steps and took a seat; and as she sped into an unknown country the heart of our little traveler gave a leap of unguessed excitement and joy.

"Where are you going, my dear?" the conductor asked, when these thoughts had silenced her. May noticed that some passengers who sat near her were looking at her curiously, and with a decided air she answered: "To Fairtown." It was the only name she could think of at the moment; her father had driven her there one day when he went on business.

It was not hard, now for the conductor to guess that his young passenger was a runaway, and, sitting down beside May, he leaned near and said, coaxingly: "This train does not go to Fairtown. I have a little girl at home myself; tell me where you live and what your name is, my dear." But May only shook her head and would not answer him. Her first impulse had been to tell her kind questioner all about it, but the sudden thought: "He'll send me home if I do," closed her lips. She was not ready to go home yet, though she began to long sadly for her mother. The conductor had no time to spare and he was anxious to leave the child as near her home as possible, so he decided quickly what to do. Rising to leave he said, in a low voice: "The station master at our next stopping place is a friend of mine. He's a very nice man. He has some little girls too. I'll just leave you with him until you can decide about going home; then he will see to it that you get home safely."

When the train drew into the next station May felt glad to leave the people on the car who seemed to be looking at her and talking about her. She heard an old lady just opposite say to a companion: "I'm going over to talk to that poor little girl." But just then the conductor came up and held out his hand, so May took it willingly and followed him almost at a run, as he hastily led her out of the car and through the station into a little room where the ticket man sat. "It's a runaway girl," the conductor whispered to his friend. "Got on next station down. Find out name and address and telegraph her people—I'll be all right."

"Well, I declare," the ticket man exclaimed, shutting his mouth suddenly. May felt sorry for him and a little embarrassed.

"It's only just me," she remarked, soothingly.

"Oh, it is, is it?" he said, drawing a comical sigh of relief. "And who are you?"

May looked at him appealingly. "I can't tell you that," she answered.

"Well, where are you bound for, little one?"

The ticket man seemed to feel more at home with her now, and, after a moment's thought, he said, sedately: "Oh, I'm just traveling a little."

Her new friend looked at her thoughtfully, and his next question was quite unexpected: "Where's your mother?"

The little girl's eyes dropped and her lips quivered as she said: "She's—she's at home."

"She'll miss you, I guess," the ticket man suggested. May was quite silent, but big drops were gathering under her lashes and splashed down on her clasped hands quick and fast.

"Don't cry," the ticket man said, "I've time for you to go to bed this evening, and your mamma goes up to your room and looks at your bed and wonders where you are, and begins to cry."

But May interrupted him. "I want my mamma—I want my mamma," she sobbed.

The station master looked very much relieved. "There, there," he said, to be sure you do, and you'll have her in a jiffy, too. Just tell me your name now, and where you live."

"My name is May West, and I live in Denville," the little girl answered between her sobs. "What a relief it was to tell him and to give up running away!" She did not know how the ticket man would get her mamma, but she was sure he would. She watched him play with his fingers on a little machine which made queer noises like a great clock ticking very loud.

"About an hour later she was awakened by a sound of voices, and soon which seemed to know, was saying: "Yes, when I got your telegram there was just time to catch the next train." She opened her eyes and saw her father. He was talking to the ticket man, but was leaning over her with a look in his eyes which made the little runaway stretch out her arms without a thought of fear, although she had given all this trouble.

While May was being borne back to her friends, Miss Dorian and Mr. Allen were with Mrs. West waiting to see her. When the little girl got home she felt so tired and sleepy that it was all she could do to get into bed. "What is it, dear?" asked Miss Dorian, as May whispered her name.

"Can I ever get your letters again, sometime?"

"You can always get them, if you like," was the answer, given with a kiss. May thought a moment, and then, lifting her face with a happy smile, said: "I'm afraid Anna would feel bad. We'll just take turns the way we used to." And so they did.

Victoria Y. Reunitt, in N. Y. Independent.

AN EMPEROR'S HUMILITY.

Ceremony of Feet Washing as Conducted by Francis Joseph.

An interesting ceremonial is that conducted by the emperor of Austria on Holy Thursday, in the ceremonial hall of the palace, and thus described by a correspondent: At ten o'clock the doors are closed to invited guests. Then enter, one after another, groups of high functionaries, among them the chaplain of the court, in splendid vestments, whose duty it is to read the appropriate passages from the Scriptures during the ceremony. Altar boys, bearing lighted candles, stand on either side of the reading desk arranged at one end of the hall. Colonels and captains, high and mighty by right on lesser occasions, are made to stand back and in line on this for-to-day only those of higher grade are to do duty.

Then hobble in the twelve old men. Such another group of the "clean and shaven" it would be hard to find. They have been chosen in part from among the almshouse folk according to their age as well as worthiness. The oldest to-day was 101 years of age, and all looked pathetically worthy. The standards aided each old man to his place at the table, and had a personal care of him throughout. The aged men were dressed in the garb of Spanish pilgrims—black robe, leather girdle, black hat and sandals, soft felt flat hats, the brim widest in front and behind these also black, and broad white plaited collars.

Next enter the twelve archbishops chosen to assist in the ceremony.

Lastly we see enter a quiet, gray-haired man in the sixties. He wears the uniform of general. He is simple and modest in his bearing and action. It is Francis Joseph, emperor of Austria, king of Bohemia, and Apostolic King of Hungary.

Since the days when Christ washed the feet of the disciples, the popes have sometimes imitated the Master. The emperor has observed the custom. He enters and takes his position on the platform at the upper end of the table. Directly enter the twelve men of his body-guard, magnificent men in scarlet and gold, each bearing a tray on which are various dishes of food. They halt and turn about, each man facing one of the twelve, but remain at the foot of the raised dais. The emperor takes the dishes from each tray and places them before the guests at the table. The guards retire with empty trays. Then the twelve archbishops advance, mount the platform and stand in line close to the table, an archbishop facing each old man. They remain there but a moment before up steps the body-guard with empty trays, each one holding behind an archbishop, who then removes the dishes from the table to the tray, when off marches the guard in swift military step to the ante-chamber. The archbishops then step back to their places. Shortly in comes the guard with trays bearing the second course. Again the emperor, with his own hands places the food before his venerable guests, again the archbishops appear, standing for a moment as if about to serve; again steps up the guard, off goes the second course, and so it goes through four courses.

Meanwhile the twelve old people only look at the incoming and swiftly vanishing goodies during the time the ceremony passes. But it is comforting to know that as a reward for what must from the nature of the case be a most tantalizing ordeal of the most appetizing dishes that we see so pompously brought in only to disappear are really sent to the almshouse after the ceremonial.

The next event is the appearance of a tray on which are a vase and bowl, all of gold, borne by a dignitary, and other following with a variety of napkins of finest damask. The chaplain at this moment begins intoning: "Verily, I say unto you, the master is not greater than the servant," etc. Others pour water over the feet of the old men, the large golden bowl placed underneath to receive the water, and the emperor, kneeling, wipes with a napkin the feet of each of the twelve in turn.

This ceremony ended, the brother of the emperor brings a tray containing twelve pairs of white leather, suspended on gilt chains, each containing thirty-two pieces of silver. These are placed on the table, and the emperor, placing one of them on the neck of each old man, and thus closes the ceremony of the "Fusswaschung."—N. Y. World.

What Women's Extravagance Does.

It is always amusing to hear men complain of the extravagance of women, when, if it were not for this so-called extravagance, manufacturers, jewelers, merchants, importers, dressmakers, furriers and milliners would have to go out of business, says the Boston Beacon.

It takes an army of trained artisans to get one great lady ready for a ball. When she is dressed from the tip of her hair to the tip of her toes, she is the product of a dozen artistic trades, and represents some of the mightiest interests in commerce. It was the demand of the fine things of all women's adorning, as well as the sacrifice of one woman's ornaments that led to the discovery of the only extravagance in dress is the new extravagance when women spend for their dress out of proportion to their own or their husband's incomes. The woman of wealth ought to spend of her abundance in every direction. Comparatively speaking, the poor are a great deal more extravagant than the rich.—Boston Herald.

Her Needs.

A young and very aspiring girl was speaking of her literary attempts to an older writer. She was especially anxious to know what color of ink she should use, and whether to write on ruled or unruled paper. After these points were settled she drew a sigh of satisfaction. "Now," she said, "I feel sure I can do something. The only hard thing," she continued, innocently, "is something to write about. If I only had something to say, I'm sure I could write perfectly well."—Youth's Companion.

The Parsees taught that there were two Isms, male and female, who presided over marriage.

SCIENCE AND INDUSTRY.

Great Britain exports every year about £110,000,000 of textiles fabrics, £100,000,000 of metals, £11,000,000 of clothing and £8,000,000 of chemicals.

Russia exports wheat, cattle, hides, wool, gold, iron, copper, lumber and platinum, and manufactures enormous quantities of alcohol and sugar.

The Cape of Good Hope raises wheat, oats, Indian corn, rye and barley. It also makes 4,000,000 gallons of wine every year and 2,000,000 of brandy.

Foods and frogs carry a supply of water about with them in a sac provided for the purpose. If, by accident, the supply becomes exhausted, the animal dies.

The strongest timber known is the "Bilian" or Borneo ironwood, whose breaking strain is one and fifty-two hundredths times greater than that of English oak. By long exposure it becomes of ebony blackness and immensely hard.

Farmers in Tasmania and Eastern Australia frequently turn up with a plow a substance that resembles a potato, but is, in reality, a species of polypus, found in the soil. It is called the Tuckahoe or Indian bread found in the United States, but, unlike its American congener, has no value as food, being insipid and indigestible.

Good pencil cedar is getting so scarce that the great firm of Faber & Co. have begun to cultivate forests of cedar in Germany. At Schloss Stein there is a cedar forest which covers thirteen acres, and the head of the firm has for many years maintained nurseries and plantations of cedars on its land in Bavaria, growing from seed which he imported from Florida.

Mr. H. H. Dixon has been studying the locomotion of insects and spiders by means of instantaneous photographs. He finds, says Nature, that the limbs move together in diagonals. In insects the first and third legs on one side move with the second on the other, the middle moving with the first leg on the same side. In the case of spiders, which have eight legs, the first and third on one side move with the second and fourth on the other.

Murray (Challenger expedition) states the greatest depth of the Atlantic ocean as 27,200 feet; Pacific ocean, thirty thousand feet; Indian ocean, 18,282 feet; Southern ocean, 25,200 feet; Arctic ocean, nine thousand feet. The Atlantic ocean has an area in square miles of 34,536,000; Pacific ocean, 50,269,000; Indian ocean, 17,084,000; Arctic ocean, 4,410,000; Southern ocean, 50,269,000. The highest mountain is believed to be Doodhanga, one of the Himalayas, 29,002 feet.

M. F. Walter has found that an alloy consisting of ninety-five parts of tin and five parts of copper adheres so tenaciously to glass that it can be employed as a solder to join the ends of glass tubes. It is obtained by adding the copper to the tin previously melted, agitating with a wooden stirrer, casting or granulating, and then re-melting. It melts at about 300 degrees C. By adding from half to one per cent. of iron or zinc, the alloy may be rendered either softer or harder, or more or less easily fusible. It may also be used for silvering metals or metallic thread.—Review Scientific.

Celloidin is prepared from dry gun in the best possible quantity of alcohol. As a layer is placed on layer of the gun cotton the solution is sprinkled upon it until finally it sinks into transparent lumps. These are first worked between cold iron rollers, and then rollers heated by steam, forming layers that are finally subjected to hydraulic pressure. After thorough drying of the resulting plates they are molded while warm, and turned into any desired form. The imitation of amber, coral and the like is accomplished by coloring the lumps with various colors, together in the proportions and patterns desired. Non-combustible celloidin has not yet been made.

DRESS OF THE PARSEES.

It is Symbolical of the Mysteries of Their Religion.

The entire costume of the Parsee symbolizes the mysteries of religion. The gauze shirt, bound with the sacred cord of Kusti, must be woven with twenty-two threads to represent the chapters of the "Zastani," and the twelve knots of the heavy tassel signify the twelve months of the year and represent the perpetual obligation of sacred duties. The embroidery of the sloping black lints carries out a further decimal signification, and in the white head-bands of the women warp and wool form an elaborate cryptograph of Zoroastrian theology. Even the mode of wearing the silken saris of pink, primrose, azure and green is prescribed by ritual law, though the linen head-band gets pushed further back, and the floating folds of the brilliant veil occasionally combine coquetry with orthodoxy. A solitary instance recurs to memory of a fuzzy fringe framed by head-band and sari, and contrasting strangely with the Asiatic face and beautiful historic dress of the wearer; but the Parsee beauty rarely ventures on such a decided protest against the tyranny of custom and creed.

The possession of unlimited wealth enables the Parsees of Bombay to exercise important control over the fortunes of the city, and rows of splendid mansions in the suburb of Parel show the status of the colony which identifies itself with western progress while retaining original character and ancient faith.—All the Year Round.

Period of Incubation in Snake Eggs.

The ophiologists mention but two instances of a python laying her eggs while in captivity—that at the Paris Zoological Gardens in 1841 and the case of Dr. Knox's pet at Danbury, Conn., in July of last year. The eggs in each case were something like forty in number, spheroid in shape, six inches in diameter, and of an ashy gray color. It takes the hatching python almost two months to hatch her eggs. In the Paris instance cited, eggs deposited on May 5 did not produce live young until July 2.—St. Louis Republic.

THE BOUNDARY.
The Story of the Great Boundary Dispute Continued.
T. Jay in Underfoot News.

MITCHELL'S MAP.
This map was undertaken with the approval and at the request of the Lord's commissioners for trade and plantations, and is chiefly composed from draughts, charts and actual surveys of different parts of his majesty's colonies and plantations in America, a great part of which has lately been taken by their Lordship's orders and transmitted to this office by the governor of said colonies and others. This map was first drawn in 1750, and again corrected and improved before it was published in 1755, as appears by the extended note endorsed on the face of said map, and the maker of it says:

"I have since taken care to procure all the information I could get in order to render it as accurate and useful as possible, which has given occasion to the second edition of it, in which I have likewise inserted all the observations I believe we have for the geography of North America, since I find them grossly misrepresented by others."

Here there is a map made at the request and with the approbation of the department of the government that had the special charge of and jurisdiction over all matters relating to the colonies, and it was made up from official documents, maps, charts, in said office, and was evidently constructed with great care and accuracy.

This map clearly shows the boundary line between Maryland and Virginia on the left or northern bank of the Potomac river.

But again, if the charter of Maryland is not to be interpreted by the obvious intent and understanding of the king at the time it was granted, as shown above, but in the light of facts that have since been discovered, and by the real topography of the country, then the said State of West Virginia avers that application of the language of said charter to the facts relating to the head spring of the Potomac river, requires that the line along said river shall be placed on the left or northern bank.

Lieut. Michler in his report says: Within 4,132 feet north of the Fairfax stone the line crosses the North Branch of the Potomac, the stream making a bend to the west and north from the springs before assuming its general course toward the east. It has a narrow sheet of water there, twenty feet from bank to bank, running through lowland swamps. The line thenceforth drawn from the Pennsylvania line south toward the Fairfax stone to the further bank of the said river would cross the river before it reached said stone, and the further bank would be that bank which becomes the northern bank after the river assumes its general course toward the east.

The rights of Lord Baltimore and of the Virginia colony were very materially changed by the Revolution of 1647 in England. The colony of Virginia, and especially some of the citizens who claimed rights on the eastern shore, among them, William Claiborne, had vigorously contested Lord Baltimore's charter and his rights under it, from the time it was granted, and in the midst of these controversies came the revolution of 1647, in Great Britain. Charles I. was beheaded January 30th, 1649. The commonwealth in England, commenced from that period and continued, under different modifications, until the restoration of Charles II, in 1660. Oliver Cromwell was declared protector, January 9, 1654, and died on the 13th of September 1658. He was succeeded by his son, Richard Cromwell, but he abdicated in 1659. Sir William Berkeley, the governor of Virginia, and the council and burgess were loyal to Charles II. On the deposition of the monarchy in England doubts existed in America whether the powers of the governor and council and the other officers of the colonial government, deriving their appointment from them, were not extinct. This gave rise to one of the provisions of the first act of the Grand Assembly held at James City on the 10th of October, 1649, which made it highly penal to maintain such doubts, and declared all defenders of the execution of Charles I. accessories of the death of the king after the fact, and to doubt the right of succession of Charles II. was made high treason, and it was equally treasonable to propose a change of government or to doubt the powers of the governor and government of Virginia.

In 1651 the Parliament sent over commissioners to reduce all the plantations within the bay of Chesapeake, to the due obedience to the Parliament and Commonwealth of England. These commissioners were the same William Claiborne, who had been in constant controversy with Lord Baltimore, together with Richard Bennett and Edward Curtis. The Virginia authorities

surrendered to these commissioners promptly.

Thus it may well be claimed that the colony of Maryland became an imperial colony by the treaty with the commonwealth of England, and that treaty was never modified or disturbed by any absolute act of Oliver Cromwell. Maryland and Virginia both became imperial provinces of the commonwealth of England and were both within the prerogative of imperial grant.

Meantime the grant of the Northern Neck of Virginia had been made to Lord Hopton and others, which was afterwards confirmed in 1667, by which the river Potomac was granted to these patentees. Lord Baltimore was deprived of his proprietary rights for 11 years or more under the commonwealth and Cromwell, and again by the King from 1690 to 1715. It was not until 1715 that he was restored to his lieutenantancy by King George I. He was restored to his proprietaryship of Maryland. But during the time of his deposition his territory had been reduced on all sides. By the degree establishing the southern Pennsylvania border far south of the 40th parallel and by establishment of the boundaries of the Delaware territory, which had been granted to the Duke of York—and so if the Potomac river had been originally included in the limits of this charter, it was taken away by the grant to Lord Hopton and others, which had been subsequently confirmed by Charles II upon his restoration to the throne of England.

Lord Baltimore never regained the territory taken by Pennsylvania from his northern boundary, nor did he ever gain the territory of Delaware, and it is submitted that Lord Hopton's grant of the Potomac river and the settlement with the Parliamentary Commissioners by which the ancient limits of Virginia were restored, had the effect to deprive him as effectually of that river, if indeed it ever belonged to him, as had the means by which he was deprived of the territory acquired from his dominions by Pennsylvania and Delaware. Furthermore the State of West Virginia claims that the king of Great Britain and his council had absolute authority and control over the American colonies, before the American revolution and could change their limits and jurisdiction at his royal pleasure, and that therefore it was entirely within the power of King Charles II to grant the Potomac river to Lord Hopton and others when he did, although it may have been embraced within the limits of the charter previously granted to Lord Baltimore. Wherefore the State of West Virginia claims and insists that the boundary line between her and the State of Maryland is the line of low water mark on the north bank of the Potomac river from the division line between Virginia and West Virginia to the head spring of the North Branch of the Potomac river at the said Fairfax stone by the course of the line run by Francis Deakins in 1788 to the Pennsylvania line.

Selby's report.
We have been having more than our share of rain the past month. We had heavy frosts May 30th, June 7th and 8th, which killed nearly all the vegetables in many of the gardens and in some cases cleaned up whole corn fields. H. M. Frazee is hauling walnut logs to the station to be shipped to Friendsville where they will be sawed to order for Cox & Sipe, of Connelville, who bought them. Our village was enlivened somewhat on Saturday evening by Dutch and Stephen engaging in a rough and tumble fight. Stephen is a large man but he got his foot in it when he tackled Dutch, for he was done up in great shape. Mr. and Mrs. J. Z. Browning, of Deer Park, were visiting at Mr. Jonas Frazee's last week. Mr. W. Lee Coddington, of Friendsville, is again on the road representing a Baltimore boot and shoe firm. Success to Lee. On last Thursday it was reported that an old couple was coming to our village to get married and would put up at the Hotel Diamond. Quite a crowd of our curious young people gathered at the hotel to see the old folks and witness the ceremony if possible, but were disappointed as the proprietor would not allow them in and would not say whether they were married. The parties were Mr. John Barnes and Mrs. Sarah A. Friend, of Deer Park, Md. There is one thing certain, if they were not married they can beat the young people at love making all hollow, even if their ages do run in the seventies and eighties.

We were sorry to hear of our sheriff being locked up but if he fails to live up to the law he must take his medicine along with the rest of the unruly.

We have been told by Democrats that the McKinley law was making the rich richer and the poor poorer.

Now, what is the Wilson bill doing? Making both classes poorer isn't it? Oh, no; we will have no strikes if the Democrats once get in power. The present strikes in coal fields have not only shut down the mines but five per cent. of the manufacturers in the United States and the strike at Washington has shut down the other ninety-five per cent. They have also said only give us a chance at the trusts and we will smash them beyond repair. For several months they have been in a position to smash the Democratic sugar trust, which contributes an immense sum of money to the Democratic campaign fund. In that time the market value of sugar certificates has increased \$30 a share or more than \$10,000,000 in all. This is the kind of a bold smasher of trusts the Democratic party is.

We noticed an article in a New York paper that read as follows: "Lost, strayed or stolen, the fundamental principles of the Democratic party. Last seen of it was at Chicago, June 22, 1892. They could hardly have been sold for anything. That same party in their platform on the above date said: 'We denounce a policy which fosters no industry so much as it does the sheriff.' Now in 1894 by their performances at Washington they practice a policy which fosters no industry so much as it does that of the sheriff, for the sheriffs have broken all previous records in the way of sales in the past year and still getting worse, but we will try to bear with it for awhile and after '96 nothing will be left of the Democratic party but a naked name to remind us of this administration."

J. G. Hartman, of Fairchance, Pa., is among our business men. Mr. H. expects to locate here soon. S. P. Lowdermilk is reported to be on the sick list. Mrs. Sallie Frazee, of Frazee Ridge, died suddenly on the evening of the 10th. She is supposed to have been paralyzed. We note that some Pennsylvania capitalists are coming in our district buying more farms. Messrs. Daniel and Jasper Augustine, of Addison, Pa., are the only cattle buyers this spring. We what has become of our dear old uncle Joe the Democrat. His smiling face has not been on our streets for months. We begin to think he is like the balance of the Democrats. Wait and join us next time, and all will come right.

Our fleecy grown Democrats say they have done nothing to help hard times. If some of them would go back to history and read up the Democratic platform of 1892 and study what they promised us they would go in a hole, wouldn't they?

Rogers' Specific Liniment.
A radical cure for cholera. Sold by A. G. Sturgess, Oakland, C. F. White, Hattons: The Co-Operative store, J. O. DeBerry, Corinth; E. A. Weimer, McHenry. Smith & Callis, Johnstown; J. E. Gnagay, Accident; Jonas Frazee, Young Store Co., R. Liston, Selby'sport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

Schell.
The quiet little town of Schell has never as yet been heard from through the columns of THE REPUBLICAN, so we thought a few locals would interest the people in this section.

Mr. and Mrs. Thos. Smouse, of Cumberland, were calling on friends a few days last week. Mr. J. W. Gault, of Baltimore, stopped in town last week calling on one of our fairest damsels. Our summer school closed last Tuesday with some very appropriate exercises. The school has been very successfully taught by Miss Lucy Coddington, of Oakland. Miss Dixie Wolf, of this place, has returned from an extended visit with friends and relatives at Parsons, W. Va.

Mr. H. C. Reel, of Bayard, has been in town the past week and has completed the fine residence of B. Sanders. Miss Carrie Wagner, of Pendleton, is spending the summer with her brother, J. W. Wagner. Miss Rosetta Souder, of this place, was a caller on her friend Miss Bertie Fulk, at Bayard last week. Mr. and Mrs. A. H. Glenn were calling on friends at Dobbin last Sunday. Mr. Vernon Wolf, of Newburg, arrived in town last week and has resumed his work for the milling company. Messrs. Shriner and Butts, the champion log cutters of West Virginia, arrived in town last week, and are now slaying the timber for Benj. Souder. Messrs. George Daily and George Lee were at Gorman last week for the purpose of organizing a lodge of American Mechanics.

Mr. Anthony Stonebraker is a regular caller on the Maryland side every Sunday.

Mr. William Smouse spent Sunday with his family at Keyser. Mr. James Keener spent Sunday with friends at Thomas.

Mr. W. T. McGinnis, of Keyser, had charge of G. S. Frederick's store in the absence of Mr. Wagner. Mr. D. M. Fortney, of Newburg, has accepted a position with the Manor Manufacturing Co., and is now located at this place. He seems to have some special attraction near the school house.

The young ladies of town gave a very entertaining social one evening last week. There was a close contest for a prize, which was to be awarded to the gentleman doing the best work with the needle. Mr. James Keener secured the prize.

Hoyes.
Warm weather. Messrs. Will and Patrick Hamill and Samuel Ralston were the guests of Wm. Dewitt Sunday evening. Misses Kate Suter and Blanche Ferguson were visiting Miss Mary Wilburn Sunday evening. Quite a number of our young folks attended the love feast at Accident Saturday. They report having a good time. Mr. Cox was the guest of Wm. Callis Sunday. Mrs. Lou Keller, of Romney, is visiting her parents, Mr. and Mrs. A. C. Dewitt. Miss Jennie Breuneman is visiting friends and relatives near this place. There will be a picnic at McHenry the fourth of July.

New Concrete for Roads.
A successful application has been made, it appears, of the newly invented road concrete, some time ago described in the papers of Germany, and its usefulness in various directions seems to be assured. Curious enough, shavings and planing mill chips, either of common or fancy woods, and which may be stained before use if desired, are mixed with cheese—or rather, casine—calcined magnesians limestone, glycerine, silicate of soda and a little linseed oil, and this combination of substances is forced by hydraulic pressure into molds, where it is allowed sufficient time to harden. When dry the composition is strong and solid and can be sawed, planed, polished and varnished. Among its various proposed uses are ornamental panels and wall surface coverings, etc. New York Sun.

For Malaria, Liver Trouble, or Indigestion, use BROWN'S IRON BITTERS.

ORDER NISI.
Charles J. Bonaparte, Mortgagee, vs. Jane O. Morgan, Mortgagor. In the Circuit Court for Garrett County, sitting in Equity. No. 10 Equity.

Ordered, this 1st day of May, in the year 1894, by the Circuit Court for Garrett County, Md., sitting in Equity, that the sale made and reported in the above cause by Wm. Reynolds, trustee and attorney of the mortgagee named in the mortgage, and made to Charles J. Bonaparte be nullified and annulled, unless cause therefor to the contrary be shown on or before the 20th day of June, 1894; and a copy of this order be published in some newspaper published in Oakland, Md., once a week for three successive weeks before the 20th day of June, 1894. The report states the amount of sale to be \$529.00.

E. Z. Tower, Clerk Circuit Court. True Copy, Test: E. Z. Tower, Clerk.

ORDER NISI.
William Reynolds, Assignee of Gilmer S. Hamill, Mortgagee, vs. Martha Cline and Floyd's Churcher husband, Mortgagors. In the Circuit Court for Garrett County, sitting in Equity. No. 10 Equity.

Ordered, this 1st day of May, in the year 1894, by the Circuit Court for Garrett County, Md., sitting in Equity, that the sale made and reported in the above cause by William Reynolds, assignee of the mortgage, and made to Charles Washington be nullified and annulled, unless cause therefor to the contrary be shown on or before the 20th day of June, 1894; and a copy of this order be published in some newspaper published in Oakland, Md., once a week for three successive weeks before the 20th day of June, 1894. The report states the amount of sale to be \$900.00.

Jenny kissed me when we met,
Dancing from the chair she sat in,
Time you chief who have to get
Sweet into your list put that in.

"Will you kindly bring in a log, Mrs. Dawson, and then you may go. I shall not require anything more tonight."
"Very well, sir. I'll put the kettle on the hob for you; you may like to have a little something hot later on, and I always think a kettle is such company."

A grunt was the only response to this well-meant offer, as Mrs. Dawson, charwoman and caretaker, went out of the room.

"Confound that woman's incessant chatter; thank goodness I shall be left in peace for the next few hours at least."

The speaker, a cross-looking, hard-favored old man, settled himself to the best of his ability among his pillows, for he was an invalid, but somehow the pillows would not take the curve he wanted, and at last, breathless and exhausted, he sank back and closed his eyes, giving up the attempt. A look of intense weariness came over his thin old face, and I think his worst enemy would have felt some pity for him now, old, ill and alone, with no one to care whether he were alive or dead. His loneliness was indeed pitiable. Presently he turned his head towards the flickering firelight, and had anyone been there to see, they would have noticed something glinting in the old man's eyes suspiciously like tears, but, as I said before, he was alone, so no one brushed those tears away from his eyes, or tried to turn his thoughts into a brighter channel. The fire burnt on fitfully, casting weird shadows on the furniture of the room, handsome old-fashioned furniture, that told you the owner was by no means a poor man. In fact, there was everything in the room that told of wealth, but comfort and homeliness were wanting. The single touch of a loving woman's hand might have worked wonders, but then she also was wanting.

The old-fashioned black ebony clock ticked solemnly, was the only sound that broke the stillness. Occasionally a rattle of old fell with a dull thud into the fender, and then the fire would burn up brightly for a moment or two, bringing the white face and the white hands of the occupant of the bed into high relief against the dark shadows thrown by the heavy morose curtains of the old-fashioned four-poster bedstead. By and by, as the kettle began to sing in a soft and soothing way, the weariness of the face relaxed, as the eyes closed, and the old man fell asleep, and judging from the transformation of his face his dreams must have been happy ones.

"Dandy-boy, be quiet, you naughty little dog, or I'll wake up my poor old gentleman," this with a soft admonishing pat on the head of a remarkably mischievous-looking fox terrier pup. The voice came from the doorway, where stood a quaint little figure. In her arms, cradled up with a good portion of the first white nightgown, was the puppy addressed. Peeping cautiously round, the little figure advanced a few steps into the room, looking all the time at the bed, and clenching at the puppy for confidence, until that long-suffering animal protested with a squeak only to be again gently patted on the head and told to keep quiet. Still fixing her eyes on the bed, the little girl climbed up into the big leather armchair, in front of the fire, and smoothing her nightgown over her knees she deposited the puppy, who first shook himself well on finding he was released, from his previous suffocating position, and then curled himself up with a long drawn out sigh that would have done justice to the most blasé and ancient dog. What a quaint little couple they were, this baby girl and puppy dog.

The former with her little pink toes protruding from under the hem of her nightgown, her curly hair as it caught the light of the fire, glittering with a bright coppery glow, the big mischievous brown eyes looking so serious, and the sweet little mouth and dimpled chin, sat with a most determined expression that gave a curious dignity to the quaint little figure. The puppy dog, on the other hand, with one ear pricked, his head resting forward on his paws, and the eye that was not closed looking sharply round the room, on the lookout for mischief or rats.

After looking steadily at the occupant of the bed for some time, the child murmured to herself: "Poor old man, he's got no jam and no Dandy-boy. When I cut my finger mother gave me jam, and when I had the measles the doctor gave me Dandy-boy, 'cos I was good and took my medicine properly."

The old man turned in his sleep and smiled. Instantly the child slipped down off the chair, upsetting the puppy on the hearth just as he was on the point of going to sleep, and crossing the room on tip-toe she went over to the bedside, and stood there gently smoothing the pillow over and over again with her little hand, uncaring a lullaby almost under her breath, the lullaby that she used to sing to her doll and to Dandy-boy sometimes, when she wanted him to sleep.

The lines in the worn face of the sleeper seemed to have vanished, so tranquil and happy an expression rested on it now.

"It is better, I know he is, so I'll go on smoothing his pillow. Mother said he was a cross-grained old cunardgeon. I wonder what that means?" in questioning voice; getting no answer to her query, however, she went on talking to herself. "I think he looks kind, poor old man. I'm glad I came down. Mother never would let me come, 'cos she said you didn't like children, but you do, 'cos you look kind," this time nodding her head towards him and holding an imaginary conversation with him. "Would you like me to kiss you?" she went on, "just like I kiss father, and like your little girl used to kiss you, 'cos you did have a little girl once, mother told me so, and she died, and then the girl's mother died, too, and now you've got no one to kiss you, so I shall kiss you, and when I say my prayers I shall ask God to tell your little girl that I will love you now; then she will be quite happy when she knows you're not alone." Then softly climbing on to the bed she leaned forward and kissed the sleeper, first on the forehead, then on the lips, then, sliding down again, she went back to the arm-chair, where, in company with Dandy-boy, she curled herself up, and in spite of her resolutions to the contrary, went fast asleep. Gradually the fire died down, until only a faint red glow remained, the kettle no longer boiling, left off singing, and darkness and silence reigned supreme, save for the ticking of the clock on the mantelpiece. By and by there was a movement from the bed, and a hand went groping out in the dark in search of matches. Striking a light, the old man sat up in bed heaving a heavy sigh as he did so. "I might have known it was only a dream," he muttered, half to himself: "how long is this to go on when I try to see my dear ones again?" Then something in the arm-chair caught his eye and made him hold his breath. Could he be dreaming still, or had God been merciful and restored him to his dear ones gone before? It must be, it was his little girl, and holding out his arms towards the sleeping child, the old man burst into tears.

"My God, my God! I thank Thee," he cried out, so loud as to wake the little sleeper, who, starting up out of her sound sleep, called to her father. "It is, it is my Jenny," called out the old man in a frenzy of joy. Instead of being frightened, the child ran over to

him and said: "Are you glad I came and kissed you, old man?" "Kiss the old man again, dearie," and putting her little arms around his neck, she drew his head towards her and kissed him.

"You naughty disobedient child, to come down here like this, with only that thin nightgown on; too; it'll be a wonder if you don't catch your death of cold. Now be off with you, and don't worry the gentleman any more."

"But mummy, dear, you said we were to go to bed together, and he called me to kiss him, and he called me 'this little Jenny.' What did he mean?"

"His little girl was called Jenny, my pet, and I fancy the poor old gentleman thought she had come back to him when he woke up suddenly and saw you. Poor old man, she went on to herself than to the child, "this mind has been giving way this long time past. I shouldn't wonder if it went altogether."

"Mummy, may Dandy-boy and me go and sit with him sometimes if we're good?"

"Yes, my pet, if you're a good girl now and go to bed and get some sleep you shall." With which she tucked up the child in her little cot, and left her to sleep off any ill effects of her long night's vigil.

"Good morning, Mrs. Dawson, and how is my patient this morning?"

"Nicely, sir, thank you, I think," answered Mrs. Dawson. "He really don't seem like the same man; he used always to be grumbling from morning till night. Now he seems quite happy so long as my little girl sits with him now and again. It's a very strange thing," she went on: "he's got the idea that she is the child he lost many years ago. You may have heard, sir, as how his wife and child were drowned on their way home to England from India. Master was in the army, you know, sir, and of course he couldn't leave his young wife and little girl home, and the ship went down. They say master was never the same again; he got so bitter like, wouldn't take any interest in anything, and shut himself up in this lonesome old house, without any servants, saving me and my husband, when to do justice to the place there ought to be a dozen servants at least."

"Poor old fellow," answered the doctor, disregarding the latter part of her speech. "His delusion makes him infinitely happier, and although his mind wanders he is no longer the object of pity he was, for now he tells me that he is perfectly happy and contented since Jenny kissed him."

Very pretty it was to see the child, with a wisdom far beyond her years, playing the part assigned to her by the old man's happy delusion.

DOCTORING DIAMONDS.

Clever Ways in Which Precious Stones Are Falsified to Increase Their Value.

The practice of falsifying precious stones, especially diamonds, in order to make them appear to the inexperienced valuable, is not by any means modern. It can be traced back to the fifteenth century, and to Holland, where diamonds were cut and set in jewelry, and the trade in diamonds and other precious stones, various illegitimate means were devised of imposing upon the purchasing public, and enhancing the apparent value of gems offered for sale. Some of these practices date back hundreds of years, others belong to a modern period, and are almost coincident with comparatively recent discoveries in chemical science.

By dealers and the trade generally, diamonds are separated into various classes, and known by special names. These terms relate mainly to the method in which a gem is cut. Diamonds cut to a point, with more or less facets, are called brilliants; those presenting a flat surface are known as table stones. The term brilliant is properly applied only to a stone cut in a certain form, but in the practice of the trade it is given also to colorless sapphires, rubies, emeralds, Oriental topazes, and a few other gems. All such stones, whether quite colorless, or with a greenish, yellowish, or bluish tinge, are of equal value, provided they reach the standard of brilliancy. In the trade diamonds from India, Brazil, of Africa are generally classed together. The name "Oriental diamond" does not denote that the stone is of eastern origin, but that it is of superior quality, and is a gem of the first order. Diamonds may or may not have been mined in the Brazils, the name only signifying that they are of second quality; while "Cape brilliants" include all less valuable stones. Formerly spurious diamonds were mostly formed from rock crystals, many of the so-called diamonds found in antique snuffboxes, watches, and miniature frames are in reality rock-crystal imitations of real gems.

The value of diamonds and other gems depending mainly upon their brilliancy, the efforts of falsifiers have been chiefly directed towards increasing the brilliancy of the stones. The principal mode of doing this is known as "doubling." It was in use in the seventeenth century, and is a case lately before the law courts in reference to a so-called ruby shows that it is still flourishing. It consists in joining together with cement a portion of a real stone and an imitation so as to make the combination appear one and indivisible. This can be done so deftly that the initiation are sometimes deceived, as the case referred to above goes to show. So long as a combination of this kind remains unexamined, the falsifier discovers it usually by a close examination of the edges; when it is mounted in a ring, bracelet, or other setting recognition is practically impossible. This is the most common form of deceit in the jewelry trade. If some of the jewels are dropped into a dish of very hot water, the cement dissolves, and the component parts fall apart, and the result might astonish the owners. Some surprising discoveries of this kind have been made when the jewels were being examined by a jeweler.

It is to guard against deceptions of this kind that jewelers and dealers in precious stones decline to buy gems in their settings. When the gem is unset it can easily be subjected to ready and infallible test. A stone about which there may be suspicion is dropped into a dish of very hot water. If it is a "doublet," the cement quickly dissolves, and the component parts fall apart, and the result might astonish the owners. Some surprising discoveries of this kind have been made when the jewels were being examined by a jeweler. It is to guard against deceptions of this kind that jewelers and dealers in precious stones decline to buy gems in their settings. When the gem is unset it can easily be subjected to ready and infallible test. A stone about which there may be suspicion is dropped into a dish of very hot water. If it is a "doublet," the cement quickly dissolves, and the component parts fall apart, and the result might astonish the owners. Some surprising discoveries of this kind have been made when the jewels were being examined by a jeweler.

Among the tests used by dealers and jewelers to ascertain not only the reality but the quality of diamonds offered for sale is that of resistance to hardness. Few precious stones are without a nucleus of proved diamonds, graded according to their degree of hardness. All purchases are tested by this scale, and their quality ascertained. A specially constructed microscope is used to distinguish colors in stones. It has been stated that diamonds are seldom bought by the trade after they are mounted. They are generally taken out of the setting for inspection. This is more especially the case if the stones are so mounted that the under portion is hidden. One of the oldest tricks of the trade is to color the bed in which the stone rests as to change the hue of the gem. For instance, a ruby will glow with a deeper and more intense fire if the bottom and sides of the setting wherein it is fixed be colored red. The shade of a stone can be altered or concealed by the skillful use of colors in this way. Naturally this device does not deceive the initiated. A perfect stone is invariably mounted "a jour," or so that every part of it is visible.

The discovery of diamonds in South Africa led indirectly to some clever device by the dealers. Many of the South African diamonds have a straw tint, which has an unfavorable effect on their price, especially as experts believe that it will become more decided the longer the stones are exposed to the air. Some of the more knowing dealers discovered that by subjecting the straw-tinted diamonds to a bath of certain acids the objectionable color was removed and the gems became pure white. A number of diamonds so treated were sold in Paris and Berlin, and brought

higher prices than they would if they had retained their original color. After exposure to the action of the acid for a certain time the original color returns; but by that time they have passed out of the dealers' hands. The fraud was soon found out by the trade, and they now guard against imposition of such a character by means of various tests. Of these, the most generally used are hot water bath and friction. If a dyed stone be left in hot water for a few minutes it resumes its original hue, or if the gem be rubbed sharply on a towel, or even on the coat sleeve, its normal color can be detected. These tests are simple and efficacious, and are in daily use.—Pall Mall Gazette.

CONCERNING CRABS.

An Interesting Chapter on the Habits of the Crustacean.

Crabs can see but cannot hear; crabs can remember and can communicate; crabs are sensitive to any vibration of the ground; crabs are inquisitive; crabs are docile and crabs can smell.

Eight months of constant association with crabs, eight months in which many leisure and lonely hours were occupied in watching and studying crabs, give five men the freedom of a suburban island for that period of time the opportunity to get on friendly, even familiar, relations with the red crabs that infest by millions that strange equatorial coral isle. They were the employees of a phosphate company, and were preparing a road to a new quarry, in which they returned recently from the island. They made the following observations: The crab can see, but he is near-sighted. At a distance of twenty-five feet he can observe a man walking along the beach, but at that distance cannot see distinctly, for he is unable after the manner of a schoolboy to get on friendly, even familiar, relations with the red crabs that infest by millions that strange equatorial coral isle. They were the employees of a phosphate company, and were preparing a road to a new quarry, in which they returned recently from the island. OUR WASHINGTON LETTER.

(From Our Regular Correspondent.)
 WASHINGTON, June 11, 1891.
 Republican Senators are not making any predictions as to when the final vote will be taken on the tariff bill in the Senate, but they take no stock in the assertion of Senator Harris that the Democrats will force a vote before the close of the present week, not because they doubt Senator Harris' willingness to do so, but because they doubt his ability to keep a quorum on the floor continuously for that purpose. The Republicans have not altered their position. They contend that eight hours a day is sufficiently long for the Senate to sit, and that they are entitled to debate each schedule of the bill as it is taken up. Their willingness to accept the agreement to debate certain schedules under the five minute rule furnished convincing evidence that they have no wish to filibuster; but they do not intend that such important portions of the bill as the wool schedule and the income tax shall be railroaded through without debate. Senator Monahan, of Nebraska, expressed the opinion that it will be nearer a month than a week from this time when the final vote is taken.

Senator Brice made one of the most remarkable statements ever published by a Senator when he said: "Whatever you may hear about discussion, I can tell you, that there will be forty-three votes for the bill, whatever there is in it. Senator Jones may make modifications, but whatever he finally decides upon will be voted for by forty-three Senators." In other words, if Senator Brice knows what he is talking about, forty-three Senators have agreed to sink their own individuality and principles and to vote for whatever Senator Jones tells them. Never before has the majority of the Senate delegated such autocratic authority to one man.

There are people who say that Representative "Bill" Springer, of Illinois, has no influence with the administration, but I notice that he has been able to get his son, R. W. Springer, a lifetime position as Chaplain in the army, although the young man, who has been drawing six dollars a day as clerk of the House committee on Banking and Currency while studying for the ministry, was only ordained to preach about two months ago. Mr. Springer may not be able to get places for his constituents, but he manages to provide for his family. Ex-Representative Abner Taylor, of Illinois, is regarded as an authority on political matters in that state. He has just been over the ground and this is the way he sizes up the situation: "It isn't a question of Republican success, but of how large our majority will be. I put the Republican plurality at 50,000 in November, but shall not be surprised if it reaches 100,000. There is no longer the slightest doubt that the legislature will be Republican, and the Democrats may consider themselves lucky if they get as many as five out of the state's twenty-two Congressmen."

Representative Breckinridge, of Kentucky, has shown himself to be the possessor of a skin as thick as that of a rhinoceros, but thick as it is it was penetrated by a direct shot from his Democratic colleagues in the House. He has been boasting of his intention to take charge of the general deficiency appropriation bill when it was ready to be reported to the House, by virtue of his being chairman of the subcommittee which has charge of that bill. As soon as his Democratic colleagues found out that he really meant to do so they lodged a formal protest with chairman Sayers of the Appropriation committee, and the result was that Mr. Sayers informed Breckinridge that he would not be allowed to take charge of the bill, because of the refusal of Democratic members to recognize his leadership in even so small a matter as the management of a bill which usually goes through without any serious opposition. If Breckinridge were not entirely without the sense of shame he would resign from Congress and withdraw from his contest for re-nomination.

The Democrats of the House are more susceptible to the influence of public opinion than the Senators; they have to stand up for renomination and reelection this year, and they are hearing from their constituents. Consequently they are opposed to the sugar trust schedule of the tariff bill, and many of them are outstaged in their determination to defeat it even if it be necessary to defeat the bill to do so.

The Senate investigation committee is wasting more time over a continuation witness—a member of the New York firm of stock brokers through which the Democratic Senators are supposed to have done their sugar speculating. He refuses to tell the name of Senatorial customers or to produce his books, and the committee will ask that his case be certified to the Grand Jury, which has not yet indicted the newspaper correspondents.

Deer Park.

To those contemplating a trip to the mountains in search of health and pleasure, Deer Park on the crest of the Allegheny Mountains 3,000 feet above the sea level, offers such varied attractions as a delightful atmosphere during both day and night, pure water, smooth, winding roads through the mountains and valleys, and the most picturesque scenery in the Allegheny range. The hotel is equipped with all adjuncts conducive to the entertainment, pleasure and comfort of its guests.

The surrounding grounds, as well as the hotel, are lighted with electricity. Six miles distant on the same mountain summit is Oakland, the twin resort of Deer Park, and equally as well equipped for the entertainment and accommodations of its patrons. Both hotels are upon the main line of the Baltimore and Ohio Railroad, have the advantage of its splendid Vestibule Limited Express trains from the East and West. Season excursion tickets, good for return passage until October 31st, will be placed on sale at greatly reduced rates at all principal ticket offices throughout the country. One way tickets reading from St. Louis, Louisville, Cincinnati, Columbus, Chicago, and any point on the B. & O. system to Washington, Baltimore, Philadelphia or New York, or vice versa, are good to stop off at either Deer Park, Mountain Lake Park or Oakland, and the time limit will be extended by agents at either resort upon application, to cover the period of the holder's visit.

The season at these popular resorts commences June 23rd. For full information as to hotel rates, rooms, etc., address George B. DeShields, Manager, Deer Park, or Oakland, Garrett County, Maryland.

Notice to Trespassers.

All persons are hereby warned not to trespass upon that part of Military Lot No. 1899, lying on the south side of the B. & O. R. R. at Altamont, and owned by the undersigned. All persons so caught trespassing will be prosecuted to the fullest extent of the law.

Mrs. MARGARET E. MCCHONIE.
 H. McCORMIE, Agent.

Property for Sale.

The undersigned offers at private sale his house and lot at east end of Oak street, Oakland, Md. This is a desirable property, and will be sold on reasonable terms. Good well and all necessary outbuildings attached. Call on or address,
 THOMAS SANSFIELD,
 Oakland, Md.

Notice.

If you want fresh bread free of alum and white corn meal get it at B. Frieze's, next door to postoffice. He has been in Oakland for more than nine years and all his bread is stamped with his name on top of the loaf. See that you get the above. It will not cramp you after eating.

Notice.

To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to
 MICHAEL W. DURST,
 Grantsville, Md.

Land for Sale.

The undersigned offers for sale a part of "Swan Meadows," lying about 4 1/2 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to
 E. H. SINCELL,
 Oakland, Md.

A Quarter Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

SHERIFF'S SALE.

Under and by virtue of a writ of fieri facias issued out of the Circuit Court for Garrett county, at the suit of Thomas A. Nettikin against Adam S. Sell, the same being No. 7, do hereby certify that on the 10th day of April, 1891, the undersigned Sheriff did seize and take in execution the following described property of the said Adam S. Sell, to wit:—One two horse wagon, horse eleven years old, one saddle horse, one cow eight years old, one spotted cow seven years old, one bull calf, one heifer, and the following described parcel of land situated about six miles north of Oakland in Garrett county, to wit:—That part of a tract of land called "Good Hope," containing one hundred and twenty-six and a half acres, which is described in a deed from E. H. Nettikin and wife, dated the 27th of April, 1882, and duly recorded in Liber B. 7, p. 10, folio 36, one of the Land Records of Garrett county. Said parcel of land will be sold subject to a mortgage due E. H. Nettikin, which is described in a deed from E. H. Nettikin and wife, dated the 27th of April, 1882, and duly recorded in Liber B. 7, p. 10, folio 36, above described near the public road leading from Oakland to Sang Run, the said Sheriff will offer at public auction to the highest bidder on
 Saturday, the 23rd day of June, 1894,
 at ten o'clock a. m. of said day, to satisfy the foregoing execution and costs.
 Terms of sale cash on the day of sale.
 CHARLES WEGMAN,
 Sheriff of Garrett County.

Estate of Caroline E. Bell, deceased.

THIS IS TO GIVE NOTICE, That the subscriber, of said County, both claimed from the Orphans' Court of Garrett county, in Maryland, letters of Administration on the personal estate of

CAROLINE E. BELL, late of Garrett County, Maryland, deceased. All persons having claims against the estate are hereby notified to exhibit the same with the vouchers thereon legally authenticated to the subscriber, on or before the 24th day of December next; they may otherwise be barred by the expiration of said term of said estate.

Given under my hand this 20th day of May, 1891.

ARTHUR TOWNSEND, Adm'r.

Oakland, Md.

Proposals for Building a School House.

OFFICE OF THE GARRETT COUNTY SCHOOL COMMISSIONERS, OAKLAND, MD., May 31, 1891.

The Board of School Commissioners of Garrett county will receive sealed proposals, up to the 21st day of June, 1891, at 2 o'clock p. m., for the erection of a school house in the town of Oakland, according to the plans and specifications to be seen in the office of said board. The board reserves the right to reject any and all bids.

By order of the board,
 W. H. HINEBAUGH, Sec'y.

Chamberlain's Eye and Skin Ointment.

"THE REST,"

is now offered for sale. This property has a reputation and is valuable to anyone wishing to engage in keeping a Summer Resort. For particulars apply to
 D. P. MILLER,
 Cumberland, Md.

Dr. A. S. Todd's Anti-Bilious Pills

are good for sick headache, constipation, piles, bilious colic, fever and ague, dyspepsia, rheumatism, neuralgia, flatulency, indigestion, female complaints, liver troubles, biliousness, and general debility. They will positively cure all disorders of the liver, kidneys, stomach and bowels. 25 cents a box.

Laughlin's Infant Cordial

helps babies over the critical teething period, soothes and softens the gums, controls the nervous system, and gives rest to both child and mother. It will also cure summer complaint, dysentery, diarrhoea and wind colic. It is absolutely safe—contains no strong drugs and gives immediate relief. 25 cents a bottle and 50 cents a box.

Laughlin's Worm Syrup

destroys worms, which are not only bad in themselves, but which induce and aggravate other diseases. Laughlin's Worm Syrup is purely vegetable, perfectly effective and does not cost more than 25 cents a bottle.

Most all druggists have these three medicines. If yours hasn't, send the money to us and we will deliver them to you.

THE REPUBLICAN.

OAKLAND, MD., THURSDAY, JUNE 21, 1894

NUMBER 15.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

It will be a glorious Fourth. Prepare for the celebration of the Fourth of July. Big stock of 4th of July goods at Cheap John's. Something fine at Malette's: Fresh cakes and crackers. For A No. 1 fresh fruits and vegetables, go to W. H. Malette. Seeds by ounce, pound, pint and peck at H. E. Felty's Grocery. Mr. Doyle Burton, of Wilson, was an Oakland visitor Friday. A choice line of fine candles just received at the Oakland Pharmacy. Mr. Samuel Lawton was at Terra Alta Monday evening on business. Cheap John's is the only place in town to see a full stock of toys, etc. Ice cold soda and mineral waters of all kinds at the Oakland Pharmacy. 13-3t. Mr. Wm. T. White, of Terra Alta, was in the city a day or two last week. Jonas Frazee, of Selbysport, was an Oakland visitor Tuesday and yesterday. If thirty-two is the freezing point what is the squeezing point? Two in the shade. Cheap John has a car load of wagons for children. Come and see for yourself. Thomas Hay Rakes and Champion mowing machines for sale by J. M. Davis & Son. Ex-Sheriff E. N. Casteel and little daughter, of Hoyes, were in Oakland Tuesday. Mr. John Edmonds, of Deer Park, was here last Friday and paid this office a visit. Mr. Thomas J. Moyer, of Uniontown, Pa., was here yesterday with Mr. Jonas Frazee. Mr. John Shartzler was on a business trip to Accident and Friendsville last and this week. Senator and Mrs. R. A. Ravenscroft, of Accident, were in Oakland last Thursday with friends. Miss Jennie Johnson returned from a visit of two weeks to friends at Hagerstown Tuesday night. Mr. and Mrs. G. A. Bolden, of Terra Alta, spent Sunday in Oakland with relatives and friends. D. L. Conneway has for sale chop, bran, middlings, etc., at the lowest prices. Give him a call. We have on stock a car load of Ochilla guano and Silvergray for buckwheat. J. M. Davis & Son. The Mayers building on Second street has been repainted, which adds very much to its appearance. Mr. Joseph Lashorn, of Deer Park, was here yesterday on business and paid his respects to this office. State Lecturer Graham Dukehart, Esq., of Baltimore, was in Oakland Thursday and Friday of last week. Mr. Charles Deffenbaugh, a Cumberland typo, was in Oakland Tuesday shaking hands with his many friends. There are 40,000 women cyclists in the United States. New York and New England claim half that number. Mrs. U. G. Palmer and mother, of Hutton, were the guests of friends in Oakland Thursday of last week. Rev. Ernest R. McCauley was at Aurora last Wednesday attending the Sunday school convention held there. Mr. and Mrs. Wm. G. Riley and son, of Kearney, Md., were the guests of Mr. and Mrs. Chas. J. Newman on Sunday. All members of Garrett Lodge, K. of P., are requested to meet at their hall Wednesday morning, July 4th, at ten o'clock sharp. It behooves our people to decorate their houses on the Fourth. Every citizen of the town should have "Old Glory" floating in the breeze from the house top.

S. T. Davis, Esq., whose riding gallery is now located at Elkins, W. Va., spent a day or two in Oakland this week.

Rev. Dr. W. J. McKnight will preach in the Garrett Memorial church Sunday morning, June 24th, 1894, at 11 o'clock.

Miss Carrie Colandean has returned to Oakland from Wheeling in which city she has been attending school for several months past.

Mr. and Mrs. G. S. Knight, of Accident, were the guests of Judge and Mrs. Patrick Hamill in Oakland Tuesday and Wednesday.

L. M. Davis & Son have on hand a few two-seated spring wagons and single buggies, and a first-class horse grain drill at reduced prices.

A lot of mixed paints for sale at the Oakland Pharmacy very reasonable. Give us a call when you are ready to do some painting. 13-3t

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Mr. E. P. Anderson is ill at his home in Newburg, W. Va. We wish for his speedy recovery and return to Oakland.

Mr. Homer Ravenscroft, of Kingwood, who was employed here for a number of weeks by Mr. Joseph Helbig, returned to his home last Thursday evening.

Hon. Geo. W. Wilson, of Wilson, was here Friday last to consult with his physician, Dr. J. Lee McComas. Mr. Wilson's health has not been very good this spring.

Mr. W. H. Trickett, of Deer Park, who recently moved there from Cranesville, W. Va., was in the city last Friday and ordered this paper sent to his address.

Brighten the appearance of your cottage by using a few gallons of ready mixed paint which you can buy at the Oakland Pharmacy very cheap. Guaranteed the best quality. 13-3t

I have taken the agency for the Frederick steam laundry. All work guaranteed to give satisfaction. Goods called for and delivered free of charge. J. Ed. Miller, Oakland, Md.

Mr. Jacob S. Myers went to the Half-Way House on the old national pike, Saturday morning, to visit Mr. and Mrs. Thos. B. Layman over Sunday. He returned to Oakland Monday morning.

Thos. Carr the veteran railroader has gone to Baltimore to have his eyes treated by a specialist. Everyone sincerely hopes that "Uncle Tommy" will be benefited.—Morningtown Dominion.

Prof. Little, the eye specialist of Cumberland, will be at Dr. H. W. McComas' office June 25 and 26. Eyes examined free. Glasses properly adjusted to suit your eyes. Satisfaction guaranteed.

Misses Sallie Casteel and Alice DeBerry, who attended the West Virginia Female Seminary at Buckhannon the past winter and spring, returned to their homes near town last Thursday morning.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

The Medical Society of the State of West Virginia will convene in annual session at Berkeley Springs, W. Va., July 10, 1894. Dr. J. Lee McComas is a Fellow of this society and may attend its sessions.

Mr. and Mrs. J. S. Keller and children, of Romney, W. Va., who were on a visit to the family of County Treasurer E. E. Sollars and family near town for several days last week, returned home Thursday.

Prof. Charles D. Smith, who was on a visit to his parents in Baltimore for three or four weeks, returned to Oakland Thursday evening of last week. He will open the Normal school here on next Monday.

FOR RENT—Furnished, the very desirable Summer Hotel known as "The Rest," at Oakland, Garrett county, Md.; terms liberal. Apply to CHARLES J. BONAPARTE, 216 St. Paul street, Baltimore. 22-6t

A. B. Gouder, of the Oakland bar, entertained a number of his friends at dinner on Thursday. Among those present were Father Mattingly, of St. Peter's Roman Catholic church; D. E. Offutt, F. Thayer, G. S. Hamill and Thomas J. Peddicord.

Mr. John Shank, a native Marylander, who has been residing in San Francisco for several years past, arrived in Oakland last Friday morning and went to Accident Saturday to visit the family of Mr. Aaron Borer, and to attend the wedding of Miss Dwyer.

Hon. Jere Wilson, of Washington, who spent two or three days last week at his beautiful summer place near town, departed for New York Friday night where he embarked on a vessel Saturday morning for London, England. He will also visit Paris for a week and return to Oakland in about thirty days.

A picnic and dance will be given at Melchery in McLane's grove on July 4. Music will be furnished by the Accident bands and the DeWitt string band. Nothing but temperance drinks allowed on the grounds. Bring your basket and stay all day. By order of COMMITTEE.

Regular services will be conducted in St. Mark's church, Oakland, Sunday morning and evening at the usual hours by the pastor, Rev. Ernest R. McCauley. Christian Endeavor meeting will be held in the Sunday school room at 7 o'clock p. m. the same evening, to which all the young people of Oakland are earnestly invited.

Sometime ago I was troubled with an attack of rheumatism. I used Chamberlain's Pain Balm and was completely cured. I have since advised many of my friends and customers to try the remedy and they all speak highly of it. SIMON GOLDBAUM, San Louis Rey, Cal. For sale by Oakland Druggists.

Quarterly meeting services will be held at St. Paul's M. E. church next Saturday and Sunday. The quarterly conference will be held at 2 p. m. on Saturday. Preaching at 7.45 Saturday evening. Sunday services as follows: Sermon at 10.30 a. m., followed by the Sacrament of the Lord's Supper; love feast at 2.30 p. m.; song service and sermon in the evening.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

The majority of the striking miners in the George's Creek region have gone to work at the old price of forty cents per ton. The Fourth Regiment has gone back to Baltimore and everything is quiet. It is expected that by Monday evening mine in the region will be working to its full capacity. On Monday Gov. Frank Brown visited the camp of the soldier boys and accompanied the Fourth home.

The Sunday School convention of Glade circuit will be held at Pleasant Valley U. B. Church June 30, 1894. There will be speaking by the best talent to be secured, with singing. Refreshments of all kinds on the ground by committee. Come one, come all and enjoy a pleasant day. Two miles south of Mountain Lake Park. A beautiful grove and grounds. D. R. WAGNER, Pastor.

Garthright has just received the largest and cheapest line of goods ever brought to Garrett county and is selling them at panic prices. The bottom is out of muslins and prints; 25c. satens at 13 cents; lace curtains at 40 cents per pair or 124 cents per yard; 75 cent shirts at 45 cents; 8 cent muslins at 64. Come one and all and be convinced. Still taking choice butter and other kinds of produce at highest market prices.

While at Peekskill, N. Y., Mr. J. A. Scriven, a prominent manufacturer of New York City, purchased a bottle of Chamberlain's Cough Remedy. Such good results were obtained from its use that he sent back to the druggist from whom he had obtained it for two more bottles of the same remedy. When you have a cough or cold give this prescription a trial and

like Mr. Scriven you will want it when again in need of such a medicine. It is a remedy of great worth and merit. 35 and 50 cent bottles for sale by Oakland Druggists.

A member of the Pay army, whose name we were unable to ascertain, but who claimed his home at St. Louis, addressed a large crowd of our citizens at the Central Hotel corner Tuesday evening of this week. In his remarks he hauled both the great parties over the coals, paid the wealthy his compliments and by his argument endeavored to show that the only hope of the country's regaining its prosperity was to pass the bills which Gen. Coxey had presented to Congress. He was a very fluent speaker and held his audience well. A collection amounting to two or three dollars was taken up by the speaker's lieutenants.

I have two little grand children who are teething this hot summer weather and are troubled with bowel complaint. I gave them Chamberlain's Colic, Cholera and Diarrhoea Remedy and it acts like a charm. I earnestly recommend it for children with bowel troubles. I was myself taken with a severe attack of bloody flux, with cramps and pains in my stomach, one-third of a bottle of this remedy cured me. Within twenty-four hours I was out of bed and doing my house work. Mrs. W. L. DUNAGAN, Ban-aqua, Hickman Co., Tenn. For sale by Oakland Druggists.

For Sale Cheap. The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre. FRED. A. THAYER.

Office in Felty Building opposite postoffice. Married. FELTY-GROVE. On Wednesday of this week at Martinsburg, W. Va., Mr. Henry E. Felty, of Oakland, and Miss Laura Grove, of Martinsburg. May a long life and prosperous one attend them is the wish of THE REPUBLICAN.

WHETSKILL-BOYER. Accident English Lutheran church was packed last Sunday night to witness the marriage of Mr. Geo. P. Whetskill, of Grafton, W. Va., and Miss Lillie V. Boyer, eldest daughter of our worthy citizen, Mr. Aaron Boyer. The wedding march was played by Miss Virgie Hinebaugh, and the wedding ceremony was pronounced by Rev. Geo. Royer, making the two man and wife. The attendants were Mr. D. D. Boyer, Miss Carrie M. Boyer, Miss Sarah Crist and Mr. W. T. McMillan. Immediately after the ceremony was concluded the young people were driven to the home of the bride where a reception was tendered them. Mr. and Mrs. Whetskill bade us good bye on Monday morning and started for Grafton, where they will make their future home. May long life and prosperity attend them.

Accident Normal. The outlook for a good school is very encouraging. The citizens are in full sympathy with the school and will do all they can to further its interests. Excellent boarding will be furnished at very low rates. Accident can take care of a hundred students. They are now supporting a good literary society and a lively interest is manifested. I know of no place in the county that has kept a literary society alive during school vacation. This work will be taken up by the Normal and carried right along. We will do all we can to make the school a success. R. R. SANBORN.

Rogers' Sarsaparilla. A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetine and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuppet Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbysport; W. Wass, Mineral Springs; J. E. Gnagey, Accident; Smith & Callis, Hoyes, and by all general dealers.

Uppas Tablets relieve nausea.

THE RAMBLER.

He Touches Upon Subjects of More or Less Interest to Our Readers.

To the Editor of the Republican: The question whether journalism can be made a branch of college study has been a moot one for a good many years, and there have been several ill-digested schemes for such a course experimented with. Renewed attention has been called to it by the University of Pennsylvania. That journalism was not one of the learned professions when it began, it is impossible to deny. Journalism is a modern invention. The clergyman, the doctor, the lawyer—theirs have been immemorially learned professions; but there was no journalism two hundred years ago, and indeed a century ago the newspaper was in its infancy. The growth of the newspaper essentially belongs to the nineteenth century, and its development is the result of the age of steam and the swiftly following age of electricity.

The other day—Thursday of last week—I picked up a copy of the *Mountain Democrat* and was scanning its pages simply because I had nothing else to do. In one of the local columns I noticed an article calling attention to the out of the proposed new school house to be erected in Oakland, and cut to be found on another page. In vain I looked down one column and up another and at last gave up finding the alleged cut. I went home to my family in a state of mind equal to Mr. Cleveland's "innocuous desecrude," and my wife, noticing it, wanted to know the wherefore. I enlightened her. The result was the cut was found; but oh, the position! Dear reader, do you understand? If not, get a copy of said paper.

The multiplication of telephone and electric light wires in Oakland within the past two years has been something marvelous and should the increase continue as fast within the next few years the streets will take on a metropolitan aspect. Telephone connection with the several towns lying within a radius of ten or fifteen miles of Oakland is a great convenience to our citizens and I hope before long to see a line stretched from here to the lower end of the county. It would be a paying investment for some one.

The glorious Fourth is drawing near and the success which crowned the efforts of our people last year should be an inducement for them to exert every endeavor to make this the Fourth in the history of the town. From what I have learned the committees are all at work and doing good service. Keep the ball rolling and a big crowd will be here on that day to celebrate with us.

From what I have been able to ascertain open war has been declared between some of the people of Terra Alta and Oakland. It is generally credited that Terra Alta was the aggressor. Both towns have had their innings and my advice is to drop the matter now. Enmity stirred up between two neighboring towns can but injure them both, but barring the injury that is bound to accrue what good will come of it? The matter, if not dropped immediately will in the course of time wind up in the police court. Drop it!

The sudden change in the weather has made a great many people unwell, I among them, and I feel that to make this letter longer would be imposing upon you and your readers, so I will stop. THE RAMBLER.

Notice to Trespassers. All persons are hereby notified not to trespass on my land known as "Swanton," by cutting timber, clearing land or by farming of pasturing land that is cleared on my premises, fishing, or in any other way trespassing, as I have instructed my agent to prosecute all trespassers to the fullest extent of the law. M. M. ARMSTRONG. CHAS. A. WILT, Agent, 9th Westernport, Md.

A Trip to the Park. By request the editor preached at Mountain Lake Park, last Sunday a. m. He, with Mrs. Thompson, went to the Park Saturday p. m. and were met by Rev. L. A. Rudisill, who took them to his cheery little cottage where they were delightfully entertained. After sup-

per, Mr. Rudisill took them with Mrs. Rudisill and "Baby Ruth" on a drive. We would say that this happy little girl in the matter of age takes precedence of the other "Baby Ruth."

The improvements that are being made under the superintendence of Mr. Rudisill are very suggestive of the great prosperity of the Park. The auditorium is enlarged to about double its former seating capacity. The electric lights make the grounds look almost like fairyland. The new cottages are nearly ready for occupancy. We met many pleasant acquaintances. Mr. W. H. Gilbert, of Piedmont, was there to spend the Sabbath. It is feared that Miss Addie Sherman, who is really very ill at Grace Cottage, will not recover. Many who have been led to Christ through her efforts and those of her friend, Miss Jennie Smith, will sympathize with them both in this affliction.—Keyser Echo.

Mount Zion. The weather has been very hot and dry and in consequence the crops are suffering.

Hon. G. W. Biocher is preparing to build a new barn.

Among those who attended the children's meeting we noticed Mr. Jacob S. Myers, clerk to the County Commissioners.

Mr. John Bancroft, Jr., of New Germany, was the guest of Mr. Peter Pope last Sunday.

Mr. R. F. Layman made a trip to New Germany last Sunday evening with one of the fair sex.

The young people in this vicinity are taking a great deal of interest in the singing class, which we are pleased to note.

Photographs. Having run a gallery in the city the past winter I have returned and am now running my Oakland gallery, and as my predecessor closed cutting prices I will open with reduced prices for one month: \$1.50 per dozen for full-length figures and other styles in proportion. I guarantee satisfaction and challenge comparison with the best work turned out by Loar & Co. Give me a call. 15-3t. G. H. PRITCHARD.

A Card. I have resumed the practice of law; office in the Felty Building opposite the postoffice, where I will be pleased to see all my former clients and any others who choose to entrust their legal business to my care. Will be assisted in all important cases by Benjamin A. Richmond of the Cumberland bar. FRED. A. THAYER.

A NEW STORE. I HAVE A FULL LINE OF Millinery Goods, New and Stylish Hats, Ribbons, Flowers, Lace, Gloves, Mitts, Corsets, Veiling, Fancy Goods and Notions. Also have Sugar, Calico, Muslin and other articles at reasonable prices. BUTTER AND EGGS taken in exchange for goods. MARY SPINDLER, ACCIDENT, MD.

Why Pay More When You Can Get Them For Less? Look at These Prices: 20 lbs. granulated sugar, \$1.00; all package coffee, 21 cts.; Mocha and Java coffee, 31 cts.; good green or black tea, 21 cts.; Baker's chocolate, 40 cts. per pound; Baker's cocoa, 15 cts.; Van Houten's cocoa, 10 cts.; California prunes 12 cts.; evaporated peaches, 15 cts.; 4 lbs. choice raisins, 25 cts.; 5 lbs. choice currants, 25 cts.; Lenox soap, 4 cents per bar; 2 cans choice pie peaches, 25 cts.; 3 cans choice table peaches, 31 cts.; 4 cans corn, 25 cts.; 3 cans beans, 25 cts.; 3 cans tomatoes, 25 cts.; early June peas, 11 cts. per can; French peas, 20 cts. per can; fine baking powder, 31 cts. per pound, guaranteed to be as good as Royal.

We Can Save You Money on Anything in Our Line. We receive daily a full line of choice fruits and vegetables. Everything the market affords at a reasonable price. We have just received a full line of fresh crackers and cakes—the finest line ever in the city. Call and see us and we will make it to your advantage to call again.

W. H. MALETTE, Oakland, Md.

TEMPERANCE NOTES.

SWEDISH AS DRINKERS.

A System for the Regulation of the Sale and Use of Drink.

It is the element of gain in the saloon business which makes it so persistent, which causes it to enter politics in order that it may protect and perpetuate itself. Remove the element of profit from the saloon business, render it merely self-supporting, and you have dealt the saloon its death-blow. Men will not continue in an occupation which pays no profit. They can not afford to. Hence the great attention which is given by temperance people everywhere to the system in vogue in Sweden for the regulation of the liquor traffic—a system which removes the element of profit, as far as possible, and which destroys all the social features of the saloon. It is the Gothenburg system, so called, and the town wherein it was first tried, and the result of years of trial vindicates its right to be considered as a distinct advance toward a final solution of the drinking problem.

The temperance people of Sweden early recognized that to legislate the saloon out of existence was impossible. That it was deemed practicable that laws could be devised to fit conditions as they were, and that the enforcement of legal provisions would prove a remedy for most of the ills flowing from intemperance. Laws were enacted. They provided for a strict control of the manufacture of spirits. Next, they gave to every community the right of selling liquor, either to licensed dealers or to a company who would have a monopoly of the business. That law was passed in 1875 as a measure of relief from the evil of intemperance, which appeared to be spread all over Sweden in a way that appalled those interested in the uplifting of the people.

These reforms had a gigantic task on their hands, for the governmental reports showed that Sweden had become the land of drunkards. No fewer than 33,422 stills were in operation as late as the 50's, or one still to each 100 inhabitants, and the annual per capita consumption of liquor was 2 1/2 quarts, or double that of any nation at the present time. The Swedes were the heaviest drinkers in the world when their first liquor law was passed. The chief feature of reform in this law—granting a monopoly of the business to an approved company—was not given a trial for ten years, however, and the many evils inherent in the system were delayed till, in 1895, a company was organized among the citizens of Gothenburg. This company petitioned for a "concession of all the retail liquor-licenses in the town, pledging themselves to conduct the business without further profit to themselves than a reasonable return on the capital invested and to devote the surplus to the welfare of the laboring classes."

Despite the most violent opposition, the petition was granted. And its issue was the redemption of not only Sweden but Norway as well. City after city adopted the plan. It produced a complete revolution in the liquor traffic. In ten years the number of saloons in all Sweden was reduced one-fourth. And in Norway, where the system was given a trial, the showing was equally triumphant, for since 1871 till the last census the number of saloons was reduced from 501 to 237, or one saloon for each 591 inhabitants. At the same time the per capita consumption of distilled spirits fell off till today the Swedes who are ranked as the heaviest drinkers among civilized nations, have dropped down to ninth place.

The system which in a few years has accomplished this result aims directly at the discouragement of drinking. Fixed salaries are paid those who liquor but no profit is given to the agents who sell them. Only one drink in three hours is allowed the same purchaser. And habitual drinkers, or those under the influence of liquor, are not served at all. The net earnings are divided between the state and municipal treasury, after a certain percentage is paid the agricultural society. We should be glad to have a fair trial given by some state of this country to this method, whereby it has proved possible in Sweden to pulverize the rum power.—Toledo Blade.

ALCOHOL IN THE SYSTEM.

Chronic Illnesses Brought on by the Use of Liquor.

The immediate effect of a moderate amount of alcohol is a feeling of increased vigor. Ideas are increased in quickness, but lose in concentration. The system soon demands the stimulant more frequently. Abstinence is followed by suffering. The hand loses its steadiness, the brain its clearness. Insensibility add to the drain on nervous force, and the patient instinctively resorts for relief to the poison which is the direct cause of his condition. In time these symptoms become intensified, and evidence of chronic degenerations manifest themselves, scarcely an organ in the body is exempt. Alcohol in the stomach retards digestion by paralyzing terminal nerves, and by a chemical action on the pepsin of the gastric juice produces changes in the secretions of the liver, and vitiates the processes throughout the whole alimentary tract, by causing a perverted action of the sympathetic nervous system. Partially digested food passing from the stomach to the intestines becomes subjected to abnormal fermentations. As a result, poisonous products designated by modern chemists as ptomaines and leucamines are formed. Consequently these products are absorbed into the system and are auto-poisoning results. The lungs and skin undertake to assist in relieving the system of effete material, as shown by the peculiarly disagreeable odor of breath and perspiration persisting for days after cessation from the use of alcohol. These patients will be found to suffer from chronic catarrh of most of the mucous membranes, notably the stomach, and chronic liver and kidney

changes leading to cirrhosis and Bright's disease. Degeneration and resultant weakening of the walls of blood-vessels predispose to rupture (usually in the brain), producing apoplexy.—Dr. E. F. Arnold in North American Review.

WORSE THAN WASTED.

The Large Amount of Money Squandered in England on Useless Stimulants.

According to the Statist, even six glasses of wine daily (divided between a family of two or three persons) means £18 5s. a year, and six glasses of spirits means £24 6s. 8d. a year. And as for the poor it is perfectly appalling to think that as I know by experience in lairs of the utmost squalor, where the parents are always begging and the children always starving, they manage to find money enough, somehow, to keep themselves constantly muddled with two-penny ale! Socialists, laborers, and plump their wives and children into abject irretrievable misery because they will not—will not, until at last they can not—resist the tyranny of a brutal and self-created appetite.

The stream of horrible profits which drains the poor into the enormous reservoir of the drink trade is a stream swollen by untold misery to the innocent, and a stream which everywhere leaves the slime of its overflow over devastated areas of society. But, apart from drunkenness, and all its ruinous incursions upon the well-being of our country, the amount of hopeless waste caused by the drinking habits of our poorer population, is the main cause of the pauperism and demoralization with which for so many weary years the best men have struggled in vain.

If there were no other and deeper grounds for temperance efforts, they would be amply justified by the immense prosperity which the working classes might achieve for themselves if they would divert into the channels of useful trade the vast mass of wealth amounting, according to some calculations, to £500,000,000 a year—which they spend on an article of consumption which is not a food, but a needless stimulant; and which even in measures that are deemed moderate, is to large multitudes of men a source not of strength, but of weakness, not of health, but of widespread anguish and disease.—Contemporary Review.

PERSONAL RIGHTS.

A Shallow Excuse Raised in Defense of Drunkenness.

The drunkard insists on destroying himself, his family, his property, and his neighbors. He has no right to be a nuisance to himself, his family, his neighbors, and the public. Society endures this, and the plea of personal liberty is raised when his conduct is questioned. Science indicates that such conduct is insane. That the drunkard has no right to any liberty that brings pain to himself, his family, his neighbors, and the public. He has no right to be a source of suffering and loss to any community. That he has no right to marry and entail on the next generation weakened vitality, diseased tendencies, and incapacities to live normal lives.

No man has a right to destroy his reason by drink, to become diseased by drink, to destroy his moral sense and conception of right and wrong.

The higher laws of duty demand that such conduct be repressed by depriving the victim of liberty which he has no right to enjoy.—Journal of Inebriety.

TEMPERANCE TIDINGS.

Even a brewer one hundred years ago wrote: "Through drink there are half a million homes to which happiness never comes."

An English syndicate is reported to have agreed to pay fifty million lire annually to Italy for the monopoly of its traffic in alcohol.

The statement was recently made in the German reichstag that there are eleven thousand persons in Germany who are suffering with delirium tremens.

The St. Louis Globe-Democrat calls attention to the significant statement of a specialist, Kauff Ebling, that all forms of insanity, from melancholia to inebriety, are caused by alcoholism.

Reference to the matter of taking the pledge, John B. Gough once said: "If the pledge had been offered me when I was a boy in Sabbath-school, I should have been spared those seven dreadful years."

The Army Temperance association of India is reported to have enrolled 100,000 members of the entire British army in that country, thus proving that it is quite possible for Europeans to live in India without alcoholic stimulants.

Postmaster-General Bissell, announces his intention not to appoint as postmasters any persons engaged directly or indirectly in the liquor business. He says he does this because convinced that any man who is directly or indirectly interested in the liquor business is in a measure unfitted by his occupation for the discharge of all the duties of the postal service.

Remarking the offspring of habitual drunkards, says Dr. Paul Garner, of Paris, who has made a special study of children of the shams. "There is a law in the very nature of these young wretches that the psychologist sees clearly and notes with apprehension—the absence of affectionate emotions, and where they did not become lunatics they show insensibility and pitilessness."

How liquor brings all classes to the same low plane is shown by Mr. G. R. Sims, the novelist, who found within a short interval of time, in a single saloon lodging-house in London, two officers of the army and navy, a physician, a clergyman, two university men (one of whom had kept a pack of hounds, and succeeded to a large fortune), a master of a college and fellow of the royal society, and fellow of the royal academy, and others from similarly good stations in life, all of whom had been brought to the last stage of degradation and poverty through drunkenness.

MISCELLANEOUS.

—Switzerland yields cheese, butter, condensed milk, clocks and watches. —He can never speak well who knows not how to hold his peace.—Plutarch.

—The sexes were made for each other, and only in the wise and loving union of the two is the fullness of health and duty and happiness to be expected.—W. Hall.

—Customer—"Is this a hair tonic that you know well or?" Clerk—"Well, I should think so. It's been on the shelves here for the last ten years without ever being disturbed."—Inter Ocean.

—In Pervandom. —Sculptor—"I should think you would like a marble bust of your husband." Mrs. P.—"I think not; the three-nights-a-week kind is enough for me."—Detroit Free Press.

—Of the presidents of the United States eight have been of Welsh descent—John Adams, Thomas Jefferson, James Madison, James Monroe, William Henry Harrison, James A. Garfield, Benjamin Harrison and John Quincy Adams.

—The patents applied for in Washington last year numbered 40,000. The total number of patents outstanding on January 1 was 545,000. The receipts of the patent office were \$1,500,000, and the expenses \$150,000 less. New York stands first in the number of patents applied for.

—The Hydrographic office has issued a report concerning wrecks and derelicts. It is estimated that the average period of drift is thirty days, but notice is called to the case of the three-masted schooner, *Fannie E. Woolston*, abandoned October 15, 1891, and last seen on February 29, 1894, a period of 830 days, during which she drifted 7,025 miles, the longest track of the kind on record.

—Catherine de Medici, widow of Henry II., ruled France with absolute power for many years during the reign of her son, Francis II., and Charles IX. It was under her auspices that the massacre of St. Bartholomew was planned and executed. In her last days she perceived the evil consequences of her policy in regard both to the people and the nobility, and advised a change.

—One of the most famous widows of antiquity was Agrippina, the wife of Germanicus. During the lifetime of her husband she attended him in all his campaigns and shared his dangers. Suspecting that her husband had been poisoned, she had his corpse removed to a desert island, and was herself soon after strangled with such indignity by the Romans that she was driven to despair and starved herself to death.

—An old Scotch lady who had no relish for modern church music was expressing her dislike to the singing of any hymn when her son, a young man, who was a neighborly neighbor, said: "Why, that is a very old hymn!" David sang that anthem to Saul. To this the old lady replied: "Well, well! I too for the first time understand why Saul threw his javelin at David when he had sung for him!"—Presbyterian.

—Lady Huntington, the illustrious patron of the Methodists, was a widow of forty-five years. She lived to be 90 years old, and retained the vigor of middle life almost to the end. Her benevolences were innumerable, and she founded a number of churches and societies. She died in 1842, and was buried in the cemetery of the Methodist church. She was a devoted wife and mother, and her life was a model of domestic virtue.

—Some one who understands human nature has written the following: "Mother—I wish you would rattle your keys over my head once a day, when I've got a sprain in my wrist, or the rheumatism in my back, or growing pains in my right leg, or an'—an'—an' toothache." Mother—"After you have rattle the leaves into a pile, you may set it on fire and jump over it. I've got a sprain in my wrist, or the rheumatism in my back, or growing pains in my right leg, or an'—an'—an' toothache." Mother—"After you have rattle the leaves into a pile, you may set it on fire and jump over it."

—The Cadillac (Pa.) Gas and Water Company recently asked for an injunction restraining the Cadillac Traction Company from laying its tracks above the water main because of electrocution. The case was argued in the court, and Judge Saffer said, as it is an important case that involves millions of dollars worth of property throughout the country, it must be fully investigated. The case was continued so that the railway company may take testimony.

—English collars have somewhat lost popularity in New York. It is not that English collars are too heavy for summer wear, and added that buyers sometimes complained that such collars shrunk in the washing.

—Some unpleasant appearing statistics have just been issued by the French government. Explanations of the figures may come later to tone down the evil impression, or explain it away. In 1885 about 37,000 bottles of absinthe were retailed in France; in 1892 over 126,000 bottles were similarly sold, and there has been a marked increase in the consumption of all other alcoholic drinks the republic. Between 1881 and 1883 the average annual number of condemnations by the law courts was 86,000; in 1885 it had risen to 137,000. Increase of population had little to do with the increase of figures, for in recent years the excess of births over deaths in the country had varied from 10,000 to nearly 40,000 a year.

ROBIN OF WHITE PETTICOATS.

The reign of white petticoats predicts for several months, approaches slowly. The lifted dress coat skirt still shows the dainty silk and lace trimmed petticoats in a more bewildering variety than ever. For wear under white and delicately tinted lawns, mousseline de soie, and other gauzy materials nothing is so satisfactory as an impalpable, yet nipped gown of it, and except under gingham gowns of the palest variety the muslin or cambric petticoat has no sphere.—Chicago Tribune.

IDENTIFICATION CARDS.

The Way to Avoid an Unpleasant Hospital Experience.

It is an unusually careful woman who provides herself with any means of identification when she takes her walks abroad. The popular impression in the feminine mind seems to be that when a woman is run over by a cable car or faints in a crowded store or succumbs to heart disease on the street some heavenly knowledge will come to her rescuers as to her identity. She relies on chance to spare her family hours of agony, or may be days of uncertainty, as to her whereabouts and condition. In her pocketbook may generally be found samples.

Of course, therefore, women who are two or three cards with the names and addresses of recently moved friends, a sentimental clipping or two, a recipe for a face lotion and the like, but nothing to give a man or woman who picks her up in a swoon the slightest idea of her own name or address.

Of course, these women whose embroidered handkerchiefs and underwear give their initials, whose monograms adorn their umbrella handles and whose cuff buttons are also a means of identification, but these are comparatively few, and initials are not a substitute for full names and address. If Miss A. L. D. is picked up unconscious in the street or suffers in a railway accident, her family does not know of her plight until their own searching or the newspapers bring them the information. But Miss Annie Louise Dobbs, of the Lebanon, New York City, is found injured, or unconscious, it is a comparatively easy matter for the ambulance doctor to see that her family is informed at once of her state. If Miss Annie Louise Dobbs, furthermore, a line about her some further, a "Notify L. R. Dobbs, Boston, Trumpeter," the task is made doubly easy and the delay lessened.

These are careful fathers and mothers who have imposed upon the ambitious young women of their families, who live and study in a distant city, a lesson to be learned by all young women without full means of identification. A card with the young woman's name and New York address and her father's address constitutes the usual identification certificate. But cards have been taken to be mislaid. For the benefit of young women who have the reprehensible habit of not knowing what they have done with their belongings, a stationary identification card is necessary. One young woman has had made a broad silver bracelet, on which her name and address are engraved. This is not an ornament for the young woman adorns her wrist, and consequently, she clasp it above her elbow. She is happy in the thought that the railroad disaster or the swoon will not find her unprepared.—Pittsburg Chronicle-Telegraph.

THE MASS OF JUPITER.

Facts and Theories Concerning the Huge but Distant Planet.

Taking the earth's mean distance from the sun at 92,796,350 miles, as given by Harkness, the mean distance of Jupiter from the sun will be 482,463,750 miles. The eccentricity of its elliptical orbit being 0.01825, its distance from the sun at perihelion is 479,567,500 miles, and at aphelion 505,360,000 miles. Between its greatest and least distances, therefore, there is a difference of 25,792,500 miles, or about one-half the earth's mean distance from the sun. The inclination of Jupiter's orbit to the plane of the ecliptic being only 1 degree, 18 minutes 41 seconds—or less than that of any of the other planets, with the exception of Uranus—the planet never departs much from the ecliptic, and hence it was called by the ancients the "ecliptic planet." Its period of revolution round the sun is 11 years, 314.8 days.

The inclination of its axis of rotation being nearly at right angles to the plane of its orbit, there are practically no seasons in this distant world. As the attraction of Jupiter's enormous mass would render the materials near its center of much greater density than those near its surface, the latter must be considerably lighter than water and may possibly be in the gaseous state.—Gentleman's Magazine.

A Good Advertisement.

The gentleman from Boston was stopping with a farmer landlord, and a new guest arriving, he was much impressed by the conversation of the Bostonian. Later he was talking with the landlord, who was not anything like so languid as the guest.

"By the way," he said, "that gentleman has an extensive vocabulary hasn't he?"

The landlord was greatly pleased. "Well," he responded, "you'd ought to see it when he first come, 'twasn't nothing to speak of; he's only been boardin' with me two weeks, and he's had to let his valise out four times."—Detroit Free Press.

—Were we to take as much pains to be what we ought to be as we do to disguise what we really are, we might live like ourselves without being at the mercy of those who disguise whatever is beneath.

A LESSON FROM TOLSTOI.

One of the Great Russian Humanitarian's Popular Tales.

In playing children found in a ravine something of the size of a hen's egg, with a little hollow running along the middle of it, and looking like a grain.

This was noticed by a traveler, who bought it from the children for five copecks.

He took it over to the capital and sold it to the czar as a curiosity. In a moment the wise men and gave orders to find out what the thing is—an egg or a grain.

The wise men thought and thought over it and were unable to give an answer.

The object was lying on the window sill, when a hen flew into the room and began to peck at it and pecked through it a hole that proved to everybody that it was a grain.

The wise men came then to the czar and told him that the thing was a grain of rye.

The czar was astounded and he ordered the wise men to find out where and when this grain was thriving. The wise men thought and thought over it, looked over the books, and could not find any elucidation.

They returned to the czar and said: "We cannot give any answer. In our books we cannot find anything about it. We must ask the mouzhiks (peasants). Perhaps somebody has heard from their forefathers where and when such grain was thriving."

The czar sent for and ordered to be brought before him every old man of the mouzhiks.

An elderly mouzhik was found and brought before the czar.

There came an old mouzhik, shriveled and toothless, stepping in with difficulty on two crutches.

The czar showed him the grain, but the old man is already without sight, and only somehow could he examine it by the touch of his fingers.

The czar questioned him: "Dost thou not know, little grandfather, where was such grain thriving? Hast thou not sowed thyself such grain on the fields? Or hast thou not brought during thy lifetime somewhere such grain?"

The old man is deaf, and with extreme difficulty he could hear the question, and also with extreme difficulty comprehend it.

Then he answers: "No, on my fields I have never sowed such grain, never sowed and never brought it."

"When we bought our rye it was always small grained. But I must ask my father, perhaps he has heard where such grain was thriving."

So the czar sent for the old man's father to be brought before him. The father of the old man was found and brought before the czar. He was an elderly man, walking with one crutch.

The czar showed him the grain. The old man saw with his own eyes and examined it thoroughly.

Then the czar said to him: "Dost thou not know, little old man, where such grain was thriving? Hast thou not sowed thyself such grain, or perhaps, hast thou not brought somewhere such grain?"

Though the old man was a little hard of hearing, he heard better than his son, and he answered: "On my fields I have never sown nor moved such grain, and also I have never brought it, because in my time money was not established. Everybody subsisted on his own bread, and in need we shared it each with another. I do not know where such grain was thriving, though our rye was of large grain and better yielding than this of the present time. I have never seen one of this size. I heard from my father that in his time crops were large grained, better and better yielding in thrashing. He must be questioned."

The czar sent for the father of this old man, and the grandfather of the old man was found and brought before the czar.

This old man appeared before the czar without crutches, walking easily, his eyes serene, hearing well, and speaking distinctly and intelligibly.

The czar showed the grain to the grandfather.

The old fellow looked at it, turned it over, and said: "It is a long time since I have seen this older-time grain." He bit a small piece off it, chewed it a little, and said: "Itself is it."

"Tell me, little grandfather, where and when this grain was thriving? Hast thou not sowed on thy field such grain? Or hast thou not brought in thine age such grain from the people?" And the old man answered:

"Such grain was thriving everywhere in my time. With this grain I was fed myself and I have fed others with it. This is the grain that I have sowed, moved and threshed."

"Tell me, then," said the czar, "little grandfather, hast thou bought somewhere this grain, or hast thou sowed it on thine own field?"

The old man said: "In my time," said he, "none could ever think of such a sin as to sell and buy bread, and of money there was no idea; everybody had plenty of bread."

Then said the czar: "Tell me, little grandfather, where hast thou sowed this grain and where was thy field?" And the grandfather answered: "My field was God's earth. Wherever we plowed there was a field. The earth was free. Nobody called it 'mine earth.' Mine was called only the labor."

"Tell me, then," said the czar, "two more things,—firstly, why was *thou* thriving such grain, and it is not thriving nowadays? and, secondly, another thing, why thy grandson walked with two crutches, and thou canst here walking easily, and thou hast serene eyes and strong teeth, and thy speech is intelligent and affable. Why? Tell me why, little grandfather, those two things exist now." And the old man said: "These two things exist now because people have ceased to live on their own labor and began to lust after some one else's labor. In the olden times we lived to please God. We had our own and we were not greedy of the gain of our neighbor."—From the Russian.

FIRESIDE FRAGMENTS.

—Risk Pudding.—Heat dry, stale bread in the oven until hard, then roll fine and soak in milk until swollen, afterwards adding sugar and a couple of well-beaten eggs, a pinch of salt and baking. Chopped sweet apples are an addition. Eat with milk or cream and sugar.—Orange Judd Farmer.

—Baked Codfish.—Scald the fish; shred it very fine. Boil some potatoes; while hot put in a large lump of butter; mash them thoroughly, mix potatoes and fish together, and beat to a cream with a wooden spoon. Put the mixture into a pudding dish, butter the top and bake until nicely browned. Use one-third more potatoes than fish.—Boston Budget.

—Pickled Cherries.—Put cherries into a jar and pour over them as much hot vinegar and sugar as will cover them. To each gallon of vinegar allow four pounds of sugar. It should be boiled, skimmed, and while hot poured over the fruit. Let stand a week; pour off the vinegar and boil as before; pour hot over the cherries a second time. As soon as cold, seed closely.—House-keeper.

—Baked Salmon.—As soon as the salmon is caught, open it and cut out the spinal column. Wash it in clean water and dry on a clean towel. Rub the fish on the meat side with table-spoonful of sugar, and on both sides with some fine salt. Place it with some dill in a large clean stone jar, and turn it daily for two or three days, when it is ready to eat, either as it is or broiled. Dill always improves the taste of salmon.—Harper's Bazar.

—Citron Cakes.—One pound of powdered sugar, one pound of sifted flour mixed with one teaspoonful of baking powder, six whole eggs (or the yolks from the preceding recipe, with two eggs mixed with a little milk, will do as well), four ounces each of citron and orange peel cut in small pieces. In a bowl add the other ingredients and bake in small cakes on buttered pans. Perhaps it may be necessary to add a little flour.—Good Housekeeping.

—Wilted Lettuce.—Place in a vegetable dish, lettuce that has been very carefully picked and washed, each leaf by itself, to remove all insects. Cut across the dish several times, and sprinkle with salt. Fry a slice of fat ham until brown; remove meat; heat the grease until very hot; add one cup of good vinegar, and pour it boiling hot over the lettuce. Be certain to have the fat so hot that when the vinegar is poured in it will boil immediately. Add half cup or a cup of vinegar, according to the strength of vinegar and quantity of lettuce.—Farm, Field and Fireside.

—Celery Soup.—Cook two small heads of celery (from which the green leaves have been removed) for forty minutes in a quart of water in which has been chicken or beef or veal in which it has been boiled. Boil a pint of milk, half an onion and a sprig of parsley together. Mix two even tablespoonfuls of flour with four tablespoonfuls of cold milk and add to boiling milk; cook ten minutes. Mash celery in water in which it has been cooked and stir into boiling milk; add two tablespoonfuls of butter, salt and pepper to taste. Strain and serve at once. A cupful of cream added just after the soup is put into the tureen is a great improvement.—Farm and Fireside.

BRILLIANT COLORS.

Beauties That Meet the Eye on Approaching the Bermudas.

The attention of the traveler is at first attracted by the colors of the waters as he approaches land, and in the innumerable bays and inner sounds. The blue reminds him of the Mediterranean, where the Mediterranean is at its best, but among the islands the blue changes to emerald as vivid as the sapphire, to Tyrian purple, to a blending of purple and maroon in the shallow bays, while if he looks across any wide stretch of it there is an iridescent appearance, a shimmering of shifting colors like changing silk. Only the colors seem more solid, and one doubts whether they are sky reflections, and not solid colors of the bottom seen through the transparent water. For the water at a great depth is absolutely transparent. On the eastern coast of Sicily, below Taormina, are seen just such wonderful colors. Along the shore, just such sparkling blue in the sun, and there it is associated with ages of romance and adventure, with suggestions of treasure wrecked along the coast in the galleys of Phoenician and Greek voyagers. It is here difficult to believe that these brilliant colors are inherent in the water, and the fancy is quickened by some of the fish that sport in these halcyon seas. One of these is the angel fish, flat and oval in form, of coralline blue, with two long streamers edged with yellow, apparently one of the happiest, as he is one of the most graceful, of all marine inhabitants. Another is the parrot fish, a larger animal, so called from his colors of green and brown, who moves about vigorously with his long fins, that imitate in their motion the stroke and recovery of the Yale boat crew. His head is brown, his back is vivid green in shining scales, and his tail is brown again, with fine shadings of green. He knows that he is one of the handsomest of swimming things.—Charles Dudley Warner, in Harper's Magazine.

Muskats as Household Pets.

Mrs. Sarah Howard, of Houlton, has two muskats—a couple of muskats that came up the drain into her cellar and thence even got into her kitchen. They have now got so tame that they eat out of the cat's saucer and show no fear of that individual, who on her part does not deign to notice them, though her kittens sometimes cuff the rats. One day they got straw and pieces of the broom and made a nest under the cupboard. They will come close to one's chair and snuff one's hand when reached down to them. When thrust milk they sit beside the saucer, thrust both paws into the milk, and then lap it from their paws, sometimes taking a half hour to consume a small saucer of milk.—Leviathan Journal.

THURSDAY, JUNE 21, 1894.

Shall the Republic do its own work? is the title of the famous speech of Hon. J. P. Jones, U. S. S. of Nevada, which has just been re-assigned by the American Protective Tariff League. The speech makes a pamphlet of 96 pages, and is of great value. Send stamps to cover cost of printing. Address W. F. Wakeman, General Secretary, No. 135 West Twenty-third Street, New York.

A well conducted business men's association, board of trade, improvement club, or any organization under any other name, having for its object the forwarding of the interests of the place in which it is located, is a great factor in pushing the claims of the town to the front and making it boom. Every town has a large amount of latent enterprise lying dormant, awaiting the opportunity for exercise. There are also many desirable business and manufacturing enterprises seeking locations which would be warmly welcomed and substantially encouraged if some medium were provided through which the citizens and those seeking investment could confer and negotiate. The phenomenal progress of all the "magic cities" of the south and west is mainly due to the efforts of these organizations.

Let us have a well supported business men's association, composed of wide awake, go ahead, progressive citizens, who will make known to the world the inducements our town offers for the location of manufacturing industries and other enterprises which will employ labor, make business for our merchants and furnish a home market for the product of our farms. The time is now ripe for this movement. A great change is being wrought in manufacturing circles. The exigencies of competition and the conflicts with the question of transportation and other economic questions have convinced owners of manufacturing plants that it will be good business policy to establish themselves in communities convenient to the raw materials in the smaller cities and towns, where real estate is cheap and expenses low.

Experience shows that in industries situated remote from the congested population of large cities strikes, lockouts and other troubles are infrequent, and that the relations of employer and employees are much more pleasant. Under our interstate commerce laws the advantages that great railroad centers once had over less favored localities have been overcome, and this inducement will no longer draw manufacturing plants to those places, and the locality where the raw material can be procured cheaply and quickly will be the ideal location for the future manufacturer.

These industries will in the coming years be located somewhere. Shall we have our share of them? It remains with our readers to decide.

Signs of the Times.

All the signs are of a pending political revolution the like of which has scarcely been seen since the war. Every election held within the past year points to the same result. The chief states voting last fall were Pennsylvania, Ohio, New York and New Jersey. The last two went strongly Republican. Ohio gave 80,000 majority and Pennsylvania 138,000. Of the states voting this spring, Rhode

Island has given an unprecedented 65-year majority. Pennsylvania gave Grow for Congress at large 180,000, and now Oregon, which for the last eight years has had a Democratic governor, goes Republican by 15,000. In special congressional elections in New York City, Democratic majorities of from 7,000 to 11,000 were wiped out, and in Illinois a judicial district of twelve counties, all of which but one went Democratic in 1892 with a combined majority of 7,000, this week held an election for supreme judge in which every county but one went Republican, with a total majority of 4,000, a change of 11,000.

All these straws tell but one story. The people are disgusted with the blundering incompetency of the Democratic party. Independent and conservative Democrats who have had faith in the ability of their party, to rule the country if once it were given control of all departments of the government, confess to disappointment and chagrin at the spectacle presented by this 53rd Congress and at the turmoil and business disaster with which it has filled the land. It is stated on good authority that one year of this administration has cost the nation more than the civil war. The expenses of the army and navy from 1861-65 were about \$3,500,000,000, and the payments for pensions have been a little over \$1,500,000,000 or a total of \$5,000,000,000 as the cost of the war. In a recent issue, Bradstreet's, a non-political publication, gave the figures for the volume of trade of the whole nation for nine months in 1892 and 1893 and for January, 1894, which show that in these ten months the loss to the country's business exceeds the total cost of war and all pensions up to date.

This is a startling comment. It is no wonder Democrats are everywhere voting to rebuke their party. With such a record as that they feel they cannot afford to be Democrats. Their party is proving itself a national nuisance. They find it has failed to grow up with the country. It undertakes to govern this nation on the same narrow policy that characterized it forty years ago. And herein it is merely proving anew that its chief use is as a party of opposition and obstruction. It serves as a brake and check to the party of progress when the latter's policy displeased its own members, a sort of rallying point for that general body of voters who frequently ally themselves with the "opposition" in order to register a protest. This is not a mere partisan view. It is simply history, the cold statements of a truth which Democrats themselves in large numbers are now declaring.

Secretary Morton's Food Charts.
Secretary J. Sterling Morton is a valuable man to have in office in times like these, when tariff reformers, by their tinkering with the industrial life of the nation, have got the business interests of the country into the prone condition in which they are to-day. He realizes that many men are out of employment; that many more are working fewer hours; that others are living on reduced incomes. This makes economy necessary, and herein lies the value of a man like Mr. Morton at the head of the Interior Department.

He has made a study of the best method of getting the most nutriment out of different sorts of food. He has reduced beefsteak and mutton chops and pork and beans to their relative food values, and his office is hung with charts in which these edibles are represented by colored lines of different lengths. It would be impossible in a short article like this to do justice to Mr. Morton's colored lines and tabulated deductions, but the government is about to issue a pamphlet giving the information in detail, and in such plain terms that she who runs the kitchen can read and understand.

One of the things Mr. Morton's pamphlet will explain is that the workingman of the United States is very extravagant and wastes a great deal of money in food that he might save by a careful study of his diet. This fact, it is claimed, demonstrates the usefulness and value of these investigations which Secretary Morton says is but the beginning of a campaign of education for the people. He proposes to require the experimental stations of the Agricultural Department to

assist in the prosecution of this work, and will probably establish food laboratories. He will show that roundsteak and chuck are the most nutritious, and beside providing sustenance in larger quantities than the deceptive tenderloin, they give the teeth exercise which is good for them, and keep the jawbone from becoming rusty at the hinges.

It is always desirable to know how to obtain the best results from anything, and food is no exception to this rule. At the present time the study of this problem is more necessary than it has been in many years in the United States. Secretary Morton no doubt feels it incumbent upon him to instruct the people how to subsist on a tariff reform basis in tariff reform times, but the people as a body will much prefer to see the return of the days of tenderloin steak.

Sunday School Workers' Convention

A Sunday school workers convention was held at Mountain Lake Park, June 15-17. The 17th session was held on the evening of the 15th. The Rev. Mr. McCauley, the energetic pastor of the Lutheran Church, was elected president. He is an excellent and enthusiastic presiding officer. J. A. Enlow was elected secretary. Supt. Rudisill delivered the address of welcome. Responses were made by John Shartzer, Esq., of Oakland; Rev. Geo. Bishoff, of Johnstown, and Rev. McCauley. The session was a delightful one. About a dozen workers were present from Oakland.

Saturday morning very interesting papers and addresses were had. The discussions were participated in by Rev. C. T. Weede, of Keyser; Mrs. Townsend, of Zanesville, O.; Rev. Geo. Bishoff, Rev. McCauley, Miss Jennie Smith and others.

In the afternoon Rev. C. T. Weede and Rev. McCauley presented strong papers on Sunday school work, which were discussed by Rev. G. W. Kepler, of Oakland, and others.

At night Squire Hinebaugh, of Oakland, spoke on the importance of temperance lessons in the Sunday school. Remarks were made by Capt. Hayden, Mr. Clune, Capt. Sumner and Supt. Rudisill.

Sabbath morning Supt. Rudisill preached from the text "Be Zealous." Rev. 3:19. The convention was a success. Delegates were present from a number of schools. The Methodist choir furnished the music.

Grantsville Normal Class, July 2, 1894.

The Grantsville Normal Class will open Monday, July 2, 1894. The reason it has been postponed is the instructor, principal of one of the high schools of Baltimore county, Md., will not be exempted from the duties of his present position until June 29, 1894. The studies to be taught will include 1st and 2nd grade work. The pupils can take all or part of the studies. During the term talks will be given on the following subjects: School Government, School Methods, School management, my first and last days of school and also on the Art and Science of Teaching and Theory and Practice. These talks will follow after certain words and terms have been explained. These talks are free to all interested in education.

Attention will be given to those studies that the student will need in practical life, especially book-keeping, business forms and correspondence, arithmetic, also Frank's method of map drawing and the studying of geography and history, taking all three as one.

Your instructor will be in touch with your work, knowing by experience what it is to obtain an education with poverty holding you check, and the difficulties attending rural teaching. He will be glad to get acquainted with you all.

Terms: First grade \$6; 2nd, \$5; special branches in first grade, \$6; second, \$5. As harvest will be on hand anyone wishing to enter after harvest will be charged in proportion to the time he enters. If possible be on hand at the opening of the class. Communications invited. The school will continue during July and August.

Address, AMOS R. FRANK, Elio, Md.

Public School Distribution.

The Comptroller of the Treasury has made the quarterly distribution of the public school tax to white and colored schools in the several counties and the city of Baltimore. The distributions to Allegany and Garrett counties are as follows: Allegany, white schools, \$7,366.08; colored schools, \$329.38. Garrett, white schools, \$2,498.52; colored schools, \$44.32. The distribution to the entire state, total \$162,234.93 white schools, and \$49,500 colored schools.

BRILLIANT DISPLAY OF MAGNIFICENT FIREWORKS IN THE EVENING.

Reduced Rates on the B. & O. R. R. from Martinsburg, Fairmont, Clarksburg and all Intermediate Points.

Come to Oakland on the Fourth!

OUR WASHINGTON LETTER.

WASHINGTON, June 18, 1894.
It might be difficult to say whether the sugar trust, Democratic Senator or the free trade, Republican Senator, is the more honest, but the sugar schedule is no longer, thanks to a robust expression of public opinion by the newspapers of the country, confined to the House. A movement is now on foot to modify the sugar schedule before the formal vote is taken on it in the Senate. If it were not for absolute pledges which Democratic Senators have made there would be no doubt of the success of the movement. Still the disquiet of some of them is so marked that they may repudiate their pledges, preferring to offend the sugar trust rather than to lose the respect of thousands of their constituents.

The work opened with much uncertainty concerning the tariff bill. Senator Harris expected to have disposed of the sugar schedule by the middle of last week, but it is still undetermined, although it will be finished early this week, unless the three to fifteen percent duty is put upon it. It is expected that the debate on the income tax will occupy nearly of a week, and it is not yet certain that it will be reached this week. So there is little probability that the final vote will be reached before the first of July.

That "where there are more ways to kill a dog than hangers" is proven by the manner in which Mr. Cleveland is trying to make Congress obey his request, not to enter upon any financial legislation at this session. The bill providing for a currency commission, which shall spend six months in investigating the subject before submitting its recommendations to Congress, is Mr. Cleveland's scheme to prevent action upon any financial bill, and the administration influence is being used to get it favorably reported from the House committee on Banking and Currency.

If Mr. Till, the man who gave the first information (for which he received several thousand dollars in cash) that the Carnegie Companies were not properly carrying out their contracts with the government for the making of armor plate for war vessels, is not one of the greatest liars of the age the Carnegie companies, instead of being fined a few thousand dollars, by Mr. Cleveland, should have been made to refund every dollar received for botched work and to have forfeited their contracts. Still has been here for several days testifying in the investigation that is being conducted by the House Naval committee. The most of his testimony can be verified, as he specifies every piece of bad armor that was delivered to the government, and as it can all be got at and examined and probably will be in course of time. The odd part about the business is that Mr. Cleveland knew all about this man's testimony when he set aside the decision of Secretary Herbert in this matter and himself made one very much more favorable to Carnegie, who evidently knew whose interest he was serving when he publicly endorsed the Wilson tariff bill in its original form, before going to Europe for an indefinite stay.

The explanation given is no longer monopolized by Democratic Senators. Representative Richardson, of Tenn., had a very bad case of it when, in reply to the charge of a local paper that he had been using his position as a member of the House committee on the District of Columbia to speculate in real estate, he explained by saying that he had bought some real estate on speculation, which he sold to a real estate agent, without knowing that it was purchased for a street railway company which had a bill before the D. C. committee, and that it was a mere coincidence that he (Mr. Richardson) happens as a member of that committee to report a bill favorably to the House, which that railroad company was very anxious to have passed, just four days after the sale of that real estate. Such coincidences are dangerous to public men.

The last Democratic Senator to make an explanation was Ransom, of North Carolina, who confessed, after the facts had been ascertained by newspaper men, that his son, who is his committee clerk, had been speculating in sugar trust stock. It is not probable that Mr. Ransom would have ever said anything about it if the Senate investigating committee had not in deference to a general public demand examined every Senator at present in Washington, going alphabetically through the list. Senator Quay surprised nearly every body when he testified that he had been speculating in sugar stock, that he had a perfect right to do so, and would whenever he felt so inclined. The greatest interest is felt in the testimony of Senator Gorman, who is still absent and reported to be sick. It may be that Senator Gorman will join the other Democratic Senators who helped him fix up the

sugar schedule in denying everything, but there is reason to believe that he could tell some very sensational things in connection with this business if so disposed. But it is hardly probable that he will be so disposed when his testimony is taken.

Dear Park.
To those contemplating a trip to the mountains in search of health and pleasure, Deer Park on the crest of the Allegheny Mountains 3,000 feet above the sea level, offers such varied attractions as delightful atmosphere during both day and night, pure water, smooth, winding roads through the mountains and valleys, and the most picturesque scenery in the Allegheny range. The hotel is equipped with all adjuncts conducive to the entertainment, pleasure and comfort of its guests.

The surrounding grounds, as well as the hotel, are lighted with electricity. Six miles distant on the same mountain summit is Oakland, the twin resort of Deer Park, and equally as well equipped for the entertainment and accommodations of its patrons. Both hotels are upon the main line of the Baltimore and Ohio Railroad, have the advantages of its splendid Vestibled Limited Express trains from the East and West. Season excursion tickets, good for return passage until October 31st, will be placed on sale at greatly reduced rates at all principal ticket offices throughout the country. One way tickets reading from St. Louis, Louisville, Cincinnati, Columbus, Chicago, and any point on the B. & O. system to Washington, Baltimore, Philadelphia or New York, or vice versa, are good to stop off at either Deer Park, Mountain Lake Park or Oakland, and the time limit will be extended by agents at either resort upon application, to cover the period of the holder's visit.

The season at these popular resorts commences June 23rd. For full information as to hotel rates, rooms, etc., address George D. DeShields, Manager, Deer Park, or Oakland, Garrett County, Maryland. 14-2.

Notice to Trespassers.
All persons are hereby warned not to trespass upon that part of Military Lot No. 1899, lying on the south side of the B. & O. R. R. at Altamont, and owned by the undersigned. All persons so caught trespassing will be prosecuted to the fullest extent of the law.

Mrs. Margaret E. McCORMIE, H. McCORMIE, Agent.

Property for Sale.
The undersigned offers at private sale his house and lot at east end of Oak street, Oakland, Md. This is a desirable property, and will be sold on reasonable terms. Good well and all necessary outbuildings attached. Call on or address, THOMAS SARGENT, 13-14 Oakland, Md.

Notice.
If you want fresh bread free of alum and white corn meal get it at B. Frieze's, next door to postoffice. He has been in Oakland for more than nine years and all his bread is stamped with his name on top of the loaf. See that you get the above. It will not cramp you after eating. 13-14

Notice.
To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to MICHAEL W. DEIST, 7-201 Grantsville, Md.

Land for Sale.
The undersigned offers for sale a part of "Swan Meadows," lying about 4 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINCELL, Oakland, Md.

SHERIFF'S SALE.

Under and by virtue of a writ of fieri facias issued out of the Circuit Court for Garrett County, at the suit of Thomas A. Nettikin against Adam S. Sell, the same being No. 7, sheriff did seize and take in execution the following described property of the said Adam S. Sell by a levy upon the same the 18th day of April, 1894, to wit:—one two horse wagon, one white mule fourteen years old, one horse eleven years old, one sorrel mare, and one cow eight years old, one settled cow seven years old, one bull calf, one better, and the following described parcel of land situated about six miles north of Oakland in Garrett County, to wit:—all that part of a tract of land called "Good Hope" containing one hundred and twenty-six and a half acres, which is described in a deed from F. R. Nettikin and wife dated the 27th of April, 1892, and kin and wife dated the 27th of April, 1892, duly recorded in Liber E. Z. T. No. 19 fifth for c. c. one of the Land Records of Garrett County. Said parcel of land will be sold subject to a mortgage due F. R. Nettikin, which is recorded in Liber E. Z. T. No. 19 fifth for c. c. one of the Land Records of Garrett County, above described near the public road leading from Oakland to Swan Run, the said sheriff will offer at public auction to the highest bidder on

Saturday, the 23rd day of June, 1894, at ten o'clock a. m. of said day to wit: the above described execution and contents of sale cash on the day of sale. CHARLES W. GORMAN, Sheriff of Garrett County.

Estate of Caroline E. Bell, deceased.

THIS IS TO GIVE NOTICE, That the subscriber of Garrett County, both deceased and living, has been appointed administrator of the personal estate of the said Caroline E. Bell, late of Garrett County, Maryland, deceased. All persons having a claim against the estate are hereby warned to exhibit the same to the subscriber on or before the 10th day of December next; that any claim not so exhibited will be barred by the said order of the court. Given under my hand this 20th day of May 1894. ABEL TOWNSEND, Admin'r. Oakland, Md.

NOTICE.

OFFICE OF THE GARRETT COUNTY SCHOOL COMMISSIONERS. Notice is hereby given that any person or persons using the public county roads or paths for the purpose of hauling or moving any logs, heavy machinery or lumber, or any other heavy loads, will be held strictly responsible for any and all damages to said roads and bridges for reason of such use, and supervisors of roads and bridges are notified to report all damages to this office. IRA E. FRIEND, President. J. S. MEYERS, Clerk.

Chamberlain's Eye and Skin Ointment.

A certain cure for Chronic Sore Eyes, Itch, Sal. Rheum, Scald Head, Old Ulcers, Sores, Fever Sores, Itch, Rash, Pruritus, Scabies, Sore Throat, and Piles. It is cooling and soothing. Hundreds of cures have been cured by its use, and all other treatment had failed. 10 cents per box.

\$40.00 PER WEEK FOR WILLING WORKERS

at either sex, any age, in any part of the country at the employment which we furnish. You need not be away from home over night. You can give your whole time to the work, or you can spare moments. As capital is required your own risk. We supply you with all that is needed. It will cost you nothing to try our business. Any one can do the work. It is a new and profitable trade. Failure is not known with our system. Every hour contains money. No one can make a dollar a day who is willing to work only once in three days at any ordinary employment. Send for free book containing the fullest information.

H. HALLETT & CO., Box 280, PORTLAND, MAINE.

Mrs. John E. Wood and family have arrived from Baltimore and are now at Fernleigh Manor, with the genial Colonel.

Mrs. J. H. Riley, who has been visiting her parents near town for several weeks, returned to her home in Elkins yesterday.

Miss Annie Spedden arrived in Oakland Monday night from the south and will remain here during the summer with relatives.

Miss Orley Dunham, who has been on a visit to friends at Morgantown, returned to her home in Oakland Monday evening.

Messrs. John Shartzer and E. J. Fringer have rented the store room in Mr. Dixon's building and put in a line of flour, grain and feed.

J. M. Davis & Son have on hand a few two seater spring wagons and single buggies, and a first-class shoe grain drill at reduced prices.

A lot of mixed paints for sale at the Oakland Pharmacy very reasonable. Give us a call when you are ready to do some painting. 13-3t

Mr. O. B. Barnard, of Bloomington, was an Oakland visitor Tuesday. He was accompanied by Mr. Cramer, also of Bloomington.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Rev. Ernest R. McCauley will preach in St. Mark's church Sunday at 10:30 a. m.; Corinth Sunday afternoon at 3; Deer Park Sunday evening at 8.

Now is your chance for a buggy. A. D. Naylor will sell four buggies this week on the installment plan, with approved security, at \$1 per week until paid for.

Misses Nannie and Edith Weber, of Oakland, and Minnie Pollock, of Mt. Savage, were the guests of Miss Nettie Jackson over Sunday. —Loneconing Star.

The Oakland normal school opened with thirty pupils: Accident with twenty. The Grantsville normal, in charge of Prof. A. R. Frank, will open next Monday.

A Cleveland turkey entered a prisoner's cell the other day and found him sorting over six dozen fine saws, a saw frame and a enough tools to cut the jail to pieces.

In 1461 a fashion of gold collars came in. They were of solid gold and inclosed the neck, fastening with a padlock in front. Some of them weighed as much as a pound.

A. D. Naylor has lots of vehicles on hand: Buggies, spring wagons, carts, surreys, buck boards and light road wagons. Give him a call when you need anything in his line. 16-3

A wire message from New York to Auckland traverses a length of line of 19,129 miles, nearly three-fourths of which is submarine cable. It has to be repeated or rewritten fourteen times.

We have a letter from Mr. J. H. Howell, of Duquoin, Ill., who wants to move to this county and purchase a farm. If he comes here many more from his section in Illinois may follow.

Brighten the appearance of your cottage by using a few gallons of ready mixed paint which you can buy at the Oakland Pharmacy very cheap. Guaranteed the best quality. 13-3t

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

Workmen on Friday last began the work of excavating for the new Presbyterian church at this place. The building, which is located at the entrance to the drive on Randolph avenue, will be of stone and is estimated to cost, when completed, about \$16,000. The house is the gift of Hon. H. G. Davis to the congregation at this place. —Elkins Inter-Mountain.

For RENT—Furnished, the very desirable Summer Hotel known as "The Rest," at Oakland, Garrett county, Md.; terms liberal. Apply to CHARLES J. BONAPARTE, 216 St. Paul street, Baltimore. 22-5t

A German carp nearly a yard long and weighing fifteen pounds was caught in the dead pond at Oakland one day last week. This is the largest fish ever caught in the waters on the mountain.

Elwood Offatt and Chas. Shaffer, two Garrett county boys who have been students at St. John's College, Annapolis, returned to their homes last Thursday night to spend their summer vacation.

Mr. Henry E. Felty arrived in Oakland last Friday morning, accompanied by his charming bride. The young couple will reside with Mr. Felty's parents. The band was out on the evening of their arrival and serenaded them.

This morning Mr. Scott T. Jones received a letter from New York stating that Dr. H. C. Alexander, who has been ill in that city for several weeks, was steadily growing worse. There seems to be no hope of his recovery.

Sign boards with the names of the several streets painted thereon have been erected at the street corners in Oakland. Our people now have a chance to learn the names of the thoroughfares within the city limits.

Prof. Charles D. Smith opened his Normal school in Hamill & Little's hall, Oakland, under very auspicious circumstances, having an enrollment of over twenty Monday morning when the session began. There are still a number to come in.

Dr. W. N. Berkley, of McLane & Berkley, Frostburg, will be at the Commercial Hotel Tuesday, July 10th, to treat catarrh and diseases of the eye, ear, nose and throat. Special attention to the examination of eyes for glasses. 16-2t

Sometime ago I was troubled with an attack of rheumatism. I used Chamberlain's Pain Balm and was completely cured. I have since advised many of my friends and customers to try the remedy and they all speak highly of it. STUCK GOLDMATE, San Luis Rey, Cal. For sale by Oakland Druggists.

A picnic and dance will be given at McHenry in McLane's grove on July 4. Music will be furnished by the Accident bands and the DeWitt string band. Nothing but temperance drinks allowed on the grounds. Bring your basket and stay all day. By order of COMMITTEE.

A merry picnic party of young ladies consisting of Misses Cora Hannis, Mollie Stoddard, Nettie Michaels, Annie Kepler, Mand Bosley, Nellie Michaels, Annie Townsend, Nellie Sturgiss and Mollie Peddicord, chaperoned by Mrs. Henry J. Mayers, went to Crellin this morning to spend the day.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street. They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at your own prices. The Baltimore Bargain Store, Oakland, Md. 8-10t

A game of ball was played between the Mountain Lake Park nine and some of the Oakland boys at Highland Park last Saturday afternoon, which resulted in a victory for the Park boys by a score of 32 to 4. There is some excuse for our boys being so badly beaten as none of them had been practicing and the battery received very poor support from the fielders.

It is said there is a capital B on every oats blade this year. Several blades have been shown us and the B was there. Now what does it mean? was asked. Don't know, was the respond. Who does? Our oats men then said that oats blades bore the B before and during the late war, and he thought it meant blood. It might as well mean beer, bread, Boston baked beans, or biscuits, but we think buncombe would suit better. At all events the B was on the blades we saw. How would a C do? for Coxy. Meyersdale Commercial.

Sheriff Wegman accompanied by a number of deputies, went to Bloomington last night to protect the mining property there. This move on the part of the authorities was made necessary by a number of striking miners committing depredations and driving workmen from the mines.

LATER.—The Sheriff and his deputies returned this morning and reported the statement made yesterday to the authorities greatly exaggerated.

On last Thursday morning a telegram was received in Oakland from the State authorities directing Captain R. C. Townsend to assemble his company at the armory and to proceed Friday morning to Frostburg. The company assembled and proceeded to the mining regions where it joined the First Regiment. Upon the arrival of the First Regiment the Fifth Regiment was relieved and returned to Baltimore.

Hon. William Frederick of Friendsville, Md., spent a few hours in town last Monday en-route to Pittsburg. He had with him an iron tobacco box which he purchased in 1854 of the firm of Ross & Johnson of Petersburg, and has carried it ever since. A rough calculation shows that this little box has held in the aggregate a surprising amount. —Confidence Echo.

Quite a merry party composed of Mr. and Mrs. H. J. Mayers, Misses Belle Browning, Elsie Fay, Nettie and Nellie Michaels, Alice Kepner and Nellie Browning, and Messrs. W. H. Spedden, Wm. Weber, D. E. Offatt, Jr., E. H. Bartlett, Jr., and Hicks Long, of Baltimore, went down to Lake Brown last Friday evening and spent the time very pleasantly in dancing, playing social games, etc. They returned to Oakland in the early hours of the morning. Prof. S. C. Smith furnished the music for those who engaged in dancing.

Dr. J. Lee McComas had an experience with a "yellow jacket" Saturday night which he will not soon forget. Being thirsty he picked up a vessel containing some water and placed it to his lips. It being dark in the room he did not notice the "jacket" swimming on top of the water, but soon found out that it was there. The first sip from the vessel drew the insect into the mouth which proceeded very promptly to sting him on the end of the tongue. The doctor said that the sting was very painful as well as extremely dangerous.

I have two little grand children who are teething this hot summer weather and are troubled with bowel complaint. I gave them Chamberlain's Colic, Cholera and Diarrhoea Remedy and it acts like a charm. I earnestly recommend it for children with bowel troubles. I was myself taken with a severe attack of bloody flux, one-third of a bottle of this remedy cured me. Within twenty-four hours I was out of bed and doing my house work. Mrs. W. L. DICKS, Ban-aqua, Hickman Co., Tenn. For sale by Oakland Druggists.

While at Peckskill, N. Y., Mr. J. A. Scriven, a prominent manufacturer of New York City, purchased a bottle of Chamberlain's Cough Remedy. Such good results were obtained from its use that he sent back to the druggist from whom he had obtained it for two more bottles of the same remedy. When you have a cough or cold give this prescription a trial and like Mr. Scriven you will want it when again in need of such a medicine. It is a remedy of great worth and merit. 25 and 50 cent bottles for sale by Oakland Druggists.

Mr. R. G. Richardson has moved his family to Mt. Lake Park. Miss Julia Reynolds, of Oakland, is the guest of Miss Maggie Carney. —Mr. and Mrs. Jefferson Broadwater, of New Germany, Md., spent Monday in town, leaving for home Tuesday accompanied by Mrs. A. G. Jennings and Mrs. A. Milsagel, of Galveston, Texas, who will remain their guests for some time. —Rev. Father Stanton and Miss Kate Stanton, of Loneconing, were in Piedmont a few days ago. —Miss Grace Souders has gone to Oakland, to spend the summer, the guest of her friend, Mrs. Godfrey Felty. —Piedmont Independent.

Ripans Tablets relieve nausea.

THE RAMBLER.

He Writes For the Last Time Until He Recovers His Health.

M. Sadi-Cornot, President of the French republic is dead—dead at the hand of an assassin—an anarchist. President Carnot was a man of purity of life, of distinguished public services, a lover of the people of his country and a friend to all of them. Twice I have seen the President of the United States laid low by the hand of an assassin but the Government still survives. So it will be with France. There will be mourning and there will be indignation, but there will also be a government and that government will continue to be republican.

I have lately learned that a Springfield, Mass., clergyman sprung a sensational advertisement upon his congregation. He flooded the city with circulars inviting the wheelmen to attend the Sunday morning service, which would be specially interesting to those riding a wheel. A reporter who was present says: "The pastor chose his text from Job xxx., 23: 'Thou causest me to ride upon the wind.' The entire service was little less than an advertisement for the company whose wheels occupied a prominent place within the chancel rail, and is the first case on record where the pulpit has been engaged as the advertising medium of any particular kind of a wheel." Appreciating the position in which he was placed with the wheels of a certain firm so prominently exhibited on the platform, the pastor refrained for the greater part of the time from referring to the name of the manufacturer, but in his description brought out many of the superior points which are claimed for this special make. This opens up a new field for advertisers, but it is doubtful if anyone will attempt to follow this example.

I have been greatly distressed since learning of the illness of Dr. Henry Carrington Alexander at the home of his brother in New York. Since this learned gentleman has been in Oakland I have spent hours in his company listening to his conversation upon all subjects. His fund of knowledge is something wonderful. I hope soon to learn of his recovery and return to Oakland.

I was in the company of a gentleman from San Francisco the other day and among other matters we were talking of the financial market. I remarked that I had understood that there was an abundance of money in the west that could be borrowed for less than 5 per cent. He assured me that money was as tight in the Pacific states as here and that there was hardly enough on the market to supply the demand. Where all the money has gone to I am at a loss to know.

Well, it is only a week until the Fourth is here. Have you purchased your bunting, flags, etc., with which to decorate your house and help make this a big Fourth. Don't be late in getting it for the demand will be great and perhaps the supply limited.

Cholera morbus is "prevailing to an alarming extent in and about Oakland, but our intelligent and hard-working corps of physicians seem to experience no trouble in checking it if called in time.

This is the last letter I expect to write until I get rid of that "tired feeling."

Fruit and Vegetables. Cheapest and best and freshest and everything, satisfactory in the way of fruit, vegetables, melons way down at H. E. Felty's grocery.

A New Hardware Store. Mr. A. Wolf will, within the next few days, open a full line of hardware in the Felty building on Alder street, Oakland. All goods will be displayed on counters and marked in plain figures.

Look at the following list of prices: One brace and five steel bits worth \$2.75, sold now for only \$1; stove lifters, 3 cents; 100 steel tacks, 1 cent; forged steel butcher knife, 25 cents; double steel clamp ratchet brace, \$1.25; solid steel hatchets, 49 cents; 24-inch hand saw, 49 cents; 6 knives, 6 forks, solid steel, 75 cents, and over one thousand other different articles in light hardware to be sold at the same reduction. Come one, come all, and convince yourselves. Open until 9 o'clock p. m. A. WOLF, Proprietor.

Grantsville Normal Class, July 2, 1894.

The Grantsville Normal Class will open Monday, July 2, 1894. The reason it has been postponed is the instructor, principal of one of the high schools of Baltimore county, Md., will not be exempted from the duties of his present position until June 29, 1894. The studies to be taught will include 1st and 2nd grade work. The pupils can take all or part of the studies. During the term talks will be given on the following subjects: School Government, School Methods, School management, my first and last days of school and also on the Art and Science of Teaching and Theory and Practice. These talks will follow after certain words and terms have been explained. These talks are free to all interested in education.

Attention will be given to those studies that the student will need in practical life, especially book-keeping, business forms and correspondence, arithmetic; also Frank's method of map drawing and the studying of geography and history, taking all three as one.

Your instructor will be in touch with your work, knowing by experience what it is to obtain an education with poverty holding you back, and the difficulties attending rural teaching. He will be glad to get acquainted with you all.

Terms: First grade \$6; 2nd, \$5; special branches in first grade, \$6; second, \$5. As harvest will be on hand anyone wishing to enter after harvest will be charged in proportion to the time he enters. If possible be on hand at the opening of the class. Communications invited. The school will continue during July and August.

Address, AMOS R. FRANK, Elko, Md.

While in Topeka last March, E. T. Barber, a prominent newspaper man of La Cygne, Kan., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life. Every family should keep this remedy in their homes at all times. No one can tell how soon it may be needed. It costs but a trifle and may be the means of saving much suffering and perhaps the life of some member of the family. 25 and 50 cent bottles for sale by Oakland Druggists.

NEEDING A TONIC, or children who want building up, should take BROWN'S HOP BITTERS. It is pleasant, cures Malaria, Indigestion, Biliousness, Liver Complaints and Neuralgia.

A NEW STORE.

I HAVE A FULL LINE OF Millinery Goods, New and Stylish Hats, Ribbons, Flowers, Laces, Gloves, Mitts, Corsets, Veiling, Fancy Goods and Notions.

Also have Sugar, Calico, Muslin and other articles at reasonable prices.

BUTTER AND EGGS

taken in exchange for goods.

MARY SPINDLER, ACCIDENT, MD.

Why Pay More When You Can Get Them For Less?

Look at These Prices:

20 lbs. granulated sugar, \$1.00; all package coffee, 21 cts; Mocha and Java coffee, 31 cts; good green or black tea, 21 cts; Baker's choice, 40 cts; per pound; Baker's choice, 30 cts; Van Houten's cocoa, 50 cts; California prunes 12 cts; evaporated peaches, 10 cts; 1 lb. choice apples, 25 cts; 3 lbs. choice oranges, 25 cts; Lemons, 25 cts; per box; 2 cans choice pie puddings, 25 cts; 2 cans choice table peaches, 50 cts; 3 cans corn, 25 cts; 3 cans beans, 25 cts; 3 cans tomatoes, 25 cts; early June peas, 11 cts; per can; French peas, 20 cts; per can; fine baking powder, 25 cts; per pound, guaranteed to be as good as any.

We Can Save You Money on Anything in Our Line.

We receive daily a full line of choice fruits and vegetables. Everything the market affords at a reasonable price. We have just received a full line of fresh chickens and ducks—the finest line ever in the city. Call and see us and we will make it to your advantage to call again.

W. H. MALETTE, Oakland, Md.

RETROSPECTIVE.

I would I were a child again, when July Fourth is here, So that I could enjoy the roar that reads the atmosphere: To feel again the wondrous thrill that comes alone to boys When all the earth seems bursting into every kind of noise.

To have my being tingle with a wheezing wave of gloom Because some friend had lit a pack of crackers under me: To know the bliss, now long since gone, of setting kindled matches By throwing at them as they pass small paper hand-grenades.

I wish I still could see the fun that lies in frightened looks By setting giant crackers off upon the pantry hooks: I'd love to think I'm grown so old I do not feel the spell That once came from the doudling squibs I dropped into the well.

I'd love to taste just once again the prize that always comes To boys on Independence day from having burned their thumbs: I wish I might find heart to smile as once I used to do When burning powder dropped on me and scorched my trousers through.

But most of all I wish that I could still feel sympathy With boys who now are just what I in old days used to be. But time, alas! has left to me no symptom of it. Else I'd not have chastised my son for blowing up the cat.

—Gaston V. Drake, in Harper's Bazar.

THE GLORIOUS FOURTH.

"Oh, I'd like to make a racket, And get off my Sunday jacket." Said the jolly little cracker of the pack, "For to sizzle I am sizzling." Is the exercise that I most surely lack."

"Oh, I want some punk and crackers, Just the blindest kind of whackers." Said a merry little fellow, bright and gay, "For I long to see them flaring, And to send them off in whizzing, Just to scare the girls as they go by to-day."

So the two, they came together, In the pleasant July weather. Both the jolly little cracker and the boy: And the one, he made a racket, While the other burned his jacket. But to both it was a day of keenest joy. —Mrs. J. E. Greenleaf, in Wide Awake.

A FOURTH OF JULY EAGLE.

FZZ-BANG! The powder-stained faces of four boys were lighted up by a momentary outward glare and the old brass cannon belched forth its unearthly roar at three o'clock on the morning of the glorious Fourth of July. The air was full of patriotism, so full that it was as impossible for the moderate patriots to sleep as it was for the extreme patriots to keep still. Cannons, horns, crackers, torpedoes and howays made the volkin ring. All the boys of Riverton were out in force. For the next twenty hours there would be a premium on noise. Think of that, from a boy's standpoint!

"Sold there be a much better substitute for Parrot!" Archie, Dick Pond, Charlie Graham and Willie Hills were at the same time the happiest and the noisiest boys in town for they had the forty-pound brass cannon which belonged to Uncle William Pond's dismantled yacht. This venerable piece of artillery was not one of the modern breech-loading yacht cannons, but a rather clumsy, old-fashioned muzzle-loader, which had seen actual service in the great "oyster war." It was more than fifty years old, and was one of the first brass cannons made for an American yacht. But it was the largest cannon in Riverton, and for Fourth of July purposes was the envy of every boy within five miles.

"Wasn't that a screamer!" exclaimed Archie Pond, delightedly, as the last reverberation of old "Brass Betty," as they called her, died away on the startled air.

"Oh, wasn't it!" cried the other boys. "And did you see how far she kicked back—more than three feet!"

"It was the wadding that did it," said Willie Hills. "Let's put in a whole Gazette next time, and run it down for keeps!"

"Yes, and we'll touch her off under Principal Mason's window. He can't say anything, seeing it's Fourth of July; and I should just like to make him jump once!"

So the boys went on their patriotic and immortal rounds, never touching off "Brass Betty" in the same spot twice, but giving every person whom they didn't particularly like a free thrill of enthusiasm at the return of another anniversary of Independence. By the time the sun came up the last grain of their ten pounds of powder was gone.

"What let's do the rest of the day?" asked Charlie Graham, as the boys were about to separate at Uncle William Pond's barn and go home to breakfast.

"Let's do something real patriotic!" exclaimed Willie Hills. "That's the way I feel to-day. I want to just whoop it up for the old stars and stripes, some way! Hooryay for the red, white and blue! Three cheers—one—two—"

The boys pulled off their caps and cheered with all their might. The shrill "tiger" set off some other boys down the street, and they still others, until there was a perfect confusion of cheering all through Riverton, like the crowing of coals at dawn.

"Let's do something that'll be patriotic," suggested Archie Pond. "Oh, I'll tell you!" His face brightened and his eyes shone, as he put his arms over the other boys' shoulders, and drew them all into a listening circle. "You know the eagle's nest on Bryant's

cliff? Well, I've kept watch of it, and the young birds are just getting so they sit out on the edge of the shelf and flap their wings a little. What do you say if we catch one of 'em, put him in a stout box and send him to the director general of the world's fair, with a note reading something like this: 'Dear Sir: Please accept a Fourth of July contribution to the world's fair, sent by four Rhode Island boys. Long may the American eagle wave—no, scream! Yours truly, Willie Hills, Charlie Graham, Dick Pond, Archie Pond.' How would that sound—eh?"

The boys broke from each other's embrace and danced around like wild Indians.

"Glorious!" cried Willie Hills. "Splendid!" cried Charlie Graham. "Immense!" cried Dick Pond.

"Well, meet Dick and me here at eight o'clock, then," said Archie. "And mind you don't say a word about the scheme to anybody. There's just the rope we want upstairs here in Uncle William's barn, and there's a stout little basket-chair without any legs for the fellow to sit on who goes down the cliff for the eagle."

At fifteen minutes past eight that morning, the four boys stole down the back stairs of Uncle William Pond's barn, with the following articles in their possession: Ninety feet of rope, a legless willow arm-chair, a big United States flag—used for draping public halls; a rusty old sword without a scabbard, and an empty canvas meal-sack. They sneaked across the garden and the pasture, keeping the barn between themselves and the house. Then they crossed the road and took a path through the woods and up the rocky slope which culminated in Bryant's cliff.

"I don't believe there are five fellows in town who know about that eagle's nest," said Archie Pond.

"Nor I, either," replied Willie Hills. "I shouldn't have known anything about it if you hadn't told me."

"That was a splendid idea of yours, to take the flag along and hang it across the shelf where the nest is," cried Archie. "Won't it look picturesque, though, and patriotic? If Uncle could only see it, I know he wouldn't scold."

When the boys reached the cliff, they hid the things which they had brought with them and took a good view of the surrounding country, to make sure that no one was in sight. Only the white steeples of the two village churches could be seen gleaming over the treetops. There were no houses in the vicinity, and, as it was the great national holiday, no hay-makers were at work in the meadows beneath the cliff. "I guess the coast is all clear," said Charlie Graham. Just

The rope was first firmly tied, with slip and sailor knots; then three strong pieces were attached to the back and two arms, running thence to the main rope, about which they were carefully braided and wound with small cord. Archie seated himself in the chair, and was firmly tied into it by a piece of rope passing about his waist. He tucked the flag in on one side of his body and the meal-sack on the other. The sword he held in his hand ready for immediate use. As a final precaution the loose end of the rope was tied around a tree.

"Now, remember," said Archie to the other boys, "that you are to do just as I tell you. If you shouldn't be able to hear me call, bear in mind that two twitches on the rope mean 'lower,' three twitches mean 'up,' while just one twitch means 'stop where you are.' Are you all ready?"

"Yes," answered the other boys. They were quite pale, and looked a good deal more anxious than Archie did.

Archie let himself slowly over the edge of the cliff, facing it, while the other boys paid out on the rope. Their companion gradually disappeared from sight. They could hear his clear voice crying out every few minutes: "All right, boys! Lower away!" The rope uncoiled foot by foot. Archie was now well down the face of the cliff, and not far from the eagles' eyrie. Suddenly there was a fierce rush of wings from above. The parent eagles darted down so close to the intrepid boy's head that one of them brushed his cap off, and it went whirling down to the base of the cliff.

Archie slashed about him with his sword, and the eagles wheeled away for a minute; then they came swooping back, fiercer than ever. The boy was now but a few feet above the shelf of rock, and the young eagles were adding their harsh cries to the screams of the old birds. The boys on top of the cliff, no longer able to hear their companion's voice, and terrified by the outcry beneath them, ceased lowering on the rope. Archie was fighting off the eagles with all his might, and had no chance to give a signal. Finally, he struck one of the great birds a telling blow, which broke its wing; and as it went screaming and fluttering down the cliff, the other eagle ceased for a moment its fierce attacks. Then Archie grasped the rope in front of him and pulled sharply upon it twice. His head was up, now that he was bound not to back out, now that he was so near the coveted prize. This reassured his companions continued to let him down. A little further—there! His feet have touched the ledge and he calls out, and, at the same time, signals to the boys: "Hold where you are!"

should faint from weakness. But he made a strong effort and recovered himself. His companions were trembling with mingled terror, dismay and joy.

"Oh, Archie! I'm so glad you've got back alive!" cried Dick's neck. "But how you are bleeding, and how pale you look! Are you very badly hurt?"

"No, it's nothing at all," said Archie, rather faintly. "One of the eagles scratched me a little. Please untie the rope. I want to lie down and rest a few minutes."

Half an hour's rest, with a hatful of cool water brought from a neighboring spring, refreshed Archie so that he sat up and began to joke about his adventure. "I must have looked funny enough, fighting the eagle with that chair tied to my back!" he cried. "But, I can tell you, it was a pretty ticklish job. I wouldn't do it over again for a hundred dollars."

"And I wouldn't do even my part of it over again for a hundred dollars!" exclaimed his brother. "My! how frightened we were when the eagles pounced over the cliff after you—weren't we, boys? We hadn't even sense enough left to haul you up."

"Well, I am glad you didn't now," said Archie, "for then we should not have had our young eagle. Well, I feel all right again. Suppose we start for home."

Of course the whole story leaked out. An artist who was spending the summer in Riverton heard of the boys' adventure and went out to look at the cliff and the eagle's nest. When he saw the flag trailing from that lone shelf away up on the rock he was so much impressed that he sat down and made a sketch of it for a painting.—N. Y. Independent.

THE WANDERER'S RETURN.

In His Absence His Parents Had Undergone a Change.

Twenty-five years ago a boy went for a pint of milk. He hid the can beneath a stone, directed his course to the nearest wharf, shipped as a cabin boy and went to sea. Years went by and he was given up for dead. But he wasn't dead; he was amassing vast wealth—a common thing by the way, with sailors. The other day he returned, found the can where he hid it, procured a pint of milk, and, going to his boyhood's home, entered and said: "Father and mother, here's your milk."

He was given a warm welcome, but he noticed that there was a change in his parents' appearance; they had not the old familiar look. He questioned them and explanations followed, through which, though they were still his parents, the change in their appearance was accounted for. Shortly after his departure from home his father died, and his mother married again; then his mother died and his new father married again. This on his return he found the old home as he left it, the only difference being that he had a new father and mother. Verily, truth is stranger than fiction.—Sellers.

The Fate of a Fool Male.

There is a dead mule back in Kentucky, a sun-colored, fool mule. For a long time this mule was the property of the Benedictine monks, beyond Covington. When the brothers rose the other day there was an unearthly sound in the pasture lot below the monastery. The blood ran in streams from the bull's nose and mouth. The mule was unhurt. He was moving on a pivot, with his heels ever toward the big, angry brute on the circumference of the circle trodden in the grass. Suddenly, with lowered head and a bellow like thunder, the bull rushed at the mule. There was a flash of steel, a thud and the bull was on his knees, the mule was on the kick. Time and again the bull went down before the mule's lightning feet. Once more he made the rush, then retired, seemingly beaten. The mule looked about, shook himself, and began to eat grass. The first time his eyes had left the bull and a latter saw his chance. When he had finished with the mule there was scarcely enough left to bury. One of the monks said he was a fool, like every other mule; then they killed the bull to put him out of his misery.—Cincinnati Tribune.

HAVING A GOOD TIME.

THE START.

THE FINISH.

—Arkansas Traveler.

The fireworks that splutter most do not make the most noise.

GEN. DANIEL H. HASTINGS.

Republican candidate for Governor of Pennsylvania. He was in command at Johnston at the time of the great flood.

Jays of a Railway Employee.

The Nervous Woman—How long did you say it was before the train leaves? Station Agent—One hour and a half, ma'am.

The Nervous Woman—Are you sure? Station Agent—Yes, ma'am.

The Nervous Woman—That would make it safe for me to go out for a short time, wouldn't it? Station Agent—Certainly.

The Nervous Woman—You are positive? Station Agent—Yes, ma'am. How far did you wish to go?

The Nervous Woman—I want to go over to the newsstand on the other side of the street and get a paper. But if I lose the train I'll report you, now mind.—Chicago Record.

His Skill.

The wife of a wealthy manufacturer had occasion to call in the help of a new floor polisher.

"Do you understand your business thoroughly?"

"All I ask, madam, is that you shall inquire for yourself at the colonel's next door. On the parquetry floor of the large drawing-room alone five persons broke their limbs during the last winter and a lady slipped down the grand staircase. It was I who polished the stairs."—Der Ullk.

In Utah.

"I want a pair of boots for my wife." Bootmaker—Yes, sir. What number, please?

Mormon Elder—Seventeen. Bootmaker—Seventeen? Great Brigham Young, sir! We haven't boots of that size.

Mormon Elder (sternly)—I'm not speaking of the number of the boot, sir, but of the number of my wife.—Vogue.

Made It Useful.

"Hello, Timmins!" said the inventor's friend. "Have you done anything with your flying machine yet?"

"Yes."

"Anything practical?"

"Eminently practical. Part of it I used for kindling, and by putting rocks on the rest I made it into a first-class cradle for the twins."—Washington Star.

Job's Advantage.

Mr. Dryden said he had the stove, with his fence handaged, groaning, horribly, and his wife endeavored to console him.

"Have patience, Charles; murmuring and fretting will do no good. Remember Job; he had patience."

"Yes; but he never had his teeth extracted by the painless process."—Chicago Tribune.

Tough on the Cashier.

Mr. Mangygirl—I have discovered that my cashier has robbed me of \$50,000.

Friend—Have you notified the police? Mr. Mangygirl—Not yet. I'll give him one more chance to propose to my eldest daughter. If he doesn't do it then I shall have him locked up.—Texas Siftings.

Capital and Labor.

"Yes, sir," said a pompous New York manufacturer, "I consider myself a benefactor of the human race. I feed two hundred people in my factory."

"You do?" replied a bystander. "Goodness! And all the time I was under the impression that they fed you."—Alex Sweet, in Texas Siftings.

A CASE OF INTUITION.

Mother—Mabel, stop pounding your little brother! What do you mean?

Mabel—Well, I told him we'd better play war was only engaged, but he wanted to play war was married.—Leslie's Weekly.

It Would Be a Give-Away.

Days—I see that they have at last deciphered the little hieroglyphics, supposed to be four thousand years old.

Wags—Really? I hope there are none of my jokes among them.—N. Y. World.

He Did Too High.

"A penny for your thoughts," said he; she sweetly smiled, as maidens do; "They are not worth that much," said she, "For I was thinking, sir, of you."—N. Y. Press.

He Knew Bins.

The boy had applied for a job. "We don't like lazy boys around here," said the boss; "are you fond of work?"

"No, sir," responded the boy, looking the loss straight in the face.

"Oh, you're not, ain't you? Well, we want a boy that is."

"They ain't any," said the boy doggedly.

"Oh, yes, there are, we have had a half dozen of that kind here this morning to take the place we have."

"How do you know they are?" asked the boy.

"They told me so."

"So could I if I was like them; but I'm different; I ain't a liar," and the boy said it with such an air of convincing energy that he got the place.—Detroit Free Press.

An Explanation.

I asked the tramp, he seemed so healthy. He answered with a pleasant smile: "Because I allers dreams I'm wealthy." —Harper's Bazar.

THERE'S NO PLACE LIKE HOME.

Tom (with emotion)—Jim, I was born in this house. My grandfather killed my grandmother in it, and my twin brother left it to end his days in Sing Sing, and I return from my term on the island to find the old place occupied by a heathen landladyman. (Gurgling) Do you wonder at my show of feeling? (After a pause) Let's go in and rob him!—Life.

Most Have Been Jones.

A prominent gentleman, in speaking of the commonness of the proper names of "Jones" and "Smith," told this story:

"I once attended a camp meeting in one of the rural districts of Kentucky. One day as I was walking from the spring to the camp I met a strange gentleman who offered me his hand. 'I am glad to see you, Mr. Jones,' said he. 'I suppose you are mistaken,' said I. 'I reckon not,' said my new friend. 'I am a stranger here, but the man who brought me over here said that every other man I met would be a Jones.'"

"Well, the last one was Mr. Smith." —Arkansas Traveler.

The Dog's Name.

Senator McLaurin was trying a case before the circuit court in Kanawha county, Mississippi, just before his election to the senate. There was a negro and a dog involved.

"What is the dog good for, uncle?" asked Mr. McLaurin. "Will he catch coons?"

"Never heard of his catchin' nuthin'," replied the dandy. "Ain't no 'count at all. He jes lays aroun' de house, he does, an' eats an' sleeps. Ain't wuf shukes. Dat's what makes us call 'im what we do."

"What do you call him?"

"Lawyer."—Washington Times.

From Frying Pan to Fire.

Deacon—We must devise some means of paying these five hundred dollars of outstanding bills against the church; we are being pressed for the money.

Vestryman (in surprise)—Why, what are they for?

Deacon—For flowers, decorations, music and so forth, furnished for the entertainment last month, to celebrate the church being at last free from debt.—Puck.

She Is Still Learning.

She went through several classic schools And gained her tutors' approbation; She's married now, and knows the woe Of hiring girls who quickly go.

Whereat she murmurs with a smile: "In this I'm getting all the while. A course in hire education!" —Indianapolis Journal.

Lessons on Shooting.

Young Freshie—Yass, I think of going onto a ranch for awhile, but I suppose, before I start, I ought to learn something about shooting, oughtn't I?

Cowboy—That's so. Spend a few weeks learning not to shoot off your mouth; then you'll be all right.—Good News.

The Republican.

BENJ. H. STINCHFIELD, Editor and Proprietor.

RATES OF SUBSCRIPTION:
The Republican is published every Thursday morning at the following rates:
One copy one year.....\$2.50
One copy six months.....1.50
One copy three months......75
One copy one month......35
Single copies.....10

ADVERTISING RATES.
First insertion for space of ten nonpareils lines \$1; each additional insertion after first 5 cents per square of ten nonpareils lines. Subscribers to advertising will be made from the above rates.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at our risk. If made by horse, at the risk of the sender. Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, JUNE 28, 1894.

The farmers, who went into the Democratic party in 1892 because that party promised "dollar wheat," have learned that Democratic promises are not worth fifty cents on a dollar.

The deficit in the revenues of the Government for the present fiscal year will reach nearly \$80,000,000. The deficit in the pockets of the laboring men is a good many times that sum. When the country wants a change it is always entitled to it. In 1892 it voted the change. Since then it has done a good deal of work figuring up the costs. The result will not encourage a repetition of the experiment.

ABRAHAM LINCOLN'S first speech on the Tariff question was short and to the point. He said that he did not pretend to be learned in political economy, but he thought that he knew enough to know that "when an American paid twenty dollars for steel to an English manufacturer, America had the steel and England had the twenty dollars. But when he paid twenty dollars for steel to an American manufacturer, America had both the steel and the twenty dollars." That was the sum and substance of the Tariff question as he viewed it.

LET ALL sheep men take notice. Senator Jones says there were 830,950 different farmers in the United States who owned sheep, and that the Free Trade disease, which is worse than the scab, would injure all of these 830,950 sheep farmers. Senator Jones was right. It has injured them. The loss on all the sheep in the country has been \$25,650,015 under the Free Trade sheep disease. Divide that loss among 830,950 sheep farmers and you will find that each farmer has lost \$30.88. Thirty dollars and eighty-eight cents lost by each farmer who owns sheep since the sheep ranches were attacked by the free wool plague. This is a pretty sort of good times. Is it what the Democratic party promised in 1892? If not, just stir up that sheep wash mixture again and rub it well into the Democrats' next fall.

A Tough Fiber Story.

We got a good many stories from China which tax our powers of mental degeneration. Usually the Chinese themselves tell the stories, but here is one which Prof. Waterhouse, of St. Louis, is responsible for. He got it from a Chinese, however, and perhaps they should bear all doubt which arises in the minds of those who read it. We learn, through the educator quoted, that Chinese children often wear ramic clothing that were worn by their parents and grandparents when they were children. This sounds like a very tall story to people who know something of the wonderful ability of children to wear clothes into holes, and it really looks as though Prof. Waterhouse ought to produce affidavits.

His statement was part of a plea for the cultivation of ramie, as well as flax and cotton, for cloth-making purposes. Not only is a fiber said to be durable, but it has the luster of silk, and makes a handsome cloth. There has been a difficulty in getting rid of the gum and other things that stick to the fiber, but machinery has been invented to facilitate the process. It would seem that textile manufacturers ought to look into the claims of ramie.

"G." Has a Crow to Pick With "The Republican."

Kind and revered gubnor:—I have a crow to pick with you an now without further palaver about it, as the wether is somewhat torrid, with yore

permishen I'll begin to make the fethers fly.

Wat I hav tu sa iz this: I want tu no how in blazes it kum about that mi former hi-toned article wuz so mutilated in the house av its friends that its own daddy hardly note it. Wat I komplane av iz the use uv "for" for "forty." I sed the shugger tariff had bin so arranged that the trust wud be enabled to make f-o-r-t-y forty nilyun dollars out uv it. That's wat I sed, and wat's the yuse fur me tu h awake nites elaboratin an idee so that yore readers ma no smuthing an then hav yore printers' devils nock awl the face out uv it that's way? Its klear enuff tu mi mind that the young'un kant spel an of the oills devel dnuz awl the wurk I suggest that yu 4th with sekure a lad that kan spel in the English language, and it mite not be a bad idee tu send him a short time tu yorse truh an hav him brushed up a little, but az a wink iz az good az a nod tu a blind horse I meorly mak the suggestion.

Now, Mister Editor, I presume yu will be curus tu no what I've bin the last three weeks an yu wil be greeved tu no that mi proud, sensitive sole wuz so shocked at the bare tho't uv havin mi wisdom tu look radiekulous that I had a sever cernys shock wich degenerated in smuthin like a old-fashioned gro-a-ple bel—I mean kolie ako—so familyun tu me in the daze uv mi boyhood, and it had tak about avl the yim an fire out uv me. I hope however, in be abel tu kontinue the interestin sketches provided I don't katch a relaps.

My vews hav slitley changed since I saw yu be4 but I kan konfide a sekret tu yu. I begin tu se how the kat is hoppin an wil akordingly explain.

Yu no az I sed b4 that bi a remarkabel koincidense the heds uv awl the big trusts ar dimmykrats and bi another remarkabel koincidense the awl got wat tha wanted from the revisin kommittee. Tha put nilyuns in the kampane uv '92 bi Cleveland and Reform and bi that meens we got thar. Yu no we sed in our Chekago platform that protekshun wuz unconstitushunal in that the trusts must go, and yu no our peof, preet and king sed the same thing in his own wa. Uv korse tha had tu li tew get in, and a li tew stuck tu iz sed tu be about az good az the truh, and I tell yu frankly fur us dimmykrats its a grate deel better. We sed protekshun wuz unconstitushunal, that it wuz robbery, that the biznes uv the country wuz in a bad wa on akount uv it, wich uv korse wuz not just exakly truh, and we find now that wher a protekted biznes iz weak or unorganized it iz robbery, but wen it iz strong, wel organized and powerful it iz a necessity tu protek it. If a trust or a korporashun haz a few nilyun tu skatter round sort o' promiskious like about eleeshun time tha hav a rite to be protekted, and wher a biznes iz wel organized and kommands a grate meny votes wich mite change the result uv an eleeshun, in that kase protekshun also is not robbery, I mite menshun the iron, the kole, the shugger and the match trusts. Tha' ar entitled tu enything tha ask 4 4 varius rosins. Over plan iz tu feed the big fish sich uv them az we kan milk and let the smal fri look out for themselves and the devel for the hindmost. It won't be no shake 4 the noozepapers tu explain this tu the people and tu make them believe tha are gettin just wat wuz promised.

A noozepaper, Mister Editor, iz the gratest institushun wat lyes. It kan make the people believe enything. We made the laborin people believe that protekshun wuz no advantage tu them; that it only made them pa hier prices 4 everything. We made the farmers believe that manufakturing in this country wuz no advantage tu them—only tu kause them tu pay more 4 everything tha bought. We told them that when we got fre wool the prise wud go up—that it always worked that wa. Uv korse it was a litle trublesome tu explain how fre wool end make the prise go up tu the seller and down tu the bier but we had tu depend on the intellek uv the avridge dimmykrat bern uv such an order that he wuz not konstrained to ask kvestions. Tha shud take them dimmockrisy strate az most uv them did, ntherwise tha wuz not the kind uv stuff that good reliable kinmykrats ar made uv. I tell yu konditenshally wat I onestly think about it. Jist between yu and me thare ar a grate meny variaties uv fools sojornin in this mundane sphere. Thare ar nacherel born fools, thare ar rules 4 the want of sense, fules becoz tha ar tu meen and stubern tu no enything, but uv awl the fules wot ever got up and went cunny place the fule that kan believe that the puttin uv wool on the fre list wil make the prise bier takes the kake and snertly shud hav a kromo; and yet the woods iz ful uv this variaty uv fules and made so bi the dimmykrat pa-

pers persistently stacking a biznes thru evil and thru good root and proves the truh uv the prverb wat sals a li wel stuck tu iz a good az the truh.

We kan stil sa tu the farmers that the McKinley bil did it and if he is a good dimmykrat uv the regnashun stripe he ought a believe it.

Next yere I suppose we hav tu hav another explanashun, but ther iz ingenuity enuff left mite parti tu attend tu that—tu inkt a nu li wich awl good dimmykrats wil be in derty bound tu beleve.

But if the eleeshuns continue tu go az tha hav bin a goin, won't mak much difference if a dimmykrat beleves enything at awl or not. Our trust iz now in the trus and if we kan skweze them haw w ma be wel. Yours confiding

Another Brief Catechism.

New York Sun.

Do you see the man?
I do see the man.
Who is the man?
Grover Cleveland.
Who is Grover Cleveland?
The President of the United States.

How did he get there?
The Democratic party put him there.

What is the Democratic party?
It is what swiped the Republican party off the face of the earth in 1892.

Did it?
That was the inference.
How was it done?
By promises.

What kind of promises?
Promises to do what the people demanded by the majority to be done.

Have the promises been kept.
Yes; kept in the background, where they can't be got at.

What are these promises?
The substance of things hoped for; the evidence of things not seen.

Ah, faith?
The same, but the works are rusty. Who is doing this?
The three C's.

The three C's?
Yes; Cheekos, Compromise and Cleveland.

Do Democrats favor this combination.
No, no, no!

Why don't they spit on their hands and take another hold.
Their hands are tied.

Can't they kick?
They can and they do.

Does it avail anything?
A litle.

Is there no balm in Gilead?
If there is the Wilson bill has got a duty on it.

What is the Wilson bill?
It is a sop to Cerberus.

Who's Cerberus?
Ask the promoters of the bill.

Do they know?
They think they do.

When will they know for sure?
In 1896.

What will happen then?
They will feel the trouble which every one else feels now.

Thrift of the Menonites.

There are about 11,000 Menonites in Kansas. They prosper every year, and their homes are veritable storehouses of garden and field products. To step into them is almost equal to a visit to the land of the Volga. Carious furniture, strange and peculiar garb and habits impress one that he is in another land and another age. Surrounding the low and squatly houses are heavy stone walls and old country fencing. Barns and farming implements are everywhere numerous, but the farming utensils are under shelter and bright as new, while the barns and bins are bursting with a wealth of the previous year's crops, in marked distinction to the American neighbor, whose cribs are empty and whose farm machinery is sheltered by the canopy of heaven, while he is off at the country seat town discussing the "circulation per capita" and the downtrodden and oppressed condition of the toiling farmer.—Boston Transcript.

Low Rates to Denver, Colorado.

The Baltimore and Ohio R. R. Co. will sell round trip excursion tickets to Denver, Colorado, from all points on its lines east of the Ohio river, July 19th, 20th and 21st, good for return on trains leaving Denver July 27th, August 2nd and 25th; tickets will also be sold to Denver August 8th, 9th and 10th, valid for return passage on trains leaving Denver August 19th, 25th and September 13th.

The rate from Baltimore and Washington will be \$47.40 and correspondingly low rates from other points.

Passengers taking the B. & O. have a choice of routes, going via Pittsburg, Akron and Chicago, via Grafton, Bellair and Chicago, or via Parkersburg, Cincinnati and St. Louis; double daily service of express trains, with Pullman sleeping and dining cars on all routes. 15-3t

Ripans Tabules relieve nausea.

THE FORTH IN OAKLAND.

Yesterday's Celebration Surpasses all Previous Ones.

It is usual and a holiday on which the weather is fair that a better day could not be made to order. This is as true of yesterday (with the exception of a small shower, which only settled the dust and cooled the atmosphere making the closing hours of the day more pleasant) as if it had been said of any other day. The sky was blue, the sun not unreasonably warm for July, the air bracing and balmy as in spring. Early in the day the fact that something unusual was going on would have been apparent to a deaf man; if not from the smell of powder from the crowds that thronged the streets. More people from the country and the outlying towns were to be seen than on any former similar occasion. The side walks were crowded—at prominent street corners well high impassable.

The town, too, was gay. The decorations sprang into existence in the early morning hours as if by magic. Homes were literally covered with decorations and the large number of United States flags displayed from buildings was notable. These make an inspiring impression when seen from a distance and one large flag when displayed from a building sets it off wonderfully.

The day opened early and at a seasonable hour the parade was formed and was well managed reflecting great credit upon the chief marshal, Mr. Fred A. Thayer.

The parade was formed in the Oakland Hotel grounds in the following order:

Marched and two aides on horseback.

Three lady aides, Misses Sweeney, Browning and Browning. These young ladies are superb horseback riders and excited rounds of applause as they passed along the streets.

The Fifer band of Keyser, W. Va., in their showy uniforms, came next and rendered inspiring music and an abundance of it, so much, indeed, that it excited comment and made this band one of the favorites of the people of Oakland and the visitors present.

The next in line was a band of young men impersonating cowboys and Indians. They made a good display and rode well.

The next was a carriage in which were seated Miss Nellie Browning representing the Goddess of Liberty and Miss Annie Townsend representing Columbia. Both of these young ladies looked decidedly handsome and made quite an impression.

Following this carriage was a wagon containing fourteen young girls in white dresses and wearing red sashes; then came a clown seated astride a donkey; wagon containing fourteen girls dressed in white costumes; the devil and the donkey came next; wagon containing girls dressed in white and wearing blue sashes brought up the rear of the first division.

The second division was headed by the First Regiment Band of Clarksburg, W. Va. This band is worthy of more than a passing notice. It rendered first class music and plenty of it.

Following the Clarksburg band came the Oakland Fire Department. The fire ladders had the engine and the hook and ladder truck handsomely decorated and handled the heavy pieces admirably.

Next came the lodges of Knights of Pythias, Ancient Order Hibernians, Catholic Benevolent Legion and others, followed by a clown and an ox-cart.

The third division was headed by Smith's Military Band, of Oakland. At any time this band furnishes good music and on yesterday the boys excelled themselves.

Following Smith's band came the trades display in which were many handsome floats. Many visitors were in Oakland from towns of very much larger population and more varied industries, but it was heard on all sides that the display would have been very creditable to large cities. In the rush to get this paper to press we can only give the names of the firms taking part in the display.

Mayers Drug Co.; Oakland Pharmacy, drawn by four handsome gray horses from Sweeney's stables; Townsend & Son, general merchants; A. D. Naylor, blacksmith, carriages and blacksmith shop; D. E. Offutt & Son, general merchants; G. O. Miller & Co., merchants; Sincell Bros., merchants; Hamill

& Little, merchants; W. O. Cleveland, expressman; J. M. Davis & Son, hardware; F. Felty & Bro., merchants; W. H. Malette, jewelry and green groceries; H. E. Felty, green groceries; W. S. Wolie, liverman; Mountain Democrat; Shartzer & Bolden, furniture; Oakland Jobbing House and Feed Co., flour and feed; Oakland Candy Co., bread etc.; Preston Lumber and Coal Co.; A. Nelson, butcher; J. W. Leathers, harness. The rear of the parade was brought up by Geo. Grim dressed as "Uncle Sam" and driving a nag hitched to a wagon having low solid wood wheels.

The parade passed along all the principle streets and was dismissed at Highland Park, the picnic ground, which is owned by Dr. E. K. Goldsborough and who very generously donated the use of it for the day.

After dinner a tournament was ridden, dancing was indulged in and a game of base ball played between the Oakland and Mountain Lake teams, resulting, as usual, in the defeat of the home nine.

The evening and night, with its magnificent pyrotechnic display, made a fitting finale, but through it all the impressive feature was the immensity, the good humor, the democracy of the throngs that made one great throng all on the go, all seeking amusement, all finding it, but all, with all else gaining the impression anew or deeper, perhaps many for the first time, that this is a country worthy of the devotion shown on such a day in such a way.

Perhaps the most fitting thing that was done all day yesterday was the rendering by Smith's Military Band of the "Star Spangled Banner" at the Howard residence in the East End, for in this house there resides Mrs. Chas. Howard, the only surviving daughter of the patriot who wrote that inspiring song, Francis Scott Key. Mrs. Howard, although in the ninety-second year of her age, made her appearance on the veranda and with tears in her eyes thanked the band in a few brief words for their consideration. This alone would have made the day glorious to this venerable old lady. In token of this appreciation which she felt for this act of courtesy on the part of the band boys, she sent them the following message:

"Mrs. Howard wishes to return her thanks to each member of the Oakland Band for the pleasure they gave her in their serenade of the 'Star Spangled Banner' yesterday."

Mr. Wellington's Successor. Judge Ormond Hammond, of Talbot county, recently appointed and confirmed as Assistant Treasurer of the United States at Baltimore, will succeed Mr. George L. Wellington the latter part of this month. There are several places in the Sub-Treasurer's office which are not governed by the civil service law, and as a consequence Judge Hammond has been almost overwhelmed with applicants from needy statesmen out of jobs dwelling in all parts of the State, and especially on the Eastern Shore.

He says he has not decided yet whom to appoint and shall make no decision until after he has become familiar with the duties of the various positions in his department.

Resolutions of Respect.
WHEREAS, It having pleased an all-wise Providence to remove from our midst our brother, John T. Wilburn, therefore be it

Resolved, By Johnstown Council No. 41, Jr. O. U. A. M., that we tender our sincere sympathy to the bereaved widow and orphans and commend them for consolation to Him who doeth all things well. We would also remind them of a blessed hope of an everlasting reunion in a home not made with hands eternal in the heavens.

Resolved, That the above resolution be spread upon our minutes and sent to a county paper for publication and a copy be presented to the bereaved family.

THOMAS J. LOWDERMILK.
WM. CALLIS,
FREEMAN DEWITT,
Committee.

The Late Dr. Henry Carrington Alexander.

The Rev. Dr. Henry Carrington Alexander died in New York City at the home of his brother William on Thursday, June 28th. He was born in Princeton, New Jersey, Sept. 28th, 1835. He was the eldest son of the late Rev. Dr. James W. Alexander, who for many years was pastor of the 5th Avenue Presbyterian church, New York City, and grandson of the Rev. Dr. Archibald Alexander, one of the founders and original professors of the Princeton Theological Seminary.

The Rev. James Waddell, the "Blind Preacher," of Virginia, was his great-grandfather.

Dr. Alexander was also related to the well known family of Alexanders of New York City, being a brother of James W. and William Alexander, who are prominent officers in

the Equitable Life Assurance Society, nephew of H. M. Alexander and a cousin of C. B. Alexander.

He was a graduate of Princeton college of the class of 1854, and of the Theological Seminary of Princeton. Shortly after entering the ministry he was made pastor of the Presbyterian church at Charlotte Court House, Va. The first charge of both his grandfather and father was in the same church.

He left Charlotte Court House to accept a professorship in the Union Theological Seminary at Hampden-Sidney, Va. He resigned this professorship in 1892, after about 20 years of service, and came to Oakland as pastor of the Presbyterian church, which church he has served faithfully for three years.

Dr. Alexander was a prominent and influential member of the Southern Presbyterian church, a voluminous writer on theological philosophical subjects, and a man of learning and broad scholarship.

His remains were interred at Princeton, New Jersey, June 30th, at 1 o'clock p. m.

THE MEMORIAL SERVICE.

On last Monday night a very impressive service in memory of Dr. Alexander was held in the Garrett Memorial Church, Oakland. The altar and chancel were draped in black and the large building was crowded to its utmost capacity, showing the respect in which the deceased gentleman was held by the people of Oakland.

The opening hymn No. 204 from the Presbyterian hymnal was read by the Rev. J. H. Moore, of Keyser, and was followed by a scriptural reading from the 13th chapter of 1st Corinthians by the Rev. Jefferson R. Taylor, of the Episcopal church of Oakland; prayer by Rev. G. W. Kepler, of the Oakland M. E. church; opening remarks by Mr. Scott T. Jones, chairman. The remarks made by Mr. Jones were followed by eulogies by Rev. Dr. Benj. Ison, Rev. John M. Davis, Mr. William Hinebaugh, Mr. Gilmer S. Harrell, Rev. J. H. Moore, Rev. Dr. John A. Scott, Rev. G. W. Kepler, Rev. Dr. G. M. P. King, Capt. I. Kuykendall, Rev. Jefferson R. Taylor and Dr. E. H. Bartlett. Following the remarks the resolutions printed below were introduced, read and adopted:

"The members of the Presbyterian church and the citizens of Oakland generally here assembled to night deem it fitting that some expression be given of our sorrow, as we bow beneath the chastening hand of God, who has seen fit in His wisdom to take from us our beloved Pastor, and from the community their warm hearted and true friend; therefore be it

Resolved, That in the death of Henry Carrington Alexander the church has lost an earnest worker, his congregation a faithful shepherd, and the community a friend to all and enemy to none.

Resolved, That in his residence in our midst Dr. Alexander had endeared himself to all who came in contact with him.

Resolved, That guileless as a child, modest as virtue, we disparage no one when we say his congregation and the people he loved so truly will seek long ere they find one to replace him.

Resolved, That in the spontaneous and heart-felt expressions of sorrow, that fell from the lips of all as the news spread of his death, we find the strongest testimony to his Christian character, and realize most fully the hold he had upon our people.

Resolved, That such a man, such a character would shrink from fulsome adulation, therefore with this simple tribute to his memory in our hour of grief, borne down by sorrow, we pray to Him who called our friend, that his memory may long remain fresh in our hearts, and that he be planted bring forth fruit in the years to come.

Resolved, That a copy of these resolutions be published in our weekly journals and transmitted to his relations, surrounded by whom he passed his eternal home.

Following the resolutions hymn No. 2 was sung and a prayer made by Rev. Dr. Ison. The benediction was pronounced by the Rev. Dr. W. J. McKnight.

Died.

SHERMAN.—Miss Addie Sherman, who is known from one end of the land to the other as a great revivalist and christian, died at Mountain Lake Park last Saturday afternoon. Miss Sherman was ill several weeks. The only living relative she is known to have is an aged brother residing at Cleveland, Ohio.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardean Cottage, opposite the bank, Oakland, Md. 41-1f.

A DAY AT HOMESTEAD.

Experience of a Workman on His First Day in the Great Carnegie Works.

From "Homestead" as seen by one of its workmen, in McClure's Magazine for July.

When I went to the superintendent and asked for work, he said, "What can you do?"

"Anything. I am large, strong, active and willing. I have been about machinery all my life, and want work badly."

He touched a button, and a boy appeared. "Show this man down to the converting mill and ask Fred if he can do anything for him. Good morning," he said, and my interview was over.

I put on my new overalls and jumper, and followed my guide down through the mills. We made our way through piles of stock, raw material, rolls, etc., and came at last to the huge converting mill. The superintendent was found, and the word delivered. He glanced at me a moment, then said, not unkindly: "You look good and strong; jump in and help those fellows on those vessels."

I hardly knew what he meant; but through the smoke and steam I saw some men beneath one of the vessels, or converters, working with sledges and bars to get the bottom off. The mill with its ponderous and massive cranks, the immense vessels all covered with black scale and soot, the flying sparks, the roaring flames, the lights coming and going, the air filled with steam and smoke, and, finally, the shrill and deafening noise, awed, confused, and even disconcerted me more than I should have liked to acknowledge.

I seized a sledge lying near and "jumped in." We at last got the "keys," as they called the weights which hold the converter together, and by the help of a hydraulic ram took the bottom off. This left a white-hot opening eight feet in diameter and about six feet from the ground, under which we must work. It seemed to me as though the skin on my neck and hands would burst with the heat. My clothes even steamed and smoked.

How I wished I had been anywhere under the sun (good old Sol), rather than under this fiendish hot sun hanging so very near us.

When we had the new bottom on we went up to the platform above the converters, and drove the keys home more securely, and stopped any small hole there might be with "ball stuff."

A shrieking engine passed by me and swiftly poured into the converter a "heat" of iron. Then the blast was turned on, and a cloud of yellow and saffron flame, mixed with sparks and small particles of metal, rushed out of the mouth of the converter into the air. One of the men caught me by the arm and pulled me away just in time to save me from being seriously burned; for I was not expecting the flame.

By noon I was so tired I could hardly stand, but I stuck to it for all I was worth. During the afternoon I frequently fell down because my knees were too weak to hold me up. My hands were burned and blistered, and my new overalls with holes burned by flying sparks. About 4 o'clock in the afternoon, while working under the platform, I was startled to see a stream of red fire run over the edge of the platform and strike in the midst of some workmen. As it touched the wet ground it exploded with a report like that of a cannon. The molten metal flew in every direction. Many workmen were burned more or less severely; and in the case of one poor fellow—it makes me sick still to think of it—the steel came down directly on his head and back. We got him out of the steam and smoke, and tenderly cut his burning clothing from him. As we placed him on the stretcher the burned flesh dropped from his bones.

When I was relieved at six o'clock it seemed as if it would have been utterly impossible for me to live in that mill another hour. I dragged myself to my room and went to bed at once. All that night I tossed and turned my aching bones, trying to get into some position less painful than the last. I was tortured by a thousand grotesque fancies, and by the picture of the poor fellow who was burned so badly. At last I got into an uneasy drowse, but I felt as if I had not been asleep a minute when my alarm clock announced to me that it was 4:45 and that I must get up to my 5:10 breakfast. Oh, the misery of that rising and going to the mill! Every bone and sinew seemed as if made of red-hot iron, and the joints as if mated together.

It was a dark, foggy morning I found, when, having desperately got up enough will-power to dress, I tumbled out of my boarding house. The Pittsburgh smoke and fog are proverbial, but I really think that on that particular morning one might have cut tangible chunks out of the black, wet air. The board walks in Homestead are never in repair, and on my way to

the mills I stumbled along through mud and stones, over boards and into holes, carrying in my hand my tin dinner bucket, which contained my mid-day meal.

On my first Sunday we reined the converter, and it became my duty to stand up in the inverted vessel and hand up the ball stuff and limestone with which to reline it. The vessel had been left to cool simply over night, and I suppose the temperature of the dry air inside of it stood at about one hundred and forty degrees. I worked as hard as I could, but near noon I fainted, for the first time in my life.

My experience at Homestead was the experience of the majority of workmen there.

Overloading Teams.

A great many men who use animals for labor are neither careful nor skillful drivers, and because of their want of care and skill they fail to obtain all the service which their teams are capable of rendering. The animals are not only regularly full, but they are also especially liable to suffer from accidents and injuries.

One of the most common faults of men who use teams injudiciously is overloading. From this various evils result. If the animals are young they are likely to become either discouraged or vicious. After repeated experiences with loads that are too heavy for them the teams get balky, and will often refuse to move loads which they could draw without undue exertion, and upon which they never would thought of refusing to put forth their strength if they had not previously been unduly loaded. And when the habit of balking has been formed it is exceedingly difficult to overcome. This is one of those things in which a little prevention is worth more than any quantity of cure.

The attempt to make a team draw too heavy loads is a great waste of time. Three trips with moderate loads might be made in the time required to deliver two very heavy ones. More work would be accomplished in a given time, and both team and driver would be saved a good deal of very decided unpleasantness. The risk of injury to the animals by overstraining and by frictional efforts, which is very decided when the loads are too heavy, is also avoided when there is a proper adjustment of the load to the strength of the team. And last, though it can hardly be accounted the least, reason why overloading of teams should be avoided is found in the fact that such a course will remove from the drivers a very strong temptation to anger and profanity.

Maryland's Diploma of Excellence.
The Baltimore News says: "Colonel Love, Secretary of the Maryland World's Fair commission, has received notice from the Hon. John Boyd Thatcher, of the Columbian Exposition Award committee, that the diploma of excellence granted this State's educational exhibit at Chicago would shortly be forwarded."

Deer Park.

Potato bugs are plentiful in this section.

The hay crop will be very light. Mr. D. F. Graham and his son spent a few days here last week.

Mr. and Mrs. H. D. Denney, of Pittsburgh, arrived at No. 2 cottage last week and will spend the summer here.

Mrs. S. C. Hoye is very ill. Rev. C. E. Feather's little daughter was being very sick but is now much better.

Mr. John Elliott has built a new shop.

Mr. William Garrett, of Baltimore, was here last week.

Mrs. Charles West was the guest of Mr. Abe Freeland a few days last week.

Mr. Mike Garrett, of Baltimore, was here several days last week directing the repairs of Miss Mary Garrett's cottage.

Mr. and Mrs. Robert Garrett will arrive here on the 6th inst. and spend the summer.

New arrivals on every train are filling up the hotels and boarding houses.

A new side walk has been laid from the hotel depot to the village station, which is quite an improvement.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

Land for Sale.
The undersigned offers for sale a part of "Swan Meadows," lying about 4 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINCELL, Oakland, Md.

HOW TO KEEP ROADS.

Perfect Drainage an Important Factor in Preserving Highways.

All experience joins with common sense in repeating to us that the only essential condition of a good road (granting a practical grade, drainage, underdrainage and surface drainage), writes Colonel J. W. McClung in Good Roads, "is surface material is of secondary importance. If kept dry, our common clay makes an ideal road. Above every other consideration is the roadbed itself. It should be underdrained so that the water cannot accumulate or remain underneath. The inequalities of the surface, depressions and mudholes are usually caused by water softening the roadbed. In the spring the frost heaves and disintegrates the road, because the earth below has been saturated with water. With thorough underdrainage frost would not disturb the road. There should be sufficient crown to the road to carry the water at once to the ditches. The tiles for drainage may be laid below the bottom of the ditches, with intakes at proper distances and a free discharge at the first natural water course. In this way roads will be thoroughly drained, and the water will run off without washing the road sides.

With a properly constructed bed a good and durable road is assured. Even if no road metal is used, the road will be excellent nine months of the year and passable at all times.

But a road to be good at all times must have a covering of metal of some kind. In this part of the work the same object ought to be kept in view—namely, to get rid of the water, to keep the road dry. Broken stone, gravel and similar material are not necessary for a wearing surface. The clay beneath will sustain any load put on it if it can be kept dry. The only intelligent purpose of using road metal is to put a roof over the road. This requires a sloop to discharge the water directly, and a close, compact covering to prevent water from sinking into the earth.

It is not at all necessary to use a great thickness of road metal. Thousands of miles of the best country roads lasting indefinitely have been made with but three, four and five inches of macadam. But the foundation was properly constructed, smooth, compact and well drained.

Indeed the road is the better for a lighter coating of road metal, because it will then retain some of the elasticity of the underlying clay, so desirable for horses and vehicles.

If proper attention were given to the drainage and construction of roadbeds much less metal would be required, and very little expense for repairs would be required. Our roads would be smooth, durable and elastic. The work of each year would remain until the country, by yearly additions, would have abolished bad roads.

Mid-Summer by the Sea.

On Thursday, July 5th, the Baltimore and Ohio Railroad will inaugurate the series of popular excursions for the Summer to Atlantic City from Pittsburgh, Wheeling, Parkersburg and all intermediate stations to Washington Junction, Md. This announcement will be welcomed by thousands of residents of Western Maryland, Western Pennsylvania, West Virginia and Eastern Ohio, who may desire to avail themselves of the cheap rates and superior train service of the B. & O. R. R. for a trip to the seashore.

For the excursion on July 5th, the same low rates and unexcelled train service, which have made these jaunts to the sea so popular in past summers, will be in effect. Many improvements have been made at Atlantic City, which will add to its general popularity and strengthen its claim as the most attractive resort on the Atlantic Coast.

Tickets will be valid for return journey for twelve days from day of sale, and will be good on all regular trains. On return journey they will be good to stop off at Washington, thus affording an opportunity to see Congress in session, to visit the numerous public buildings, which are open to visitors free of charge, and to take a trip down the Potomac to Mt. Vernon, the tomb of the immortal Washington, as well as to visit other places of interest in and near Washington.

For rates and time of trains consult appended table:

	A. M.	P. M.	A. M.	P. M.	RATE.
Terra Alta.....	9:07	7:15	7:35	9:40	
Oakland.....	5:54	0:20	7:31	3:58	8.50
Mt. Lake Park.....	5:54	0:20	7:40	4:07	8.50
Deer Park.....	6:06	0:35	7:48	4:12	8.50

Correspondingly low rates from other stations.

For more detailed information apply to nearest B. & O. Agent. 16-2t.

LADIES

Needing a tonic, or children who want build.

BROWN'S IRON BITTERS.
It is pleasant to take, cures Malaria, Indigestion, Bilelessness and Liver Complaints.

Dentistry.

Dr. L. L. Ritter, of Frostburg, Md., will be at Accident, Md., July 23d and 24th; Hovyes, July 25th and 26th; Cranesville, W. Va., July 27th and 28th, prepared to do all classes of dental work. Teeth extracted without pain.

Look Here.

When you come to town on the Potomac of July call on H. E. Feltz for fruits, vegetables, groceries, cake and crackers. Everything plenty at rock bottom prices. H. E. FELTZ, Grocer.

Summer Vacation Tours.

The Baltimore and Ohio R. R. Co. now has on sale at all its offices east of the Ohio river a full line of tourist excursion tickets to all the lake, mountain and seashore resorts in the Eastern and Northern States and in Canada. These tickets are valid for return journey until October 31st. Before deciding upon your summer outing it would be well to consult the B. & O. Book of Routes and Rates for Summer Agents at principal points have them, and they will be sent post paid upon receipt of ten cents, by Chas. O. Scull, General Pass. Agent, B. & O. R. R., Balt., Md. 16-2t.

Photographs.

Having run a gallery in the city the past winter I have returned and am now running my Oakland gallery, and as my predecessor closed cutting prices I will open with reduced prices for one month: \$1.50 per dozen for full length figures and other styles in proportion. I guarantee satisfaction and challenge comparison with the best work turned out by Loar & Co. Give me a call. 15-3t.

G. H. PRITCHARD.

A Card.

I have resumed the practice of law; office in the Feltz Building opposite the postoffice, where I will be pleased to see all my former clients and any others who choose to entrust their legal business to my care.

Will be assisted in all important cases by Benjamin A. Richmond of the Cumberland bar.

FRED. A. THAYER.

Notice to Trespassers.

All persons are hereby notified not to trespass on my land known as "Swanton," by cutting timber, clearing land or by farming of pasturing land that is cleared on my premises, fishing, or in any other way trespassing, as I have instructed my agent to prosecute all trespassers to the fullest extent of the law.

M. M. ARMSTRONG.

CHAS. A. WELCH, Agent.

Westernport, Md.

Notice.

To Preserve

The richness, color and beauty of the hair, the greatest care is necessary, much having been done by the use of verticilline dressings. To be sure of having a first-class article, ask your druggist or perfumer for Ayer's Hair Vigor. It is absolutely superior to any other preparation of the kind. It restores the original color and fullness to hair which has become thin, faded, or gray. It keeps the scalp cool, moist, and free from dandruff. It heals itching humors, prevents baldness, and imparts to

THE HAIR

a silken texture and lasting fragrance. No toilet can be considered complete without this most popular and elegant of all hair-dressings.

"My hair began turning gray and falling out when I was about 25 years of age. I have lately been using Ayer's Hair Vigor, and it is causing a new growth of hair of the natural color."—R. J. Lowry, Jones Prairie, Texas.

"Over a year ago I had a severe fever, and when I recovered, my hair began to fall out, and what little remained turned gray. I tried various remedies, but without success, till at last I began to

USE

Ayer's Hair Vigor, and now my hair is growing rapidly and is restored to its original color."—Mrs. Annie Collins, Dighton, Mass.

"I have used Ayer's Hair Vigor for nearly five years, and my hair is moist, glossy, and in an excellent state of preservation. I am forty years old, and have ridden the plains for twenty-five years."—Wm. Henry Ott, alias "Mustang Bill," Newcastle, Wyo.

Ayer's Hair Vigor

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by Druggists Everywhere.

OAKLAND, GARRETT CO., MD.

HEROES.

1.—THE BOYS' HERO.
The lad who starts in life as poor as a small church mouse:
Who has a hard stepmother who will keep him in the house:
Who runs away, and meets a man who takes him by the hand:
And tries to make him up to lead a wicked pirate band:

Who winks his eye, and learns a lot about the pirate crew:
Becomes, indeed, their leader, but whose principles are true:
And gives his followers away to him they wish to rob—
I think boys like him better if his name be Jack or Bob:

Who jumps into a raging sea and saves a drowning girl:
Whose father, as it chanced, is a haughty noble earl:
Who goes to confutations with a little water-pail:
And takes a hand just when the engines seem about to fail:

Who goes to war with nothing but a dagger made of steel:
And with it forces thousands of his enemies to reel:
Or who, perchance, sells papers in a so attractive way:
That he becomes a millionaire in one year and a day:

Whom nothing daunts this hero true the schoolboy much admires:
Who if it was necessary could swim up Niagara Falls:
And when his father's boat to taste a bitter galling cup:
Appears upon the scene in time to pay the mortgage:

Who then goes back and weds the child of him they call the earl:
The loveliest of all her sex, a truly perfect girl:
Then sits him down in comfort, full of honor and true worth:
And seems to all mankind to be the finest man on earth:

2.—THE GIRL'S HERO.
The lad who doesn't run away because he can't stand:
The ways of his stepmother with her rule, ungentle hand:
But stays at home to cheer his dad, and mitigate the strife:
That he must suffer from the one he's taken for a wife:

Who earns two dollars every day, by writing poetry:
That no one knows is writ by him, but which all men can see:
Is finer verse than Milton ever wrote, excelled by none:
Save one or two small verses by the immortal Tennyson:

Who could save folks from drowning if the chance should ever arise:
Whose words are few, and always of the wisest of the wise:
Who, spite of all temptations to wed handsome wealthy girls:
Prefers some little freckled maid with pretty yellow curls:

Who's always saying noble things, like "I am here!" and "Hold!"
"You cannot buy my conscience, nay! for all your state of gold!"
Who gives away to those who need, no matter what his store:
And says "Take all I've got! I weep because I have no more!"

Who grows to manly stature with a pallor on his face:
And walks into a drawing-room with really wondrous grace:
Who never reads or says a thing that strikes the girls as trash:
And settles down to happiness and twists a brown mustache:

—John Kendrick Bangs, in Harper's Magazine.

LOVER OR BURGLAR?

BY MRS. T. L. HEWARD.

(Copyright, 1894, by the Author.)

G LADYS FOR-
TUNES sat by her dressing
table late, late at night, thinking
She was a pretty girl
with soft, dreamy, gray
eyes and wavy brown hair, but her chief characteristic was her self-control. Relatives and friends alike teased her openly, and admired her secretly, saying that in an earthquake or a whirlwind, a fire or a flood, Gladys would be always "calm and self-possessed."

On this occasion everyone else was in bed and asleep, but Gladys was looking at a splendid necklace of diamonds of the first water, which sparkled in the rays of the crimson-shaded lamp which stood close by.

"They are very beautiful," she said, half aloud, as she closed the case, "but you know, Horace," turning towards a portrait hanging close by, "they can never tempt me from you, can they, dear?"

The face, that of a handsome young man, seemed to smile down upon her in response, and Gladys sat looking at it with an expression of tender trust and love, which the original would have been glad to see.

Of course it was her lover, you have guessed that already. They loved each other really—these two—but Horace was fighting for his country in the Sudan, and Gladys had to get what comfort she could from his picture until he came back. It was a full-length portrait, and a speaking likeness; and Gladys had got into the way of talking to it as if it were really Horace, until sometimes time and space seemed to vanish, and they were together again.

To-night she had dismissed her maid, that she might talk to him about the diamonds, and a passionate declaration and offer of marriage, which had accompanied them. Gladys was not one to wear her heart in her sleeve, and although it was generally understood that she was engaged to Horace Ralston, her reticence was misinterpreted. It was thought because she said little, she cared little, and there were some who with Mrs. Fortescue to aid and abet them, tried to persuade Gladys that she would do better to bestow her affections nearer home. Horace was poor, and Gladys was rich, a sufficient

bar in the eyes of her mother, who was constantly lamenting Gladys' situation, and assuring her that she might do a great deal better.

But Gladys had her own way in the matter, as these "calm and self-possessed" persons often do, and her loyalty was proof against the luster of diamonds and the shimmer of a coronet. Therefore she had none of those miserable indecisions and heart questions which more fickle girls endure. Horace reigned supreme and Sir Henry Magee would have his diamonds and his coronet to-morrow.

When the portrait, which meant so much to Gladys, first came home, it would not go into the recess which it was supposed to fit, various other positions were tried, but none of them quite pleased the young lady, who, however, kindly and yielding elsewhere, was despotism itself as regarded the arrangement of her own pretty rooms. So she cleared away the books and knick-knacks from the shelf below, and decreed that the painting should hang in front of the recess, the lower end supported by the shelf, and so it was.

On this never-to-be-forgotten night, Gladys, as we have said, closed the velvet case, talking to Horace, the while, in a confidential tone. Then she unclasped the bracelets and put them in her jewel drawer.

"You see, Horace," she said, "it isn't as if I had never seen you; then the diamonds and the coronet might perhaps have tempted me, I don't

than five minutes, her brother Harold and two of the men-servants were sleeping and shoelessly, if I may coin a word, making their way to his sister's bedroom. They only half believed her story, but were soon undeceived. They had nearly reached the door when they heard a crash, followed by a growl and a terrified cry. When they entered the painting lay on the ground, with two holes where the eyes should have been, and half-sitting, half-crouching on the shelf was a big, rough-looking man, held by the leg by an enemy who was being drenched then the human

approaching. The stranger's nether garment loose, so the dog had not hurt him, but his gleaming teeth and flashing eyes terrified the thief into a fear of prison or treadmill.

"Take your dog off," he cried, again and again. And even when Bruce had very unwillingly released his victim, the dog's fearful presence subdued him so completely, that he was made prisoner without any difficulty.

By this time all the household was assembled, and some attempt was made to learn what had really happened, questions and not waiting for the answers, or describing the circumstances of their availing and the terrible fright they had had, it was some time before Gladys could tell her story. When it had at last been heard for the third time, Harold said, with a romantic air big brothers like to assume at times:

TAKE YOUR DOG OFF!" HE CRIED.

know. For he is a very worthy man, Horace, dear," she continued, "although you need not be jealous of him, and I hope he will find a good wife by and by." And as she spoke she looked up at the portrait with an arch smile. "I hope his heart won't be quite broken, don't you, dear?" she added. Suddenly she looked away, and pulling the case towards her with a trembling hand, pretended to be examining the contents closely, until she had recovered from her strange alarm.

"Calm and self-possessed," they call me," she said to herself. "I need those qualities now. What did it mean?" she thought, excitedly. "I'm certain it wasn't my fancy. I did see the eyes move!"

"What must I do? I ought to look again, but I am afraid I look frightened. But the lamp is shaded, so the light will not fall on my face, and the color will hide my pale cheeks. I must look, and then I shall decide what to do."

Summoning all her courage, Gladys rose from her seat and slowly walked towards the picture, gazing steadily at the face, studying its every line with loving eyes; or so it seemed. Her suspicions were confirmed, the eyes did move! Blindly and confusedly Gladys stumbled back to her seat, and then sat gazing before her in perplexity and horror. But one conclusion was possible to her. Some one had not behind the picture and was hiding there. He must have heard about the diamonds and have some idea of stealing them. That was the only clear thought of which Gladys was conscious for some time. She dared not go to the bell, that would arouse suspicion at once. She sat quite still, until she had regained her self-control, then rising again, she strolled lazily towards the door, kissing her hand to the picture and saying: "Good night, dear love, good night."

Then she slowly opened the bedroom door, and a pungent smell of dog barked in, whining with delight and almost snuffing her with his chinny affection. But in another second he became uneasy, and sniffed about the room with a low growl.

"Why, Bruce," said the girl, taking his head in her hands, and looking steadily into his almost human eyes. "I want you to take care of your master's portrait; you have often done it before, you dear old dog. You love him nearly as much as I do, don't you?"

Bruce seemed to understand that he was to be quiet, and he hid his face, where his mistress pointed, looking out of the corners of his eyes, as much as to say: "I suppose you know what you are doing, but I don't see what you are driving at, and I don't half like the job."

Then he licked his lips uneasily, and settled down to his work, silent and watchful as Cerberus himself, only showing his teeth at intervals to show what he would like to do if he had his own way.

Gladys lost no time now in getting out of the room, though she did it without any appearance of hurry. In less

"You have earned your southerly now, and it has been of some use to me. How brave you are!" said Cousin Rachel. "I am sure I should have seen you."

"A lot of good that would have done," muttered Harold, under his breath. "I think Bruce deserves all the credit of the affair," said Gladys, laughing a little hysterically. "I don't know what I should have done without him. I knew he would not let the man get away, but I was dreadfully afraid the wretch would shoot him."

"It was well for you all that he was unarmed," observed Mrs. Fortescue, with the dignity which she was never known to lay aside, even though her costume was decidedly unconventional. "I hope Sir Henry's diamonds are safe after all." This fact was soon ascertained, and the party dispersed.

It appeared at the trial that the would-be burglar had heard that the necklace would be placed in Miss Fortescue's room on that particular day. He had been very busy making friends with the servants for some days past, and had learned all he wanted to know. But his ingenuity did not save him from a period of retirement from public life. At its close he returned to society a sadder and wiser man, as he was young as yet, he amended his ways, and used his brains thereafter to better purpose.

But not before he had been the cause of much mortification and distress to our heroine. How it got abroad no one knew, but certain it is that within a week's time Mrs. Fortescue's confidences to her lover were public property, and her treasured secret was in everybody's mouth. But for her "character," the banter she received would have driven her away from home, but, although she suffered keenly, Gladys took it all in good part. Only she gave up talking to Horace from that time forth, lest some one else should overhear.

And that is the end? Well, almost. Of course, Gladys had another portrait painted. Of course, Horace was invalided home just after this event. Then Gladys helped to nurse him, and they were married as soon as possible and "lived happy ever afterwards," as the fairy tales say.

And Bruce, the hero of the hour? Well, in my own mind, I have no doubt that Bruce knew he was the hero of the hour. He received all congratulations with a suitable dignity and a bashful, conscious air that was most becoming, and whenever the story was told in his hearing believed precisely as many another hero does, and his conclusion walked from one to another of the assembled company and gravely put up his paw to shake hands.

He lived in peace and honor to a good old age, for his master never could think without a shudder of what "might have been" if Bruce had not been "to the fore" on that eventful night.

BREAD.

A Few Facts About a Somewhat Familiar Article of Food.

Styles change in bread as in everything else, and shapes that were novel or less familiar ten years ago are now not made at all. Every baker tries to have something distinctive about his output, and almost every baker thinks his bread is the best. So everybody who buys baker's bread knows there is really a great difference in it in appearance and in taste. The housewife makes wheat bread of one kind of flour; the baker makes it generally of three, two brands of spring wheat flour and one of winter wheat, mixed, with the result of making a finer, whiter, smoother loaf. Bakers do not all agree as to the exact proportions, in which these flours should be mixed.

Graham flour is made of the entire grain of the wheat ground up together; gluten flour of that part of the wheat grain which contains the gluten. Rye Graham flour is made of the entire grain of the rye, the rye flour used in the ordinary rye bread is usually mixed with wheat flour in proportions varying from a little wheat up to half wheat. Of the bread sold in American bakeries about 85 per cent. is wheat, the remaining 15 per cent. being divided about equally among Graham, rye and gluten. In German bakeries the proportion of rye bread sold is very much greater.

Bakers are all the time getting up new shapes in bread, and there can scarcely be said to be any absolutely standard form, though there are some doughs and so on, each being composed of a different blend of materials and mixed and handled differently.

Perhaps as nearly standard as any of these shapes is the one known as New England; this is an oblong loaf with square corners. Almost all the breads are made in different sizes; the New England is made in at least five, which are sold at 5 cents, 8 cents, 10 cents, 25 cents and 50 cents; usually the 20-cent loaf is made to weigh a trifle more than three 10-cent loaves would weigh. The smallest sized New England loaf is the one most sold, and these with all breads made in sizes, but the 2-cent and 10-cent loaves are in large demand, and there is a steady sale for the loaves at 25 and 50 cents; the larger of the two big loaves is sometimes cut in two and sold in halves. The big loaves are sold in whole, in halves, and in quarters, and are used for

houses, and in private families, also. Some folks like crust, and some like the inside; the big loaves are especially desirable for those who like the inside; they have proportionately to weight less crust than the smaller loaves, and they can be so cut as to be served in almost any form, and may be desired, with crust or without.

Breads for hotels and restaurants are generally made in special shapes. They are a shape corresponding to New England, and many restaurants that don't want so much crust take a bread that is made in a loaf which is eighteen inches in length, and not very wide, baked not separately, but laid close together, so that the loaves have crust on the ends only. Some hotels buy this kind of bread, but hotels generally use some French bread and Vienna sticks. Taking all the people together, old and young, and of all the three quarters like their bread crusty.—N. Y. Sun.

BOSNIA'S CAPITAL.

The Bewildering Variety of Nationalities in Its Streets.

Serajevo is a jumble of bewildering sights and sounds, which baffles description. It consists of a maze of narrow, straggling streets of the true eastern type, crowded with accredited representatives of most of the races of the earth: long-bearded Mohammedans, austere dervishes, slovenly Serbs, heavy Spanish Jews, any one of whom might serve as a model for a portrait of King Solomon; shrouded, shapeless figures of women, of whom nothing indicative of life and reason is visible but a vague, ethereal gleam through two holes in the long, white veil, as they shuffle noiselessly forward in soft yellow slippers or sandals, which no European could manage to retain for five minutes on his feet; graceful little girls, who would be pretty but for their saffron-colored hair and nails; genuine Greek women in blue, white breeches, gold embroidered frocks, and roses behind their ears, who insist that their natural complexion is as white as paper, and who are painted with thick layers of powder and pigments; stolid beggars, who are neither importunate nor grateful; red-mouthed, broad-shouldered Albanians, with flowing locks of jet black hair and deep, defiant looks; greasy orthodox priests, with their long blue or colored robes, queer headgear, flowing hair and small, fiery, furtive eyes; jovial Franciscan friars, with long mustaches, close-clipped hair, who make themselves all things to all men and women.

Wherever you turn, the sound of flowing water is the ground tone of the city's hum at every street corner you pass a mosque or a Mohammedan cemetery, or both combined—the cemetery consisting of a little forest of slender stone pillars, with blue or golden legends in Arabic script and often surmounted with a Turkish primitive bakers' shops, by the dozen, coffee houses, with dense clouds of tobacco smoke at the doors; high houses, resting upon lofty piles of cisterns and fountains, with texts from the Koran; quaint stone arches, cool, covered market places, ancient khans or caravansaries, and at a dozen different points laden with merchandise enough to break a camel's back, generally with skins filled with olive oil, mountain-made butter, or unfermented juice of the grape. One's head swims and aches with bewilderment.—Fortnightly Review.

SCIENCE AND INDUSTRY.

—From two observations made July 15, 1893, of the aurora borealis at the University of Toronto it was found that its height above the earth was 100 miles.

The white rhinoceros has become nearly if not quite extinct. There are two stuffed specimens in England and one in the Cape Town museum. It is the largest specimen of the genus.

For protection wool and furs rank first, then silk, cotton and linen. Any layer of confined air is a slow conductor of heat, and a loose-fitting garment is warmer in winter than a tight-fitting one in other respects the same.

Droughts in Algeria are reported to have caused much damage to the geranium crop, which is raised for the purpose of distilling geranium oil from the leaves. The fragrant oil is used by perfumers, a part being sold under its own name, but a still greater amount is used for adulterating the attar of roses.

Specimens of the American hognose (Lepidodactylus paradoxus) have been sent to London from the upper Rio Paraguary. This and the Proteopterus of African rivers have been thought by Dr. Ayers to be congeneric, and even varieties of our species, but their generic distinction has been lately reaffirmed by German and English authorities.

Water is compressible theoretically, but not practically. That is, when an amount of water is subjected to an additional pressure of one atmosphere it is compressed one-twenty-thousandth part of its bulk. Thus, for all practical purposes, it is correct to say that you cannot get more than four quarts of water into a gallon vessel under any circumstances.

More than three hundred species of fish hitherto unknown to naturalists are described by M. Leon Vaillant as inhabiting the lakes of Borneo. Many other fish are identical with species living in the waters of the Sunda islands and of Indo-China. As these species never reach the sea, they furnish another argument in favor of the theory of a former connection of these countries.

The Capricornian, an Australian journal, says that "the introduction of the little fruit baskets as used in California, into which the fruit is picked direct, has given a flip to fruit cutting, and growers find it so profitable that neither producer nor consumer will now rest content until the whole of the California system of handling fruit has been introduced to South Australia."

An English scientist, after careful experiments, finds that when potatoes are cooked without removing the skins they lose only 3 per cent. of nutritive quality through extraction of the juice. When the skins were removed before boiling the loss was 14 per cent., which makes the process of cooking the potatoes without their jackets an exceedingly wasteful one.

A singular instance of connection between superstition and agricultural pests is reported from Ceylon. The high-class Buddhist Cingalese refuse to destroy the predatory insects which infest the tea plantations, as they regard it a sin to take life. Consequently the tea plantations owned by them become the breeding ground for moths and other insects, and a source of infection to neighboring plantations.

The following instance of tenacity of life in land snails is given by Mr. Stearns, of the United States National museum: "Certain snails were collected on Cerros or Cedros island, off the coast of Lower California in 1850. Six years later one of them, on being placed in a box of moist earth, began to move about. Another shell, also from Lower California, woke up from its lethargy after a long nap of two years, two months and sixteen days."

The Baluban tribe of Central Africa are famous for their skill in casting and forging iron. They construct tall cylindrical conical furnaces of clay with tinners of clay and ingeniously devised wooden devices. They make arms for hunting and for war, and collars and bracelets of iron. The neighboring natives resort to them in great numbers to exchange their own products for the manufactures of the Balubans.—Popular Science Monthly.

WOMEN OF IMPERIAL ROME.

Marriage Regarded by Them as a Foolish Ceremony.

In Juvenal's time the woman were entirely independent. They could do as they pleased, go where they liked without comment, and were mistresses of their own fortunes and estates. After the great civil wars the religious rite of marriage was discontinued, and a new custom gradually arose, by which a woman on her marriage did not cease to belong to her father's house, to which she could return, if she liked, by divorcing her husband.

With such a loose state of morals, and divorce so easy, it seems to us it was scarcely worth while to marry at all. The Romans themselves were of this opinion. So many were averse to marriage and so objected to the burden of children that the old Roman stock was threatened with extinction, and was eventually superseded by that of freed men and provincials.

While hump is to be bought while knives remain?

asks Juvenal of Ursillus, on the eve of the intended marriage of the latter. A rich Roman, who married was regarded as a fool. Unmarried and without heirs, he was courted by crowds of sycophants and legacy hunters, who swarmed around him, on the lookout for gifts during his life or for legacies at his death. He was an object of attention to and adulation from all. Each Roman vied with his neighbors in his display of wealth. Ostentation became a passion. A feast was not considered a success unless the cost of it was a matter for discussion by all Rome.

The Palaces and villas were built in the most splendid and costly style. Beautiful marbles, gold and silver and precious stones were lavishly used in order to show the wealth of their owners. Nero had several rooms in his golden house studded all over with pearls. Goethe might well term the Romans the greatest purveyors in history.—Westminster Review.

A black and white illustration of three guanaco-like animals standing in a landscape. The animal on the left is facing forward, while the two on the right are facing right. They are standing on a grassy field with some rocks. In the background, there are trees and a fence. The top of the illustration is framed by a decorative border with geometric patterns.

A THIO OF GUANACOS

A favorite object of the reckless Welshman's pursuit is the gannet, and in its pursuit he has lost the lives of many a horse. He says: "The dogs and horses saw them, too, and we were off. It was a straight-away gallop, our horses straining every nerve and muscle to the utmost. We had a dog or two, and a few horses, but desisted them again for a slight elevation running in another direction. We were thus able to ride over a shorter leg of the triangle than the one they traced. We were now coming well up on the fleeing animals. But again they drew away, and again we headed them off by going down the steep side of a ravine. Here the horses had to stop, and the dogs were sent to the front under the feet so rapidly that they were compelled to abandon locomotion of their own. With legs spread out and

VOLUME 18.

OAKLAND, MD., THURSDAY, JULY 12, 1894.

NUMBER 18.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Sheriff Wegman has five prisoners now in his charge.

Mr. John Barnes, of Deer Park, was here yesterday on business.

Mr. Louis Nydegger, of Gorman, was an Oakland visitor Tuesday.

Miss Mamie Hogan, of Cumberland, is here as the guest of the Misses Fay.

Senator Ravenscroft, of Accident, was here on business Tuesday morning.

Miss Bertie Cleaveland is visiting friends and relatives at Frostburg, Allegany county.

Mr. J. J. Whetstone, of Friendsville, was an Oakland visitor Tuesday morning.

Mr. Wm. H. Butler, of Terra Alta, was in Oakland Tuesday with two of his sons.

Mrs. Chas. Wegman has been quite ill for a week with an attack of cholera morbus.

Mr. Jessie J. Ashby, of Cretlin, was here Tuesday and paid his respects to this office.

Mr. John Ault is preparing plans and specifications for a residence for Mr. E. J. Fringer.

Thomas Hay Rakes and Champion mowing machines for sale by J. M. Davis & Son.

Miss Eva Tasker arrived in the city last night and is the guest of her aunt, Mrs. D. Tasker.

D. L. Connaway has for sale chop, bran, middlings, etc., at the lowest prices. Give him a call.

We have on stock a car load of Ochulla guano and Silvergray for buckwheat. J. M. Davis & Son.

Messrs. Joe and Will Sincell, of Washington, spent Sunday and Monday in Oakland with relatives.

Miss Edith Browning, of Roanoke, Va., is here visiting her grandparents Hon. and Mrs. Patrick Hamill.

Miss Lula Murphy, of Keyser, is in Oakland visiting her aunt, Mrs. W. M. Coddington, and other relatives.

Mr. W. H. Smith, of Hazleton, Preston county, W. Va., is here on a visit to his son, Mr. David G. Smith.

Miss Millie Clark, of Buckhannon, W. Va., was the guest of Mrs. Robert Felty several days last and this week.

Messrs. G. W. Engle and C. E. Ellithorpe, accompanied by Miss Amanda Ellithorpe, of Bittering, were here Monday.

Mrs. Wm. E. Messersmith and Miss May S. Robison, of Baltimore, are in Oakland visiting their sister Mrs. Mahlon C. Hinebaugh.

The contractors for the erection of the school house in Oakland have a force of men at work excavating for the cellar and foundation.

The machinery for Mr. George M. Mason's mill has arrived and is being installed in the building, which is nearing completion.

J. M. Davis & Son have on hand a few two seated spring wagons and single buggies, and a first-class 8 horse grain drill at reduced prices.

Messrs. Geo. D. White and Abraham Lawton have rented the Oakland Steam Laundry and will have it in operation in a few days.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Mrs. Chas. W. Bolden, of Oakland, accompanied by her little grandchild, Prima Bolden, spent Saturday last with relatives here.—Oracle.

Rev. E. J. Wilson, president of the West Virginia M. P. Conference, accompanied by his family, are the guests of Dr. and Mrs. I. D. Newman.

Among the guests at Oak Hall are Miss Mary L. Balch, president of the Mount Auburn Seminary, Washington, Mrs. Dr. Leavitt and Miss Spencer, daughters of the late distinguished Dr. Spencer, of Brooklyn, N. Y., and Mrs. Benj. F. Butler and family, of Washington.

A convention of the lumber manufacturers of the United States was held at the Oakland Hotel Tuesday. About seventy-five members were present.

There was a heavy frost in some sections of the county Sunday morning which did considerable damage to buckwheat and other growing crops.

Mr. L. J. Brown departed for Baltimore yesterday afternoon in which city he has secured the position as salesman for Horner & Co., boot and shoe dealers.

Mrs. George McNeil, of Moorefield, W. Va., who was visiting Mrs. D. E. Offutt several days last and this week, departed for her home yesterday evening.

The pocketbook advertised as found in these columns last week was the property of Mr. J. A. Robinson and was delivered to his brother-in-law, Rev. Dr. Ison.

Hereafter postal clerks must reside at some point on the route to which they are assigned. Those living along other lines must make the change before May 1, 1895.

Mrs. Chas. Bell and children, of Sharpsburg, W. Va., and Miss Daisy Belle Naylor, of Hedgesville, W. Va., are visiting Mr. and Mrs. A. D. Naylor in Oakland.

Bradford Bros. have a number of men at work in Mr. Broderick's field making brick for the new school house. Two hundred thousand will be made and burned there.

Mrs. Simpkins, nee Felty, of Chicago, arrived in Oakland last Saturday night and will remain here during this and next month visiting her parents and other relatives.

In our account of the parade last Wednesday we failed to make mention of the fact that there were representatives from several Jr. O. U. A. M. councils in the procession.

A. D. Naylor has lots of vehicles on hand: Buggies, spring wagons, carts, surreys, buck boards and light road wagons. Give him a call when you need anything in his line.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church.

Mr. E. M. Spedden and force of men were engaged yesterday raising the building on Railroad street and occupied by Mr. R. S. Jamison, to the level of the new pavement recently built by the railroad company.

Having determined to return to Baltimore I will close out my entire stock of millinery goods and notions, consisting of hats, ribbons, etc., at cost.

MISS ALICE MURPHY, 18-21* Deer Park, Md.

FOR RENT—Furnished, the very desirable Summer Hotel known as "The Rest," at Oakland, Garrett county, Md.; terms liberal. Apply to CHARLES J. BONAPARTE, 216 St. Paul street, Baltimore.

WANTED.—A woman to do general housework, cook, wash and iron for a family of three. To a suitable person permanent employment and good wages will be given. None other need apply. Address with references, William Moody, Bloomington, Md.

Jane Thorne, of near Gorman, was sent to jail in Oakland by Justice Browning in default of bail to await the action of the September grand jury on the charge of stealing \$19 from a man named Swick. The woman was employed as a domestic in the family of Mr. Swick.

Mr. Jacob S. Meyers, acting as deputy sheriff, went to Kingwood, West Va., last Friday with a warrant for the arrest of Bruce King, charged with larceny, and who was on trial in that town on the same charge. King furnished bond to appear at the September term of the Circuit Court.

W. H. Nelson, who has been in the drug business at Kingville, Mo., has so much confidence in Chamberlain's Colic, Cholera and Diarrhea Remedy that he warrants every bottle and offers to refund the money to any customer who is not satisfied after using it. Mr. Nelson takes no risk in doing this because the remedy is a certain cure for the disease for which it is intended. It is for sale by Oakland Druggists.

Dr. B. F. Keller and wife, former residents of Oakland but now living at Bloomingburg, Ohio, arrived here one day last week and are the guests of Squire and Mrs. A. B. Gonder near town. Dr. Keller has been confined to his bed until recently with a severe attack of inflammatory rheumatism.

The U. S. Naval Academy band, which is furnishing music at Oakland and Deer Park hotels this year, has been giving open air concerts every second day at Oakland. The band is composed of professional players only and their music has many admirers among the people of Oakland.

Mr. Baker Johnson, constable of District No. 3, came up to Oakland last Thursday bringing with him a man named Brown from near Lonaconing who was charged with disturbing a public meeting at Firm Rock on the fourth. He was put in jail but later released on bail for his appearance at the September term of the Circuit Court.

Messrs. J. Shapiro & Bro. have removed their store from the old REPUBLICAN building to the C. C. Michael building on Railroad street.

They have just returned from the north with a big assortment of spring and summer goods, clothing, dry goods, notions, shoes, hats, caps, etc., and will sell them at their own prices. The Baltimore Bargain Store, Oakland, Md. 8-101

We have sent out statements to a number of our patrons and we desire to impress them more fully that we need the money due us. We have expended in the past year for new machinery, type, building, etc., over three thousand dollars, and as we are not yet a millionaire or have a very large bank account it will be seen that our request should not go unheeded. If you can't pay the whole amount send part of it.

Rev. Dr. Scott, the venerable father of Dr. S. M. Scott, of this place, accompanied by his daughter, Miss Annie, arrived here from Florida last Saturday morning and will remain some weeks. The reverend gentleman brought with him a baby alligator, as a present to his grandchild Stanhope, but this climate proved too cold for the animal and it died shortly after its arrival.—Oracle.

Chamberlain's is the best of all. Vincent J. Barkl, of Danbury, Iowa, has used Chamberlain's Cough Remedy whenever in need of a medicine for coughs and colds, for the past five years and says: "It always helps me out. If anyone asks me what kind of cough medicine I use, I reply, Chamberlain's, that is the best of all. 25 and 50c bottles for sale by Oakland Druggists."

A horse kicked H. S. Shafer, of the Freeman House, Middleburg, N. Y., on the knee, which laid him up in bed and caused the knee joint to become stiff. A friend recommended him to use Chamberlain's Pain Balm, which he did, and in two days he was able to be around.

Mr. Shafer has recommended it to many others and says it is excellent for any kind of a bruise or sprain. This same remedy is also famous for its cures of rheumatism. For sale by Oakland Druggists.

A fellow who will not take his home paper is the one, when he gets taken in on some scheme that his home paper has exposed a dozen times who rushes in and asks that his name be withheld as having taken the first premium as the champion sucker of the state. The same fellow when he gets in a scrape, don't want a word said about it, but when he wants a free puff or favor he has no hesitancy in asking his local paper to give it and he will stop whatever work he may be doing to borrow a paper and read it.

Dead Letter List. List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending July 14th, 1894, the parties addressed being unknown to the postmaster.

Allen P. Lodge, J. J. Taylor, James Foherty, G. W. Wilson, John Doran, Andrew Heidler, Matthew Doyle, Frank Reagin, D. E. Stearns, Mrs. Sarah Campbell, Miss Jennie Gilpin, Mrs. G. W. Garret, Mrs. Wilson, Mrs. Nellie Miller, Mrs. Beekie Vanech, Miss Jennie Stone, Miss Sarah Calhoun.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

Colored Society Notes.

Miss Ida Dunmirk, who has been ill, is improving slowly.

Mr. Daniel Holt, who was taken ill Friday, is much better at this writing.

Misses Matilda Davis and Lucy Banks, who spent the winter in Pittsburgh, have returned to Oakland.

Rev. Stephen Conrad, of Washington, D. C., preached to a crowded house last Sunday night from these words: "Watch therefore: for ye know neither the day nor the hour wherein the son of man cometh." Matthew 25:13.

School Board Meeting.

The Board of School Commissioners met on the 5th inst. and re-organized by re-electing Mr. Jas. D. Hamill president, and Mr. Wm. Hinebaugh secretary, treasurer and examiner.

A large number of delegations were before the Board and urged the erection of new school buildings. The Board finally decided to build eight school houses in various parts of the county this year. Vacancies in boards of trustees, caused by neglect and refusal to qualify, were filled.

Married.

WILSON.—SHARP.—At the residence of the officiating minister, the Rev. Dr. Ison, in Oakland, July 5th, Mr. Orion C. Wilson and Miss Maggie M. Sharp, both of Wheeling, West Va.

MYERS.—DUCKWORTH.—On July 3rd, at the residence of W. R. Duckworth near Mount Zion church, William H. Myers and Susan Duckworth were united in marriage by Rev. W. E. George in the presence of a few select friends who witnessed the ceremony. The couple are both of Garrett county.

A Quarter-Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable medicine for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

Low Rates to Denver, Colorado.

The Baltimore and Ohio R. R. Co. will sell round trip excursion tickets to Denver, Colorado, from all points on its lines east of the Ohio river, July 19th, 20th and 21st, good for return on trains leaving Denver July 27th, August 2nd and 25th; tickets will also be sold to Denver August 8th, 9th and 10th, valid for return passage on trains leaving Denver August 19th, 25th and September 13th.

The rate from Baltimore and Washington will be \$47.40 and correspondingly low rates from other points.

Passengers taking the B. & O. have a choice of routes, going via Pittsburg, Akron and Chicago, via Grafton, Bellair and Chicago, or via Parkersburg, Cincinnati and St. Louis; double daily service of express trains, with Pullman sleeping and dining cars on all routes. 17-3t

Resolutions of Respect.

At a meeting of the Session of the Oakland Presbyterian Church on July 2, 1894, the following resolutions were passed: WHEREAS, It has pleased our Heavenly Father to remove from us by death our honored and beloved pastor-elect, the Rev. Dr. Henry Carrington Alexander; therefore be it

Resolved, That we recognize in this occurrence the hand of that Divine Providence which orders all the affairs of this world.

Resolved, That by the death of Dr. Alexander this Session has lost a moderator who presided over its deliberations with that dignity and consideration which commanded the respect and love of all its members.

Resolved, That by his death we as a church have been deprived of one who was always active and zealous in the discharge of his duties, and retiring in his devotion to the cause of our Blessed Master. Who exemplified in his noble living and doing the teachings of the gospel he professed and so faithfully expounded. Of whom it can be truly said, "He went about doing good."

Resolved, That these resolutions be entered upon the minutes of this Session and a copy be sent to his surviving brothers James W. and William Alexander, and that they be published in the local papers and Central Presbyterian, of Richmond, Va.

S. T. JONES, Clerk of Session.

Notice to Trespassers.

All persons are hereby warned not to trespass upon any premises situated in District No. 8, Garrett county, for any purpose whatever. 17-3t M. M. BEST.

Weather Crop Bulletin.

The Maryland weather crop bulletin for this week contained the following reports from this county: Grantsville.—Weather fine and favorable for all farm work. Wheat is ripe, but none cut. Oats improving. The hay crop much improved by the late showers. Potatoes doing well. J. S. MILLER.

Bittinger.—Some fine showers the past week broke the drought and revived vegetation generally, but a good soaking rain is needed. Hay making in progress. Slightly cooler. P. P. LOON.

Thayerville.—Cool rain and some hail during the early part of the week, but hot and dry later on. Crops are doing tolerably well now. Grass will be light and oats short. L. BECKMAN.

Sunnyside.—Weather continues very dry. All growing crops are suffering for want of rain except corn. Light frost morning of July 9th. Wheat harvest will commence this week. JOHN G. KNAUER.

Dreams and Godly Things

Is the title of a lecture to be delivered by Prof. Robert H. Hall, on Wednesday, July 18, at 8 p. m., at the Auditorium, Mountain Lake Park.

The Professor is highly endorsed by eminent men of many States as a Specialist on the Head and Brain and the action of the Soul while the body and brain sleep. His lecture is said by all to be very instructive and deeply interesting.

Many questions in regard to Dreams, that are dark and mysterious to the human understanding, he will argue satisfactorily and profitably to intelligent listeners. Will close by discussing the question that we have a spiritual reflection that will never forget although separated from the earthly body, and will also tell several exciting ghost stories.

Below are a few private press endorsements selected from a number of similar commendatory letters.

NEW MARKET, VA., April 15, 1894.

Prof. Robert H. Hall delivered a lecture in Polytechnic Hall, New Market, Va., on the night of April 14th, 1894, on the subject of Dreams and Godly Things. The lecture was quite instructive, interesting and entertaining. He uses chaste, good language. Many seemed to enjoy the lecture.

Dr. S. HENKEL, D. D. I very cheerfully endorse the above testimonial of Dr. Henkel regarding Prof. Hall's lecture on Dreams and Godly Things. All should hear it.

W. H. SMITH, Pres. Faculty, Polytechnic Hall.

Prof. Robert H. Hall lectured in Polytechnic Hall, this place, on Saturday night last. His lecture was interesting, and, as he dealt in matters pertaining to dreams, it was something out of the ordinary. He is a good speaker and thoroughly understands his subject.—Shenandoah Press.

FRENCHBURG, KY., December 8th.

Editor Herald—Dear Sir: I desire through the columns of your paper to say that Prof. Robert H. Hall lectured in this place last evening. His subject was Dreams and Godly Things. He came endorsed by eminent men and many ministers as a lecturer. His lecture was instructive and interesting, and well worth the time and money given for it. He showed that he was a disserter of spiritual things. He is a specialist on the head and brain, and the action of the soul in time of sleep of the body.

J. R. NELSON.

Pastor M. E. Church, South. Editor Baltimore (Md.) World—June 19, 1894. Prof. H. Hall, delivered a grand lecture in Christ's Institution, 704 Ensor St. Subject Dreams and Godly Things. The professor showed in his arguments the causes for dreams and certainly understands his subject. He beautifully pictured the soul as acted upon by the supernatural while the body and brain sleep. He is a deep searching reasoner on spiritual things, has a cultivated mind and Godly gifts. He is a fine speaker and those that heard him will be pleased and profited.

REV. G. W. KENNARD, Pastor. REV. W. M. COLE, Sec'y C. I. Admission 25c; Children 15c.

Excursion to Atlantic City, Cape May and Sea Isle City.

On Thursday, July 19th, the Baltimore and Ohio Railroad will inaugurate the series of popular excursions from Pittsburgh, Wheeling, Parkersburg and all intermediate stations to Washington Junction Md., to Atlantic City, Cape May and Sea Isle City, giving the excursionist a choice of the three greatest seashore resorts in the country. For the excursion on July 19th, the same low rates and unexcelled train service, which have made these jaunts to the sea so popular in past summers, will be in effect.

Tickets will be valid for return journey for twelve days from day of sale, and will be good on all regular trains. On return journey they will be good to stop off at Washington, thus affording an opportunity to see Congress in session, to visit the numerous public buildings, which are open to visitors free of charge, and to take a trip down the Potomac to Mt. Vernon, the tomb of the immortal Washington, as well as to visit other places of interest in and near Washington.

For rates and time of trains consult appended table:

	A. M.	P. M.	A. M.	A. M.	RATE.
TOTAL ADULTS.....	9.00	7.15	5.50	3.90	90
Children.....	5.50	4.25	3.25	2.25	50
Mt. Lake Park.....	5.50	4.25	3.25	1.00	50
Deer Park.....	6.00	4.75	3.50	1.12	50

Correspondingly low rates from other stations.

For more detailed information apply to nearest B. & O. Agent. 16-2t.

Rogers' Sarsaparilla.

A specific for all the 100 diseases for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetizer and Worm Syrup, sold by A. G. Sturgis, Oakland; Cnappert Bros., Meigs; J. A. DeBerry, Coriath; C. F. White, Hinton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Langhin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gnagay, Accident; Smith & Callis, Hoyaes, and by all general dealers.

Last June, Dick Crawford brought his twelve months old child, suffering from infantile diarrhoea, to me. It had been weakened at four months old and being sick everything ran through it like water through a sieve. I gave it the usual treatment in such cases but without benefit. The child kept growing thinner until it weighed but little more than when born, or perhaps ten pounds. I then started the father to giving Chamberlain's Colic, Cholera and Diarrhoea Remedy. Before one bottle of the 25 cent size had been used, a marked improvement was seen and its continued use cured the child. Its weakness and puny constitution disappeared and its father and myself believe the child's life was saved by this remedy. J. T. MARLOW, M. D., Tamaroa, Ill. For sale by Oakland Druggists.

Look Here.

When you come to town on the Fourth of July call on H. E. Felty for fruits, vegetables, groceries, cakes and crackers. Everything plente at rock bottom prices. H. E. FELTY, Grocer.

Why Pay More When You Can Get Them For Less?

Look at These Prices:

20 lbs. granulated sugar, \$1.00; all packages coffee, 25c; Shell and Java coffee, 30c; good green or black tea, 25c; Baker's chocolate, 10c; per pound; Baker's cocoa, 5c; Van Houten's cocoa, 30c; California prunes, 12c; evaporated peaches, 15c; 1 lb. choice raisins, 25c; 5 lbs. choice currants, 25c; Lenox soap, 1 cent per bar; 2 cans choice pie pouches, 25c; 3 cans choice table pouches, 50c; 3 cans corn, 25c; 2 cans beans, 25c; 3 cans tomatoes, 25c; 2 cans peas, 11c; per can; French peas, 20c; per can; fine baking powder, 30c; per pound, guaranteed to be as good as Royal.

We Can Save You Money on Anything in Our Line.

We receive daily a full line of choice fruits and vegetables. Everything the market affords at a reasonable price. We have just received a full line of fresh crackers and cakes—the finest line ever in the city. Call and see us and we will make it to your advantage to call again.

W. H. MALETTE, Oakland, Md

FOR YOUNG PEOPLE.

BESSIE'S FAMILY.

There's a little family
Of which I'm very proud;
They never fight and never scratch,
And never cry out loud.

They sit up in the dollhouse there
When I'm away at school,
Like little ladies in laces and blue,
By grandma's strictest rule.

I love them so that each one seems
The apple of my eye,
And if you'll listen just a bit
I'll tell the reason why.

Well, first there is my new French doll—
My Marie Antoinette;
Because she has such lovely curls
She seems my dearest pet.

Then this old doll I've washed and scrubbed;
Till she is pale and sick;
I call her now my invalid,
And love her 'cause she's sick.

Then Pinkie—that's my china doll;
She fell and broke her knee,
I have to love her very much
'Cause she's lame you see.

And then there's Pinkie's sister, Belle,
(She's china every bit);
She has to wear a flannel dress
'Cause nothing else will fit.

Once as I washed her rosy face,
She slipped and cracked her nose—
Oh, how I've loved her ever since
Not even mamma knows!

And last of all there's Sookie Ann,
My rag doll like and fat;
I'm fond of Sookie, though she is
As black as papa's hat.

For Sookie minds the other dolls
When I'm not there to see;
I make her hand the cups around
When all the rest have tea.

Now that is every doll I own;
I've broken all the rest,
You ask which one among the four
I really love the best!

I'll have to whisper very low,
There's none of them who knows,
You'll not tell! Well, then, I think
It's Belle who smartest nose!

—Sara B. Kennedy, in *Parm and Home*.

A NOSE OUT OF JOINT.

We've got a baby in our house
A perfect little right;
I think that is the reason
It came so late at night.

His eyes keep shutting all the time,
His head is awful bare;
And he makes so many faces,
It gives me quite a scare.

Mamma says he is beautiful,
Her precious darling boy;
Papa calls him his jewel bright,
His face, his light, his joy.

I used to have so many names,
I can't remember all;
But since that red-faced baby came,
I'm plain Samantha Hall.

—N. Y. World.

LANGUAGE OF ANIMALS.

They Know How to Warn One Another of Danger.

While hunting with rifle for squirrels in the heavy timber I have at different times, says a writer in *Forest and Stream*, noticed that both birds and mammals seem to have several ways of kind but also of different species, of the presence of a supposed common enemy. In fact, the practice might be called the warning system of animated nature.

As an illustration, suppose the hunter to be going stealthily through the woods or quietly seated upon a stump or fallen tree, and while there to be seen, as he is almost sure to be, by some of the sharp-eyed little wood folks. Now suppose the little wood has before been giving out some note or sound, peculiar to its species. All at once those sounds will be changed to others having a different cadence from those at first given, or as the hunter has discovered the sounds may quickly cease, or even if the little thing was quiet before some movement of the hunter again produces the same phenomenon. How far beyond the commencing point these danger signals are kept up, or extended one may be unable to discover, but I should judge from what I have observed that they extend in all directions beyond gunshot distance.

Should anyone, either with or without a gun, while in the woods where wild life is plenty, twice note of this system of cautionary cries, he would find it very interesting and instructive.

Among the causes that lead to the detection by animals of a person when still hunting there is one that he seldom or ever thinks about, which is the effect his shadow has upon them, especially when the sun is low. No matter how stealthily one may be going along or how carefully he may be concealed behind a tree, or even be seated, his long tell-tale shadow when lightly

moving may be a greater cause of the non-appearance of game than he is aware of.

Still another cause, which, of course, cannot be obliterated much, is the appearance of the face and hands in contrast with the clothes of the hunter or with surrounding objects. That often attracts the attention of animals, but more especially is their attention attracted by the movements of the hands while manipulating the gun. One cannot help but notice should he occasionally take a look behind him when quiet in the woods, how near squirrels and other animals will come up to him from that direction, while in front he will see none of them, thus showing conclusively that the contrast made by the face and hands, with surrounding objects has more to do with making the hunter other than a success than many gunners are aware of.

A FLYING DUTCHMAN.

Home-made Toy Which Is Sure to Delight the Children.

Did you ever see a flying Dutchman? It is a very amusing toy, and a simple one to make. The only materials needed are a spool, a piece of stick, four steel wires, nails and a piece of very thin sheet iron or tin.

To make a toy "Dutchman," obtain an ordinary spool, such as sewing silk is wound on. It will be about an inch and a quarter high and seven-eighths of an inch in diameter. It will have a hole through the center about the diameter of a lead pencil.

Around one end of this spool drive four thin steel wire nails an equal distance apart, as shown in Fig. 1, and file or cut the heads off so they will appear like bits of wire. Then obtain a piece of hard wood stick, about one-half an inch round or square and six inches long; with a sharp knife make a cut around the stick one and three-quarter inches from the end, and from this cut to the end shave the wood away evenly and allow the cut to form a sort of shoulder on which the bottom of the spool may rest, and the finished end will appear like Fig. 2.

One-half inch of this wood used should project above the top of the spool, as shown in the illustration. This short end will sometimes prevent the spool from jumping off the stick,

while at the same time it serves as a center over which the "Dutchman" is to fit just before it is flown. For the "Dutchman," which is the last thing to be made, obtain a tin snail's shell or a very thin tin, and cut from it a square of five inches. From this square bore a hole in the center of it large enough to fit loosely over the end of the stick above the spool. Around this hole, and on a line with the blade, punch with an awl and hammer four small holes, large enough to fit over the steel wire nails driven in the top of the spool.

The "Dutchman" will then fit over the stick and nails and lie flat on top of the spool. Now take hold of the "Dutchman's" ears and bend each one slightly by hand, all in the same direction as shown in the cut, and place the spool over the end. Around the spool wind a piece of fishing line about two feet long, having at one end a button which may be taken hold of when pulling the string. Then place the "Dutchman" over the stick and pin, so when it is all together it will appear as shown in the illustration. Place your thumb against

the spool to prevent the cord from unwinding, and when ready give the cord a vigorous pull and the "Dutchman" will fly upward.

To make the "Dutchman" fly hold the stick with the snail's ear up in the left hand. Several of these "Dutchmen" can be made at one time, as they will get lost sometimes or lodge on high places.

The ears of the "Dutchman" should be bent, of course. The edges that catch the wind first in revolving should be up, so the centrifugal force given to the "Dutchman" by the string and spool will cause it to fly.

One must be very careful, though, not to nip them at anybody, as the sharp revolving edges would be liable to hurt or even cut a person. If made according to the above directions and the ears are bent properly a vigorous pull on the cord should make one of these little metal pieces fly a great many feet high. —N. Y. Recorder.

MISCELLANEOUS.

—In Connecticut, Florida, Oregon and Wisconsin the school age begins at 4 years.

—Sagittari was fond of cats, and, in this circumstance, the celebrated and very curious "Cat Fugue" which appears in his works.

—In New York City there are 3.82 families to a dwelling; in Cincinnati, 1.96; in Chicago, 1.73; in Boston, 1.70; in St. Louis, 1.51.

—"I had horrible dreams last night," Mrs. Gnesso. "There, I told you if you drank that strong coffee you wouldn't sleep one wink, didn't I?"—*Inter Ocean*.

—There are 5,925 light house stations in the world. Of these England has 817, the United States 232, Canada and Newfoundland 101, and France comes fourth with 444 lights. The whole of Europe has 3,477 light houses as stations.

—Under the treaty of Guadalupe Hidalgo, all persons in the acquired territory who were regarded as citizens of Mexico were considered to become citizens of the United States, and thus many people of many tribes in Mexico, Arizona and California are legally citizens.

—The population of the globe is thus divided in point of religion: Christians, 219,000,000; Greek Orthodox church, 95,000,000; deists, 4,000,000; Mohammedans, 172,000,000; Jethons or Pagans, 234,000,000; Asiatic Buddhists, 618,000,000; grand total, 1,455,000,000.

—Manufacture of home "vials" is the old little sign on a basement door in Varick street, New York. Within two men with blowpipes and abundant heat fashion the tiny bottles in which homeopathic pills are put up. Skilled workmen can turn out the small vials with great rapidity, as they require only a certain deftness of hand, together with a knowledge of the properties of heated glass.

—There seemed at one time to be some danger that the admirable short and entirely adequate "ink" would be driven out by the phrase "writing fluid," and many persons did for a while permit the intemper to be thrust into their mouths, but the hundred and one purveyors of ink, while each vinting his own product as the best in the market, seem content nowadays to spell the name with three letters.

—Mrs. Lucy C. Carnegie has the satisfaction of being the first woman elected to membership in the New York Yacht club. Though not admitted to the use of the clubhouse on a footing with men, a freedom no woman would desire, Mrs. Carnegie receives all the privileges she wishes—the flying of the club burgee, entering races, and the use of the club stations and boats, which extend from Bay Ridge to Vineyard Haven. Mrs. Carnegie is an enthusiastic yachtswoman, and her new steam yacht Dungeness will be an important addition to the club fleet.

—A season ago, when a New York library some weeks ago gave forth the other day an exquisite great butterfly. The delicate feathered creature was kept in the room day or two and then in pity set free just at nightfall. These were some misgivings lest this thing, proved to be a butterfly, but it was felt to be well when next morning the butterfly was discovered where it had been placed, but this time in company with a mate. It had happened that the temperature indoors and out had been so nearly alike that the butterfly, in the library, had burst its bonds almost at the same moment, and one outside destined to become its mate.

—The plea was made on behalf of the Cornell student who recently played a trick through which a woman lost her life that they "had not any malicious intent." A small plea, but all was felt to be well when next morning the butterfly was discovered where it had been placed, but this time in company with a mate. It had happened that the temperature indoors and out had been so nearly alike that the butterfly, in the library, had burst its bonds almost at the same moment, and one outside destined to become its mate.

—A gray-haired and wrinkled Italian organ grinder after turning out several popular melodies in front of a Brooklyn grocery store, doffed his old hat and bowed himself to the store door, where the proprietor, who apparently had enjoyed the music, was standing. The Italian extended his hat and smiled. The grocer felt in his pocket and said: "I haven't got a penny." The Italian's smile deepened. He fished four cents out of a jingling vest pocket and handed them to the grocer, who, while still smiling, handed them back, so the organ grinder's bronzed countenance, produced a nickel and handed it to the Italian. A throng of little school girls who had seen the transaction sent up a shout of laughter, in which the grocer joined with heartiness.

Bullets of the Hindus.

In proof of how much belief is a thing of environment the wise men point to the Hindus. With all castes of Hindus it was a matter of religion that the body of a snake accidentally killed should be burned as it may have been the incarnation of a Brahmin. This belief was held by all good Hindus till the British government began to offer a reward for the heads of venomous snakes, when every mother's son of a Hindu instantly went back on his belief of his ancestor and chopped off the snakes' heads he could get. The Hindus have the most superstitious reverence for venomous grandfathers and their fathers-in-law, who are supposed to keep up their existence after death in the body of a snake, but that does not prevent the wholesale slaughter of snakes. Nay, some of the more enterprising Hindus have gone into the business of raising cobras and have exhibited little snake farms, where vipers breed for the reward that attaches to their heads. —N. Y. Times.

FOUR CONSUMPTIVE GAMBLERS.

Each Try to Live Longest So as to Win a Pool of Four Thousand Dollars.

In the year 1881 there were few men better known in the sporting world than Billy Emerson, Jack Sheridan, Johnny Pratt and Winniege. No one ever seemed to know just what Winniege's first name was, but, like the other three, he was a man whose nerve, when it came to making a heavy wager on card or horse, was never questioned. Among racing people in the east and west these four men were known and respected, for, in addition to being heavy gamblers, they were men who had never been in any way identified with any scheme or deal that was not, to use a racetrack expression, "on the level." It was during the year 1880 that they were at the top notch of prosperity. Although different in many ways, there was one common ailment among them, and it was probably this that made them such fast friends. All four were consumptives, and although at that time the disease was not more than shown itself, they got worse and worse as the years rolled by, until one by one they died. Although they must have known what was the trouble with them, it was utterly impossible to get anyone of them to acknowledge that he had consumption.

Every one in a while nowadays, when bookmakers get together over a cold bottle and begin telling stories, the story of the "four cons," as they were called, comes up. One evening a bookmaker was telling the story.

"A peculiar thing about those men," he said, "was that although none of them would ever acknowledge that he was on the brink of the grave, they would take great pleasure in gazing one another about their ill-health. Emerson, pale and emaciated and emitting hollow coughs, would stand at a table and gaze at a similar condition, and say: 'Look here, old boy! you are a sick man. Go away somewhere and recuperate. You need a rest.' Then Pratt would brace up and reply, indignantly: 'You go to Halifax! What do you mean by telling me I'm sick?' and then he would stride away, and clear his throat."

"This sort of thing went on for some time, until one day Emerson remarked to the others that he was going to have his life insured. 'What?' they gasped together. 'You don't think any company would take a chance on a man like you?' Emerson laughed the insinuation, and the next day had an examination for life insurance. Of course he didn't pass. When he gloomily told the others about it they gave him the grand laugh. Then each one in turn quietly informed Emerson that he himself was going to be insured. They all tried and all were rejected.

"One day they met at the racetrack, and Emerson remarked: 'Say, boys, we couldn't get insured; but I've got a better game than that. Let's put up a thousand apiece, and the one who lives the longest takes the grand pot.'"

"Why, you poor fool!" remarked Winniege, who was at that time the worst case of all. "It's a dead certain way for me."

"O, you don't say so!" put in Pratt. "Why, one of your lungs is missing now, and I don't think you'll live a year." After an hour of this sort of chaffing the four men agreed to put up the money. It was given to Billy Elliot, a bookmaker, and he deposited it in a New York bank. It was deposited in such a way that any one of a dozen bookmakers could draw it out at any time. This was done so as to make the last man would be able to get the money without any trouble. At this time Pratt Winniege was an awful sight, and people thought he would die at any minute. Yet he would come to the track every day, and whenever he ran across one of his sort of chaffing the four men agreed to put up the money. It was given to Billy Elliot, a bookmaker, and he deposited it in a New York bank. It was deposited in such a way that any one of a dozen bookmakers could draw it out at any time. DEBS INDICTED.

He and His Followers Charged With Conspiracy.

THE FEDERAL JURY ACTS.

Accused of Restricting Mails and Interstate Commerce.

DEFENDANTS RELEASED ON BAIL.

The Western Union Compelled to Produce Debs' Telegrams in Court—Peace Finally Attained at Chicago—Troops Sent to Sacramento—Strikers Armed and Bloodshed Likely at the California State Capital—Dispatches Indicate That Normal Conditions Are About Restored Throughout the Country—The Order Promulgated For All Classes of Labor to Strike in Chicago—Anarchists Terrorizing People in Illinois—Strike News From Different Points.

CHICAGO, July 11.—Slowly but steadily, calmly and certainly, as leftists the supreme power of a great nation throughout all that wide stretch of its domain where evil disposed persons are taking advantage of an exceptional condition to incite violence and bloodshed, the federal government is moving to the accomplishment of that for which its powers were delegated to the people, the preservation of order and the safety of life and property. At Chicago, in conjunction with the state and municipality, it has already brought new order to the condition of war which prevailed last week. At San Francisco, Sacramento, Los Angeles and various points in Colorado and Washington, where the unruly are causing havoc, it has let slip the dogs of war in token of its intention to have peace, even if it has to fight for it. In this city the military arm having accomplished its purpose, the judicial arm has taken up the orderly course of its duties which include the thing upon the guilty parties the measure of their crime and the fitting of the punishments thereon.

The first step in this procedure was the assembling of the federal grand jury and the delivery of the charge to it by Judge Grosscup as set forth by the national authorities, who are not to be turned aside from an exhaustive inquiry into the questions which it has undertaken to pass upon by a mere technicalities. This was evinced at the outset by the brusqueness with which it swept aside the plea of immunity and privilege which the Western Union Telegraph company, with a due regard for the privacy of the messages of its clients, was forced to put in when the jury called for the messages from President Debs to the members of his order which had been transmitted over its lines. The court held that public safety was paramount to private right and ordered that the dispatches be produced. That it is the intention of the government not to be too long about the work in hand, was shown from the fact that the first steps of the telegraph officials who brought the dispatches, had scarcely ceased to echo along the corridor leading to the grand jury room when that body filed into Judge Grosscup's court and announced that it had found a true bill of indictment.

Reading the arrest of the person thus put under the ban of the law, his name remained locked in the breast of the least high executioner and the public was allowed to draw its own conclusions from all the premises and such preliminary data as it had at hand. That President Debs was the man, none doubted, and subsequent developments justified the surmise.

Toucing the outlook for the future, outside of Chicago, it may be said that the dispatches are almost uniform in tone to the effect that normal conditions have already been restored, or that they are rapidly approaching that state, and there seems no reason to believe that the progress toward a complete resumption of trade and traffic will meet with any serious check as the coming days shall succeed each other. In other words, it does not seem probable, with all the forces of law and order as now arrayed with their leader put to his own defence at the bar of justice with their ranks beginning to be depleted by desertions, and with the strain which they have already endured, that the American Railway union can rally its forces for a struggle which must needs be long and discouraging at best.

Apparently, therefore, their only hope of final triumph lies in the aid which they hope to get from union labor outside of the organization.

The order for all classes of labor in Chicago to go on strike has been promulgated and that of Grand Master Workmen Sovereign of the K. of L. calling on all members to strike and all who sympathize with the Pullman strikers all over the country to come out with them followed quickly. How generally these orders will be obeyed is problematical. To a good extent their effect has been already discounted by the stagnation of business, and it is known that the longest headed of the labor leaders themselves believe that action has been postponed too long to be fully effective.

At sunset tonight this nation will probably know whether the situation is one of crisis or collapse.

JUDGE GROSSCUP'S CHARGE.

His Statement of the Law Affecting the Strike.

CHICAGO, July 11.—Judge Grosscup, in the course of his charge to the federal grand jury, defined the laws existing making it a crime to interfere with interstate commerce or with the transmission of the United States mails. The laws of the United States also provide that a conspiracy to interfere in any way with the laws of the United States is to be treated as a crime. He said that the laws of the United States are in force against the United States.

Then Judge Grosscup says: "If it

shall appear to you that any two or more persons corruptly or wrongfully agreed with each other to interfere with the mails and interstate commerce should be forcibly arrested, obstructed and restrained, such would constitute a conspiracy.

"If it shall appear to you that two or more persons corruptly or wrongfully agreed with each other that the employees of the several railroads carrying the mails and interstate commerce should quit, and that successors should, by threats, intimidation or violence be prevented from taking their places, such would constitute a conspiracy.

"If, however, the right of labor to organize, each man in America is a free man and so long as he does not interfere with the rights of others he has the right to do with that which is his own. He is entitled to the highest wage that the strategy of work or cessation from work may bring, and the limitations upon his intelligence and opportunities may be such that he does not choose to stand upon his own perception of strategic or other conditions. His right to choose a leader, one who observes, thinks and wills for him, a brain skilled to observe his interest, is no greater prerogative than that which is recognized in every other department of industry. So far and within reasonable limits association of this character is not only not unlawful, but, in my judgment, beneficial when they do not restrain individual liberty and are under enlightened and conscientious leadership.

"But they are subject to the same laws as other associations. The leaders to whom are given the vast power of judging and acting for the members are simply, in that respect, their trustees. Their conduct must be judged like that of other trustees, by the extent of their lawful authority and the good faith with which they have executed it. No man in his individual right can lawfully demand and insist upon conduct by others which will lead to an injury to a third person's lawful rights. The railroads carrying the mails and interstate commerce have a right to the service of each of its employees until each lawfully chooses to quit and any concerted action upon the part of others to demand or insist upon any effective penalty or threat upon their quitting to the injury of the mail service or the prompt transportation of interstate commerce, is a conspiracy, unless such demand or insistence is in pursuance of a lawful authority conferred upon them by the men themselves and is made in good faith in the execution of such authority. The demand and insistence under effective penalty or threat upon the quitting of the mail service or the prompt transportation of interstate commerce being proven, the burden falls upon those making the demand or insistence to show lawful authority and good faith in its execution.

"Let me illustrate: Twelve carpenters are engaged in building a house. Aside from contract regulations, they each can quit at pleasure. A thirteenth, a stranger to them, and to the others, by concerted threats of holding them up to public odium for private malice, induces them to quit and leave the house unfinished. The latter in no sense represent the former or their wishes, but are simply interlopers for mischief and are guilty of conspiracy against the employer of the carpenters.

"But if you on a trial for such results prove that instead of being strangers they are trustees, agents or leaders of the twelve, with full power to determine when and whether they will quit, and that they ought to continue or quit, and that they have in good faith determined that question, they are not then, so far as the law goes, conspirators.

"But if it should further appear that the supposed authority was used not in the interests of the twelve, it would no longer justify their conduct. Doing a thing under color of authority is not doing it with authority. The injury of the two to the employer in such an instance would only be aggravated by their breach of the associated twelve, and both employer and employees should with mutual insistence ask for the violation of the law.

"If it appears to you, therefore, applying the illustration to the occurrences that any two or more persons, by concert, insisted or demanded under effective penalties and threats upon men quitting their employment to the injury of the mails or interstate commerce, you may inquire whether they did these acts as strangers to these men, or whether they did them under the guise of trustees or leaders of an association to which these men belonged. And if the latter appears, you may inquire whether their acts and conduct in that respect were in furtherance of the interests of their supposed authority, or were simply a use of that authority as a guise to advance personal ambition or satisfy private malice. There is honest leadership among these our laboring fellow-citizens, and there is dishonest leadership. You should not brand any act of leadership as done dishonestly or in bad faith unless it clearly so appears. But if it does so appear, if any person is shown to have betrayed the trust of these toiling men, and their acts fall within the definition of crime as I have given to you, it is of your interest, the pleasure and the duty of every citizen to bring them to swift and heavy punishment.

"I wish again, in conclusion, to impress upon you the fact that the present emergency is to vindicate law, if no one has violated the law under the rules I have laid down, it needs no vindication; but if there has been such violation, there should be quick, prompt and adequate indictment.

"I confess that the problems which are made the occasion or pretext for the present disturbance have not received the consideration they deserve. It is our duty as citizens to take them up and by candid and courageous discussion ascertain what wrongs exist and what remedies can be applied. But neither the existence of such problems nor the neglect of the public hitherto to adequately consider them justifies the violation of law, or the bringing on of general lawlessness. Let us first restore peace and punish the offenders of the law and then the atmosphere will be clear to think over the claims of those who have real grievances. First vindicate the law. Until that is done no other questions are in order."

ANARCHISTS SPREAD TERROR.

Illinois People Terrified by the Striking Foreign Miners.

OTTAWA, Ill., July 11.—Affairs at Spring Valley are taking on an ominous look and the commanders of the Rock Island and Galesburg companies sent a long communication by wire to Adjutant General Orendorff detailing

the situation. The substance of the dispatch was that the miners have so intimidated all classes of the people with threats of what will happen after the troops are removed that every obstacle is placed in the pathway of the soldiers and all classes act in a hostile manner. Mayor Jackson, who is evidently terrorized, ordered the soldiers out of town, but they refused to obey. The telegraph operator was frightened away and one of the soldiers is at the key.

The storekeepers have been made to refuse to sell supplies to the troops and the latter have, in consequence, taken possession of the company store, soldiers acting as custodians in place of the terrorized clerks. So far has this reign of anarchy extended that the woman upon whose property the well from which the troops draw water is situated, begged pitiously for the officers to secure water elsewhere, as the anarchists had threatened to burn her house to the ground.

There are 120 soldiers and 75 well armed deputies upon the ground, a force sufficient to prevent the anarchists from obstructing trains and to hold the company store, but the officers consider it good policy for the state to increase the force in order that a showing may be made that will wholly cover the turbulent Hungarians and Lithuanians.

DEBS OUT ON BAIL.

He and His Lieutenants Indicted by the Federal Grand Jury.

CHICAGO, July 11.—The federal grand jury, after receiving the instructions of United States Judge Grosscup returned indictments against Eugene V. Debs, president of the American Railway union; George W. Howard, its vice president; Sylvester Kolcher, secretary, and L. W. Rogers, one of its directors, and shortly thereafter the four men were arrested. They are charged with conspiracy to commit an unlawful act, that is, to block the progress of the United States mail. Joined in the indictment with the four leaders of the railway union was James Martin, the Rock Island striker who threw the switch which derailed a mail train at Blue Island on the night of June 30.

Debs, Howard, Kolcher and Rogers were taken into the office of District Attorney Mitchell immediately after their arrest and after a few hours' detention were released on bail by Judge Grosscup, their bonds being \$50,000 each. The federal grand jury spent but a short time on the case of Debs and the other leaders of the strike. The case was based on some of the public utterances of Debs and the other leaders, and this was clinched by the original orders in writing sent out by Debs directing men on the different railways to quit their work, and this stopped the running of mail trains. A large number of telegrams sent by Debs from his headquarters, giving directions which extended the blockade of the trains were submitted.

DEBS' TELEGRAMS PRODUCED.

Western Union Manager Compelled to Bring Them Into Court.

CHICAGO, July 11.—E. M. Mulford, manager of the Western Union Telegraph company, was called before the federal grand jury to produce telegrams sent by President Debs. He refused to do so on the ground that they were privileged communications. He was notified by Judge Grosscup to appear with the telegrams. He again objected and referred to the matter to the general attorney of the company. The matter was taken under long consideration and the attorney sought on every legal provision at his command to avoid the production of the telegrams.

But the federal grand jury, on the point made by Manager Mulford, that the communications were privileged and in the custody of the company as such, Judge Grosscup's notice was imperative, however, with the word that unless the telegrams were produced Manager Mulford would be sent to jail. Evasion being impossible the telegrams were produced in court.

The Western Union manager at St. Paul, Minn., was also called and at Keokuk for refusing to produce telegrams in court received by A. R. U. officials at that point.

THE STRIKERS ARMED.

Eight Almost Certain When Regulars Reach Sacramento.

SAN FRANCISCO, July 11.—The ferry steamer Alameda, bearing United States troops, has left Presidio wharf. The steamer headed for Sacramento river and there is no doubt the destination of the troops is Sacramento. The statement that martial law has been proclaimed caused the wildest excitement at Sacramento. The strikers are quiet at Sacramento and are prepared to resist any effort to disperse them. A prominent striker informed your representative that if any attempt was made to bring in regulars they would surely follow. Guards have been stationed along the river bank to warn the strikers of the approach of the steamer carrying the regulars. There is no doubt but that the regulars, if sent here, a bloody conflict is inevitable. As near as can be ascertained the strikers are in possession of about 1,400 rifles and are prepared for a long siege.

The Pullman Building Guarded.

CHICAGO, July 11.—The Pullman building at Michigan avenue and Adams street, the home of the Pullman Palace car, is now well guarded by the headquarters of General Miles and the department of the Missouri, United States army, under a strong guard of armed men, and by the Pullman detectives. The big building, which is one of the most palatial and elegantly furnished in the city, has been under guard ever since the beginning of the Pullman strike.

Deserted to the A. R. U.

CHICAGO, July 11.—At a joint meeting of the Brotherhood of Railway Trainmen Lodge No. 284 and the Order of Railway Conductors, Division No. 208, employed on the Chicago division of the Illinois Central railroad, turned the laws of their orders to the wall and resolved to join the strike. Lodge No. 40, Switchmen's association, located at Grand Crossing, surrendered its charter and its members joined the A. R. U.

Freight Trains Delayed at Louisville.

LOUISVILLE, July 11.—Everything is quiet here and no trouble of any kind has occurred. The strike is confined to the Louisville and Nashville and the men on all other roads are still at work. All passenger trains are moving about

on time and the only delay is as to freight trains. The only men out are firemen and switchmen, the engineers and conductors having refused to strike.

Business Normal at St. Louis.

ST. LOUIS, July 11.—The condition of traffic at this point is reaching a normal condition. On the west side of the river and on transfer systems the yards and engines are fully manned. All the freighthouse yards are opened for business and the volume of traffic handled is showing a gratifying increase, the force of men at present at work being large enough to handle more than now comes to them.

May Ignore Pullman.

CHICAGO, July 11.—A movement originated among a coterie of Pullman stockholders on the board of trade to induce the resident directors of the Pullman company to bring their influence to bear on Mr. Pullman to yield to demands for arbitration, or, if necessary, to call an emergency meeting of the executive committee of directors to act independent of Mr. Pullman's interests.

The Strike in the Senate.

WASHINGTON, July 11.—In the senate Mr. Peffer discussed his resolution, which looks to the government control of the railways and coal fields and the adoption of the doctrine of a single tax. Senators Davis and Gordon made a strong attack on it and the Kyle resolution, and severely condemned Debs and the strike.

Arrested For Abusing Workmen.

DULUTH, July 11.—Two deputy United States marshals have arrested E. Leeson, an A. R. U. telegraph operator of the Northern Pacific road here, for contempt of the United States court. When the freight passed his station he called the engineer and fireman uncomplimentary names and attempted to intimidate them.

A Railroad Bridge Burned.

TRIUMPH, Col., July 11.—Striking coal miners or A. R. U. men burned a bridge 120 feet long on the Aguilar branch of the Denver and Gulf railroad near Victor. The union miners at Aguilar who are on strike were incensed because the United Coal company had opened up the mines with non-union men.

Merely a Paper Blockade.

MINNEAPOLIS, July 11.—The blockade of traffic on the Minnesota and Wisconsin is a blockade on paper only. For a number of days the passenger service on all the roads has been moving practically on time. Now freight service has been resumed on the Milwaukee and St. Paul, the Omaha and other roads.

A Bloody Fight With Rioters.

SPRING VALLEY, Ill., July 11.—Company C of the Fifth regiment, commanded by Captain Conrad, came into collision with the mob at this place and after patiently enduring volley after volley of stones fired into the mob, killing a man and wounding several others. They are all foreigners.

Improvement at Cincinnati.

CINCINNATI, July 11.—The railroad situation continues to improve. Trains move with regularity and in greater number every day. The strike of the Big Four firm on the St. Louis division from St. Louis to Indianapolis does not affect the movement of trains at this end of the line.

Strikers Fire a Bridge.

HAMMOND, Ind., July 11.—Strikers fired the Main bridge across Little Calumet river and before the flames were extinguished two rail lengths of the trestle were destroyed. In consequence trains on that line are delayed.

Wearing Miniature Flags.

CHICAGO, July 11.—For answer to President Debs' call upon all sympathizers to wear white ribbons miniature United States flags are being distributed on the board of trade and worn on the lapel.

Attempt to Blow Up Wickes.

CHICAGO, July 11.—An attempt has been made by a man whose name the police will not divulge to kill Vice President Wickes of the Pullman company with an infernal machine.

Four More Arrests at Milwaukee.

MILWAUKEE, July 11.—Four more men have been added to the company of railroad men held by the United States authorities for interfering with the movement of the interstate commerce act, making eight in all.

Fire in an Ohio Town.

ST. CLAIRSVILLE, O., July 11.—Fire broke out in E. H. Wilson's restaurant and in three hours damage to the amount of \$200,000 had been done. There were no means of fighting the blaze and it quickly spread to the main building, the store, then to Redmeyer & Van Curen's grocery, Alexander's drugstore, Horner's meat market, Gillis's saloon, McMillan's jewelry store, Barr's jewelry store, Calkins' bakery and The Gazette office, all of them being destroyed.

Carnages Want the Money Back.

PITTSBURGH, July 11.—It is now stated authoritatively that the Carnegie Steel company will make a strong effort to recover the fine of \$140,000 imposed upon it by President Cleveland for furnishing alleged bad armor plates to the government during the war. The plates have been declared to be all right.

Prendergast Likely to Hang.

CHICAGO, July 11.—Judge Bailey of the Illinois supreme court has refused to issue a supersedeas in the case of Prendergast, the assassin of Mayor Harrison. This apparently makes certain the hanging of Prendergast on Friday, July 13. About the only hope for Prendergast is interference by Governor Alged.

Awards Must Serve His Time.

BREMEN, July 11.—The imperial high court has rejected the appeal of Rector Ahlwardt, the notorious Jew baiter, against the sentence of three months' imprisonment imposed upon him for libelling Prussian officials.

That Shen to Be Electrocuted.

TROY, July 11.—Bartholomew Shen, who killed Robert Ross in a riot on the municipal election day, has been condemned to death by electricity during the week of Aug. 21.

Statehood For Utah.

WASHINGTON, July 11.—The bill for the admission of Utah has passed the senate without division.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARSONS, M. D., 123rd Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 27 MURRAY STREET, NEW YORK CITY.

\$1.75. \$1.75.

THE NEW YORK WEEKLY TRIBUNE AND THE REPUBLICAN

ONE + YEAR +

One Dollar and Seventy-five Cents CASH IN ADVANCE!

Address all Orders to THE REPUBLICAN.

MERCHANT TAILORING.

B. Savage, the Tailor, has returned to Oakland and reopened his Tailoring Establishment, and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also a large and complete stock of ready made clothing which he will alter to suit and make to order for the alteration. Give him an early call and judge for yourselves. He will also in a short time have a full line of shoes and hats for sale. Yours respectfully, B. SAVAGE.

Cor. Oak and 3d Streets.

MILLINERY!

I desire to inform the people of Oakland and vicinity that I am now prepared to furnish them at very reasonable prices.

Give me a call, examine my goods, and be convinced that my stock is complete in every particular. 113a MADIE CUNNINGHAM.

PLACE YOUR ORDERS FOR Monuments, Headstones, AND Chimney Pipe WITH J. B. WILLIAMS FROSTBURG, MD. AGENTS WANTED. 1193-37-8

NOTICE TO TAX-PAYERS.

Notice is hereby given that the undersigned officer in person or by deputy, will be in each of the election districts in said county, to collect and receive taxes at the time and places following:

July 16, McHenry.
17, Hayes.
18, Fremontville.
19, Sellersport.
20, Arcadia.
21, Cove.
22, Grandville.
23, Johnsons.
24, P. H. Lockmans.
25, Avon.
26, George's.
27, New Germany.
28, Pittsburg.
August 1, Bittinger.
2, Bloomington.
3, Floyd.
4, Sullivan.
5, Wilson.
6, Deer Park.
7, Alton.
8, Gorman.
9, Red Horse.
10, Rockwell.

Office in Oakland will be closed from July 10th to August 4th inclusive.

X. W.—By an act of the General Assembly of Maryland, passed at January session, 1890, being Chap. 23, it is provided that "All county taxes shall be due and payable on the first day of September succeeding the date of levy, and on county taxes paid on or before said day a discount of 3 per cent, shall be allowed, and after the first day of January all taxes shall bear interest at the rate of 6 per cent per annum until paid. The Treasurer shall take the discount and charge interest on the tax bills for county purposes regularly in the manner aforesaid, and shall note the same on his books and upon the receipt given for taxes so paid; but this discount shall not be allowed unless the whole amount of State and county taxes for the current year be paid when the same are due."

E. F. COLLARS, Treasurer.

M'COMAS & HINEBAUGH.

—PROPRIETORS OF—

OAKLAND PHARMACY.

A NEW STORE.

I HAVE A FULL LINE OF Millinery Goods, New and Stylish Hats, Ribbons, Flowers, Lace, Gloves, Mitts, Corsets, Veiling, Fancy Goods and Notions.

Also have Sugar, Calico, Muslin and other articles at reasonable prices.

BUTTER AND EGGS

taken in exchange for goods.

MARY SPINDLER, ACCIDENT, MD.

AMY'S WEDDING GIFT.

WHEN Bert Hammond was a boy of eighteen years old his mother died. But before her death she exacted from him a promise that he considered his sacred duty to fulfill. He was a conscientious boy and had been a good son.

"Your father," the dying woman said, "took one thousand dollars from Seth Manning, of whom you have often heard me speak. He is a hard man, treating those less fortunate than himself coldly and superciliously. But that was not the slightest excuse for your father's dishonesty. Mr. Manning never even suspected his guilt. I have tried during all the years of my widowhood to earn the stolen money and restore it. I found it utterly impossible to do so, for it took all I could earn to support myself and you in even the humblest way. But you are young and strong and brave, Bert dear, if you want me to rest quietly in my grave, you will strive to return that money."

He made the promise without any misgivings, too young to realize how severe the task might be. He was not a very gay and happy, and what upon some shoulders would have been a very heavy burden rested lightly and easily on his. He expected to work hard and was determined to spend no more money upon himself than was absolutely necessary. He tried to find a better situation, and after a few months his perseverance was rewarded. He lived quite as simply as before, managing to save one hundred and fifty dollars or more every year.

When Bert was about twenty-one years old he was walking one day in the street, carrying a valuable vase home to his purchaser. Suddenly he heard a great noise and outcry, and as he turned a corner he saw a dog, his mouth covered with foam, just ready to spring upon a young girl, who stood as if paralyzed with fear. The vase was large and heavy, and without a moment's hesitation Bert threw it at the dog's head. It stunned the creature for a few moments, and before he could spring up again two policemen attacked him with their clubs and soon all danger was over. When Bert picked up the vase, he saw with a sinking heart that the handle was broken. He sighed involuntarily.

"Will you have to pay for that?" asked the girl.

"Yes, I think so," he replied, gravely.

"How much will it be?"

"Twenty-five dollars," said the very least.

"Oh, I am so sorry," she exclaimed.

"You did it for me—and I am not worth it."

"You must not say that," he answered, approvingly. "What is this thing compared with the life of a human being? Think of your mother."

"I have no mother."

"Your sister, then, or brother?"

"I have neither—nor relative of any kind."

"No one?"

"No. So you see my life cannot be of much consequence, although I think you for saving it."

"I am all alone, too," Bert said.

"We ought to be friends."

"How can we be?" she asked, sadly.

"Do I look like a rascal?" he demanded, in his brusque, impetuous way.

"No," she replied, gazing straight into the big, honest eyes. "I wish you were my brother. If you will let me help you to pay for that vase, broken on my account, I shall be very glad. I can give you ten dollars now, that I have saved."

"What were you saving it for?"

"To buy a winter cloak; but I can wear my old one."

"No, you cannot. Do you think I would deprive you of a garment you really need? Nice brother I should be!"

The acquaintance did not end here. Amy Hillings painted little pictures for an art store. They showed no great taste or talent, yet they did, as such things do sell, in a way that seems unaccountable. Doing fancy work besides, she managed to supply her simple daily wants. The poor woman with whom she boarded took a great interest in the desolate child, befriending her in many ways.

Very soon Bert did what young men who are in no position to marry are almost certain to do. He fell in love, and with little Amy. It must have been from pure pity in the first place, for the girl was neither pretty nor especially attractive. Constant care and anxiety had taken the color from her cheek and the glad brightness from her eyes. But the expression of her face was sweet and gentle, and her smile was like sunshine, the more charming, perhaps, on account of its purity, for she was usually grave, even to sadness. Bert was always delighted if he succeeded in bringing a merry look into her face for even a moment.

"You poor little thing," he exclaimed one day. "I would like to take you in my arms and carry you off where you would always dress in satin and live on nightingales' tongues."

"You are a dolt, good Bert," she said, "but I would rather have muslins to wear sometimes, and I should prefer a generous slice of roast beef to the nightingales' tongues." And it made his heart fairly dance to hear a genuine laugh ripple from her lips.

A short time after this Bert made a sudden declaration of his love, with all his natural impetuosity and eagerness. But Amy looked so astonished and startled that his conscience smote him and he cried:

"I am a brute, Amy dear, to frighten

you so. You need not marry me if you do not want to. I take it all back, every bit of it."

Then, womanlike, she looked so sadly disappointed that he commenced delightedly at the very beginning and said each word over again, even more earnestly and impetuously than before. But by this time Amy had told him that she had solemnly promised to marry him, and was neither surprised nor frightened. Indeed, she seemed to consider them very satisfactory. Of course they were engaged, and gradually the pretty color returned to the young girl's cheek and the light to her eyes. The kind widow rejoiced in these evidences of happiness, and in the prospect of a brighter future for her gentle favorite.

Yet Bert, although at times he could not resist buying a pretty, inexpensive trinket for the girl he loved, still could not convince little Amy, however, that he had solemnly promised to pay.

When he and Amy became engaged he had six hundred dollars in the bank; and soon afterward his weekly salary was raised from twelve to fifteen dollars. Amy clasped her hands in delight when she heard the welcome news, but she would not listen to Bert's proposal that they should be married right away.

"No, no," she said. "You must pay that debt before we can think of marriage. Your mother would not smile upon me from above if I consented to the other burden to the one you already have to bear."

"You would not be a burden, Amy," he cried. "You are the dearest, sweetest."

He finished the sentence in the way that is usually very convincing. Indeed, she could be very true at times.

It took more than a year to make up the necessary amount. But oh, how happy they were when it was accomplished!

"Now your mother will smile in heaven," Amy said, tenderly, to her lover.

"And I have taught you, my darling," he replied, "to smile on earth."

That was, indeed, the truth, for she looked very little like the pale, sad Amy he had first seen. Her face was round, her cheeks brightly tinted, and her eyes sparkled with health and happiness. No medicine in the world could ever have effected what love had so easily and naturally done.

When Robert was shown one morning into Mr. Manning's office, the grim lawyer's greeting was not an encouraging one.

"Well, young man," he demanded, "do you want anything? Speak quick, as my time is valuable."

"Perhaps you remember Evans Hammond," Bert said.

"Yes, what of him? Speak—why don't you speak?" he asked, impatiently, as the young fellow hesitated.

"You never knew, I believe," Bert said at last, "that my father, sorely tempted, took a thousand dollars from you."

"I always thought him a fool, but I never suspected that he was a knave also."

"My mother did not betray him, but she made me promise to return the whole sum, and there it is," Bert said, as he placed a roll of bills on the lawyer's desk.

"Where did you get that money?" he finally asked.

"I have been saving it ever since I

"WHERE DID YOU GET THAT MONEY?"

was eighteen years old, and I am now twenty-five."

"Then all I have to say is that you are a fine fellow—worth a dozen of your father. I should be glad to shake hands with you, for I can appreciate perseverance and honesty if I am an old skindiv—that is what they call me. Are you married, young man?"

"No, sir, but—"

"Yes, and I shall not have to wait any longer now that I am relieved of this debt. Amy would not listen to anything of the kind until the money was paid. She is the best girl in the world."

Bert wondered afterward at his temerity in talking thus freely to the stern old man. But Mr. Manning's sternness seemed suddenly to have disappeared, and he listened to the lover's honest confessions with almost a smile upon his face.

When Bert was turning in order to leave, the lawyer seized the roll of bills, evidently intending at first to return the whole sum. But the innate spirit of greed was too strong for him and he hesitated. Then he nervously divided the money and thrust one-half deep into Bert's pocket, quite conscious that if he kept it one-half second longer he would make another devil.

"Your Amy," he said, "deserves to be happy. Tell her that money is a wedding present; and if either of you ever want a friend, come to old Seth Manning."

Bert fairly ran to Amy with his good news.

"The old fellow is not half as bad as people say," he said to her.

"I call him magnificent," she declared emphatically, as she looked at the bills in her lap.

They were soon quietly married, and no happier, merrier wife than Amy Hammond was ever seen or dreamed of.

ARE WE SAXON OR ROMAN?

The British and American Type of Character is Roman.

A narrow sectarianism and a meager view of ethnological influence closed the British mind to the abundant proofs that Roman blood had determined the quality of the British race before any Angles, Danes, Saxons, or Normans came and the show of Britain.

The Romans had held sway in Britain for centuries, between B. C. 43 and A. D. 410. This is longer than the period which has elapsed since the discovery of America by Columbus. In a single campaign of the earliest period of Roman conquest sixty thousand lives had been lost in fighting the tattooed Britons. There is no evidence that one-sixth as many Angles ever entered the country, and had the whole Angle tribe come, men, women and children, it could not have numbered fifty thousand. The Anglo-Saxons filled England with farms and, on one occasion, the great City of Rome (then of two million, three hundred thousand inhabitants) was rescued from famine by importations of wheat from Britain. Roman roads bound together all the cities and towns of England, and extended far up into Scotland. The Saxons, and later the Angles, came as allies, and not as invaders. Their number cannot be known.

Britain had been drained of many of its Roman troops in the campaigns in aid of Maximian and in the conquest of Bretagne in Gaul. But it was never overrun like Spain, Germany and Italy by the barbarian tribes of Goths, Huns, Vandals, or Visigoths. In no part of Europe were the chances so good of preserving the Roman blood in so large a measure.

From the Saxons, Angles, Celts, and the English have been drawn saving, trading and plodding qualities. From the original tattooing Britons, Silures or Welsh, Picts and Gaels, they derived endurance and toughness under defeat. But how could they escape deriving from four centuries of Roman education the most powerful and legislative forces which make the modern British race successors to the ancient Rome?

How little Gladstone's features differ from Cicero's or those of Victor Hugo from the bust of Homer! The face of the most distinguished statesman of the present day is that of Julius Caesar, yet it is not one whit more purely Roman than that of a typical American lawyer and senator, Lyman Trumbull, of Illinois. The English and Americans become, on a little investigation, more clearly the countrymen of the great Gallic, Columbus and Napoleon than thousands of those who were born within the sound of the Tiber, but of immigrant blood from Sicily, Lybia, Egypt, or Thrace. The British and American type of character is not Anglo-Saxon. It did not originate with the English, but is a composite of that race which has been the most forceful and masterful for three centuries.—Social Economist.

TRIALS OF A LONE DUCK.

Compelled to Fight Murders on Toy Ships—

The children up at the pond at Seventy-sixth street, on the east side of the park, have great fun with the solitary duck inhabitant. This duck has none of the shyness of the squirrels. He is a bold and brazen bird, and will make futile attempts to climb up the perpendicular stonework surrounding the pond in the hope of finding a cracker.

Crackers are his chief article of diet. Not ordinary crackers, but fancy ones in queer shapes at twenty-five cents a pound. Little rich children, who are bored to death by the necessity of feeding the ducks, throw their crumbs to the pond every morning for the purpose of fattening that duck on sweet crackers.

They stand on the brink and shout "Ducky, ducky, tum an' det a tratter," and every few minutes one of them falls in.

The duck doesn't let this disturb him, however. His mind and soul are on crackers, sweet crackers in animal shapes preferred, but in the absence of these he'll eat anything from bread crust to doughnuts.

Sooner or later he will soon grow so fat that he can't paddle but for the enforced exercise he gets every afternoon. Then children of a larger growth come and sail toy ships when there is wind, and if there is one thing that the duck dreads more than another it is a toy ship.

No sooner is one set in the water than, squawking, quacking and flapping his wings, he flees to the uttermost corner, only to find another there, perhaps.

His afternoons are one wretched succession of wild twistings and turnings and ddivings.

One day last week, having been hemmed in a corner by three boats, he dived and came up outside the blockade, only to find a miniature schooner bearing down on him.

With a squawk of dismay he swerved, and a sleep on the other tack took him squarely amidships.

Down he dived deep, stayed there for a few seconds, and just as his head came out of the water a big sloop bumped into him. Then there was trouble.

His duckship arose, and then there was a squawk. With his bill he seized the bowsprit of the sloop and pulled it down under the water.

Then he grabbed the jib, tore that off, tackled the mainsail and ripped it up the middle, and with a note of triumph flapped a big wing over the stern and tipped the boat over.

Flushed with triumph, he proceeded leisurely to demolish the rigging and all else breakable or tearable, while from the bank the walls of the shipowner were wailed far on the air.—N. Y. Sun.

Palestina was plagued by poverty all his life. His compositions are almost numberless, many of them still remaining in manuscript in the Vatican Library, but in spite of the marvels he wrought in church music, he barely managed to make a living for himself and family as conductor of the pope's choir.

SCIENCE AND INDUSTRY.

Work has begun under the new plan permitting the Palestine exploration fund to dig for two years at Jerusalem. Mr. Bliss starts on Zion, and will proceed toward Ophel, exploring the tract lying between the south wall of the city and the valleys of Hinnom and Jehoshaphat.

Tobacco culture is increasing rapidly in Queensland, Australia. The crop has been found to be the most profitable one raised in the colony, the local demand from the tobacco factories sustaining good prices for the leaf. Coffee is also receiving increased attention in the colony, and many trees have been planted in the northern districts.

According to the Glasgow Evening News it appears that the latest statistics issued by the German imperial health department give to Berlin the honor of being the healthiest city in the world. The death rate is given as only 16.3 per 1,000. The most healthiest city is Alexandria, which, despite its unvarying fine weather, its three hundred fountains and its soft sea breezes, has a death rate of no less than 53.9 per 1,000.

The talk about the danger of catching disease from the wine vessels used by the Protestant communion service has led a microscopist to institute an inquiry whether there is not a like danger from the use of common drinking glasses and mugs in the liquor shops. It is not at all probable that this microscopist will find much to be looking for, as the barkeepers wash every glass or mug after it has been used.

Miss Mary Westfall, of California, during the past eight years has been gathering, classifying and exhibiting Pacific sea mosses and algae. These probably the best and most beautiful collection in the world. She has made a special study of marine botany, and has arranged with exquisite skill her superb collection of more than three thousand specimens. Scientists who saw a portion of Miss Westfall's collection in the Wauwatsch building at Chicago were enthusiastic in their praise of her work.

Peonies—or as they are called there, ground nuts—are largely cultivated in India, the area devoted to the crop in the presidency of Madras alone, ranging from one and a half to two and a half acres. The methods of cultivation are very rude and primitive. When the crop is ready for harvest from forty to eighty women are employed per acre for gathering them out of the soil. The average crop on unirrigated land is about twice that.

One of the latest uses of electricity is in pulling teeth. To the battery are attached three wires. Two of them have handles at the end, while a third is attached to the tooth. The tooth is grasped by the handles, the current is turned on suddenly, and the dentist instantaneously applies the forceps to the tooth. The instant the tooth is touched, it, as well as the surrounding parts, becomes insensible to pain. A quick jerk and the patient is relieved of his tooth without pain.

The hunchbacks which were introduced into New Zealand a few years ago have become naturalized and are spreading into neighboring colonies. They are almost the only insects that are capable of fertilizing the scarlet clover which, being of annual duration, must be fertilized every year, or else the fields must be resown with imported seed. This beautiful and valuable variety of clover gives a great quantity of nutritious fodder, and for this reason great efforts have been made to introduce the hunchbacks, so that the fields may be naturally resown from plants grown upon the field.

In his recent work, "The Great Barrier Reef of Australia," W. S. Kent states that the average annual value of the pearl-mussel fishery in that region is \$200,000. The pearls are made out of the pearl shell only; for the pearls, and often very valuable ones, too, are frequent; they are appropriated by the natives. M. Kent distinguishes two pieces of pearl shell, the large white shell, Melogona margaritifera, and a smaller blackish one, which he names, respectively, nigro-margarita. Mr. Kent has proved that it is possible to transplant living pearl shells. Under favorable conditions the shell is supposed to attain in three years the marketable size of eight or nine inches in diameter, and that in five years a pair of shells may weigh five or six pounds.

BICYCLE BUNCOMBE.

The Machine's Various Parts Engage in a Little Repartee.

A bicycle had collided with a coal peddler's cart and lay a tangled mass of rods upon the pavement. The various parts of the machine soon began an animated discussion as to what particular part was to blame for the disaster.

"You lost your bearings," grumbled the handle bar to the wheels, "and so you are not fit to be pedaled," retorted the wheel.

"I'm sorry I spoke," was the courteous reply.

"You two tire me to death," put in the chain.

"Wall, the handle bar was trying to saddle the chain onto me," remarked the wheel, with a trifle of resentment in its tone.

"Be quiet, you rubberneck," chirped in the handle bar.

"Was your headlight?" responded the wheel, viciously.

"It may have been, but there are no wheels in it."

"May I ask little question?" meekly inquired the chain.

"Till cogitate upon the matter," replied the handle bar, and the stillness of the night was broken only by the wind as it whistled through the pneumatic tube.—Louisville Post.

Unnecessary.

May Missus have you ever thought what you would do if you were to fall heir to a million dollars?

Daddy! No—Never! If I were to fall heir to a million dollars I should engage a capable thinker.—Puck.

FIELD COLUMBIAN MUSEUM, CHICAGO.

Located at Jackson Park, Chicago, and formerly known as the Fine Arts Palace of the World's Columbian Exposition. It contains many rare collections, exceeding in value and interest all other similar enterprises in the country, the National Museum at Washington excepted. The museum is open to the public free of charge Saturdays and Sundays. On other days an admission fee of 25 cents is charged.

ZOOLOGICAL ODDITIES.

An Hour with the Animals at Lincoln Park.

Major, the Big Lion, Is a Chivalric Sort of a Creature and Extremely Fond of Jennie, His Mate. A Bear Who Loves Sugar.

[Special Chicago Letter.]

The animals and birds from all parts of the world which make up the zoological collection at Lincoln park, Chicago, as they are, are the best of their kind as well as does the calendar man. More than this, they keep Sunday much more consistently than do many men and women who advocate its strict observance.

The head keeper of the large, oddly-assorted family of creatures strange and familiar, Mr. C. B. De Vry, has for

MAJOR WAITING FOR HIS DINNER.

them the solicited fondness which makes him keenly observant of them. He feeds them all every day in the week excepting Sundays. As it is found that animals are healthier when they fast one day in the week Mr. De Vry decided not to feed them on Sunday, as that enabled him to let his helpers have at least a part of the day to themselves. During the week they are fed at four o'clock each afternoon, and for half an hour before the keeper appears with their food they devote themselves to watching for his coming. They usually feed time approaches, looking anxiously in the direction from which he approaches. They never mistake the time of day and never fail to keep their watch save on Sunday, when they show not even the slightest signs of restlessness, when their usual feeding time approaches.

Mr. De Vry says that after the animals have never made a mistake as to the day of the week.

A little observation demonstrates the fact that animals are as individual as are human beings, and that there is, for example, as much difference among lions as there is among human beings of the same race. Among those who are wise as to lions and can judge them as certain men judge horses, Major, the splendid male lion of the Lincoln park collection, is considered one of the best of his kind in confinement. He certainly is a superb picture of might, ferocity and courage, tempered with dignity and grace. Whether or not he reasons, he does many things which would seem to indicate that he does, and he certainly remembers and learns from his mistakes. He was brought up on a bottle by a woman living in Chicago.

For months he had not seen her and as every one knows who has visited the animal house in Lincoln park there are throngs of people about the cages from early in the morning until late at night every day in the week. One day she came to see him, and almost as soon as she entered the door, and long before she could get near his cage, he saw her and rushed against the bars in his anxiety to welcome her. When she came close to him, he laid his head on her shoulder and she gave him a glad child's affectionate regard than did this magnificent, regal king of beasts.

Major is very fond of Mr. De Vry and his great amber eyes glow with pleasure every time he comes near him. When he enters his cage, as he often does, Major puts his whole paw on his shoulder and lays his big nose against his cheek. Gentle and apparently quite guileless as he is most of the time, there are occasions when all the savagery of his kind crops out. He is very fond of his kind Jennie and always treats her with a gentle complaisance and consideration worthy of a knight-errant of old.

The keeper laughingly says that in all the years they have been together he does not think they have had one cross word. At one time some new lions were brought to the park and it was thought advisable to put one of them with Major as his mate. When she was put in his cage he deliberately turned his back on her, and in a day or two became so cross that even the keeper, of whom he is so fond, could not go near him. He neglected his food and was becoming quite a wreck when it was decided that Jennie should be restored to him. No sooner was she placed in his cage than his bad temper vanished and soon he was quite himself again.

In a cage next the one occupied by Major and Jennie are two magnificent tigers which exhibit at all times and

LISTENING FOR THE CALL.

which, because of its intelligence and powers of imitation, is a great pet with those employed about the park. No sooner does he see the gray uniform of the park police than after turning his head first on one side and then the other as if he were thinking it all over he sends forth a perfect imitation of a policeman's whistle. Whenever he hears a new sound which he considers worth reproducing, after listening very attentively and apparently thinking it over most carefully, he repeats it with the utmost accuracy and, having done so, looks about as much as to say: "I don't think that could be improved upon, do you?"

ANTONETTE VAN HORESEN.

TEMPERANCE NOTES.

APPETITE.

I am going to speak of appetite;
And when my piece is ended,
I hope you will not think it plain,
You think could have been mended.

Now appetite is right enough;
A great and grand possession;
If natural, entirely safe,
And will the lones and flesh on.

If artificial, then look out,
And ponder not the stranger;
An artificial appetite,
It grumbles, means danger.

An appetite for ale and beer,
For brandy, gin and whisky,
Is artificial, and we know
Of all things very risky.

All dangerous things we ought to shun,
And so we think it better
To practice total abstinence,
Unto the very letter.

—Thos. H. Thompson, in Union Signal.

A WARNING TO BOYS.

Mental and Moral Wreck in Store for Those Who Drink.

I should like to speak a word to the boys on this subject, though I hope that none who read this may know from experience the fulfillment of the word. We have men who drink from various causes. Some boys, God pity them, merge into manhood with a hereditary taint upon them and will not out enough will to resist it, while others with every promise of a bright, successful future before them are persuaded by some one, perhaps one whom they think their best friend, to take the first glass.

Alas, boys, if some pitying hand could hold that glass before you, and in it you could see the consequences of that first fatal glass—could see the years of misery and disgrace awaiting you, would you not turn with a shudder from it? But alas! the picture is withheld. The first glass is taken, and after that the work is very rapid. How much easier it is then to follow the downward road to ruin than to stop the road to honor; yet if we would only stop to think what awaits us at the terminus of each road!

Then boys, it is not only you who have to suffer. When your honor and manliness dies, some other honor is broken. It may be a dear old mother, whose idol you are. Every downward step you take crushes that poor mother's heart. How many sleepless nights she spends praying for her wayward boy, asking God to take care of him! How she worries, prays, and weeps for him until her hair is threaded with silver, and lines of care form on the once smooth brow! And yet there is never any bitterness in a mother's heart toward her erring boy. It may be crushed by grief, broken by sorrow, yet that love never changes. Boys, when you have broken that poor mother's heart by your waywardness, when that dear face is shrouded away from your sight, when those loving hands that ever toiled for your welfare and comfort are still and cold, when those dear lips that never before refused to bless and speak a loving word to you are silent and hidden from human eyes, then you will realize all that she has been to you. If any sacrifice could then bring her back how gladly would you make it!

But strive as you will to shake off the habit, its evil grip is too firm to be easily shaken. It has enslaved you and become your master. If you would only think before you form such a habit! How many bright intelligent youths have become wrecks, mentally and morally, who must date their ruin back to their first glass of beer. How narrow and straight. Though at times it may seem hard, yet at the end you will know your toil has not been in vain.—Mannie Murphy, in Self-Culture.

ABSTAINING TOTALLY.

Strong Evidence in Favor of Strict Temperance.

I was not a total abstainer till after I was forty years old, because the desirability of setting the example had never been brought home to me. But from the day that I became one, the total abstention from alcoholic liquor has never given me the smallest trouble. Nor could it cause any real trouble to any healthy man who had always been moderate and temperate, and had never fatally persuaded himself that drink was a necessity to him. There are some twenty thousand prisoners in England, and from the day that they enter prison no alcohol is allowed them. Do they suffer in consequence? On the contrary, they improve in health.

The case, I admit, is very difficult with drunkards, and with all who have been born with hereditary craving for drink. Abstinence is not so easy for those who, even without intoxication, have long been accustomed to take drink in larger quantities than is good for them. I do not deny that the resolute determination to give up drink altogether may cost such men a serious struggle; but (1) the effort may be mitigated by a wise and moderate use of tea, coffee and very hot water, sipped when the craving becomes strong; and (2) by keeping away from every incentive and temptation to drink. Further, the effort will become easier every week that it is continued. And let me point out that, whether the task be difficult or not, these are the very men for whom the effort is a matter of the most elementary necessity, of the most initial safety. If it gives a workingman no trouble whatever to be an abstainer, then the desirability of setting a much-needed example to others, and of helping to deliver his country from an intolerable curse, ought, I think, to weigh with him. If on the other hand, it costs him great trouble, if he finds that he has an ugly and increasing fondness for alcohol, then he may be the very man for whom abstinence is most essential. To him it is a safeguard from a peril which may utterly destroy his happiness here, and may endanger the safety of his soul hereafter. To reclaim even an habitual drunkard, though difficult, is not impossible. In spite of the difficulty, the fact that confirmed drunkards, such as John Gough, the great temperance orator, once was—can be, and

have been snatched like brands from the burning, even after they have been seized by that awful disease of delirium tremens, which stands, like God's executioner, in the path of so many a drunkard, shows that a man can not be set at good as to be beyond the possibility of rescue even at the eleventh hour. It is far easier for a man to save himself (through God's grace) by total abstinence, when he has not habitually, still more when he has but rarely, sunk into the shameful, helpless, of acetal intoxication. But the more difficult it is for any man to achieve his deliverance, the more obviously imperative is it upon him, for the sake of his country, for the sake of his order, for his own sake, for the sake of his wife and family, for the sake of children yet unborn. Any trouble which the effort may cause him, is ten-thousandfold less trying than the awful and immeasurable retribution which may come upon him by a reckless continuance in that which, after all, is nothing higher than a sensual indulgence. Harshness, perhaps, it is not abused, but in no sense harmless. It tends to become a ruin and a snare.—Archdeacon Farrar, in British Workman.

A PHYSICIAN'S TESTIMONY.

Efficacy of the Non-Alcoholic Treatment of Sir Benjamin Ward Richardson.

Sir Benjamin Ward Richardson was one of the speakers at the recent annual National Temperance League, London, and his able address on the occasion he characterized as his "latest message as a physician inquirer into the effects of alcohol." Concerning the use of alcohol in the treatment of disease, and his experience as senior physician of the London Temperance hospital, we quote the following, to which we invite the special attention of American physicians:

"I was brought up professionally from a very early age—from my first age, I had almost said—to look on things medical as part of my daily life, and I had learned nothing more decisively than this: that alcohol was at least a necessary instrument of the physician, a means of cure, a remedy in disease. It had no other virtue. When the vital fire was high I was taught to use it. When the vital powers were perverted or irregular I was taught to use it. When the vital force was low I was especially taught to use it. It was addressed as a remedy to the exhausted, the debilitated, the sustained, and maintained strength, and quickened circulation. Contradictory as these statements might seem to be, they were like the laws of the Medes and Persians to the student and young practitioner of medicine in my forest and school; by were they imprinted on my mind that when I had overcome the physiological difficulties I continued for some time to apply what I had originally learned to the treatment of disease, using alcohol as, at least, an exceptional remedy. Gradually, however, the error here might be just as great as the error relating to health and alcohol. I began thereupon a new investigation. I proceeded, step by step, to lay aside alcohol as a remedy, and when the practice of the London Temperance hospital was founded, I was the first to do so. I had never had before for scientific observation—with the result that seven hundred acute cases of disease have there come under my care, diseases of the most varied kinds and acuteness in character, all of which have been treated successfully without alcohol or anything that may be called a substitute for it. The experience has exceeded every expectation that would have occurred to me twenty-five years ago. It gives me no more trouble or anxiety now to treat the most serious diseases without alcohol than ever it did with it. Recoveries from severest diseases are as good, if not better, under this method than under the old one, and convalescence is unquestionably advanced. The truth, in short, holds good all through, that that which is best in health is best also in disease, and if it were in the power of anyone to say to me, 'I remove from your reach alcohol as a medicine,' I should answer: 'There is not a medicine that you can remove from me with greater impunity.'—National Temperance Advocate.

FACTS AND FINDINGS.

SEVENTEEN hundred and forty confirmed drunkards is last year's record of the London city mission.

Of the twelve thousand saloon-keepers of New York city, whose "good moral character" entitled them to a license, eight thousand have served terms in prison.

There is steadily cumulative testimony, by many scientific experts, that beer, which the brewers boast of as a wholesome "temperance" beverage, is in reality more prolific in physical injury than the stronger liquors.

Ten years ago there were one hundred and fifty thousand brewers in Great Britain. An evidence of what temperance agitation has accomplished is the fact that their numbers are reduced to ten thousand one hundred and forty-three.

A GENTLEMAN, prominent in several New York city clubs, says that many of them are breaking away from the custom of drinking to alcoholic drinks. In the famous Harvard club, composed of graduates of Harvard college, there is a standing agreement that no member shall treat another member.

To those who have never been under the slavery of the cigarette habit it is a wonder that a man with intellectual capacity for a successful business career should have such a weak spot in his head as to become a victim of the filthy practice of incessantly puffing away at a little roll of paper filled with all manner of poisonous stuff. Very recently, the newspapers contained an item concerning one of New Haven's best-known dentists and society leaders, who was taken to the state insane retreat in Connecticut, as a result of cigarette smoking. Yet boys will pay no heed to such warnings.—Temperance Herald.

FARM AND GARDEN.

FIGHTING THE CUTWORM.

Prof. Riley Tells How to Get Rid of This Destructive Pest.

Young corn is often grievously injured by cutworms. The following reply, by Prof. C. V. Riley, to a correspondent of the Scientific American, who has been more than usually troubled with, therefore, be read with interest at this time:

If specimens of the particular cutworms were sent to the station for identification some preventive measures might be suggested, as much depends on the particular species. In a general way most of the species have similar habits in the larval state; but to deal directly with them when, as in this case, they are distributed over large areas, is a very serious problem. The most successful means under the circumstances is by the distribution of poisonous baits. These may consist of freshly cut clover or other succulent vegetation poisoned with paris green and made into balls or gathered into masses, so as to prevent their too rapid drying. One mode of accomplishing this last object is by covering the poisoned plants with boards. These poisoned baits, if placed at intervals along the corn rows, will attract a large proportion of the cutworms, which, by feeding upon them, will perish. For smaller areas, or for garden patches, the same method may be followed, or the larvae may be unearthed from about the base of the plants, where they retire for concealment during the day.

Another method is to take a smooth walking cane and make smooth holes several inches deep at intervals, going over the corn every day and punching in these holes to destroy the worms which seek them during the day as a place of concealment and tumble in. The patent salts, such as kail, have proved of the greatest value against many subterranean insects, and undoubtedly will be of value against these cutworms. They have the additional advantage of being good fertilizers, so that their expense as insecticides is more than offset by their value to the crop and to the land. I think with your correspondent that it is too late to accomplish much the present year, but by a combination of the three methods suggested he will be able another year to prevent much of the trouble. It is well, where fields are badly infested with cutworms, to plant thickly, so that two or three young corn plants may be spared, going over the corn every day and punching in these holes to destroy the worms which seek them during the day as a place of concealment and tumble in. The patent salts, such as kail, have proved of the greatest value against many subterranean insects, and undoubtedly will be of value against these cutworms. I think with your correspondent that it is too late to accomplish much the present year, but by a combination of the three methods suggested he will be able another year to prevent much of the trouble. It is well, where fields are badly infested with cutworms, to plant thickly, so that two or three young corn plants may be spared, going over the corn every day and punching in these holes to destroy the worms which seek them during the day as a place of concealment and tumble in. The patent salts, such as kail, have proved of the greatest value against many subterranean insects, and undoubtedly will be of value against these cutworms. They have the additional advantage of being good fertilizers, so that their expense as insecticides is more than offset by their value to the crop and to the land. OUR WASHINGTON LETTER.

(From the Regular Correspondent.)
WASHINGTON, July 9, 1894.
Republicans in the Senate and House have support Mr. Cleveland in the stand he has taken against anarchy and in favor of law and order, but, to their shame be it recorded, there are quite a number of Democrats in Congress who stand with the protesting Democratic and Populist governors against the action of the administration. Among his opponents are, of course, the most of the extreme states rights Democrats, and the Populists, whose public utterances have done more to encourage the spread of anarchy in this country than all other causes combined. The question of the rightfulness or wrongfulness of the original strikers against the Pullman company became a secondary consideration with everybody the moment the free passage of the U. S. mail was obstructed and the authority of U. S. courts defied.

The U. S. government has nothing whatever to do with the strikes of employees against individuals or corporations, but it has everything to do with the right of the people of the several states to communicate with and to do business with each other at will, and Mr. Cleveland would have neglected his sworn duty had he done less than he has done. It isn't the rights of the strikers that are at stake, but the very life of republican institutions in America. Fortunately the number of men in Congress who are opposed to the position of the administration is too small to be a factor in any Congressional action that may become necessary, and as long as Mr. Cleveland stands for the preservation of law and order and maintaining the dignity and authority of the United States government he can count upon the support of Congress and of nine-tenths of the people, regardless of their political opinions. There is no politics in the present situation; it is Americanism against anarchy.

Senator Call would better have allowed that little episode of pulling off his shoes in the Senate chamber while that august body was in session to die of itself, as it would soon have done, as he would have been considered merely as a man with questionable taste. But since he made that so-called personal explanation, and attack upon the Washington correspondents, he is considered as a black-guard and a well, call it a little unbalanced.

It is clear that the Democratic members of the Senate committee that investigated the sugar trust scandal are in no hurry to get their report before the Senate, having failed to get either Senators Lodge, Davis or Allen to agree to a meaningless support that would practically dismiss the whole matter. The Republican Senators propose making a report that will be in keeping with the evidence taken, and owing to the extreme nature of some of the conclusions drawn by Senator Allen he will probably make a separate report devoted largely to showing that the money which the sugar trust people admitted having contributed to Democratic state committees was actually used to help the Democratic national ticket and was so intended to be used. The Republican report will only agree with that of the Democratic Senators in one thing—it will exonerate Secretary Carlisle from any blame for having at the request of Senator Jones written that sugar schedule. It will then show that the sugar trust controlled the making of the sugar schedule of the tariff bill and the passage of the bill. The report will make the most interesting sort of campaign document, and the Republican Congressional Campaign committee will see that it gets widely circulated.

The Conference committee on the tariff bill held its first meeting to-day, in the Senate Finance committee room. If the applanse which the Democrats of the House gave Mr. Wilson, chairman of the Ways and Means committee, when he attacked the 443 Senate amendments to the tariff bill meant anything it meant that the House is going to make a hard fight to knock out every one of those amendments which raise the duty or which puts a duty upon articles which were put on the free list by the original Wilson bill. Upon the result of that fight depends the fate of the tariff bill. If it is successful, it is believed that the bill is doomed, unless the Gorman-Brice combine abjectly surrender, as every member of it has openly stated that they would not vote for the bill without the amendments they demanded and obtained from the Senate. It must not be forgotten that a loss of three votes in the Senate means the final defeat of the bill. The Republicans are not, of course, expecting anything quite so good as that, but they will not be surprised if it happens, and you may be sure that they will do nothing to make the fight between the House and the Senate less bitter.

The "Court of Honor" Destroyed.
CHICAGO, ILL., July 5.—The six large structures which formed the boundaries of the court of honor in the exposition grounds perished by incineration early this evening. The buildings destroyed were the Terminal Station, administration, manufactures, electricity hall and the agricultural building. The art gallery, which has been re-christened, the Field Columbian Museum, and the government buildings were saved. The fire started almost simultaneously at three points, so selected as to afford the best possible opportunity for the spread of the flames. In each of these places, on the second floor of the terminal station, the southwest corner of the mechanical arts building and on the southeast corner of the manufactures building, a man was seen running away from the grounds by passersby or members of the gangs of workmen who are at work tearing down the buildings, just before the fire broke out. One man was killed and one injured during the progress of the fire.

At 8 o'clock the immense manufactures building fell in with a resounding crash that was heard for blocks.

The news of the fire had spread to the city and by 9 o'clock thousands of people had made their way to the fair grounds, and far into the night all south bound cable and elevated cars were packed.

Will Not Go Out.

It was rumored on the streets Saturday night that the Baltimore and Ohio employees would go out on a strike about Sunday. When several trainmen were asked about it the reply was that "the American Railroad Association don't go here," meaning that although the American Railroad Association had ordered them out there was no inclination to obey as they had gotten everything they asked for. Another man said: "The Baltimore and Ohio is doing nothing west of the river, but we got everything we asked for here, and not one of the Brotherhood would go out, so what can the American Railroad Association do?" This sets at rest all fears created by the rumor as the men are not now in humor for a strike.

It May do as Much for You.

Mr. Fred Miller, of Trever, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure renal kidney and liver troubles and other given almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores.

Notice to Trespassers.

All persons are hereby warned not to trespass upon that part of Military Lot No. 1599, lying on the south side of the B. & O. R. R. at Albemarle, and owned by the undersigned. All persons so caught trespassing will be prosecuted to the fullest extent of the law.
MRS. MARGARET E. McCORMIE.
H. McCORMIE, Agent.

OAKLAND, MD., THURSDAY, JULY 19, 1894.

NUMBER 19.

VOLUME 18.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Mr. Ray Rodeheaver, of Terra Alta, was here Sunday afternoon.

Mr. McClure Mason, of Wheeling, was here Sunday with friends.

Mr. Ira Culp, of Wilson, was an Oakland visitor Monday morning.

Mr. and Mrs. W. A. Thomas, of Kingwood, were Oakland visitors Saturday.

Mr. W. B. Newman, of Corinth, was here a few hours Monday on business.

Robert Felty was in town this week calling on the merchants.—Kingwood Argus.

Miss Alice Kennedy, of Wheeling, is visiting her sister, Mrs. H. C. Sincell in Oakland.

Mr. Jonas Glodfelty, of McHenry, was a pleasant visitor at this office last Friday.

Mr. David G. Smith visited his parents at Hazelton, W. Va., a few days last and this week.

Lawyer T. J. Peddicord, of Oakland, is here this week attending court.—Kingwood Argus.

D. L. Conaway has for sale chop, bran, middlings, etc., at the lowest prices. Give him a call.

Miss Annie Spedden, of Statesboro, Georgia, is in town for a few days, the guest of her sister, Mrs. G. A. Bolden.—Oracle.

The Rev. J. L. Godfrey will preach at the Garrett Memorial church next Sabbath morning, July 22nd, 1894, at 11 o'clock.

Mr. Will Smith passed through Oakland Tuesday on his way home to Johnston from an extended visit to friends in Southern Virginia.

Dr. L. D. Newman, who was confined to his home several days ago from the effects of a fly bite on his arm, has recovered his usual health.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Fire broke out in the woods near Crellin on Monday evening last and destroyed some timber besides burning some railroad track and trestling.

Mr. Frederic Syster, of New York City, is registered at the Central. Mr. Syster is engaged in translating plays into the English language.

Mr. Leonard Townshend, son of Dr. S. Townshend, who returned from Baltimore last Thursday morning, has been quite ill since his arrival home.

Mr. and Mrs. Chas. E. Hilleary and little daughter, spent two or three days in Oakland last week. They are now at Mr. John L. Browning's near Deep Creek.

A. D. Naylor has lots of vehicles on hand: Buggies, spring wagons, carts, surreys, buck boards and light road wagons. Give him a call when you need anything in his line.

The wheels jumped from under a car loaded with coal in Oakland this morning and delayed trains considerable time. The track was torn up for some distance by the accident.

Several communications from different sections of the county are crowded out this week but will appear in our next issue. Among the communications is one from Glade Valley.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

FOR RENT—Furnished, the very desirable Summer Hotel known as "The Rest," at Oakland, Garrett county, Md.; terms liberal. Apply to CHARLES J. BONAPARTE, 216 St. Paul street, Baltimore.

John C. Yost was convicted in the Circuit Court at Kingwood, W. Va., last week of lascivious cohabitation with Jennie Hanger and was fined \$50, and sentenced to serve a term of 45 days in the county jail.

Benjamin Ison, D. D., of Oakland, Md., preached two very interesting sermons at the M. E.

church, on Sunday morning and evening last, in the absence of the pastor, Rev. W. J. Harkness.—Oracle.

J. D. Biggand, of Connellsville, Pa., who was arrested here about two weeks ago on the charge of stealing a horse, has been released from custody by the Pennsylvania authorities, he being an innocent party.

Dr. W. N. Berkeley, of McLain & Berkeley, Frostburg, will be at the Bellevue House, Accident, July 24, to treat diseases of eye, ear, nose and throat. Special attention to catarrh and the examination of eyes for glasses. 19-1

Having determined to return to Baltimore I will close out my entire stock of millinery goods and notions, consisting of hats, ribbons, etc., at cost.

MISS ALICE MURPHY, Deer Park, Md.

Rev. W. E. Powell, D. D., of Parkersburg, W. Va., President of Loch Lynn Heights Company, is at Mountain Lake Park assisting Major J. C. Alderson in sending out advertising matter and getting ready for the lot sale, August 9th and 10th.

WANTED.—A woman to do general housework, cook, wash and iron for a family of three. To a suitable person permanent employment and good wages will be given. None other need apply. Address with references, William Moody, Bloomington, Md. 18-3t

W. H. Nelson, who has been in the drug business at Kingville, Mo., has so much confidence in Chamberlain's Colic, Cholera and Diarrhoea Remedy that he warrants every bottle and offers to refund the money to any customer who is not satisfied after using it. Mr. Nelson takes no risk in doing this because the remedy is a certain cure for the disease for which it is intended. It is for sale by Oakland Druggists.

While a number of B. & O. railroad employes were engaged in getting a car on the track at Offutt's mill last Friday the crank on the axle became loose and ran 15 feet, fastenings and struck Mr. George Little a terrible blow on the cheek bone making a very severe and painful wound. His injuries were dressed by Dr. McComas. He will be incapacitated from work for a number of weeks on account of the accident.

Chamberlain's is the best of all. Vincent J. Barkl, of Danbury, Iowa, has used Chamberlain's Cough Remedy whenever in need of a medicine for coughs and colds, for the past five years and says: "It always helps me out. If anyone asks me what kind of cough medicine I use, I reply, Chamberlain's, that is the best of all. 25 and 50c bottles for sale by Oakland Druggists.

It has been suggested by a very prominent and popular Washingtonian that a day be observed in this community some time during August or September to be known as "Road Day." The object is to have everyone owning teams to decorate their equipages with flowers, flags, etc., and to have a monster road parade. A prize also been suggested to be given to the person having the finest decorated team and carriage. Now is the time to get the matter under way to make it a success.

A horse kicked H. S. Shafer, of the Freeman House, Middleburg, N. Y., on the knee, which laid him up in bed and caused the knee joint to become stiff. A friend recommended him to use Chamberlain's Pain Balm, which he did, and in two days he was able to be around. Mr. Shafer has recommended it to many others and says it is excellent for any kind of a bruise or sprain. This same remedy is also famous for its cures of rheumatism. For sale by Oakland Druggists.

According to recent statistics, there are now in Japan 643 Christian missionaries, 377 churches (of which 78 are self-supporting), and 37,400 church members, of whom 3,636 were added during the last year. There are also 7,393 pupils in Christian schools and 27,000 Sunday school scholars. There are 284 native ministers, 267 theological students and 665 ordained preachers and helpers. The sum contributed to the native Japanese Christians is given as 62,400 yen, or \$40,000.

Wm. Tabules relieve nausea.

One of the things which it seems difficult for the public mind to grasp is that there is a decided difference between the knot and the mile. It is certainly about time to have it thoroughly understood that the two are not the same thing. It seems easy enough to remember that a mile is only 5,280 feet, of a knot, the latter being approximately 6,082 feet in length, while the statute mile measures 5,280 feet.—Carriers Magazine.

The contract for making the survey for the Cheat River Railroad has been let to Mr. Jonathan Barrett, a well known civil engineer, who had charge of the work of the defunct Black Bottle Railroad. The Cheat River Road was chartered several months ago, and starts at Rowlesburg, on the Baltimore and Ohio, following Cheat river to Cheat Haven, three miles above its mouth. There is every reason to believe that the road will be built, and it is certain the road will open up a country abounding in unlimited mineral wealth and vast forests of the finest timber. Pittsburg capitalists are at the head of the company, and it is only a question of time until this valuable feeder of the Baltimore and Ohio is built.

The beautifully situated farm of Major J. C. Alderson adjoining and to the south of Mountain Lake Park has been purchased by a syndicate of prominent West Virginians and laid out in desirable lots and villas and will be sold at public auction on August 9th and 10th. The name of the place is Loch Lynn Heights and it will be the endeavor of the board of directors to make it a religious and literary summer resort but will in no way be in opposition but rather an aid to the Park. A large hotel will be erected on the brow of a beautiful hill overlooking the Park and surrounding country. This fall and next spring a number of cottages will also be erected and occupied. The board is getting out a supply of advertising matter setting forth the advantages of the place. Quite a number of lots have already been sold and the erection of cottages will begin at once.

Tennison could take a worthless sheet of paper, write a poem on it and make it worth \$65,000—that's genius. Vanderbilt can write a few words on a sheet of paper and make it worth \$5,000,000—that's capital. The United States can take an ounce and a quarter of gold and stamp upon it an "eagle bird" and make it worth \$20—that's money. A mechanic can take material worth \$5 and make it into watch springs worth \$1,000—that's skill. A merchant can take an article worth 75 cents and sell it for \$1—that's business. A lady can purchase a 75 cent hat but she prefers one that costs \$27—that's foolishness. A ditch digger works ten hours a day and handles several tons of earth for \$1—that's labor. The editor of this paper could write a check for \$80,000,000 but it wouldn't be worth a dime—that's roush.

Low Rates to Denver, Colorado. The Baltimore and Ohio R. Co. will sell round trip excursion tickets to Denver, Colorado, from all points on its lines east of the Ohio river, July 19th, 20th and 21st, good for return on trains leaving Denver July 27th, August 2nd and 25th; tickets will also be sold to Denver August 8th, 9th and 10th, valid for return passage on trains leaving Denver August 19th, 25th and September 13th.

The rate from Baltimore and Washington will be \$47.40 and correspondingly low rates from other points. Passengers taking the B. & O. have a choice of routes, going via Pittsburg, Akron and Chicago, via Gratton, Bellair and Chicago, or via Parkersburg, Cincinnati and St. Louis; double daily service of express trains, with Pullman sleeping and dining cars on all routes. 17-3t

Colored Society Notes. Mr. John Danridge, of Wheeling, is here on a visit to his father and sisters. Mrs. Baker Banks, Mrs. James Truly and Aunt Harriett Dunmark, were at the Park Sunday afternoon. Miss Ida Dunmark is still very sick. Mr. W. G. Glover has opened a barber shop on Main street. Work will be attended to promptly. Stop in boys and have a shave.

A Narrow Escape.

Mr. Farley DeBerry of Terra Alta narrowly escaped being crushed under the wheels of a train on Tuesday the 3rd. He was putting a little girl on the accommodation while the train was moving. Agent Walker was near and saw that if Mr. DeBerry let go of the child it would fall from the steps of the car and be killed. Mr. Walker pulled the girl from Mr. DeBerry and landed her safely upon the platform. Mr. DeBerry fell and his feet went under the moving train the wheels coming rapidly upon his limbs. Mr. Walker made a very sudden movement and jerked Mr. DeBerry from under the train. The whole affair took place in a very few seconds and the by-standers were horrified at what seemed sure to be a shocking accident. Mr. DeBerry received slight bruises.—Kingwood Journal.

Weather Crop Bulletin.

The Maryland weather crop bulletin for this week contained the following reports from this county: Grantsville.—The past week has been favorable for harvesting hay and wheat. Wheat all in shock. Crops very good. All growing crops suffering for want of rain. No rain during the week, and weather warm and windy.

J. S. MILLER.

Thayerville.—A killing frost on Monday morning, the 2nd. Cool nights and hot days. Very dry. Everything suffering for rain. Grass very short. Corn is doing well considering the dry weather.

Sunnyside.—Up to the 14th the weather was very hot and dry, but on that day a light rain fell. All crops are affected by drought, potatoes especially, and if it continues much longer a very light crop may be looked for. C. W. SLABACH.

Oak Hill.

The grass crop is light. Wheat has all been cut. Mr. Silas Teats expects to move to Virginia soon.

Mr. Wm. Teats is getting out lime rock to sell. Mr. J. W. Lee and his sons raised 464 dozen wheat on seven acres of land.

A horse belonging to Mr. Henry Schlossnagle died one day last week. About two weeks ago lightning struck the roof of Mr. Henry Schlossnagle's house and passing down through it to the lower floor killed his dog.

Mr. Sylvanus Schlossnagle is building a new house on his farm. Messrs. Clark Rush and George Schlossnagle went to Oakland one day last week.

Messrs. Schlossnagle & Evans have moved their saw mill to the farm of Joseph Groer but business is dull and the mill stands idle. Mr. and Mrs. G. E. Ault and Mr. Mike Harden were the guests of Sylvanus Schlossnagle Sunday evening.

Mr. Joseph Groer has been dangerously ill but is some better at this writing.

Resolutions of Respect.

WHEREAS, It having pleased an all wise providence to take from our midst our brother, John T. Wilburn; therefore be it

Resolved, By Cranesville Lodge No. 134, I. O. O. F., that we tender our sincere sympathy to the bereaved widow and orphans and commend them for consolation to him who "doeth all things well." We would also remind them of a blessed hope of an everlasting reunion in a "home not made with hands eternal in the heavens."

Resolved, That the above resolutions be spread upon our minutes and a copy be sent to a county paper for publication and a copy be sent to the bereaved family and our charter be draped in mourning and each member wear the usual mourning badge for thirty days.

Albert Teets.

A. C. BROWNING, W. A. WOLF, Committee.

A Quarter Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

IF YOUR BACK ACHES. Or you are all worn out, really good for nothing. It is general debility. DR. KING'S NEW DISCOVERY. It will cure you, cleanse your liver, and give you a good appetite.

Handling the Hay Crop.

The wise farmer will get all tools used in having in perfect repair long before the time to begin. On farms adapted to their use tedders and hay loaders are practical. River bottoms and level fields that are easy to haul over and yield heavy crops may require the hay tedder, and the loader saves lifting. The hay loader will keep two men busy loading, as it takes it from the windrow. With mower, horse rake loader and some good device for unloading by horse power, a farmer can handle a large crop of hay without going outside of his own family for help. Before buying a hay loader, Rural New Yorker, authority for the following, advises that the farmer remember that he will need to cut a good deal of grass to make such a tool pay interest on its cost. Not only that, but he must get one that will do the best work on his farm. The very fact that different farms and farmers require differences in tools explains why there are differences in hay loaders just as there are in plows, harrows or cultivators. Each one is designed to do a special work. There are two chief principles operated in hay loaders. In one the hay is pulled on by a system of rakes, which works much like the old hand rake of earlier hay-making. You might compare this to the principle of raking the hand toward you with the fingers down. The other principle is the reverse of this.

The mower should be free from rigging and have a filter to catch lodged grass. The latter makes have four long center bars, some six feet. Four and a half to five will give better satisfaction on stony or rolling land. They draw easier, and the team can walk faster. The rake should be a self dump, so that a boy or girl can easily do the raking. It should not tear up stones or sod or roll up the hay, but push it together.

The double harpoon fork is light to handle, durable, cheap and efficient. The whole outfit, including ropes, pulleys and hooks, can be purchased for \$5 or \$6. Hay cars and track are good, but one can hang the fork so that good work can be done without them. Sometimes, especially in the case of lower barns and large mows, better work may be done, as they can be fixed to drop the hay in different parts of the barn, while the track is stationary. To hang a fork tie a small pulley to the top of the fork. Fasten a pulley to the foot of a post on the floor opposite the side where hay is to be stored. Another, directly above this, is fastened to a rafter or crossbeam. The other is fastened as far back in the mow and as high as possible to a rafter. If the mow is large, this pulley can be shifted to either side as the mow fills. Run the rope through the pulley at the foot of the post, then straight up to the second, then down through the one on the fork, then to the pulley in the mow and back to the fork to which it is tied. This arrangement requires no boards nailed to the side of the mow and takes up all the fork can be made to hold without binding against the sides.

Obituary.

Died, suddenly at his home in Kitzmillerville, Garrett county, Md., on July 12, 1894, Ephraim G. Blackburn. He was born in Hampshire county, Va., April 30, 1817. He leaves a wife and four children to mourn the loss of an affectionate husband and father, but they mourn not as those who have no hope. He experienced a change of heart several years ago, and told us frequently that he was living for heaven. He told his wife not long before he died that he had no fear of death, and though death came suddenly, we believe it found him ready. He was a man of great energy, and though he met with great reverses of fortune, his motto was "Always upward and onward." He was generous to a fault; none ever went empty from his door.

He was twice married, had forty-nine grandchildren and twenty-one great grand children. He had no opportunity to leave a last word of triumph or council, but we mourn not as those who have no hope, but expect to meet our father where sickness, sorrow, pain and death are felt and feared no more.

ESTRAY NOTICE.

There came to my place, two miles from Grantsville, June 1st a light red heifer with short horns and a small crop out of left ear. Owner will please come forward, pay all costs and damages and take her away. MRS. AMELIA HALLER, Summit Valley, Md.

Editors all Know Him.

He doesn't subscribe for your paper because: He has more papers now than he can read.

He has no time to read except nights and his eyes are so poor that he can't see to read them.

He can't afford to take all of them, so he takes none.

He doesn't think much of your paper, anyhow. "It never has no news, nor nuthin' else much."

He doesn't like the politics of the paper.

His neighbor takes it, and he takes the other one, and they "kinder change off, you know."

He got mad at the editor seven or eight years ago and wouldn't take the paper if it was last one on earth.

He likes to see a paper that has sand enough to be on one side or the other, and not be on the fence all the time. "Ef I wuz running a paper, by Hockey, I'd, I, d—." —Danville Breeze.

Rogers' Sarsaparilla.

A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Anapine and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuyett Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Bekles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Yongh Store Co., Jones Frazee; Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Guagey, Accident; Smith & Callis, Hayes, and by all general dealers.

Last June, Dick Crawford brought his twelve months old child, suffering from infantile diarrhoea, to me. It had been weaned at four months old and being sickly everything ran through it like water through a sieve. I gave it the usual treatment in such cases but without benefit. The child kept growing thinner until it weighed but little more than when born, or perhaps ten pounds. I then started the father to giving Chamberlain's Colic, Cholera and Diarrhoea Remedy. Before one bottle of the 25 cent size had been used, a marked improvement was seen and its continued use cured the child. Its weakness and puny constitution disappeared and its father and myself believe the child's life was saved by this remedy. J. T. MARLOW, M. D., Tamaroa, Ill. For sale by Oakland Druggists.

Look Here.

When you come to town on the Fourth of July call on H. E. Felty for fruits, vegetables, groceries, cakes and crackers. Everything plenty at rock bottom prices. H. E. FELTY, Grocer.

THE BOY WHO WHISTLES.

When the curtains of night, 'twixt the dark and the light,
Drop down at the set of the sun,
And the tellers return to the loved ones at home,
As they pass by my window I see
Whose coming I mark, for the song of the lark,
As it pours, pours in the sky,
Is no dearer to me than the notes glad and free
Of the boy who goes whistling by.

If a sense of unrest settles over my breast,
And my spirit seems clogged with care,
It all flows away in a whistling air,
Past my window a-whistling air,
And I scarcely can know how much gladness I
Have,
And I never could tell should I try,
But I'm sure I'm in debt, for much pleasure I
Get,
To the boy who goes whistling by.

And this made of his, how much better it is,
Than to burden his life with a frown;
For the teller who sings to his purposes brings
A hope his endeavor to crown.
And whenever I hear his notes full and clear,
I say to myself I will try
To make all of life with a joy to be true,
Like the boy who goes whistling by.

—Nixon Waterman, in Chicago Journal.

A THANKSGIVING BEAR.

Night Hunt in a Canoe—Two Ducks—
ings and One Bear.

The homes of the Duncans and Taylors were situated near the Little Red, a swift stream that flowed through a region but little opened as yet and still inhabited by the animals of the forest.

Indeed, bear roamed at will through the dense canyons, and not infrequently made reprisals on the scattered settlers. Wolves, too, abounded in the region, and in winter their long dismal howling made the cold nights hideous.

The Duncans and Taylors boys—Roy and Phil—had been companions from childhood, and when their parents settled in the new country they were in their element, as they could roam the woods, or paddle down the Little Red, every now and then picking up a bear or turkey with their trusty rifles.

It was not long before they became known as the best young Nimrods in the whole district, and whenever they started on a hunt it was taken for granted that they would return with a well-filled bag.

One of their favorite methods of bagging wild game was by the fire-lure, and these adventures generally took place on the river. They would set up their torch in the canoe, and while paddling up stream, or floating with the current, would by its light see the eyes of the bear or deer on shore, and a shot was pretty sure to bring down the fascinated target.

The night before Thanksgiving Phil Taylor strolled over to the Duncan homestead with a proposition almost sure to find favor with his young companion. This was nothing less than a fire hunt on the river for the purpose of, as Phil expressed it, "bagging a Thanksgiving bear."

"We can't go past the big barrels near the bend," said he, as he laid his proposition before Roy. "Tom Hunter, who came through there the other day, saw lots of fresh signs, and we may be able to get a big one for tomorrow's feast."

Taken with the prospect of some exciting adventure, Roy at once acquiesced, and the two boys began to prepare for the fire-hunt. The canoe was dragged forth and the pine knots for the torch gathered and made ready. A torch of pine knots, if fashioned properly, will throw a fire glow for many rods over the water, and animals will come to the shore and gaze at it, fascinated, as it were, until the unerring bullet of the hunter in the canoe terminates their careers.

The young hunters of the Little Red waited with some impatience for the fall, and when the hour came they launched their canoe and sprang into it. The torch had been placed in the stern of the boat, and Phil, who was to have the first shot, took his seat underneath it, in such a position that the light, streaming over him and from behind, would throw its radiance along the shore, thus revealing the gleaming eyes of wolf or bear, but without the glare dazzling his own eyes.

In some places the river was dangerous on account of unseen rocks, over which the water boiled like a cauldron, while in others the canoe was perfectly safe, but the boys knew the stream well and had paddled it on many occasions after dark. Taking the paddles Roy, with a sharp look along the shore, drove the light bark into the middle of the river, while Phil under the torch watched the tall canoes that lined the edge and tried to catch the first sight of game.

The night was calmly beautiful, and the paddles made no noise in the water as the canoe swept down stream. As they neared the bend where they expected to catch sight of a living target Phil and Roy increased their watchfulness. All at once the paddles in Roy's supple hands seemed to rest, and he glanced at his companion. Phil at the same moment had seen what had caught Roy's eye.

On the right, where the tall canes seemed to seek the solitude of the stars, gleamed a pair of intense eyes, very close together, and near the ground.

"It is old Ephraim," whispered Phil, as he moved his rifle and leaned forward for a better look. "We have found our Thanksgiving bear at last!"

The canoe had reached a quieter place in the current and Roy had brought it to anchor there.

"Don't miss him," he said to Phil. "In all my life I never saw eyes shine so. I believe I can make out the outlines of the bear's head."

Slowly, with a cool hunter's deliberation, Phil lifted the rifle to his shoulder, and while he watched the shining eyes, Roy seemed to hold his breath. The crack of the weapon awoke the echoes along the shore, and as the smoke lifted both boys leaned forward with eagerness and looked toward the shore.

"You missed him!" cried Roy.

"No. Look yonder! The old fellow has tumbled into the water and is in the death struggle. Quick! Row toward him before the eddy sucks him

in. We shall lose the bear if we are not careful."

Roy needed no urging to force the canoe through the water toward the spot where something was splashing among the rocks, and Phil, who had reloaded, was watching for another shot, as he saw that the bear was desperately wounded, though not yet quite conquered.

As the canoe neared the spot there was a sudden plunge on the part of the animal, and the huge bulk vanished for a moment.

"Lost!" exclaimed Roy.

Before Phil could reply, something dark and wet rose almost underneath the frail canoe, and the next moment he saw the taffrail in the grip of a bear. The great mass, looking doubly formidable in the unsteady light of the torch, with the weight of the bear, threatened to overturn the boat, and the ugly head with wide mouth bleeding from the boy's shot, was enough to send chills of terror to the Nimrods' hearts.

"Back off!" cried Phil, as he saw that the canoe was almost among the rocks and liable to be capsized by their force.

Roy sprang anew to the paddles, and as Phil rose in the boat to thrust the rifle into the bear's face and terminate the contest, the animal made a desperate effort to climb aboard.

The situation was now full of peril and the rocking of the boat in the swift waters caused the torch to scatter a rain of fire over the devoted boys and the bear, but the least only blinked his little eyes and redoubled his efforts to scale the fragile rampart.

Finding that he could not get a shot at the bear as Roy backed the boat off, Phil struck with all his might with the gun, bringing the heavy stock down upon the huge head. He shattered the weapon but the blow, while he apparently left the skull of his antagonist unharmed.

In another movement the bear lunged forward again, and the canoe at the same time striking a rock was upended, spilling its occupants into the water and putting out the torch. All this happened in a second, as it seemed, and the boys thus thrown into the stream, and at the mercy of the bear and current, struggled to right the canoe and clamber in again.

After awhile they succeeded, and Roy, who was not hurt, enough to restrain one paddle, pushed the boat from the rocks and sent it out into the river, where it was caught in a swift current and carried along like a feather.

"This is better than drowning among the rocks—or being eaten up by the bear," said Phil, as he looked back.

"But we've lost our Thanksgiving bear steak, I guess."

"Lost the bear?" cried Roy, sharply, as his face whitened. "Look yonder. He is still clinging to the stern of the boat."

This was true, as could be seen by the moonlight, which, in the position the canoe had taken, threw the bear's head and the eddying waters. The two boys stared at the homely head lifted above the tide and at the sharp claws that seemed to dig their way into the woodwork at stern. The bear held on with a death grip as the canoe drifted down the river, and the young Nimrods rapidly down the stream, now narrowly missing some half-sunken tree, and now nearly capsizing again as Roy tried to escape a hidden rock.

"What shall we do?" cried Phil at last, as he turned a frightened face toward his companion. "The bear has terminated to prove our doom, and in a short time we shall reach the falls."

"Cut him loose," said Roy. "You have your knife, haven't you?"

Phil hailed the suggestion with a cry of joy, and rushed from the depths of his pocket a big jack-knife, and in another moment he leaned toward the bear in his wake.

Instead of striking at the throat, which was exposed, he drove the keen blade into one of the feet, near the root of the claws, and drew it toward him. The bear growled savagely, but Phil bravely faced the beast, and severed the other foot likewise.

"A tree! A tree!" rang out Roy's voice at this moment, and before Phil could duck his head the canoe struck the obstacle in the middle of the Little Red, and in a jiffy they were in the water again, struggling to grasp the limbs of the lodged tree.

In this they were successful, and when they had drawn themselves up among the branches they looked at one another with grim smiles. They knew that they were destined to pass the night in the tree, which they did, and when day came they found themselves near a plantation.

By dint of shouting until they were hoarse they made themselves heard, and were rescued by several plantation hands, one of whom discovered the bear lodged in another tree a little farther down the river. The animal was dead, and when he was drawn ashore the boys related their thrilling experience with his bearship the night before.

A wagon was procured and the homeward journey began, and in ample season for dinner the boys arrived with the Thanksgiving bear.

The canoe, which had been swept underneath the tree, was never found, but Phil and Roy were willing to lose it since they had saved themselves and the well-won body of Old Ephraim; but the next Thanksgiving, and the next, they were careful to provide for by daylight, for their thrilling fire-hunt on the Little Red was not soon forgotten.—Cleveland Leader.

Defrauded.

A short story, but very much to the point, is one told of John Allen, an English clergyman. He had heard that a brother minister kept his congregation waiting, and kindly remonstrated with him.

"It was only ten minutes," said the offender, apologetically.

"How many people had you in church?" asked Mr. Allen.

"About three hundred."

"Three hundred? Well, then, you wasted three hundred minutes!"

BATTLING BOAS.

Fighting Duel for a Mate in a Brazilian Forest.

"Brazil is the home of the most gigantic boa constrictors in the world," said Henry Closser, of Neopolis, O., the professional snake hunter and dealer, known to circus and museum managers throughout the country as "Big Doc" and "Old Dollar a Foot," that being his market price for ordinary snakes. "On my last trip to Brazil after snakes I didn't meet with the success I expected to, but I brought back one of the best snake stories, I think, that ever came from that land of serpents."

"Boas, both male and female, often fight fiercely over prey that one snake has captured and which another one covets, and at certain seasons of the year deadly combats between male boas are frequent, the fight being over the possession of a female for a mate. It was a sight such as this that I witnessed one day in the depths of a Brazilian forest. I wasn't out after snakes that day, either. If I had gone prepared to capture boas on that occasion I should have bagged two of the biggest snakes that ever came from Brazil or any other land of snakes."

"I was out taking a business look around after some rare specimens of monkeys. I had chased a choice long-tailed fellow up a tree and was trying my wiles on him when I was startled by a loud hissing sound that came from another part of the forest like a gust of wind escaping from some narrow space. I looked in the direction of the sound, and, to my surprise, saw two enormous boas on the ground locked together, and writhing and twisting in such a desperate struggle, over the possession of a female for a mate, that I was a sight such as this that I witnessed one day in the depths of a Brazilian forest. I wasn't out after snakes that day, either. If I had gone prepared to capture boas on that occasion I should have bagged two of the biggest snakes that ever came from Brazil or any other land of snakes."

"The fierce struggle on the ground lasted five minutes, and then the boas suddenly separated. One serpent glided to a large tree near by and went up its trunk like a flash of lightning. The other snake flashed in the same way up into another tree fifteen feet distant from the first one. I feared that the fight had come to an end, because one of the snakes seemed to be afraid and the other one dauntless."

"But soon saw that the victor was the snake I had chased up the tree. The snakes had hardly settled themselves among the branches of their respective trees, when the foliage of both trees began to shake and quiver as if a wind were passing through and agitating them."

"Suddenly each boa, coiling its tail around a branch high in its tree, dropped like a plummet toward the ground and hung at full length, its head raised but a few inches above the ground. For a moment their great bodies swayed to and fro like slowly moving pendulums. Their eyes glittered like fire, and they were at it. At a distance of half its length above the ground, like an arrow each head shot forward, and instantly the two enormous reptiles were locked in each other's coils like immense cables twisted together."

"The desperate struggle between the two snakes continued for several minutes, when they separated again as suddenly as they had rushed together, and each drew itself back among the branches of its tree. For two or three minutes the snakes lay quietly, each glaring at the other."

"Suddenly in the trees a hiss like escaping steam was heard, and the two snakes shot toward the ground again. The challenge was answered by one still longer from the other boa, and it flashed down to its former position and confronted its foe. The two did not rush together at once. One would strike at the other with the rapidity of lightning."

"With equal quickness that one would avoid the rush by dodging to one side or the other, and instantly make a counter attack. The two snakes were engaged in a desperate struggle, each trying to strike the other, but each was so quick that it was not aware it had been done until I saw the upper snake with three of its coils around the lower one."

There was a dreadful crunching of bones and in the twinkling of an eye the victorious snake had drawn the vanquished one three folds further within its fearful embrace. There was more crunching of bones, and by degrees the tail of the defeated serpent, anointed from its hold on the branch of the tree, and at last the great reptile dropped headlessly to the ground, a crushed and lifeless mass. For a moment the victor held the vanquished in its coils and then released it. The victorious serpent glided from its tree, moved rapidly several times around the crushed body of its lifeless foe with down and so quickly was its deadly intention carried out that I was not aware it had been done until I saw the upper snake with three of its coils around the lower one."

"Much to my surprise a third boa now appeared on the scene, a magnificent female specimen. She joined the conqueror in the late terrific battle. I then knew it was for her that the deadly duel had been fought, and she had been a witness of the combat from the seclusion of her boudoir in the tropical thicket. Her actions showed that she was pleased with the result, and she glided away with the massive winner of her favor and disappeared with him in the forest, their departure being followed by a deafening din of monkey chatterings and loud, discordant shrieks and screams of that assembly of many-colored Brazilian birds."

"I straightened the dead boa on the ground and measured him. From his nose to the tip of his tail he measured thirty-four and one-half feet."—N. Y. Sun.

THE RULES OF THE ROAD AT SEA.

Measures of Prevention Taken by the Big Transatlantic Liners.

With only few exceptions, the regular steamship lines pursue well-defined paths, both in coming and going across the Atlantic, and this not only averts the danger of collision, but is an element of safety in case of disaster, as a ship, if in the "lane," is reasonably sure of being sighted, if not by one of her sister ships, by one of some other line. The closely calculated sailing directions under which captains guide their crafts across the water provide for reaching specified meridians of longitude while on certain parallels of latitude, the meridian 50 degrees west being mostly used as a basis for reckoning. Coming westward the Cunarders will cross that line in latitude 45 north, or less than that figure; the White Star line divides the year into two parts, and from February to August runs even with the Cunard steamers; from August to February, however, its vessels keep further north, and the limit for crossing the meridian is 45 degrees 50 minutes north. The American line gets one degree nearer the equator, and strikes 50 degrees west on the forty-second parallel, while the North German Lloyd captains sail under "go-as-you-please" orders, crossing the meridian of 50, however, about eighty miles south of the Virgin Rocks, or a little to the north of the forty-fourth parallel. Going eastward, however, the figures change slightly, and the Cunard line reaches the mark of 50 degrees west one degree south of its westward crossing point, while the White Star drops its division of the year and sticks to a course still nearer the equator than its red-funnelled rival, making the forty-first parallel the objective point of junction with the meridian throughout the year.

One great danger of the transatlantic voyage is in passing the Newfoundland and Green's fishing banks, with their vast shoals of fish, and the danger is increased by the fact that the fish are known to congregate, and blow high or blow low, poke their noses up into the wind and let it keep on blowing, while the guiding spirits of the frail craft are out in the dunes, diving a school of cod or haddock. When fog settles down on the water and a damp gray blanket of mist shuts out from view everything but the tumbling wave that happens to be right under the boat, there they stay until they are either loaded with fish or short of provisions. They "go to the bottom" and away for home. At night it is the same as in fog, and while it sometimes happens that the schooner itself is smashed to splinters or cut in two and sunk, it is more often the case that a boat a short distance from her is cut down, and two or more men added to the list of missing from the fishing fleet."

The new rules of the road revive the old article of the law of 1885, which provides that open boats and fishing vessels of less than twenty tons shall have a lantern with two glasses, one showing a red and the other a green light, which shall be shown on the proper side of the boat when approached by another vessel, and another section provides that roving boats, whether under sail or oars, shall carry a lantern showing a white light, which shall be shown when approaching a craft. With these rules strictly enforced and of international effect, it is hoped that many of the perils of the sea will be overcome, for while the big steamer may come safely to port and land her passengers all right, it is not pleasant to think that in a rush for a record human lives have been sacrificed that might have been saved if strict attention had been given to all concerned to the rules of the road.—N. Y. Tribune.

NOTES OF THE FASHIONS.

Timely Hints on What Is Being Worn by Women.

A stylish and very becoming dress has a plain skirt in bell-shape with a drapery covering one side and the upper portion of the front breadth. This drapery and all the seams are trimmed with a narrow, fancy-woven galloon in black. The skirt material is dark-blue, the waist is of black velvet with blue collar and bands of velvet ribbon down the fronts. The legs-mutton sleeves have deep cuffs of blue braided with black. Shoulder ruffles of black lace extend to the waist-line, back and front.

The fashion for dressing the hair seems to be tending toward concealing the ears. Some of the new fashion-plates have the hair in a fluffy mass that covers the ears altogether; others merely show the tips. The hair is much more pulled out than heretofore, and the prediction is made that any amount of false hair will become necessary.

A stylish blouse is made on the old-time Norfolk plan, with wide, flat plaits. There are bishop's sleeves and very wide revers of moire, a more belt and collar with narrow galloon trimming.

A round hat is trimmed with a butterfly bow exactly in front. The effect is somewhat peculiar, as the loops of the bow at some distance resemble ears.

Dresses of black and tan are all the rage. Black velvet with tan-colored cloth, or vice versa, makes an exceedingly effective costume.

Waists of fancy silk, the fronts shirred in at the shoulders and waist-line, are worn with skirts in black and all colors.

A pretty turban has a trimming of satin loops and ostrich tips. One rather long plume curls back over the hair.

The sailor hat seems to be a sort of perennial. It differs but little from those worn some seasons back.—N. Y. Ledger.

ALEXANDER I, KING OF SERVIA.

Although but 18 years of age, this young autocrat recently started the world by suspending, arbitrarily, the liberal constitution of the Kingdom of Servia and restoring the tyrannical one of 1900. He has appointed a new council of state whose members are nothing but tools in the hands of the boy king. This coup d'etat is unquestionably the most reactionary measure of the past quarter of a century.

THE SAMOAN TREATY.

The United States Has Derived No Benefit From It.

President Cleveland Is Not Satisfied with the Tripartite Arrangement—Germany Still Hopes to Annex the Islands—Pango-Pango Coaling Station.

(Special Letter.)

The political papers of Europe and America have had a great deal to say about Samoa recently. Samoa is a species of kingdom. It consists of ten islands, situated in the Pacific ocean, known as the Navigator's Islands. They are said to be high, mountainous, of volcanic origin, with a rich soil, a hot moist climate and luxuriant vegetation. The inhabitants, a tribe of the Polynesian race, are described as industrious and warlike. The population of the entire kingdom, natives and foreign-born, does not exceed 40,000, but the miniature monarchy produces and exports large quantities of coffee, sugar, yams and nutmegs. For many years—in fact, ever since the French took forcible possession of the Society Islands—Aplia, the principal port of the Samoan group, has been the center of English and American interests in that part of the world. After the Franco-Prussian war the German empire developed its foreign commerce in every direction, and many Hamburg firms established branch houses and plantations at and near the Apia and other Samoan ports. Nine or ten years ago German interests began to predominate in the islands. The consul of the German empire attempted to dominate the native chiefs and made himself generally obnoxious to other foreign office holders. The natives, instead of presenting a united front, allowed themselves to become involved in civil strife. The so-called rebels were supported by the German consul, and things went from bad to worse until the government of the United States made some pertinent inquiries concerning the aims and objects of the interference in Samoan affairs sanctioned by the Berlin foreign office.

Germany After the Islands.

In 1887 Germany gave a decided answer to Uncle Sam's diplomatic correspondence. The emperor wanted to make the Samoan group a part of his colonial domains. He stated that the conditions in the islands justified foreign interference, and as Germany had the inside track, commercially speaking, he thought the kingdom should be annexed to his government. Incidentally he mentioned that England had no objections to such a termination of the

MALIEOTOA, KING OF SAMOA.

embroglio. But President Cleveland could not see things in the same light. He objected to annexation on the ground that it would jeopardize American interests. Thinking that time would help the German claims, the Berlin government allowed the entire matter to rest until 1890, when a body of natives made an attack on some German residents of the islands. Using this attack as a pretext, Germany once more laid claim to the islands, but was again balked by the protests of the United States, supported in this instance by earnest objections from England. While no sane person thought for an instant that the Samoan question would lead to a war between the United States and Germany, yet excellent reasons for an international conference between the three interested powers were perfected.

The Treaty of Berlin.

In the spring of 1899 representatives from the governments of the United States, Great Britain and Germany met at Berlin to devise a way whereby the interests of the three countries, as well as those of the natives, might be pro-

tected. After discussing the points at issue at considerable length, the three powers signed a treaty on June 14, 1899, in which they agreed to restore King Malletoa, who had been deposed and virtually deposed by a chief named Mataafa, a tool in the hands of the Germans. The treaty further provided for the complete neutrality of the islands and equal rights for the citizens of the treaty powers, for the establishment of a supreme court consisting of one judge, a foreigner, and for the setting up of a municipal government at Apia, with an administrator appointed by the treaty powers.

The Pango-Pango Coaling Station.

The fact of the matter is, the United States would withdraw from the agreement altogether were it not for an important treaty with the native government which granted us the right to establish a coaling station for vessels of war at Pango-Pango harbor. Inasmuch as the Samoan group is directly in the line of navigation between our Pacific coast ports and New Zealand and Australia, the possession of Pango-Pango would prove of incalculable benefit in case of war with Great Britain or any other power having colonies in the Pacific ocean. New Zealand can be reached from Apia in five days, and other points of strategic importance are also accessible, while the harbor of Pango-Pango affords excellent shelter for quite a large fleet. The American government fortified its rights to the station by unloading several thousand tons of coal at Pango-Pango in 1890. This fuel has never been touched, but the stars and stripes wave over the coal sheds, and no nation would dare so brazenly haul down that flag without the consent of the American people.

Despite these advantages, however, some naval officers are inclined to consider Pango-Pango of questionable value to the United States, as the maintenance of a regular coaling station there would entail a heavy expense. On the other hand, advocates of annexation claim that if any protectorate be established over Samoa it should be by our government. Many thoughtful students have viewed with alarm the seizure of various Pacific islands by Great Britain and France. They argue that we cannot afford to allow European powers to establish fortifications at points dangerous to American commerce, and claim that we have the indisputable right to extend the Monroe doctrine as far west as the Pacific islands.

The Natives Are Not "In It."

About two years ago Great Britain seized the Gilbert Islands without a protest from the United States. A little later France increased her island possessions in Pacific waters. In both instances the natives were not consulted. They had tilled the soil for centuries, but that counted for nothing. Their consent to annexation was not asked, and it had been refused. The natives have been treated simply as rebels. The same cold-blooded selfishness characterized the action of the Samoan treaty powers. The privileges of American, German and British citizens were defined at great length, but the inherent rights of the natives were passed off in a few paragraphs. The government of the kingdom was vested in a supreme court, presided over by a foreigner unacquainted with the customs and habits of the natives. It is true, the Samoans were permitted to keep their king, but the unfortunate monarch had to obey the commands of the justice and the foreign consuls.

Good Traits of the Samoans.

To understand the enormity of the cruelty and tyranny of which the treaty powers have been guilty it is necessary to state that the natives are Christians. They have never violated the rights of domicile claimed by foreigners and have never engaged in wanton strife except when egged on by foreign influence. No incident mentioned in history is more touching than the courage and humanitarianism displayed by the Samoans during the terrible hurricane of March 15, 1890, when hundreds of them risked their lives to rescue the drowning sailors and officers of the American and German men-of-war wrecked by the storm. And yet they knew that at least part of the stranded vessels were in the harbor for the purpose of annexing their country and deposing their king. Individuals would have remembered such grandeur of character with undying gratitude. Governments, however, have no conscience, and it would seem that as soon as the United States ceases to file protests Germany or Great Britain will grab Samoa with the avidity of a hungry dog in sight of a bone.

G. W. WEITZMAN.

FOR YOUNG PEOPLE.

THE QUARREL.

To-day my dolly, Rita May,
Quarrelled with her sister,
And when you think the sister did—
Went an' "saw" on the naughty kid?
No, turned around an' kissed her!
I'm a model mother in my way,
I try to do my duty;
I teach my children the golden rule
In all its golden beauty.
But what do you think my naughty child
Did to the gentle Kitty Trigg?
Wiped the kiss from her cheek, an' smiled
An' pulled her sister's wig!
I was so hopplin' mad, you see,
I didn't take time to think, an'
I gave her what mamma gives me
Once in a great, long while, you know.
I spanked her hard. An' alas! she died.
She took censurement. The sawdust
came
A flyin' all out of her poor, dear side,
An' my bad temper was all to blame!
I asked the doctor to make her well
(To the doctor's hospital I took her),
But he only said: "I have dolls to sell."
An' held her up by the hair an' shook her.
"Her head is cracked," he said, with a wink,
"She's past all mendin'; her day is quite
done."
My little girl don't you really think
An' the doctor's talk like you do me?
"It's little," I says, "My Man, that you know
Of the pain an' love of a mother's heart."
"S'posin' your little girl should get hurt,
An' the doctor's talk like you do me?
Wouldn't you give him an answer cut?
Why, you'd be as mad as you could be!"
An' I most believe that my heart is broke;
I'll never get over my havin' killed her!
For she never opened her eyes, nor spoke
After I'd been an' gone an' spanked her!
She used to open an' shut her eyes,
An' say "Mamma" in the sweetest way,
An' to think I'd have had her still, oh me!
If she hadn't quarrelled with Rita May."
—Lillian V. Douglas, in Housekeeper.

PECCARY WATCHDOG.

How a Peculiar Creature Guarded a Pennsylvania Hotel Stable.

The wild peccary, in droves, is a dangerous animal, but I know of one that was tamed and served as guard of a hotel stable.

The locality was on that noble drive up the Wissahickon, five or six miles from Philadelphia. The hotel was a much-used stopping place for jockeys and sporting men.

One fine day many such people were standing about in front of the house and stable and several boys were chasing each other among the groups. One of the boys had a short whip and made himself obnoxious by delivering stinging strokes as often as he could on the legs of the smaller boys.

Suddenly the boy with the whip uttered a loud cry of pain and fright, dropped his whip, and pressed his hands to his leg, whence drops of blood trickled slowly down.

In reply to inquiries as to what ailed him, he screamed out in his rage and pain: "That peccary bit me; and I'm afraid to get a pistol and shoot him!"

"I don't blame the peccary," said a bystander to the crowd; "he struck the beast with his whip, an' the critter wasn't interferin' with him nor nobody."

"Yes, yes, yes! he switched the peccary, and me too, and me too, and me too," shouted the small boys, as they gathered about.

"That's my watchdog," said the stableman, nodding toward the peccary—

THE SOUTH AMERICAN PECCARY.

which animal was wearing as near a gratified smile as his piglike face could show.

"Watch-dog," cried a quick-tongued boy.

The boy was correct; for the animal belongs to the canine family. Its native country is Central America, but it has been most numerous in Mexico.

This peccary had been brought to the place when young, and as he grew up he adapted himself easily to his new conditions. He knew well his duties and his privileges in the locality. He was at this time about the size of a sheared year-old sheep. He was covered with rather stiff brown hair, and flourished occasionally a very short, goatish tail.

The kennel of this curious "watch-dog" was a nest of hay and rags (the latter usually toted thither by himself) under the stairs, which were a little distance back from the main door of the stable. He gave little attention to any person in company with the hostlers, but if anyone was absent he was very fond of anyone who came into the building, trotting about near his side, and uttering threatening sniffs and grunts if the stranger touched anything.

His usual mode of attack was a side-blow of the chops, bringing a task considerable size into a tearing acquaintance with the intruder's trousers.

Dogs were liable to similar attacks. They were generally shy of the peccary, bristling up to their best, either from fear or rage, at the sight of the strange animal who had assumed their vocation. They doubtless regarded him as a "scab," as men who have abandoned work call those who venture to take their places.

"Pec" could climb the stairs over his kennel as easily as a dog. He could even mount a short ladder.

This facility in going upstairs was most striking whenever a hen broke

out in a consequential cockle. The peccary knew what this meant, and if no person was near enough to prevent he was up in the hayloft in a jiffy, and hunting for the egg about which the foolish biddy was bragging so loudly. Though the animal was quite teachable, his owner had been unable to bring the creature's moral nature up to a degree that would withstand the temptation of a freshly laid egg.—Chicago Inter Ocean.

HEROISM OF A BOY.

He Rescued Several Persons at the Risk of His Own Life.

A terrible railroad accident happened in Hoboken, N. J., a little while ago. An accommodation train, running too fast in the fog, crashed into a standing express. There was a schoolboy on the express who had been sitting in the rear car studying his lesson. As the express train slowed up a feeling of oppression took hold of him. He suddenly remembered hearing his grandfather once say that the rear car was the most dangerous one in the train, and acting on an impulse of the moment he got up and went to the rear. He was seated when he felt the car crumbling beneath him and found himself entangled in a mass of men and wreckage.

Wounded and bloody, the boy extricated himself. Above the shrieks of the unfortunate pined beneath the broken timbers. Men were dazed and agitated.

"An ax! an ax!" shouted a shrill voice.

The schoolboy was the first to grab his ax, and start the work of rescue. With an ax he saved three or four men before the older bystanders had begun to think.

Then a cry of horror from another point called an excited group of men together. Beneath the wrecked engine, amid the dropping coals and escaping steam, was seen the figure of a man. The sight was the more sickening because the dead locomotive was liable to topple over any instant and crush whatever lay beneath it. There was a cry for volunteers.

The conductor called; the engineer called; but all held back. Not all; out of the crowd came a slight figure whose clothes were torn, whose face was almost unrecognizable from blood and soot, and whose hands were black from merciful toil.

"I'll go! Let me go quick!" cried the schoolboy.

The crowd stood back, while a few made an effort to stop him, but the boy flung himself underneath the locomotive, risking death as unhesitatingly as he had skated at recess. Steam hid his movements, the huge engine actually chattered above him, as if deciding whether to roll upon the young hero or not.

Then there was a shout, and men felt a rising to their throats. From under the iron monster the boy reappeared, dragging after him the man he had gone to save. Now there were willing hands and plenty of volunteers, after the deed was done. It was said by those present that no person so distinguished himself as that schoolboy. When he appeared at his father's door, hours afterward, he sank exhausted upon the threshold, with clothes torn, with face and hands grimy and bleeding, and so changed that his mother's servants did not recognize him.

One of the distinguishing qualities of our American boyhood is its readiness to accept responsibility. Useless heroism is not a product of age, but of distinctive nobility, which it is pleasant to know that the pupil at school may possess equally with the man of maturer years.—Youth's Companion.

Salmon and Eagle Fight.

While two men were spearing salmon on the Columbia river, in Oregon, they noticed a large, gray eagle hovering over the water, but they paid no attention to the bird until it suddenly swooped down and pounced on a big fish. The fish must have weighed sixteen pounds, and it soon became evident that the eagle could not lift it clear of the water. After several ineffectual efforts, the bird next tried to release its hold, but it was caught fast as if in a trap. Finally it was itself dragged into the water, and the swift current swept the odd combatants down stream until they lodged in a fish net, where both were caught. The fish was killed; the eagle was already dead.

Wanted to Be Like Mamma.

"We are going to have Mabel very highly educated," said a clever young matron recently. "I don't want to be too highly educated," came the unexpected voice of Mabel in little tot of five from another room. "I want to be just like you."

Protesting Too Much.

She (doubtfully)—Have you really told me all the sins you ever committed? He (stoutly)—Yes. All.

She (sorrowfully)—Then I am not worthy of you. Farewell for—forever.—N. Y. Weekly.

Short Periods.

Potts—So he is. He gets full once every twenty-four hours.—Indianaapolis Jou

FARM AND GARDEN.

ORCHARD CULTIVATION.

The Best Way to Begin Is by Deep Plowing Both Ways.

Because trees grow spontaneously as nature has planted them, the idea is often entertained that they need no cultivation. Orchards are frequently planted in grass, in the unplowed field, or in fence corners, and then expected to do well. It is true that nature plants trees in somewhat similar locations, but there is a difference. The grasses in the timber sections do not form so stiff a sod as when upon cultivated areas. Then there is the mulching of constantly falling leaves and limbs, bark and decaying brush, so the soil is kept loose and moist; if we plant we must furnish the same conditions by either deep or thorough cultivation. There must be a thorough cultivation keep the soil fine and loose, that it may be in condition to give the tree all possible chance to assimilate the necessary elements from it and to prevent the escape of these same valuable elements. Cultivation may take the place of mulching, yet it is not mulching, so tillage may take the place of manure, but it is not manure. One cannot be substituted for the other to the fullest extent. There are cases where there must be mulching; in every case of continued tillage there must be manure. Begin cultivating the orchard by deep plowing both ways. The land was of course deeply stirred before the trees were set out.

This is not for the man who is planting in a stiff, cold, wet soil, where there is a superabundance of moisture. He will practice shallow plowing. My first planting of an orchard was on a level plot of ground which surface-drained itself very slowly. With a surface soil of only about six inches I platted but four inches deep, and then by repeated plowings raised the soil about the trees. I plow both ways because I do not want a hard, uncultivated strip which would otherwise be left between the trees. Let them have good soil in which to feed in every direction. Pulverize the ground thoroughly, keeping it stirred as necessary, and all is well until crop planting time.—J. M. Rice, in Epitome.

ABOUT DETERIORATION.

Why All of Our Fruits Fall Under Special Conditions.

The question of the deterioration of fruits comes up in every case, and it is pretty sure to be asserted by some one who fails to make a special fruit grow that it has gone into its dotage. The Spitzenberg apple and the White Doyenne or Virginal pear are most frequently instanced as cases of fruit decadence. But there are so many incidents that affect the life and development of trees that we must leave a good deal about a fruit before we can draw the conclusion above noted. For instance, I have a new seedling apple that came up not more than about a dozen years ago; and it is so handsome, so good and so long keeping, that I feel sure very much to propagate it. But it is, in all respects, like a dotard Spitzenberg, or worse. It would be picked out in all cases, as a decrepit, worn-out variety. The truth is it is peculiarly subject to anthracnose, and the fruit is belovely by insects. To make it sound requires that the young trees be constantly cured for anthracnose, and the fruit thoroughly sprayed. The Jonathan, which is a seedling of Spitzenberg, is like its parent, a special favorite of the codling moth, and the tree is delicate. Baldwin do best grafted high on old stocks; so do Greenings. There is no reason why we cannot get good codlings, or worse, and I do get them by exercise of great care. The price paid for them abundantly compensates extra attention and labor. The history of all our fruits shows this same story of special liabilities to fall under special conditions. Most particularly true is that some fruits need a large amount of fertilizing material or plant food to do their best.—E. P. Powell, in American Agriculturist.

HANDY GARDEN TOOL.

Simple Yet Effective Weed Destroyer for the Garden.

The sketch shows a handy garden tool which I would not do without for many times the few cents my village blacksmith would charge to make it out of a piece of scrap steel (mine is made of an old rasp that blacksmiths use for trimming horse hoofs). It is

especially adapted for cleaning out corners about the lawn and around the base of closely-planted perennials, roses and shrubs, and more so where the soil is rather hard and clayey, and no other weeder can take its place. To shift from position Fig. 1 to Fig. 2 just slip thumb underneath, at the same time turning the wrist half around to the right, which can be done forward and back rapidly. Sharpen spade part only from one side, the upper one.—Daniel P. Thuesen, in American Gardening.

Nonov ever made strawberries pay without giving them good attention and nobody ever will. Have the soil rich, give good cultivation and select the best varieties, and there is money in strawberries.

The careless berry-picker who picks green fruit and neglects to pick much that is ripe, and who eats two berries to one that he puts into the box, had better be given a leave of absence.

A GRASSHOPPER REMINISCENCE.

The Man on the Cracker Box Tells a Timely Story.

"Talkin' of grasshoppers," said the man on the cracker-box, "reminds me of the scourge of 1873, when the country out here was overrun with them pesky critters. Nobody knew what they came from, and nobody knew what they went to, for they come without warnin' an' they left in the same fashion. I had kept my weather eye peeled for a week, but nary a hopper did I see, when I heard as how they was at Blair, an' a-singin' likety split to Decatur."

"Then were lively times," said Long Jim, the stage driver. "Lor! how scared the wimmen were with the jumpin' critters."

"I were afore I married the widdler," continued the man on the cracker-box, "when I were livin' with my sister, after she come out here, an' I had a right smart of cabbage in the field by the house, an' I warn't a-go'in' to let no pack of measly grasshoppers eat 'em up, not if I knowed it. I heard after sundown as they had struck Blair, an' I set to work an' covered every critter of them critters up with blankets and comfortable."

"An' I'll bet you didn't save a one, not a one," suggested Long Jim.

"It's right you are. I didn't. When I was up in the mornin' the field was as bare as it had been struck by a cyclone, not a thing left of them cabbage but the stalks in the ground. The hopper had jes' eaten the coverin' an' the cabbage like so much provender an' gone off to another country. I nearly eried over them cabbages."

"Tell us about them in the cars," said Long Jim. "This gentleman from the east ain't never seen the like."

"They stopped the cars more times than you could count on your fingers by grittin' on the tracks, and makin' them slippery, actin' like so much grease. And once—gentlemen, you may not believe it, but it's gospel truth—the critter pulled the bell an' the engineer stopped the car, stick-still. It were this-a-way, for I were there, and see it myself. The conductor came into the car when it stopped, and he says, says he: "Who pulled that bell rope? Every-body was scared, 'cept me, and I spoke up an' says:

"'The hoppers did it?'"

"'Don't talk foolishness,' says the conductor, 'I don't low no galoot to tend to my duties. When this train is stopped, I do it myself. Don't none of you ever tetch that bell rope agin.'"

"I'd like to see anyone tetch it now," says I, an' I panted it out to him as a constrictor snake after it has swallowed a calf, an' the car bell a-ringing like mad."

"Holy Moses," says I, an' looked skairt, but it were a fact, just the same. Then hoppers followed us into the stage, and we sat there knee-deep in 'em. Scared? No, not much to speak of. You see, them wasn't the seven-foot locusts with a big "W" on their backs. These here critters were little slim things, kind of a brown-green, but Lord, how they did eat things! We folks had skeeter nets in them hoppers, and in two minutes after them hoppers struck us they were swarin' round the house like flies."

"If they come agin," said Long Jim, "I'd just fill up every grovin' thing with pizen, an' then when the hoppers were all dead I'd burn 'em and use 'em for fertilizers."

"Ver monight," said the man on the cracker-box with a thoughtful look, "fifteen-cent cards a-savin' they was comin'. But when they steal on yer like a thief in the night, you can't most always calculate just what you would do. I'm layin' for 'em this year, but they ain't sent on no advance agent with nary a hint of campaign, as yet."

And he enveloped himself in a blue haze of smoke that forbade further discussion.—Detroit Free Press.

THE PERFUMERY NUISANCE.

How an Amateur Reformers Stirred Up an Odorous Street Car.

"Why doesn't some reformer preach a sermon on that subject, or some editor write an editorial about it? asked a sandy-whiskered man on a trolley car going at the rate of eight miles an hour.

"What subject?" asked a curious passenger, while four men, six women, two babies and a poodle dog opened their ears in order to catch every word of the answer.

"What subject? Why, the odor in this car. There's a stinky old hag, after of noses. Marie Stuart, and a dozen other brands of perfumery aboard of this here car strong enough to drive a windmill. The excessive use of perfumery is a lesson necessary to teach to all womankind."

"If I was half as strong as the odor you complain of," interrupted an indignant woman, "I'd kick you off the car."

"You're an old crank," said another. The complainant slipped off the car and appeared to be well pleased.—Buffalo Courier.

HER LAST LETTER—"Thus we part, wretch, and this is the last letter from your unhappy Anna. P. S.—More to-morrow."—Fitzgibbon Blackett.

THE SMALLER, THE BETTER.

"If you can only be sure that a small pill will do you as much good, Dr. Pierce's Pleasant Pellets are smaller than any others, sugar-coated, easier to take and easier in the way they act—and yet they really do you more good. Their refined and concentrated vegetable extracts set upon the liver in a natural way that feeds. They have a peculiar strengthening effect on the intestines. They not only relieve, but permanently cure. In every liver, stomach, and bowel disorder—Constipation, Biliousness, Indigestion, Windy Eructations, "Rises of Food," Sick or Bilious Headaches, Sour Stomach—they're guaranteed to give satisfaction, or your money is returned."

On to Washington.

Three years ago, the only authentic map of the Virginia battlefields was prepared by the War Department for the Chesapeake & Ohio Railway Co. It can with safety be asserted that it is the most interesting map ever published; and so great was the demand for the first edition that 100,000 were soon absorbed, but it has been re-issued for the occasion of the K. of P. Encampment at Washington in August, and will be mailed free after June 1st, upon application to C. B. Ryan, Assistant General Passenger Agent, C. & O. Ry., Cincinnati, O. In connection with the map is also a description of the grand and varied scenery of the Virginias, and the delightful Mountain and Sea Shore Resorts along the C. & O., as well as a sketch of the battlefields.

The man who is not conscious of his own faults has no clarity for another.—Ram's Horn.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to a thousand men and women, to all ages and professions, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Positively you have the genuine De Long PATENT HOOK AND EYE if you see on the face and back of every card the words:

Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made a remittance, at the risk of the sender. Address—

THE REPUBLICAN,
Oakland, Md.

THURSDAY, JULY 19, 1894.

The Washington Star says that Senator David B. Hill will no longer be recognized as a Democrat and will not be permitted to participate in the Democratic Senatorial caucus. Senator Blackburn has suggested that he should be read out of the party by a formal resolution of the caucus.

The Crop Prospects.
The Government report on the condition of farm crops on the 1st inst., just issued, is very encouraging. It is an axiom proved true by experience that when the earth yields abundantly the people enjoy prosperity. The average condition of cotton is the best since 1890, and the South will have more of its great staple to sell than ever before. The average of winter wheat is 83.3, compared with 77.7 a year ago. The spring wheat average is the lowest for many years, being only 68.4, but the acreage is usually about one-half that of winter wheat, so that no important shortage in the total of both winter and spring will occur. Corn promises to be the bumper crop of the year. Its average condition is 85, the highest since 1887, and the weather continues most favorable for its growth. The poorest showing made is by oats, 77.7, the lowest average ever reported.

The Free Wool Scandal.
Owing to certain climatic conditions fine wool cannot be produced in these United States.
For the last eight or ten years the above has been the stock argument of "Free Wool" advocates, many of whom don't know a fleece of fine wool from the hair of a bull terrier, and Senator Voorhees seems to be one of the converts to this convenient Free Trade doctrine. It is not to be supposed that because a man has reached even the exalted position of United States Senator that he must necessarily know everything. It should be his aim, however, when great and important interests are under consideration, to use every means to learn that the arguments used are not in direct opposition to the facts.

It is hard to believe that an American, and especially one who has been selected to represent Americans, should become so strongly partisan as to knowingly indorse a statement so injurious to the people he represents, merely to gain a temporary partisan advantage. We must infer, then, that the indorsement of Senator Voorhees was made ignorantly, but we insist, earnestly.

At Onondaga, New York State, there is a flock of Merinos that was established in 1802. Previous to the election of 1892 the wool from this flock was never but once sold at less than 20 cents per pound unwashed; for the clips of '93 and '94 the owner, Mr. Davis Cossitt, was offered 10 cents.

The blood being considered desirable, the increase of the flock had always, previous to the election of '93, sold readily and at fairly remunerative prices, but a contract to deliver one hundred ewes and rams at the Syracuse station in November, 1893, at \$10 per head was canceled as soon as the result of the Presidential election of that year was known. The same sheep have since been sold at \$1.50 per head.

The "climatic" conditions of America are favorable to the production of the very best wool that can be grown anywhere. Any country where the snow flies pro-

duces finer furs, finer and softer wools than can be grown in a hot climate. This is a natural law that neither free wool fallacies, wilful ignorance nor partisan malice can abrogate.

The best wools can not only be grown here, but in sufficient quantities, too, to fully supply every demand of manufacturers and consumers, and at prices low enough to satisfy every reasonable requirement.

But the tariff tinkering majority in Congress is pursuing a course that must compel every American wool grower to surrender his only market to foreign competition. Corrupt trusts can be fostered, encouraged and protected, but the interests and rights of American farmers are not to be regarded.

Yet the men at Washington expect Democrats who are engaged in the wool growing business, and other branches of farming as well, to meekly or, to quote Mr. Voorhees, "loyally" fall into line and continue to vote the straight ticket. Well, wait till they get a chance and see.

Choice Extracts.
(Senator Hill's speech July 5.)

I have earnestly appealed to my party friends to eliminate this objectionable feature (the income tax) but my appeals have been in vain.

I have warned them of the dangers to which in my judgement, they were unnecessarily subjecting the Democratic party, but they have chosen to disregard them, as was their privilege.

In my opinion, it imperils the possibility of permanent Democratic success in any Northern State for many years to come.

The true principals of tariff reform have been sacrificed in the effort to insure the retention of an income tax. This the country believes—this the country understands. We promised the people bread and we are giving them stones. We promised them free raw materials, and we are giving them taxed coal, taxed iron ore, taxed coke, taxed lead ore, and other taxed raw materials.

They expected free sugar, but we are taxing not only that article, but other necessities of life.

The provisions of the bill are not consistent; they violate well established Democratic principles; they are unfair in their discriminations, and their enactment will place the party in a false and untenable position.

If Republican protection was a fraud and a robbery, as we declared in the Chicago platform, is Democratic protection any the less so?

This is not a Democratic bill. I am sure; it is not a distinctly Republican bill; it is not a Populist bill entire, but it is a mixture of all—it is a rag bag production—it is a crazy quilt combination—it is a splendid nothing.

"Sink or swim, live or die, survive or perish." I cannot and will not support this bill in its present shape.

Grantsville.

Mrs. Geo. W. Jackson and son and Miss Minnie Brew, of Bellefont, Pa., are the guests of Mrs. Geo. T. Brew.

Mr. Jacob Brown, of Cumberland, is stopping for the present at Ross Compton's.

Mrs. J. J. Young, wife of Rev. J. J. Young, of New York City, and family, are at Mr. Henry Wagner's. Mr. Young will join his family here about the first of August.

Prof. D. O. Sullivan and family, of Philadelphia, are at the Bigely farm for the summer.

Farmers report their wheat crops considerably damaged by frost.

A lawn fete was held at the Reformed church on Monday night at which ice cream and lemonade was served by the ladies of the congregation.

The grounds were beautifully illuminated with torches and Chinese lanterns and a good time was had by the young people. A crazy quilt, donated by Miss Lily Kratz, was danced off and the proceeds given toward buying new carpet for the church.

Mr. S. H. Ryland has put a new coat of paint on his dwelling house, which improves it wonderfully. The work was well done by Messrs. Bryan & Stratton, of Meyersdale, Pa.

Hon. Wm. R. Getty returned on Monday after an absence of ten days on a visit to his son, Dr. O. G. Getty, at Meyersdale, Pa.

OCCASIONAL.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colarneau Cottage, opposite the bank, Oakland, Md. 41-tf.

THE SIXTH DISTRICT.

Democrats Will Insist on the Renomination of Mr. McKaig.

(From the Baltimore Sunday News.)

Sixth district Democrats who have been in town during the week say that the almost unanimous sentiment among their people is in favor of the renomination of Gen. W. M. McKaig, notwithstanding his declination in advance of the convention. These gentlemen declare that Mr. McKaig has not lost any of his old time popularity, but that, on the contrary, his record in Congress for the past two terms that he has served has tended to increase his strength, and the fact that Senator Gorman has relieved him of all responsibility in the distribution of the federal patronage has prevented his incurring the odium and hostility which always result from the division of the spoils. The general impression is that Mr. McKaig will accept if he is nominated unanimously, and that the latter will be done when the convention meets in Hagerstown in September.

The opposition to the nomination of Mr. George L. Wellington by the Republicans of the Sixth district seems to have almost died out during the past few days. Indeed, from the start all prospect of defeating Mr. Wellington has appeared futile to anyone at all familiar with Republican politics in the Sixth. The sub-Treasurer has had with him the entire Republican party organization, not only of the district, but the State as well, and, in addition, nearly all the prominent men of the party have been anxious to see him again their nominee. The men who have for years controlled the destinies of their party in that section have been for Wellington in no uncertain way. The opposition to him has been spasmodic, and has now apparently died out. Mr. Wellington will retire from office as Assistant Treasurer on Saturday next after four years' service, and give place to Judge Hammond. His conduct of the sub-Treasury has been such as to commend him to all classes of the business community, and bankers and others have expressed regret at his prospective retirement.

The appointment of Mr. Boyle as postmaster at Westminster and the turning down of Mr. Vanderford, editor of the *Advocate*, is another evidence of the ingratitude of some Maryland politicians, which, in this instance, is particularly bad to understand. Mr. Vanderford, like his father before him, has always been a regular of the regulars and has invariably supported Senator Gorman in all things and at all times. Two years ago, however, he opposed the nomination of Mr. Talbot for Congress, and now he is earnestly supporting Governor Brown for renomination. Hence he is no longer in favor with the powers in control. It has been a great surprise, however, to many people to learn that Collector Shaw, whose friend Mr. Vanderford has always been in all the aspirations of that gentleman for many years indorsed Mr. Boyle. It is understood that Mr. Vanderford was offered in place of the postoffice a menial position around the capitol at Washington, which he spurned, remarked that he was "accustomed to help make United States Senators, not wait on them."

Saltysport.

Mr. Jas. A. Dunham has been and is yet seriously ill.

Mr. E. M. Liston is on the sick list yet.

Mr. and Mrs. A. G. Meese and family, of Kring, Md., spent Saturday afternoon and Sunday among their many friends in our town.

We noticed many old friends from the several appointments in town Saturday and Sunday attending quarterly meeting.

We were favored with very heavy rain on Saturday afternoon. It did not come too soon for the gardens, potato patches and oats fields were all needing it badly.

The potato tops are dying from some cause or other. Some people tell us it is the dry weather doing it, and some say it is a worm working at the root.

The fourth was quietly celebrated by our people there being very little drunkenness. It was hoped that the cursed stuff would not be used by our young people after Diamond closed his groggery but it was.

We now think it time to kick. Our school house has been used to hold meetings in by one of our secret order without opposition and now the other one is talking of moving their place of meeting to the school house and save paying rent. I don't want to put myself on record as being opposed to secret orders, but I do think that if an order of any kind has to impose on the tax-payers of our county by using school houses which were built by the tax-payers, had better be out of existence. In speaking of this matter one of our leading

citizens said he considered it an imposition upon the tax-payer. He also said that the school house now was unfit to go into and if more of these meetings are to be held in our school houses let the school board lay a reasonable tax on all such organizations, or refuse them the use of the school houses altogether which would be much better.

A part of the Bellevue road and gun club spent last week fishing and hunting in this vicinity. They stopped at the hotel Diamond while here.

Our young folks have fallen into two bad habits. They are pitching horse shoes and playing cards. They must have something to pass the time away and perhaps no one else would object to the innocent sport with the horse shoes for they always do that on a week day, but not so with the cards. Sunday is generally selected for card playing. Be careful boys, you might get your foot in it.

We hear no arguments on the question of issuing school bonds for the reason that every one seems to be of the same opinion on that all important subject.

Our voters are making preparations to pay the Wilson bill of this fall, but some think they will have to pay interest on it 'til '96. Wonder if they will.

North Glade.

Weather dry and hot. Farmers busy harvesting. Grass is light. Fair prospect for other crops.

J. M. Moon and family were visiting relatives at Ryan's Glade last week.

Mr. and Mrs. J. L. Fitzwater were also visitors at Ryan's Glade recently.

Rev. C. E. Feather preached an excellent sermon to a large congregation here on Sunday morning.

Our Epworth League is marching on. Interesting devotion meetings are held every Sunday evening. Literary meetings every two weeks on Tuesday evenings. A splendid programme was rendered two weeks ago and another good one for this Tuesday evening. Miss Lillie Garlitz has charge of this department. Mr. Geo. W. Moon will attend the convention to be held at Terra Alta the 25 and 26 instants.

Mountain Lake Park.

The camp meeting closed Monday night. A large audience had gathered to participate in the closing services. A song service commenced at 7 o'clock p. m., and continued until 8 p. m. The regular closing exercise took place at 8. For two hours and a half a decidedly interesting meeting was held. The meeting closed with the benediction by Rev. John Thompson, of Philadelphia. The past ten days the largest crowd that ever met at a camp meeting on these grounds assembled. The preaching was exceptionally good, the singing "in the spirit and understanding." This week will be one of quite and rest.

Next Tuesday the W. C. T. U. School of Methods will convene. Mrs. Caroline Buell will be in charge. Tuesday night the Hon. Geo. W. Bain, of Kentucky, is to lecture on "Among the Masses." Miss Lydia Newcome, of Michigan, is to conduct classes in physical culture. All through the five days of the convention a fine programme will be enjoyed.

Saturday, August 4th, will be a peculiar day. At 2 p. m. there is to be a joint discussion on "Protection vs. Free Trade." Ex-Congressman, Roswell G. Horr, the wittiest debater in the country, will meet Hon. John Z. White, an efficient lecturer of the Single Tax League of America. It will be a battle of giants. Each man will make two thirty minutes speeches. My, how the sparks will fly. Special excursion trains will be run by the B. & O. R. R.

The stockholders of the Mt. Lake Park Association met Tuesday.

C. W. Conner, G. C. Sturgiss, J. M. Davis, D. E. Offutt and C. W. Baldwin were elected as board directors. C. W. Baldwin was elected president. The reports were encouraging.

Married.

SPEECHER.—EXLAW.—By Rev. William E. George on July 4th, at the residence of Thomas Nine. John Speicher and Miss Julia Enlow, both of Garrett county.

Dentistry.

Dr. D. O. McKinley, of Elk Lick, Pa., will visit Friendsville, Md., July 26th and 27th, Hoyes, July 30th; Mellonry, July 31st; Thaverville, August 1st; at W. H. Spiker's, on Deer Park road, August 2nd, prepared to do all kinds of dental work. Teeth extracted without pain.

Notice to Trespassers.

All persons are hereby warned not to trespass upon my premises situated in District No. 8, Garrett county, for any purpose whatever.

M. M. BEST.

DEBS BEHIND BARS.

He and Other A. R. U. Leaders Placed in Jail.

CHARGED WITH COURT CONTEMPT

District Attorney Mielchris Says They Violated the Injunction of Judges Grosscup and Woods.—The Defendants Make No Attempt to Secure Bail.—Debs Talks.

CHICAGO, July 18.—Eugene V. Debs, George W. Howard, L. W. Rogers and Sylvester Kelher, the officers of the A. R. U. have been committed to jail by Judge Seaman in the United States circuit court for alleged violation of the injunction issued by Judges Wood and Grosscup. The four leaders of the strike in reality went to jail in default of bail for the court offered them their liberty until next Monday when they will have a hearing on the charge of contempt. Their bail was fixed at \$2,000 each, but the men refused to give it and the court committed them. Debs and his companions were taken to jail by Marshal Arnold, and before they left the courtroom Judge Seaman instructed the marshal to take them out of jail at any reasonable time or times in order that they may have abundant opportunity to consult their attorneys between this and next Monday.

District Attorney Mielchris had filed an information in court charging the officers of the union with violating the injunction and asked for a writ of attachment for contempt. It was not necessary to issue a writ for Debs, for he was in court when the information was filed. When the injunction was issued by Judges Grosscup and Woods, the marshal's summons was issued and those named in the injunction were directed to appear in court to answer. That was what brought Debs into court with the attorneys who have been retained to defend him and his brother officers. The information was read to the court by District Attorney Mielchris.

When Mr. Mielchris had finished the reading of the information, Attorney George R. Peck, representing the receivers of the Santa Fe system, took the floor and read a petition for writs of attachment against the defendants on behalf of that railroad. The petition asked that the defendants be punished for contempt for violating the order appointing the receivers as well as for violating the general injunction as it applies to the Santa Fe. A number of acts of violence were alleged and interference with trains. The formal proceedings began at 2 o'clock, when Attorney Peck, for the defendants, asked that they be released on their personal recognizance.

Judge Seaman finally decided to set the case for next Monday and fixed bail at \$2,000 each. The four men made no attempt to furnish bail and were committed to jail until Monday. The attorneys for the defendants said that they could not secure bondsmen, but Peck did not corroborate that when asked if he would give bail. He said he would not give bail to the amount of 5 cents.

A telegram was produced in court, sent by Debs, on July 17, to North Battle, Mo., it read: "General managers are weakening. If the strike is not settled in 48 hours complete paralysis will follow. Potatoes and hay are out of sight. Save your money and buy a gun."

While seated in the jail, awaiting the preparation of his cell, Debs said: "Well, I mean a few days of rest and quiet at least. I have not had much rest for over a month, and I am badly in need of it."

"No, sir, we will not give bonds. Our heads are \$2,000 each, but we would not give bonds if they were 5 cents each. We are not posing as martyrs, neither do we ask for sympathy."

"All I have to say about our arrest is that matters have come to that point in this free country, when it is held to be a crime to advise a man what to do when he seeks your advice. We are guilty of no crime unless the single expression of opinion is a crime. We are not responsible for this strike. Pullman is responsible for it."

The men were placed in the defendants' department of the jail, Debs and Howard being given a cell together and Kelher and Rogers one adjoining.

Alabama Rioters Arrested.

BIRMINGHAM, Ala., July 18.—A mob of strikers broke over the attack by striking miners on the guards and negro workmen at Pratt mines resulting in a bloody battle in which three men are known to have been killed and a number wounded, several fatally. Forty-two striking miners have been jailed on the charge of murder and 50 more will be arrested. A negro strikers' indignation meeting has been held to denounce the lawlessness.

Bills For Feeding Police.

CHICAGO, July 18.—Chief Kremen of the police department has forwarded to General Manager Egan bills for \$25,000 turned in by the proprietors of different restaurants for feeding policemen during the strike trouble. Mr. Egan responded that the bills would be paid, but that future bills of like character would not be honored.

May End the Strike.

SAN FRANCISCO, July 18.—The fruit men have succeeded in bringing strikers and railroad managers together, which may end the strike.

Hocking Valley Strike Settled.

COLUMBUS, O., July 18.—The Hocking Valley strike has been settled through the mediation of Governor McKinley and John McBride.

Signed the Scale.

MILWAUKEE, July 18.—The Illinois Steel company has signed the scale for the Bay View works and 600 men started to work this morning.

Major James Made Reeve.

CINCINNATI, July 18.—Major F. B. James has been appointed receiver of the Wilbur H. Murray Manufacturing company, engaged in the sale of harness, wagon and carriages. Liabilities are estimated at \$40,000; assets, \$10,000.

TROUBLE IN PROSPECT.

A Conflict Feared Between Negroes and Ex-Miners in West Virginia.

MASON CITY, W. Va., July 18.—The prospects of trouble between the imported negroes and the discharged white union men at the Consumers' mines are first class. General Manager Spillman has furnished each negro with a Winchester, but this has not prevented the white men from assaulting them with stones after night, and several have been badly hurt.

Bank Boss White had his skull crushed with a brick and will die. There was also a free fight in which two men were horribly cut with razors.

Pennyroy Says It's the Gold Bug.

SALEM, Or., July 18.—Governor Pennyroy, speaking of the strikes, says: "If the president had listened to the appeal in my Christmas letter and by carrying out the pledges of the platform on which he was elected, had secured the use of both gold and silver standard money, business would have revived and the existing widespread idleness, poverty and discontent, the triple progeny of a gold basis, would have been prevented. Sufficient money and compulsory arbitration, and not federal bayonets and executive usurpation, would be the nuclei of the hour. The federal government should be divorced from corporate monopolies. The real culprit in all this trouble is the gold bug."

Predicts a Revolution in France.

PARIS, July 18.—It is stated that the cabinet will make the press bill a question of confidence in the government. M. Edmond Drumont, the editor of the anti-Semitic organ, the *Libre Parole*, who has fled to Belgium rather than face the new law, predicts that the passage of the press bill will be speedily followed by a revolution.

The Corean Model.

SHANGHAI, July 18.—Nine Chinese merchant steamers have left here for Corea. It is stated that they have gone to withdraw the Chinese troops from that country. On the other hand it is asserted that the Chinese have strengthened their position at Asan. Japan has officially denied that she has accepted mediation.

To Sell a Street Railway.

CHICAGO, O., July 18.—L. T. Keel, acting as attorney for the Massachusetts Loan and Trust company, took an order of sale in the case of the Chillicothe Street Railroad company. The date of the sale has not yet been fixed by the sheriff, who will have the sale of the property under the order.

A Crack Shot Drops Dead.

NORFOLK, Pa., July 18.—Alfred Felton, aged 71 years, a member of the Montgomery Gun club and a man of national reputation among crack shots, dropped dead at Harburt station, near here. He won more prizes than any crack shot in this state.

Accused of Assault.

NORFOLK, O., July 18.—Samuel Freeman of Chicago has been brought to this city and placed in the county jail. He is charged with committing an assault on Miss Louise A. Goodman, with intent to kill. He was placed under \$1,000 bonds.

Suffered Another Temp.

MOBILE, Ala., July 18.—Owing to differences between Superintendent Bailey and the employees, the Cairo division of the Big Four has suffered a second temp. halt, with working again with non-union men.

Unwilling Prisoners Released.

CHICAGO, July 18.—The five men who were prisoners at an altitude of 100 feet on the South Halsted street bridge for nearly 30 hours have been released by the lowering of the structure.

Cholera in the Russian Capital.

ST. PETERSBURG, July 18.—One hundred and ninety-six fresh cases of cholera are reported and 79 more deaths have been recorded.

Big Workmen's Petition.

ALBANY, July 18.—Among the petitions placed before the constitutional convention is one signed by 75,000 workmen for an anti-conspiracy law.

Sentenced to Be Hanged.

JERSEY CITY, July 18.—Bernard Altenberger, who murdered Katie Knip, his sweetheart, at Snake Hill, May 13, has been sentenced to be hanged Sept. 6.

The Weather.

Showers in southern, fair in northern and cooler in southern portions; southwest winds.

PITH OF THE NEWS.

Greenbush, N. J., has been destroyed by forest fire.

Trainmen are fearfully abused by strikers at Ft. Wayne.

The Yale athletic team is being dined in London by notable people.

A plot to murder the new sultan of Morocco has been unraveled.

The alien bill passed a second reading in the English house of commons.

Lillian Russell has been engaged from Chicago, in London by a former manager.

Labor agitators Harley, Harrison and Sperry have been committed for trial at New Orleans.

Melinda Hayes has been arrested in Chicago on a warrant charging her with murdering her son in law for money.

A Chicago paper says that the strike and cheap citizenship rates is causing many strikers to go to Europe for work.

Governor Alford and Mayor Hopkins asked General Miles to take federal troops from Chicago, but he refused.

Ed Holloway, who confessed to wrecking a train near Terre Haute, has repudiated his confession.

An eastbound Northern Pacific train was wrecked near Missoula, Mon., by a dynamite cartridge concealed in the track. Strikers suspected.

Five strike leaders have been arrested at Rawlins, Wyo., for interfering with the Union Pacific.

Boss Weaver H. P. Barnes murdered Superintendent Nicholas and son in a Dallas cotton mill. He had been discharged.

Violence still continues at Enid and Round Pond, Oklahoma, over the Rock Island not stopping trains.

Deputies are protecting the Standard oilworks at Oswego, N. Y., from striking longshoremen.

Judge John Phillips of the United States district court at Kansas City addressed a letter to United States Marshal Joe Shelby demanding that strike missionaries be kept away from working railroads.

THURSDAY, JULY 19, 1894.

THE Washington Star says that Senator David B. Hill will no longer be recognized as a Democrat and will not be permitted to participate in the Democratic Senatorial caucuses. Senator Blackburn has suggested that he should be read out of the party by a formal resolution of the caucuses.

The Crop Prospects.

The Government report on the condition of farm crops on the 1st inst., just issued, is very encouraging. It is an axiom proved true by experience that when the earth yields abundantly the people enjoy prosperity. The average condition of cotton is the best since 1890, and the South will have more of its great staple to sell than ever before. The average of winter wheat is 83.9, compared with 77.7 a year ago. The spring wheat average is the lowest for many years, being only 68.4, but the acreage is usually about one-half that of winter wheat, so that no important shortage in the total of both winter and spring will occur. Corn promises to be the bumper crop of the year. Its average condition is 95, the highest since 1887, and the weather continues most favorable for its growth. The poorest showing made is by oats, 77.7, the lowest average ever reported.

The Free Wool Scandal.

Owing to certain climatic conditions fine wool cannot be produced in these United States.

For the last eight or ten years the above has been the stock argument of "Free Wool" advocates, many of whom don't know a fleece of fine wool from the hair of a bull terrier, and Senator Voorhees seems to be one of the converts to this convenient Free Trade doctrine.

It is not to be supposed that because a man has reached even the exalted position of United States Senator that he must necessarily know everything. It should be his aim, however, when great and important interests are under consideration, to use every means to learn that the arguments used are not in direct opposition to the facts.

It is hard to believe that an American, and especially one who has been selected to represent Americans, should become so strongly partisan as to knowingly endorse a statement so injurious to the people he represents, merely to gain a temporary partisan advantage. We must infer, then, that the endorsement of Senator Voorhees was made ignorantly, but we insist, carefully, at Onondaga, New York State, there is a flock of Merinos that was established in 1802. Previous to the election of 1892 the wool from this flock was never but once sold at less than 20 cents per pound unwashed; for the clips of '93 and '94 the owner, Mr. Davis Cossitt, was offered 10 cents.

The blood being considered desirable, the increase of the flock had always, previous to the election of '93, sold readily and at fairly remunerative prices, but a contract to deliver one hundred ewes and rams at the Syracuse station in November, 1892, at \$10 per head was canceled as soon as the result of the Presidential election of that year was known. The same sheep have since been sold at \$1.56 per head.

The "climatic" conditions of America are favorable to the production of the very best wool that can be grown anywhere. Any country where the snow flies pro-

duces finer furs, finer and softer wools than can be grown in a hot climate. This is a natural law that neither free wool fallacies, wilful ignorance nor partisan malice can abrogate.

The best wools can not only be grown here, but in sufficient quantities, too, to fully supply every demand of manufacturers and consumers, and at prices low enough to satisfy every reasonable requirement.

But the tariff tinkering majority in Congress is pursuing a course that must compel every American wool grower to surrender his only market to foreign competition. Corrupt trusts can be fostered, encouraged and protected, but the interests and rights of American farmers are not to be regarded.

Yet the men at Washington expect Democrats who are engaged in the wool growing business, and other branches of farming as well, to meekly or, to quote Mr. Voorhees, "loyally" fall into line and continue to vote the straight ticket. Well, wait till they get a chance and see.

Choice Extracts.

(Senator Hill's speech July 3.)

I have earnestly appealed to my party friends to eliminate this objectionable feature (the income tax) but my appeals have been in vain.

I have warned them of the dangers to which in my judgement, they were unnecessarily subjecting the Democratic party, but they have chosen to disregard them, as was their privilege.

In my opinion, it imperils the possibility of permanent Democratic success in any Northern State for many years to come.

The true principals of tariff reform have been sacrificed in the effort to insure the retention of an income tax. This the country believes—this the country understands. We promised the people bread and we are giving them a stone. We promised them free raw materials, and we are giving them taxed coal, taxed iron ore, taxed coke, taxed lead ore, and other taxed raw materials.

They expected free sugar, but we are taxing not only that article, but other necessities of life.

The provisions of the bill are not consistent; they violate well established Democratic principles; they are unfair in their discriminations, and their enactment will place the party in a false and untenable position.

If Republican protection was a fraud and a robbery, as we declared in the Chicago platform, is Democratic protection any the less so?

This is not a Democratic bill. I am sure; it is not a distinctly Republican bill; it is not a Populist bill; it is a mixture of all—it is a rag bag production—it is a crazy quilt combination—it is a splendid nothing.

"Sink or swim, live or die, survive or perish." I cannot and will not support this bill in its present shape.

Grantsville.

Mrs. Geo. W. Jackson and son and Miss Minnie Brew, of Beltsville, Pa., are the guests of Mrs. Geo. T. Brew.

Mr. Jacob Brown, of Cumberland, is stopping for the present at Ross Conditon's.

Mrs. J. J. Young, wife of Rev. J. J. Young, of New York City, and family, are at Mr. Henry Wagner's. Mr. Young will join his family here about the first of August.

Prof. D. O. Sullivan and family, of Philadelphia, are at the Rigely farm for the summer.

Farmers report their wheat crops considerably damaged by frost.

A lawn fête was held at the Reformed church on Monday night at which ice cream and lemonade was served by the ladies of the congregation. The grounds were beautifully illuminated with torches and Chinese lanterns and a good time was had by the young people. A crazy quilt, donated by Miss Lilly Kurtz, was danced off and the proceeds given toward buying new carpet for the church.

Mr. S. H. Ryland has put a new coat of paint on his dwelling house, which improves it wonderfully. The work was well done by Messrs. Bryan & Stratton, of Meyersdale, Pa.

Hon. Wm. R. Getty returned on Monday after an absence of ten days on a visit to his son, Dr. O. G. Getty, at Meyersdale, Pa.

OCCASIONAL.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-1f.

THE SIXTH DISTRICT.

Democrats Will Insist on the Re-nomination of Mr. McKaig.

(From the Baltimore Sunday News.)

Sixth district Democrats who have been in town during the week say that the almost unanimous sentiment among their people is in favor of the re-nomination of Gen. W. M. McKaig, notwithstanding his declination in advance of the convention. These gentlemen declare that Mr. McKaig has not lost any of his old time popularity, but that, on the contrary, his record in Congress for the past two terms that he has served has tended to increase his strength, and the fact that Senator Gorman has relieved him of all responsibility in the distribution of the federal patronage has prevented his incurring the odium and hostility which always result from the division of the spoils. The general impression is that Mr. McKaig will accept if he is nominated unanimously, and that the latter will be done when the convention meets in Hagerstown in September.

The opposition to the nomination of Mr. George L. Wellington by the Republicans of the Sixth district seems to have almost died out during the past few days. Indeed, from the start all prospect of defeating Mr. Wellington has appeared futile to anyone at all familiar with Republican politics in the Sixth. The sub-Treasurer has had with him the entire Republican party organization, not only of the district, but the State as well, and, in addition, nearly all the prominent men of the party have been anxious to see him again their nominee. The men who have for years controlled the destinies of their party in that section have been for Wellington in no uncertain way. The opposition to him has been spasmodic, and has now apparently died out. Mr. Wellington will retire from office as Assistant Treasurer on Saturday next after four years' service, and give place to Judge Hammond. His conduct of the sub-Treasury has been such as to commend him to all classes of the business community, and bankers and others have expressed regret at his prospective retirement.

The appointment of Mr. Boyle as postmaster at Westminster and the turning down of Mr. Vanderford, editor of the *Advocate*, is another evidence of the ingratitude of some Maryland politicians, which in this instance is particularly hard to understand. Mr. Vanderford, like his father before him, has always been a regular of the regulars and has invariably supported Senator Gorman in all things and at all times. Two years ago, however, he opposed the nomination of Mr. Talbot for Congress, and now he is earnestly supporting Governor Brown for re-nomination. Hence he is no longer in favor with the powers in control. It has been a great surprise, however, to many people to learn that Collector Shaw, whose friend Mr. Vanderford has always been in all the aspirations of that gentleman for many years endorsed Mr. Boyle. It is understood that Mr. Vanderford was offered in place of the postoffice a menial position around the capitol at Washington, which he spurned, remarked that he was "accustomed to help make United States Senators, not wait on them."

Solidsport.

Mr. Jas. A. Dunham has been and is yet seriously ill.

Mr. E. M. Liston is on the sick list yet.

Mr. and Mrs. A. G. Meese and family, of King, Md., spent Saturday afternoon and Sunday among their many friends in our town.

We noticed many old friends from the several appointments in town Saturday and Sunday attending quarterly meeting.

We were favored with very heavy rain on Saturday afternoon. It did not come too soon for the gardens, potato patches and oats fields were all needing it badly.

The potato tops are dying from some cause or other. Some people tell us it is the dry weather doing it, and some say it is a worm working at the root.

The fourth was quietly celebrated by our people there being very little drunkenness. It was hoped that the cursed stuff would not be used by our young people after Diamond closed his groggery but it was.

We now think it time to kick. Our school house has been used to hold meetings in by one of our secret order without opposition and now the other one is talking of moving their place of meeting to the school house and save paying rent. I don't want to put myself on record as being opposed to secret orders, but I do think that if an order of any kind has to impose on the tax-payers of our county by using school houses which were built by the tax-payers, had better be out of existence. In speaking of this matter one of our leading

citizens said he considered it an imposition upon the tax-payer. He also said that the school house now was unfit to go into and if more of the same kind went into it, it would not be fit for use at all. If these meetings are to be held in our school houses let the school board lay a reasonable tax on all such organizations, or refuse them the use of the school houses altogether which would be much better.

A part of the Belvernon road and gun club spent last week fishing and hunting in this vicinity. They stopped at the hotel Diamond while here.

Our young folks have fallen into two bad habits. They are pitching horse shoes and playing cards. They must have something to pass the time away and perhaps no one else would object to the innocent sport with the horse shoes for they always do that on a week day, but not so with the cards. Sunday is generally selected for card playing. Be careful boys, you might get your foot in it.

We hear no arguments on the question of issuing school bonds for the reason that every one seems to be of the same opinion on that all important subject.

Our voters are making preparations to pay the Wilson bill off this fall, but some think they will have to pay interest on it 'til '96. Wonder if they will.

North Glade.

DEBS BEHIND BARS.

He and Other A. R. U. Leaders Placed In Jail.

CHARGED WITH COURT CONTEMPT.

District Attorney Mitchell Says They Violated the Injunction of Judges Grosceup and Woods.—The Defendants Make No Attempt to Secure Bail.—Debs Talks.

CHICAGO, July 18.—Eugene V. Debs, George W. Howard, L. W. Rogers and Sylvester Keliher, the officers of the A. R. U. have been committed to jail by Judge Seaman in the United States circuit court for alleged violation of the injunction issued by Judges Wood and Grosceup. The four leaders of the strike in reality went to jail in default of bail for the court offered them their liberty until next Monday when they will have a hearing on the charge of contempt. Their bail was fixed at \$3,000 each, but the men refused to give it and the court committed them. Debs and his companions were taken to jail by Marshal Arnold, and before they left the courtroom Judge Seaman instructed the marshal to take them out of jail at any reasonable time or times in order that they may have abundant opportunity to consult their attorneys between this and next Monday.

District Attorney Mitchell had filed an information in court charging the officers of the union with violating the injunction and asked for a writ of attachment for contempt. It was not necessary to issue a writ for Debs, for he was in court when the information was filed. When the injunction was issued by Judges Grosceup and Woods, the usual customary summons was issued and these named in the injunction were directed to appear in court to answer. That was what brought Debs into court with the attorneys who have been retained to defend him and his brother officers. The information was read to the court by District Attorney Mitchell.

When Mr. Mitchell had finished the reading of the information, Attorney George R. Peck, representing the receivers of the Santa Fe system, took the floor and read a petition for writs of attachment against the defendants on behalf of that railroad. The petition asked that the defendants be punished for contempt for violating the order appointing the receivers as well as for violating the general injunction as it applies to the Santa Fe. A number of acts of violence were alleged and interference with trains. The formal proceedings began at 3 o'clock when Attorney Levin, for the defendants, asked that they be released on their personal recognizances.

Judge Seaman finally decided to set the charges for next Monday and fixed bail at \$3,000 each. The four men made no attempt to furnish bail and were committed to jail until Monday. The attorneys for the defendants said they could not secure bail, and Debs did not cooperate that when asked if he would give bail. He said he would not give bail to the amount of 5 cents.

A telegram was produced in court, sent by Debs, on July 2, to North Butte, Mont. It read: "General managers are weakening. If the strike is not settled in 48 hours complete paralysis will follow. Patrons and live are out of sight. Save your money and buy a gun."

While seated in the jail, awaiting the preparation of his cell, Debs said: "We have a few days of rest and quiet at least. I have not had much rest for over a month, and I am badly in need of it."

"No sign will not give bonds. Our bonds are \$3,000 each, but we would not give bonds if they were 5 cents each. We are not posing as martyrs, neither do we ask for sympathy."

"All I have to say about our arrest today is that matters have come to that point in this free country, when it is held to be a crime to advise a man what to do when he seeks your advice. We are guilty by crime unless the simple expression of an opinion is a crime. We are not responsible for this strike. Pittman is responsible for it."

"All I have to say about the debtors' department of the jail, Debs and Howard being given a cell together and Keliher and Rogers one adjoining."

Alabama Rioters Arrested.

BIRMINGHAM, Ala., July 18.—Intense excitement prevails here over the attack by striking miners on the guards and negro workmen at Pratt mines resulting in a bloody battle in which three men are known to have been killed, wounded and a number wounded, several fatally. Forty-two striking miners have been jailed on the charge of murder and 50 more were arrested. A meeting of citizens indignation meeting has been held to denounce the lawlessness.

Bills For Feeding Policemen.

CHICAGO, July 18.—Chief Irwin of the police department has forwarded to "General Manager Egan" bills for \$16,000 turned in by the proprietors of different restaurants for feeding policemen during the strike troubles. Mr. Egan responded that the bills would be paid, but that future bills of like character would not be honored.

May End the Strike.

SAN FRANCISCO, July 18.—The fruit men have succeeded in bringing strikers and railroad managers together, which may end the strike.

Hocking Valley Strike Settled.

COLUMBUS, O., July 18.—The Hocking Valley strike has been settled through the mediation of Governor McKinley and John McBride.

Signed the Scale.

MILWAUKEE, July 18.—The Illinois Steel company has signed the scale for the May View works and 600 men started to work this morning.

Major James Made Receiver.

CINCINNATI, July 18.—Major F. B. James has been appointed receiver of the Wilbur H. Murray Manufacturing company, engaged in the sale of harness, wagons and carriages. Liabilities are estimated at \$40,000, assets, \$10,000.

TROUBLE IN PROSPECT.

A Conflict Feared Between Negroes and Ex-Miners in West Virginia.

MASON CITY, W. Va., July 18.—The prospects of trouble between the imported negroes and the discharged white union men at the Consumers' mines are first class. General Manager Spillman has furnished each negro with a Winchester, but this has not prevented the white men from assaulting them with stones after night, and several have been badly hurt. Bank Ross Whitt had his skull crushed with a brick and will die. There was also a free fight in which two men were horribly cut with razors.

Penoyer Says It's the Gold Bug.

SALEM, Or., July 18.—Governor Penoyer, speaking of the strikes, says: "If the president had listened to the appeal in my Christmas letter and, by carrying out the pledges of the platform on which he was elected, had secured the use of both gold and silver standard money, business would have revived and the existing widespread idleness, poverty and discontent, the triple progeny of a gold basis, would have been prevented. Sufficient money and compulsory arbitration, and not federal bayonets and executive usurpation, would be the needs of the hour. The federal government should be divorced from corporate monopolies. The real culprit in all this trouble is the gold bug."

Predicts a Revolution in France.

PARIS, July 18.—It is stated that the cabinet will make the press bill a question of confidence in the government. M. Edmond Drumont, the editor of the anti-Semitic organ, the *Libre Parole*, who has fled to Belgium rather than face the new law, predicts that the passage of the press bill will be speedily followed by a revolution.

The Korean Middle.

SHANGHAI, July 18.—Nine Chinese merchant steamers have left here for Korea. It is stated that they have gone to withdraw the Chinese troops from that country. On the other hand it is asserted that the Chinese have strengthened their position at Assan. Japan has officially denied that she has accepted mediation.

To Sell a Street Railway.

CHILLICOTHE, O., July 18.—L. T. Neal, acting as attorney for the Massachusetts Loan and Trust company, took an order of sale in the case of the Chillicothe Street Railway company. The date of the sale has not yet been fixed by the sheriff, who will have the sale of the property under the order.

A Crack Shot Drops Dead.

NORFOLK, Va., July 18.—Alfred Felton, aged 77 years, a member of the Montgomery Gun club and a man of national reputation among crack shots, dropped dead at Hartman's station, near here. He won more prizes than any crack shot in this state.

Accused of Assault.

NORWALK, O., July 18.—Samuel Freeman of Chicago has been brought to this city and lodged in the county jail. He is charged with committing an assault on Miss Louisa A. Goodman, with intent to kill. He was placed under \$1,000 bonds.

Suffered Another Tieup.

MOIST CABELL, Ills., July 18.—Owing to differences between Superintendent Bailey and the employees, the Cairo division of the Big Four is suffering another tieup, but is working again with nonunion men.

Unwilling Prisoners Released.

CHICAGO, July 18.—The five men who were prisoners at an altitude of 160 feet on the South Halsted street bridge for nearly 30 hours have been released by the lowering of the structure.

Cholera in the Russian Capital.

ST. PETERSBURG, July 18.—One hundred and ninety-six fresh cases of cholera are reported and 79 more deaths have been recorded.

Big Workmen's Petition.

ALBANY, July 18.—Among the petitions placed before the constitutional convention is one signed by 75,000 workmen for an anti-conspiracy law.

Sentenced to Be Hanged.

JERSEY CITY, July 18.—Bernard Altenberger, who murdered Katie Rupp, his sweetheart, at Snake Hill, May 15, has been sentenced to be hanged Sept. 6.

The Weather.

Showers in southern, fair in northern and cooler in southern portions; southwest winds.

PITH OF THE NEWS.

Greenish, N. J., has been destroyed by forest fires. Trainmen are fearfully abused by strikers at Pt. Wayne.

The Yale athletic team is being denied in London by national police.

A plot to murder the new sultan of Morocco has been unearthed. The alien bill passed a second reading in the English house of commons.

Lillian Russell has been employed from slugging in London by a former manager. Labor agitators Harley, Harrison and Sperry have been committed for trial at New Orleans.

Mellina Hayes has been arrested in Chicago on a warrant charging her with murdering her son in law for money.

A Chicago paper says that the strike and cheap standstill rates is causing many strikers to go to Europe for work.

Governor Altgeld and Mayor Hopkins asked General Miles to lead federal troops from Chicago, but he refused.

Ed Holloway, who confessed to wrecking a train near Terre Haute, has repudiated his confession.

An eastbound Northern Pacific train was wrecked near Missoula, Mont., by a dynamite cartridge concealed in the truck. Strikers suspected.

Five strike leaders have been arrested at Rawlins, Wyo., for interfering with the Union Pacific.

Boss Weaver II, P. Barnes murdered Superintendent Nickles and son in a Dallas cotton mill. He had been discharged. Violence still continues at Fair and Round Pond, Oklahoma, over the Rock Island not stopping trains.

Deputies are protecting the Standard oilworks at Oswego, N. Y., from striking laborers.

Judge John Phillips of the United States district court at Kansas City addressed a letter to United States Marshal Joe Shelby demanding that strike missionaries be kept away from working railroaders.

TEMPERANCE NOTES.

ONLY A DRUNKARD.

The Tragic Story of a Drinker's Ruined Life.

He was not a bad-looking man, the prisoner at the bar. Dissipation had left its mark, but there was something about the face that made you think that back in his young manhood were other and happier days. He was not raised a thief, this man accused of stealing a diamond ring.

The court officials noticed the clear-cut features which might once have been handsome, the matted hair which once curled in beautiful ringlets, and said:

"The fellow is changed; prison life has done him good. When we got him he was the ugliest-looking fellow in jail; but since he has got the prison pallor he looks as if he might be an imitation of a gentleman."

Six months of enforced sobriety and good habits had certainly made a great change. Perhaps the jury noticed it, too. The ring was a valuable one, and yet the sentence was for only a year.

"Prisoner, stand up," said the judge when the foreman handed in the verdict. "Have you anything to say why the sentence of the court should not be pronounced upon you?"

The prisoner slowly arose, and in deliberate tones replied:

"Your honor, I have something to say, and I will not tire you with my speech. I think I have been a worthless, drunken vagabond, your honor, but I am not a thief. The ring which was found in my pocket belonged to my mother, dead and in heaven years ago. It is better so. I wonder, your honor, if the angels know of the shame and disgrace of those they loved on earth?"

"The lady identified the ring, but I believe that she was honestly mistaken; the rings are probably similar. I stand before you to-day, your honor, the wreck of what once was a man; the arch-angel on the street, poor at me and laugh at my rage. I have been homeless and hungry, your honor, and would have starved to death for a glass of something warm to start the cold blood once more coursing through my veins. But I am not a thief."

"I would not harm God's weakest creature. As a boy I gathered the maimed and wounded animals from the street into the kitchen, and fed them as no man ever yet fed and cared for me. I was a happy boy. My father was wealthy and distinguished, my home luxurious. I went to college and graduated with honor, and soon afterward, on the death of my father, I succeeded him in the practice of law. My mother died and the property was mine. I was a rich man. Then came months of dissipation. My companions were like myself, possessed of ample fortune. Many a night when I was cold and hungry I have taken it out beneath the glittering stars, and its sparkles were as if my mother's eyes were looking at me with the brightness which once was theirs. It was only a fancy, your honor, but it was ever before me. I was arrested while drunk one night, and the ring was taken from me; then he lady thought she recognized it as one she had lost. But she is wrong, your honor. The ring is mine! I am a drunkard and a vagabond, but a thief—never."

As he stopped speaking he drew a small paper package from his pocket. Where he got it no one knew; and before his hand could be arrested he had swallowed the contents. The lawyers jumped to their feet and seized the prisoner; a doctor was sent for; but he found medical assistance could be obtained the prisoner was beyond the reach of human skill.

"Mother, I am not a thief—I was only drunk," he muttered.

The door opened, and a woman entered in great excitement.

"Judge, judge, stop the trial! I have found my ring. He didn't steal it. I was mistaken."

"Too late! The soul had taken its appeal to a higher than all human courts.—Frank L. Wells, in *Democrat's Magazine*.

STAINED BY DRINK.

The Wasteful Waste of England's Wealth in Intoxicants.

The great American editor exclaimed: "If I thought there was a stain on the remotest hem of the garment of my country, I would use my utmost labors to wipe it off." But the abuse of drink constitutes no mere stain on the garment of England; it clothes her in garments dyed with blood. Now, if all the most influential voices tell us that it is of supreme and primary importance to combat and suppress this vice—

if, according to the Archbishop of Canterbury, this is "in one way the work of this present day of Christ, for unless it is done very little else can be lastingly done"; if Lord Shaftesbury, with his unrivaled experience, was right in his conviction that "it is impossible, absolutely impossible, to do anything permanently or considerably to relieve poverty until we have got rid of the curse of drink"; if, as Lord Beaconsfield said, in the success of our efforts to control it "is involved the triumph of the social virtues and the character of the great body of the people"; if, according to Lord Chief-Justice Coleridge, we might, but for drink, shut up nine out of every ten jails in England; if we could thus, in the opinions of men like Bright and Cobden, make England such a paradise as at present we hardly dream, then total abstinence are hardly deserving of being held up to scorn and contempt for

howing, by their personal example, how easy it would be for multitudes to find safety and happiness in the small and even pleasurable self-denial which they have adopted. If the £135,000,000 per year, or more, which we annually spend on intoxicating drink, with results so infinitely disastrous alike to the nation and to individuals, were more wisely used and less ruinously wasted, only would drunkenness and the most prolific causes of crime be nearly exterminated, but squalor and pauperism would become hideous phantoms of the past, and most of the frightful evils by which we are now afflicted would cease to drag down our prosperity as with hand of fire. I have not, in this paper, urged even a tithe of the arguments which weigh with us; but I trust that enough has been said to convince every fair and reasonable man that the example of total abstinence might be profitably followed by many who now despise it, that he might tend to an immense amelioration in the happiness of the human race.—Arldeacon Farrar, in *Contemporary Review*.

TEMPERANCE VOWS.

Good Reasons for Joining the Ranks of Non-Drinking Men.

Why do we join the triple pledge? For our own sake.

When Adam's body was formed of clay his Maker breathed upon it and breathed into it not only life, but the consciousness to know and the will to do right, and respect whom it must. For we have read in the story of his temptation by the fair one to whom he was instructed.

For our own sake, because this body of ours should be kept unpolluted from the world—a world that will kick when it can and respect whom it must. For the sake of bodily purity and strength, and for the character that is strengthened with every "no," answered to the tempter who clamors for an irresolute "yes."

For our brother's sake.

"If men mark my brother to offend I will cut no more meat while the world standeth." Who is my brother? The rich and lordly; the poor and lowly; the friend of my young life; the foe who deals out death by the glass fall in my brother in the eyes of him who has prayed, "Father, forgive them; they know not what they do." And for that brother's sake I will do nothing that will cause the weaker one to fall. Though I may think that I, in my strength, may look upon wine when it is red, my brother, through my influence, may go down, down, beneath the flood of intemperance. Every one has some influence for good or for evil. No man liveth to himself alone. And lest my influence be for evil I will taste, touch, handle nothing whereby my brother may offend. No mother shall weep for a son, no wife for a husband, no maid for a lover, brought low through word or deed of mine.

For Jesus' sake.

For the sake of him who died for me I will live; and while I live King Alcohol shall fear me doubly. And as all over this fair land of our girls and boys are pledging themselves to this warfare for life, the tyrant will may tremble. "We shall grow up, and as Legioners grow up, and 'outsiders die off,' 'saloons must go' out of here into nowhere."

First we'll make us an altar, Then wine, then ale, then beer, And then we'll light the larger fires Until our coast is clear.

—Maud Paine, in *Union Signal*.

GENERAL GLEANINGS.

As ordinance in Waldeck, Germany, forbids the granting of a marriage license to a person addicted to the liquor habit.

As a rule departed spirits are not so much feared as those that have just been turned loose from the bonded warehouse.

More than all the warriors of the Matabele, the white man's whisky is dreaded by the native South African.

"Its wounds," he says, "never heal."

There are 20,000 juvenile temperance societies in Great Britain with a total membership of 2,078,000. Nearly 1,000 societies were added last year.

The board of health has ordered the New York confection shops not to sell brandy drops to children. The attention of the board of excise has also been called to the matter. The chemist of the board of health reports that six of the brandy drops sold to children contained as much alcohol as an ordinary drink of whisky.

No wine nor intoxicating liquor was served at the wedding feast of the granddaughter of Vanderbilt, who was married not long since. Every such indulgence of temperance in high social circles is an assurance of the speedy triumph of the social glass from all circles.

Mrs. CAMERON, wife of Secretary Carlisle, is not only known to be opposed to the use of intoxicating beverages, but is notably consistent in her convictions. Her dinners are served without the alcoholic concomitants which custom seems to have fixed so inflexibly upon less independent and enlightened society leaders.

The Woman's Liberal Federation of England in its annual May meeting adopted resolutions asking the government to press forward measures for the control of the liquor traffic, and that local option thereon be transferred from the magistrates to the men and women tax-payers. They also declared their opinion that it should be a penal offense to sell drink to children under sixteen.

GRADUALLY and insidiously has this most cancer of alcoholic poisoning imbedded itself into the nation's life; and its degrading, desolating grasp on society has become such a dominant influence in our political and social economy that it has blighted our moral sense, destroyed our material prosperity, depressed our commercial vitality and brought all business into such a depressed condition that a terrible paralysis now oppresses the whole nation, making other causes of hard times sink into insignificance when compared with the results of this terrible curse.—*Democrat's*

MISCELLANEOUS.

Talent, lying in the understanding, is often inherited; genius, being the action of reason and imagination, rarely or never.—Coleridge.

The urban population of this country, that is, the population living in towns of 1,000 and upwards, constituted in 1890 29.20 per cent. of the whole. In 1790 the percentage of urban population was 3.65.

Did you see Skinduff when you went to Boston? "Yes. He asked me to lunch." "What, Skinduff? What did you have?" "Well, I got a first-rate lunch, and the pleasure of paying for it. Skinduff left his pocket-book at home."—Harpur's *Laughs*.

William McGarranhan, who died in 1857 for \$10,000. A mining company entered upon it and he had been seeking his rights through the courts and congress thirty-four years. His title was affirmed repeatedly and defeated as often on technicalities.

An aluminum penholder weighing nothing in particular has been for some time on the market, but stationers have thus far refused to interest themselves in an aluminum pen. It is an extremely light confederate, and it writes as well as the sharpest steel, but it has sold well at the few places where it is kept.

Twenty-four carat gold is all gold; 22-carat gold has 22 parts of gold, 1 of silver and 1 of copper; 18-carat gold has 18 parts of pure gold and 2 parts each of silver and copper in its composition; 12-carat gold is half gold, the remainder being made of 3 parts of silver and 9 parts of copper.

Quick doctors have a harder time in New York than in any other city in the United States. The man who tries to practice medicine there without a license is in constant danger of detection, arrest and punishment. The members of the County Medical Society and the officers of the department of health are always on the watch for irregular practitioners.

Mr. Preston, the director of the mint, reckons the product at \$15,522,000 for the calendar year 1893. This is an increase of \$16,661,000 upon the figures for 1892, and an increase of \$29,738,000 upon those for 1891. Ten years ago, in 1884, the gold product of the mint had fallen to \$20,000,000. Since then there has been an almost continuous growth in the annual yield, until now it stands \$60,122,000 above the level of 1883.—*Boston Herald*.

In one of the big down town buildings there is a restaurant whose walls are covered entirely of mirrors. The effect is startling to the person who looks into the dining room from the street or hallways. The curtains prevent his seeing anything except the ceiling and upper walls. In those, however, he can see mirrored all that the room contains, of course everything appears inverted, and it is astonishing enough to see a man eating his soup with his head down and his feet in the air. The sight is sufficiently novel to attract crowds at times.

An odd business is that of the men who, in the city, are crying, not "Red, ripe strawberries," but "Green, fresh clovers." That, at any rate, is their cry, for they carry small vagon loads of newly cut clover from Long Island and sell it to teamsters for the horses. When a team cannot be turned out to grass for a few weeks, the clover thus brought to the stable is of great benefit to the beasts, and the trade is one that horse owners encourage. The clover, as it moves along through the arid streets, looks fresh and tender enough for a salad, and the looker-on easily understands that seven-year episode in the life of King Nebuchadnezzar.

A peculiar and distinctive feature runs through the postage stamps of every country; that is, there is a national or specific character of which the different stamps present varieties. Previous to 1870 all the French stamps bore the head of Liberty. The issue of 1870 bore the head of President Napoleon. The year following they bore the likeness of the Emperor Napoleon III. The stamps now used in France were issued in 1873. They have long been subjected to much harsh criticism, and a prize has been offered for the best design for an entire new series. The stamps of England and most of the colonies have as a central ornament a portrait of the queen.

Remedy for Damp Walls.

The process consists in using two wet brushes, one for each wall, and the surface of the walls—now composed of plaster and water, and one of alum and water. The proportions are three-quarters of a pound of soap to one gallon of water, and half a pound of alum to four gallons of water, both substances to be perfectly clean and dry, and the temperature of the air not above 25 degrees Fahrenheit when the compositions are applied. The first, or soap wash, should be laid on when boiling hot with a flat brush, taking care to form a froth on the brickwork. This wash should remain twenty-four hours before a second coat of soap wash is put on. These coats are to be applied alternately until the walls are made impervious to water. The alum and soap thus combined form an insoluble compound, filling the pores of the masonry and perfectly proving the water from entering the wall.—*Architect and Builder*.

What They Called It.

"No, Johnnie, I can hardly afford to give you that dog, for, in addition to our having become attached to him, he has a remarkable instinct."

"Like enough he has, sir. But what is his instinct?"

"Instinct, my boy, is a mysterious something which prompts a beast to some action independent of any consideration on his part."

"That's it, is it? Well, our dog's got that, but we call it fleas."—*Yonker's Gazette*.

LIES IN SOCIAL LIFE.

A Woman Who Says They Are No Absolute Necessity.

Are we hypocrites, all, or are we unselfish souls who prefer to sacrifice the truth and ourselves rather than wound our fellow-beings? Is the problem which Mrs. Lynn Linton discusses in a recent *English* editorial. Is it a lie to say "not at home" and are the women who instruct their maids to say it engaged in the nefarious business of mining immortal souls? Is it a sin or merely a kindness to assure the forgotten stranger that one remembers her well, and to tell the world-be hostess of regrets and previous engagements that have no existence?

Mrs. Linton wisely refrains from answering these questions, and goes on instead to others. She wishes to know if the doctor is justified who does not tell the patient the seriousness and hopelessness of his state. And on that question she reaches a decision, doubtless to the relief of physicians and their charges everywhere.

"The permitted perjury of smooth sayings by medical men," she says, "is also one of the things we must accept and allow for in our life, and we must who desire about all things to know exactly where they stand. To them the truth is pure and simple. It is what they wish, what they deserve and what they are fit for. But these are the exceptions and the tender are the rule."

About the perjury of the sponsors' vows at marriages, and the perjury of the bitter dishonesty of marriage vows, she speaks scathingly. "The world knows how things stand," she says, "but the perjury is among those permitted by the exigencies of a society which fears nothing so much as the truth, which will pay in any way for what it conceals by lies and wraps up in cloudy pretenses."

The conclusion which she finally reaches is one which is worldly-wise enough, at any rate.

"It is all a tangle," is the wise woman's verdict, "and no one can untangle the knotted thread straight and smooth. The absolute truth would be impossible, and will be so long as human nature is as it is. We must have verbal symbols which are to be taken literally and not literally; and we can have single-folded life which is the dream of all the naturally honest and sincere. We have to hedge, and deal as faithfully as may be with our higher aspirations—checked as they are at every turn by the baser requirements of practical life. In deed and in truth it is all a tangle! But we must not have any of the smaller sins of the corner of that tract of permitted perjuries we cultivate the better for us here and the more hopeful for the hereafter."—*N. Y. World*.

WEEK BY WEEK.

A Good Substitute for the Annual Physical of House Cleaning.

It is very much better for the furniture and all your rooms to be treated systematically all the year than to have one annual upheaving. Except in the matter of carpet cleaning and repapering it is quite possible to do away with the spring or fall cleaning by simply doing one room thoroughly every week. If your house has six rooms, each room will get a good cleaning every six weeks; if there are ten, and you are restricted in help, they will get overhauled only once in five times a year, but in either case there will be no domestic revolution, no complete upheaval of your lares and penates.

It is very much better for the furniture, etc., to be treated systematically all the year than to have one annual upheaving. Except in the matter of carpet cleaning and repapering it is quite possible to do away with the spring or fall cleaning by simply doing one room thoroughly every week. If your house has six rooms, each room will get a good cleaning every six weeks; if there are ten, and you are restricted in help, they will get overhauled only once in five times a year, but in either case there will be no domestic revolution, no complete upheaval of your lares and penates.

A little done every week keeps the furniture in much better condition than a complete overhaul once a year. It is formed with such a variety of preparations that the difficulty lies in the choosing. One of the most satisfactory polishes is also the simplest—namely, a mixture of linseed oil and vinegar, kept in a well-corked bottle and shaken before use. The furniture should be treated first; then the mixture can be applied over a small surface, polishing quickly with old silk rags. This somewhat primitive but efficacious compound has a double advantage; it does not form a cake over the wood, even with long use (which causes the furniture to crack), and the combined oil and vinegar remove many stains and grease marks that ordinary polishes do not touch. Mirrors and looking glasses should be cleaned as a regular thing every time a stain is done; nothing looks so bad as a stained surface to a glass of any description, and a little spirits of wine judiciously applied with a soft rag will remove the most obstinate marks; picture frames and books, too, should be well dusted, and cupboard shelves dusted and relined with clean paper.—*N. Y. Recorder*.

Bilker Not Idle.

"I hear Bilker lost his job; wonder if he's struck anything since?"

"Er—yes, all of his friends and two-thirds of his acquaintances."—*Buffalo Courier*.

No Place for Work.

Dashleigh—So George is working again?

Renleigh—O, dear, no. He has a place in the street-cleaning department.—*Judge*.

We can not conquer fate and necessity, yet we can yield to them in such a manner as to be greater than if we could.—*Landor*.

SCIENCE AND INDUSTRY.

Experiments have been made by Prof. Ponton to prove that the colors of certain caterpillars are largely due to modified plant pigments, derived from their food plant. He has now proved that the colors of some caterpillars are made up of modified chlorophyll derived from the food plant.

The Tyrians were the most expert dyers of ancient times. The fabrics dyed with the famous Tyrian purple did not assume their proper color until after two days' exposure to light and air. During this time they passed through a gradation of shades of yellow, green, blue, violet and red, which the dyers understood how to arrest and fix at any moment.—*Baltimore Herald*.

Speaking recently at a meeting in Newcastle, Sir Robert Ball hinted at the approach of a time when posterity might have to construe machinery before by the direct action of the sun's rays. He showed on the screen a machine which, by means of a reflector, heated the water in a boiler large enough to generate the steam required to move a small printing press.—*London Inventions*.

Dr. Leche, the eminent English authority on foods, by a series of careful examinations found that when potatoes were cooked without removing the skins the loss of nutritive material was about 3 per cent., against 15 per cent. when the skins were removed before boiling—a very wasteful process. Hence baked potatoes are not only more palatable, but also evidently more nutritious than boiled potatoes in either case.

More than thirty-seven million acres of land are involved by the rabbit pest in Victoria, Australia. During the last eleven years the colonial government has expended nearly two million dollars in efforts to abate the pest, besides the expenditures of individuals. The rabbits are trapped for their skins, which are sold for fifty thousand over one hundred and fifty thousand in one town. The authorities of some districts have decided to employ phosphorized wheat for the destruction of the rabbits.

Certain beetles have long been known to eject or give out a poisonous fluid from joints of their bodies, or from their legs, or from eversible glands. M. Cuenot has recently studied the cases of ejection of blood from these beetles. The fluid, however, is not red, as the blood of insects is either colorless or slightly yellowish. Lady beetles, for instance, eject a greenish-yellow fluid which has been purchased monthly in one town. The authorities of some districts have decided to employ phosphorized wheat for the destruction of the rabbits.

Farming in South Africa has its drawbacks. A correspondent of the *Agricultural Journal*, of Cape Town, relates some of them. The locusts came late in autumn and devastated the pastures to such an extent that the writers' 300 half-starved ewes raised only 200 lambs. Their foot and mouth disease broke out among his cattle, and 15 out of 65 succumbed, being unable in their reduced condition to recover from the debilitating effects of the disease. At the time of writing farmers were trying to harvest their grain, but heavy rains interfered; the grubs had taken three-fourths of the "maize" (maize or corn crop, and a new generation of locusts had hatched out, requiring ceaseless effort to check their advance before their wings grew.

The locusts' legs perform a function not known to any other animal, and that is an escape pipe or pipes for the discharge of waste water or sweat not used in the economy of the body. These escape pipes are situated upon the inside of the legs, above and below the knee in the forelegs, and above the hunched joints in the hind legs, but in the latter they are very small and function light; upon the inside of the foreleg they are, in the healthy hog, always active, so that moisture is always there from about and below these orifices or ducts in the healthy leg. The holes in the leg and breathing in the leg are his principal and only means of ejecting an excess of heat above normal, and when very warm the hog will open the mouth and breathe through that channel as well as the nostrils.

Risks of Horse Racing.

Having one's horse win a race is all very fine, but few are the owners of only 200 lambs. Their foot and mouth disease broke out among his cattle, and 15 out of 65 succumbed, being unable in their reduced condition to recover from the debilitating effects of the disease. At the time of writing farmers were trying to harvest their grain, but heavy rains interfered; the grubs had taken three-fourths of the "maize" (maize or corn crop, and a new generation of locusts had hatched out, requiring ceaseless effort to check their advance before their wings grew.

The locusts' legs perform a function not known to any other animal, and that is an escape pipe or pipes for the discharge of waste water or sweat not used in the economy of the body. These escape pipes are situated upon the inside of the legs, above and below the knee in the forelegs, and above the hunched joints in the hind legs, but in the latter they are very small and function light; upon the inside of the foreleg they are, in the healthy hog, always active, so that moisture is always there from about and below these orifices or ducts in the healthy leg. The holes in the leg and breathing in the leg are his principal and only means of ejecting an excess of heat above normal, and when very warm the hog will open the mouth and breathe through that channel as well as the nostrils.

Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, JULY 26, 1894.

It doesn't pay to raise wool nowadays, but there are a good many farmers who propose to raise a little Democratic wool at the polls next fall.

WORKINGMEN are not to be blamed for wanting Republican wages, but it is difficult to see how they are going to get them in Democratic times.

While the McKinley bill was in preparation and passage there were no Commonwealth armies, no ill-fares, no uncertainty, no depression, no reduction of wages, and no hard times.

The Longearing Review came to us last week in a reduced size, but overflowing with news and bedecked with a new dress of type. The Review, under its new management is pulling right ahead of its contemporaries in Allegany county. Long may it live.

It is paying dear for free wool when, just to get that article and nothing else on the free list, the Democracy has forced an agitation that has cost the country, one way and another since it began, more than the war for the Union did. But when the Democratic party starts in to plunder, it doesn't seem to care how much destruction it causes if only its politicians get the offices.

"I Am the State."

Mr. Cleveland a few months ago complained that he "had Congress on his hands."

Now he wants to usurp the functions of House and Senate, and dictates the kind of legislation they shall enact.

His letter is a most amazing piece of effrontery, and is an impudent invasion of the legislative department by the executive which in more settled times would challenge the public credulity.

"Upon what merit doth this our Caesar feed that he has grown so great?"

The only entirely happy Democrat in Washington is David B. Hill. The day of his vindication has come. He hates Cleveland, Cleveland despises him. He voted against the Senate tariff bill and Cleveland, denouncing it as "party perjury and party dishonor," urged the House to stand against that measure to the last. Here Cleveland and Hill stand together. It is a remarkable junction. The opposition of each is based on different grounds, but both are doing their best to defeat the Senate measure. Hill seized as a hungry dog does a bone the opportunity to agree with the President while he drew and quartered him for the time and manner of putting on the screws. Hill's left-handed defense of Cleveland will take high rank as political deviltry. The manner of the defense, the significant tones, the flash of the eye, the "ghastly gleam" of the speaker cannot be caught by the Congressional Record, but enough has gone into that publication to show that David B. Hill was filled with a fiendish delight to which he gave free rein. There was no attempt to conceal the malicious satisfaction with which he greeted the monumental blunder of the party chief whom he has been striving to unhorse. When Hill began on the tariff bill he thought he could command the votes to defeat it. The other side attacked

his forces in detail. They caught his own colleague with collars and cuffs. They caught the Louisiana senators with sugar. They caught the coal Senators with coal, the iron senators with iron. So it went until Hill was left alone in the senate. To-day Grover Cleveland stands with him and justifies his opposition. It has been many a day since there was anything so remarkable on the personal side of politics.

Communicated.

To the Editor of The Republican.

Will you be kind enough to give publicity through your columns to a few remarks in regard to the school bond question?

It is known to all that the Legislature at its last session passed an act authorizing the County Commissioners to issue bonds to the extent of \$25,000 to be mainly expended in the building of a costly school house in the town of Oakland. This act is not to go into effect until approved by a majority of the voters of the county at the fall election, and if voted down, as it is likely to be and ought to be, of course no bonds can be issued.

But I see from your paper the school commissioners in advance of the approval or disapproval of the bond issue, have already contracted for the erection of a \$12,200 school house in Oakland. To me this looks premature and ill advised. Of course the contract to pay is certain and the means to pay with are very uncertain. It is plain when the building is up the board will be in debt for it. The county commissioners have appropriated \$10,000 for the running of the public schools for the next two terms, or five months. Is it possible, in case of the failure of the bond issue, the school board will misapply this money for paying for one ornamental school house? Surely there is no legal right to do so. Would not the law and the court prevent such a wrong if applied to? The fact that a school house has been built or even commenced without authority of law is no reason why the bond question should be voted for, but a good reason why it should be voted down.

Twelve thousand dollars would build thirty plain, comfortable school houses, and \$25,000 twice as many. There are very many such needed throughout the county, yet there is no pressing demand for them, neither is there for the Oakland building, which is only of local interest. This district, No. 3, will vote against the bonds to the man.

Tax Payer.

Grantsville, July 16, 1894.

What We Think of It.

To the Editor of The Republican.

In last week's REPUBLICAN we see the startling announcement that the proposed new school building at Oakland is to be erected at a cost of \$12,200. Now there are a good many people through the county who are like myself, ignorant as to the source from whence this money is to come to erect this building. We do not know of any rich person dying and leaving a legacy for this purpose, neither do we know that the people of Oakland mainly furnish the money for the erection of this building. If they do, all right and good. We are always glad to give our support to a good cause, and we know that the citizens of Oakland are badly in need of a new school building. But if this money is to be expended out of the public school fund for the building of one house, when there are so many school houses throughout the county that are unfit to teach in, then we say it is an outrage and one that the people everywhere should fight against. Our own school house at Glade Valley is scarcely a decent pig pen and certainly unfit for school purposes. The roof leaks badly, and there are a great many school houses throughout the county in a like condition. Now as we said before, if this money comes from some other quarter besides the county school fund, then we have nothing to say. We believe it would be a good plan for some one who knows to explain this matter through THE REPUBLICAN. This would give us a little light on the subject.

Mr. Wellington's Adieu.

Monday Mr. George L. Wellington retired as United States Sub-Treasurer at Baltimore. Speaking of his term in office the Baltimore News makes Mr. Wellington say: "I have endeavored to fulfill the duties of this office to the best of my ability. During the term of four years over \$300,000,000 has been handled and not a dollar has been missing. My relations with the officials have been pleasant and I retire from office with good feeling toward all the clerks and extend my best wishes to Judge Hammond."

TWO TEMPERANCE WOMEN

Something of the Lives of 38 Men Now at the Bar

Below we give an interesting sketch of the lives of the prominent ladies connected with the W. C. T. U. convention being held at the Park.

CAROLINE B. BUELL was born in Marlboro, Md., 21, 1818, the daughter of a minister and a lineal descendant of Mayflower stock on her father's side. She might be said to have opinions and convictions to this an "investigator," keen perceptions, and judgment, and you have a mental make-up of the subject of her sketch. She was married to Frederick Buell, a young farmer, in 1862. He died at the age of the war.

Putting aside grief and red hopes and plans, she gave to the work of comforting those hearts were aching and aching by the boy who was the subject of a short and sad life. Brought up to a religious and associated with her brother, the publication of a temperance paper she was abundantly qualified for the position of corresponding secretary of the State W. C. T. U. Connecticut, which she has held. She continued in this eleven years. So devoted a secretary was hers that after she lectured to the office of National Upgrading Secretary they persist in retaining her name upon the list of State officials. In 1875 was chosen chairman of the singing Committee of Our Union, and of the National Union, 1878 she was elected Assistant Secretary, and in 1880 Upgrading Secretary of National Union.

During this time she had the plan of the Loyal Legion, first adopted by Connecticut and afterward by National Union; also the system for reports of local State Unions.

She gave name to the Methodist, first christened one at Mountain Lake Park, she has conducted ever since.

Always tolerant she has the same right to do her own thing when she accords to others, and adopted that she regarded the safety of the National Union quietly and finally of her grand against the National Women's Temperance Association and the W. C. T. U., both incorporated and neither the control of the National Union. This brought upon her pleasure of the managers of these incorporated interests with a relentless zeal they set to remove Mrs. Buell from the national convention. At the national convention of 1893 her official head was deposed. The price had been paid in sacrifice was made in open city, and thoughtful white ribbon over the nation who loved national president, who are to the cause and love the National Union was organized to, vigorously to see the end. On the chosen leader, her hand on the throttle. If she was to the temple or the W. A. demand the sacrifice she must go, whether to the National office.

ESTHER was reared in the reform. In infancy she drew her nurture from a Quakeress of great extraction. Her father, Quaker and abolitionist, lived the Philanthropist in the year 1836, for which he and his office disapproved, only to be at once and the crusade against slavery. In early girlhood, Pugh recognized God's power on her and "crowned him with all" with her life. Twenty years by her mother, toward finished her education at Cincinnati High School, devoted herself to philanthropic religious work. "I could not be less than I am," she says, "with my hereditary environment. I deserve, no credit." She went of the crusaders and after the death of the W. C. T. U. she started a state paper for the Union as a medium for temperance workers, but a few months of each other she changed of plans that a paper. After this she acted various positions as publisher of Our Union, corresponding secretary of the W. C. T. U. of Ohio and State organizer. In 1879 she was elected treasurer of the National Union and served for nine years without compensation. In that period she held other trusts in her own State, and when the National Union time and service she accumulated.

any, and not until then.

She found the treasury empty and unpaid debts confronted her; but it was not long until these were cancelled and means evolved for replenishing and furnishing the sinews of war.

Brave and frank, she was quick to speak her disapproval, and as the National Union branched out in its various departments and stood sponsor for enterprises that threatened the organization with dangers seen and unseen Esther Pugh stood up to be counted as opposing them. Cliques and rings had sprung into existence with the growth of the National Union and these resented her opposition and interference with their plans. Her name went down with Mrs. Caroline B. Buell's on the list that was to be beheaded at the national convention, but when the tellers announced the re-election of Miss Pugh thus declaring the confidence of the women in her integrity and ability, it was evident that something must be done to secure the delivery of the "sins." Another ballot was demanded but she forestalled further action by announcing her intention not to serve another year.

Miss Pugh, though no longer standing guard over the treasury, holds herself glad and willing to serve God and humanity as a high private in the white ribbon ranks.

Last Sabbath at Mt. Lake Park.

After the fearfully hot weather on Thursday and Friday the rain came and the change in the atmosphere was most marked by Sabbath. The attendance at the auditorium was quite small as compared with the previous Sabbath, but it is understood that the sermon was preached in this place for many months if not that has ever been heard in that building. Many regretted that the immense congregation which was gathered here a week before, could not have heard the speaker last Sabbath. The preacher on Sabbath, July 22, was the Rev. Dr. J. J. Muir, the pastor of E Street Baptist church in Washington, D. C. His father was a Scotchman and his mother an Englishwoman. He was born in Ireland but has lived nearly all his life in America. He is a fine scholar, a man of deep biblical research, an impressive speaker and a Christian gentleman. He came to the Park by special invitation of his neighbor and friend, the Rev. Mr. Edwin, of Washington, D. C. He preached from Phil. 1:23 and 24. It was a most helpful sermon to all who heard it, and entered fully into the spirit of the speaker and audience. Mr. and Mrs. Muir were much pleased with their visit to the Park and to Monte Vista also, where they were so elegantly entertained by Dr. King and his hospitable family. Mr. and Mrs. Muir remained on the mountain until Tuesday noon.

A small congregation greeted the Rev. Dr. E. W. Ryan, of Michigan, at the auditorium at night. The sermon was a good one and should have been heard by a larger congregation. A stranger present exclaimed: "The present Sabbath was so small both morning and evening. The building is well adapted to such services, and with two such good sermons as were heard last Sabbath, the auditorium should have been filled at both services."

On the Mountain Top.

From the (Underwriting State Journal).

MOUNTAIN LAKE, Md., July 19. —The name of mountains, to many persons, suggests many horrible things—a barren waste, play peaks, rocky precipices, vicious animals, reptiles and dreary desolation—all these things may apply to some mountains, and to some countries where railroads and other modern conveniences are unknown; but not so to our West Virginia, Virginia, Maryland and Pennsylvania mountains, with the many lines of railroad passing over them, including the N. & W., the C. & O., the Pennsylvania, W. Va. Central, W. Va. & P., and especially the B. & O. From Washington it winds its way up the historic Potomac; at Harper's Ferry a branch passes up the beautiful Shenandoah, at Cumberland another branch diverges from the main line and winds its way through mountain gorge and over ascending heights and down to Pittsburgh; but the main line and one of the first to be built on the continent, and in all the world, got a new lease of life and gathered inspiration at Cumberland, Md., built its way up the picturesque Potomac, ascending the mountain from Piedmont and at the top of the seventeen mile grade reached Altamont at an elevation of nearly 2,000 feet. Then stretching away for twenty miles to the west is a great basin through which the Youghiogheeny river flows, first from the southwest, then east and finally north. Through this basin the B. & O. R. R. Co., built its road more than forty years ago, and

on this high plateau we find to-day

Altamont at the east, Deer Park, Mountain Lake Park, Loch Lynn Heights, Oakland, Corinth and Terra Alta, some of the most beautiful landscapes and mountain scenery to be found anywhere in this part of Maryland and West Virginia. Follow the line of the picturesque B. & O. if you would feast your eyes and drink in pure air. Here are beautiful gardens, splendid grass farms and meadows, sparkling springs and flowing streams. Look on every side, as far as the eye can see and encircled by the blue horizon, is a great sea of unsurpassed and beautiful green of mountain oak and other natural adornments that must be seen to be fully enjoyed. Nature has done well its part and the building of the B. & O. railroad has made it possible that man should add his work in splendid fields, beautiful landscapes, attractive cottages, magnificent hotels and such other attractions as now adorn this mountain top for twenty miles away from Altamont on the east to Terra Alta on the west. Splendidly equipped trains pass over this road many times each day, making close connections with Washington, Baltimore, Philadelphia, New York and Boston on the east and Parkersburg, Cincinnati, Chicago, St. Louis and other places in the west. A coming place of unsurpassed beauty and convenience is Loch Lynn Heights—opposite Mountain Lake Park. Arrangements are now being made for a large sale of lots at this place, August 9 and 10, 1894. See maps and other printed matter to be issued soon.

Monday night, July 16, was so hot in Parkersburg that the writer could not sleep, perspiration flowed all the night and at dawn he was as tired as at evening. Tuesday night he slept in a cottage near Loch Lynn Heights under two new heavy blankets, a sheet and a heavy spread and was only comfortably warm. Here the tired can rest, the weary be refreshed, the oppressive heat escaped and life enjoyed.

The extremely hot weather has sent large numbers of people from the low valleys and the cities to the mountains. Thousands of people are now along the line of the B. & O. railroad from Terra Alta to Altamont, and as many more are expected by the 9th of August. The Parkersburg contingent is not so large as in some other years, but a good number of our people are here and others will be in a few days.

Old Glory.

The United States flag was 117 years old June 14. If any national colors are entitled to the designation "Old Glory," those adopted by Uncle Sam 117 years ago certainly are. The flag of the United States is older than the majority of the flags of the European nations living to-day. The flag of Great Britain was adopted in 1801, or twenty-four years after that of the United States. The flag of Spain was adopted in 1785, while the tri-color of France, also the red, white and blue, took form in 1791. The flag of Portugal was adopted in 1830, that of Italy in 1828, and that of the German empire in 1871, so that the starry banner of the United States may well be called the "Old" flag. The Stars and Stripes also have been through more battles and have waved over more victories, both on the sea and the land, than any other flag flying in any part of the world to-day. Its nearest competitor is the flag of Great Britain, but since 1800 British victories on land and sea have been inconsiderable as compared with those of the United States. More lives have been given up and more limbs sacrificed in defense of the Stars and Stripes than for any European flag. Over a million men have died in order that that pretty hunting might remain unsullied, and an army of 25,000 untrained men stands ready to-day to see that no dishonor befalls Old Glory.

The flag of the United States undoubtedly was suggested by the national flag of Netherlands, which at that time consists of three horizontal stripes symbolic of the rise of the Dutch Republic. Netherlands was often referred to by the founders of the United States as a model for our present form of government, and it was frequently quoted in the debates in the Constitutional Convention. On June 14, 1777, the American Congress resolved that the flag of the thirteen United States should be thirteen stripes, alternate red and white, and that the union be a blue field with thirteen white stars arranged in a circle indicating "a new constellation" among the nations of the earth, the idea of the flag being that each star and each stripe should represent one of the original thirteen States. In 1794, on the admission of Kentucky and Vermont into the Union, the flag was made with fifteen stars and fifteen stripes, but on July 4, 1818, it was changed so that there should be the original thirteen stripes, while a

new star was to be added for each

State.

The Stars and Stripes, in the course of 117 years, has been carried into all quarters of the globe and into all navigable corners of the ocean. It has floated from some of the highest mountain peaks in the world, and has been carried down into the lowest caves and coal pits. It waves to-day over more nationalities than any other flag on earth.

Then let the eagle scream and the small boy shout! Hurrah for the Stars and Stripes! —N. Y. Sun.

A Stone Ditch.

Never throw the stones in loose. It is a waste of time, as the ditch soon becomes clogged and the water comes to the surface. Lay a good throat and do the work yourself. This is the only way to secure permanent results. Why is it we are so apt to distrust our own judgment on some unusual work and willing to pay big wages to some tramp who comes along looking for a job, claiming to be an expert, but who may have never seen the work done? He has the brass to try and nothing to lose. We have intelligence and self interest enough to make our work superior, without experience, to him. Thus reasoned a Rural New Yorker correspondent as he stood by his first ditch 17 years ago. He writes:

It works well yet and will for 50 years to come. Put the bottom stones below the first line so that they will not heave. There are three ways of placing them according to the width of the ditch and their own size. The mode I prefer is wide ditches is to have stones on each side and a cover laid on. The center of the ditch is a little the highest and the side stones keep crowding to the outside. The cover of flat stones should reach well across so as not to work on and drop down. Cover all cracks with other flat stones and put in as many more as you can spare or have time to draw until the ditch is nearly full. In clay land too much dirt on top of the stones will get packed down and hold the surface water.

In a narrow ditch dig one side a trifle lower than the other and put in good sized jam stones. Put flat stones against the opposite side and let them lie on top of the jam stones. This makes a V shaped throat. Put more stones on top of the cover and wedge this down against the bank to hold it tightly. Fill in with stones to level up. A third way is to take two flat stones and set them against the opposite sides of the bank, bring the tops together in the center, then fill in behind them to hold them firmly. I do not like this way, as if one slips both may fall in and close the throat.

A stone throat if firmly laid and covered with stones will not need that anything should be put on it before covering it with the earth, and a horse can be driven on it without injury while plowing in the covering. In this country we often dig ditches partially at least, to provide a place to get rid of stones. If there are only a few of them on top of the cover, scattered in some straw, which will keep the dirt from rattling through until it is well settled. The lifetime of a ditch depends on the care taken to keep the mouth open. If the fine earth cannot run out the throat soon fills.

Land for Sale.

The undersigned offers for sale a part of "Swan Meadows," lying about 45 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINNELL, Oakland, Md.

Dentistry.

Dr. D. O. McKinley, of Elk Lick, Pa., will visit Friendsville, Md., July 26th and 27th. Moves, July 30th; Mellenry, July 31st; Thayerville, August 1st; at W. H. Spiker's, on Deer Park road. August 2nd, prepared to do all kinds of dental work. Teeth extracted without pain.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conducting titles" before paying for Military Lots. Charges reasonable. Office in Colander Cottage, opposite the bank, Oakland, Md. 41-4f.

IF YOUR BACK ACHES, Or you are all worn out, really good for nothing. It is general debility. IT BROWN'S IRON BITTERS. It will cure you, cleanse your liver, and give a good appetite.

When baby was sick, we gave her Castoria.

When she was a child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had children, she gave them Castoria.

NUMBER 21.

MILLIE'S GREEN PEAS.

The Part They Played in the Scheme of Human Events.

Millie Mitchell was only six years old. Her mother was very poor, and sowed for her living in two small rooms of a dingy New York house not far from East Broadway. One bright day in summer, a day that made even the shabby and dirty street seem pleasant because of the breeze and sunshine that were blended there, Millie's mother said to the child:

"You've been very good for three whole days, and I promised you that if you didn't worry and fret me the least bit for that length of time you should have something nice to eat on the fourth day."

Millie jumped for joy. Her blue eyes glittered, and the red lips curled away from her tiny white teeth in a glorious little smile. Even in her coarse gown she was very pretty, and if she had been arrayed like some of the children who then were romping in the up-town parks, watched by their careful nurses, with her yellow dress of hair neatly combed and daintily ribboned, you might even have paused and said of her: "How beautiful a child!"

"I guess what it is," she cried. "It's green peas! It's green peas!"

"Yes," said her mother, "and I shelled them on the sly, and they'll soon be cooked. And there'll be potatoes, too, with some meat left over from yesterday. The meat will be cold, for I haven't got time with my sewing, to heat it. But two hot vegetable soups, Millie, think of that! And now you can run out into the street for a little while, and when you come in I'll have everything ready. But mind you don't stay long, and remember not to pass the corner."

To pass the corner meant to invade the great bustle and breadth of the thoroughfare near by. Millie would not have dared to do that, even if she had desired. She simply trotted along the pavements of her particular block, just as she had done countless times before.

The merry wind blew back her silken hair below the ragged brim of her hat, with its one old crumpled velvet rose nodding on the crown.

She was going to have green peas for dinner, and she was magnificently happy.

Certain residents of the street knew her, and smiled to her from their doorways. To some of these, as she tripped along, she would say, with a mellow little laugh: "We're going to have green peas for dinner!"

Some answered her laugh rather coldly. Others answered it in a kinder way. Still others gave her a smile of pity. They were all poor people, but there were grades in their poverty, self-importance and pride.

Soon she reached a grimy, ramshackle tavern in the middle of the block. From its door a big man with a puffed, purplish face had just emerged. He had a thin, frail boy, with a pale, sunken cheeks. The man had gripped the boy's sleeve, and his frown was full of threat.

"Go home," he growled, "and tell your mother that if she sends you here again when I'm taking a sociable glass, I'll send you back to her with the life belt half out of you, so I will!"

The boy gave a faint cry of pain. His father's hand had clutched his arm, and he felt the slight flesh there was on his fragile arm.

Millie came to a standstill, and stared innocently into the man's face. "I'm going to have green peas for dinner," she said. "I've been good for three whole days, and I'm going to have 'em!"

Here Millie put her head on one side and critically surveyed the wan, sunken-cheeked boy. "I guess he'd like some green peas for his dinner. I guess he ain't going to have any. I wish he was."

As she danced away, with a faint hum of song on her lips and the breeze blowing her bright hair, the eyes of the bloated man followed her. His hand dropped from the flimsy sleeve of the boy and presently it slipped into one of his own pockets.

"You said there wasn't anything home to eat? He drew out half a dollar and gave it to the boy. 'That's all I've got left, but I'll buy something. I won't take no more drink to-day. I guess I can work off this spree before to-morrow mornin'. Go home an' tell yer mother I said that. Hurry, now, an' I'll trade on after ye.'"

The pale boy, with his coin close grasped in one weak hand, hastened down the street. He knew too well his father's good resolves—how soon they melted in air. But at least the awful want from which he and his little sister and his sick mother were all three suffering would be appeased for a short time.

Fifty cents meant so much! Ten cents would buy a good deal of meat. And then there would be twenty cents left. And that for to-morrow might save off actual starvation at least another day.

As he thought this thought the pale boy, speeding to his miserable home a few streets away, blessed that same little girl from the lowest depths of his grateful and astonished heart.

Meanwhile Millie went buoyantly on, with the old crumpled rose on her hat bobbing up and down in the summer wind.

Soon she met two girls who seemed to be quarrelling. One was larger than the other and appeared to be very old indeed. She was possibly sixteen years old, while her companion could not have been more than fourteen.

"I won't go back home, Kate," said the younger girl, who was pretty, with a pale pink as a seashell and great liquid eyes, full of dark, starry shadow.

"Of course I love mother, but she's always got the young ones to mind. No, I'll earn my own living the best way I can."

"Susie!" cried the other girl, with a horrified accent.

"Yes, I will! Oh, you go along. Kate, I know what I'm talking about. Ain't I got a first-class chance?"

"No, it's wrong!"

"Wrong? Oh! go along with your notions. Won't the Bovey Paradise give me eight dollars a week to dance on the Moonlight Fairies? I'm to be one of the new pantomimes! Why, Kate, just think! My dress'll be all white lace and silver, and a pair of silver wings and spangled slippers and a wand and a big half-moon on the top of my head!"

"Don't go, Susie!" urged Kate. "I'll bring you into bad company."

"Bad company? Any worse than my father—drunk most always?"

"Your mother needs you at home," Kate persevered. "It would break her heart for you to run away and leave her."

"But she won't let me join the show if I keep on living at home," said Susie, with an obstinate pout.

"She's right; she's right, Susie. Oh! say, do give up all this! What are your little brothers and sisters going to do without you? Why, they can't never go out at all if you go. No more for them—oh! say, Susie—"

Just then Millie paused and looked, with her infantile candor, full into the faces of the two girls.

"I'm going to have green peas for dinner to-day, I am. I've been good, and my mother's cooking the green peas now."

Instantly the attention of the two was caught by the child's confidence and beauty.

"Ain't she a funny little thing?" said Kate, looking aside at the child.

"I ain't always good," said Millie, gravely.

"Oh, I guess you ain't ever very bad, are you?" said Susie, looking down, her point lost in amusement, so facile was her disposition.

Millie pondered this seriously for three seconds.

"I fret and worry my mother," she replied, conscientiously, and looking down with shame and wonder whether her elders would speak to her after such a confession. Both girls laughed with delight in the child's pretty simplicity.

"It's very wrong for a little girl to fret her mother—that's what my mother says," said Millie, stoutly persisting.

"And what if you was a big girl?" said Kate, not looking at Susie.

"No matter if I was as big—as big—" Millie paused and her eyes roved for a companion—"as big as the engine house," she ended, surprised by her own imagination of attaining such size.

"You dear little girl! Whose girl are you?" said Susie, trying to elude and kiss the child.

"Well, I'm the one of praise all Millie's fame rushing back to her."

"But now I'm good—and I'm going to have green peas for dinner!" cried Millie, skipping with delight past Susie's reach, and then strutting importantly away.

As the girls watched her their faces were sweet with smiles of delight and humor—smiles that gave them again for a few moments the looks of their less troubled childhood. When Kate, turning, caught this look on Susie's face, a deeper satisfaction came into her own.

"Well, let's go home, then," said Susie, as Millie disappeared. "Wasn't she a dear little thing?"

Kate was too wise to risk any reference to Susie's former mood, for a word of argument or moralizing might have thrown her back on her obstinacy by renewing her sense of the monotony of home and the attractions of the Bovey Paradise. All that Kate said was:

"Let us have green peas for dinner, Susie. If there ain't any in the house I'll run round to Muller's for some."

"Yes, I'm good, too, now, Kate," said Susie, with a look of tears and smiles. "And I'm going to have green peas for dinner," she cried, imitating the very accents of Millie, skipping in her fashion and then strutting away importantly by Kate's side.

Kate still said nothing.

Suddenly Susie stopped and looked earnestly at her friend.

"The Bovey Paradise won't have me for a fairy, if you want to know, Kate."

"Well, I'm just as glad, Susie! And we're both going to have green peas for dinner!"

Kate's failure in attempting to imitate Millie's tone made Susie laugh more than before, and the two went happily away with arms round each other's waists.

Meanwhile Millie entered the little kitchen where her mother stood with the flushed face of a toiling yet triumphant cook.

ANCIENT WRITING MATERIAL.

Back Through the Paper Period to the Days of Wax Tablets.

Before the invention of paper, enormous quantities of which are manufactured at the present time, the material on which people wrote then was a very costly affair. For that reason it was not as busy with letter writing as we are at the present day.

The oldest writing materials were the wax tablets. These were made of wood or ivory, coated with a surface of wax, on which the writing was done with a pointed stylus, made of bone. These tablets served as memoranda, letter heads, bill heads, as well as for writing exercises in the schools, letters and documents. When it was no longer necessary to preserve them, a special roller instrument was used for obliterating the writing, and then the tablets were ready for use again.

The old Greeks and Romans used these wax tablets generally. The Roman poet, Propertius, the greatest elegiac poet of Rome, deplores in a tender elegy the loss of his wax tablets engraved with the tender epistles that passed between him and his innamorata.

The present century has brought to light many of the treasures of antiquity, among them ancient Roman wax tablets which heretofore were known only by hearsay. These were discovered in the gold mines of Siebenbrunn, which at one time were worked by the Romans. Others were discovered in Egypt. The tablets contained mostly mercantile treaties and notes of acceptance. They are very plain and simple.

"The 'diptycha,' however, which the Roman consuls were wont to distribute among their friends when they took the oath of office, were made of ivory, elaborately carved, and embellished on the outside. Many of these carved tablets which were used during the middle ages as bindings of books have been preserved down to our day.

The Germans adopted the wax tablets from the Romans and they were very generally used during the middle ages, especially in the schools and colleges. During the fifteenth century such tablets were employed as the exclusive writing material of the University of Lubbeck. Toward the close of that century the tablets were driven out by paper, the manufacture of which then became general.

But there were some localities where they were used even at the beginning of the present century, as, for instance, in Halle an der Saale. It was in 1781 when they were abolished by a royal decree. In Sardinian Halle the state passed a law in 1812 abolishing the use of wax tablets. In the salt springs of those two places certain expenditures, such as the price of wood for the boiling of the salt or the distribution of the salt dividend, could be recorded only on these tablets.

Even as late as twenty years ago wax tablets were used at the fish market of Rome. There the revenue from the leftover fish, which were sold at public auction, was recorded on wax tablets. Water, the most formidable enemy of wax, has aided greatly in the retention of the wax tablets in certain localities, until it was at last driven out altogether. The photographic wax tablets of to-day certainly prove that history has a knack of repeating itself.—Chicago Times.

GOLD BEATING.

The Hammer of Preparing the Delicate Metal for the Delicate Metal.

"I was in the workshop of a gold beater in New York a few days ago for the first time in my life," said a Chicago man recently. "Probably less is known of this interesting trade than any other extant. One reason is that there are so few engaged in it by comparison with other industries. The gold is melted and run into a small ingot, making an oblong plate of absolutely pure gold. This is cut up into pieces about an inch square, several hundred are placed between leaves of gold beaters' skin, the whole enclosed in a parchment bag. Then it is beaten for several hours. The leaves of gold spread under the beating, and they are each cut into four pieces. The beating process is continued, the pieces are again divided, and the process repeated until the gold is so thin that the slightest breath will blow it away. Then it is ready for the sign painter, glider, book binder, etc. I am told that this is one trade in which modern invention has made no improvement. Attempts to beat gold by machinery have utterly failed, because, the gold must be uniform in thickness, and the conditions of the work are so delicate that a false stroke of the hammer is sufficient to undo the work done at any stage, and necessitate a fresh start. Only one substance has ever been discovered which will serve to beat gold in. It is obtained from the intestines of cattle and subjected to a secret process. I am told that gold is beaten now as it was when Solomon's temple was decorated with gold leaf. Sometimes a crumble of gold breaks, or is upset in the furnace. The embers and ashes are carefully gathered, beaten fine in a mortar and then washed by hand. Practically all the gold will be recovered in this way. Flying particles of gold leaf, as fine as dust, settle all over the shop. The sweepings of the shop are saved, burned and the ashes washed, and yield quite a sum in gold annually."—St. Louis Republic.

Newest in Millinery.

It is rumored that quite large bonnets are to be worn, but they have not yet put in an appearance. Tulle, silk gauze and crepe de chine are the only trimming on many of the Legerhau hats, while others have flowers or feathers in addition. The most stylish sailor to wear with the drill gowns must exactly match the color of the dress and have a band and bow of the color in the blouse.—N. Y. Post.

Disobeying Fashion's Decree.

Fanny—Have you ever felt the pinch of poverty?
Nanny—No. Why?
Fanny—When I was with the light!

A DEPRAVED RACE.

Traits and Habits of the Half-Breed Beach Combers of Polynesia.

The beach comber is described as "a maritime squaw man." He and his descendants are today growing factors in these fair lands, and if a union were possible between them, and their intelligence was at all commensurate with the physical strength and courage of themselves and their numerous and increasing descendants, they could dictate the policy of Polynesia.

These men have become so numerous that they may be classed as a distinct race. They are Europeans and Americans, and are a queer link between the highest civilization and the savage types of Polynesia. They are principally deserters, but some are ex-convicts, and not a few the remnants of the crews of wrecked or abandoned ships, who have lapsed without an effort into barbarism. They are confined to a location, but are to be found on every inhabited atoll from Christmas Island in the North Pacific to the Kermadec group in the south.

The originals of these beach combers were undoubtedly the crew of the ship "Punty," which, unthrifted in these seas, 1781 sent their captain, Bligh, and eleven of his friends adrift in a small boat, and then, under a leader named Christian, settled on one of the small islands, killed off most of the men, married the women, and for two generations were lost to the world. Curiously enough, when the half-breed descendants of these unfortunates were discovered, it was found that they were a happy people, could read and write, and were more thoroughly imbued with the teachings of Christ than some of the missionaries who had been sent out to save them.

It is impossible to make a comparison between the beach-combing pioneers and the early settlers in our own land, or in Australia. The success of English colonization is entirely due to the fact that the colonists, instead of intermarrying with the aborigines—as the Latin colonists from Europe brought with them into the new home their wives and families and all the customs and forms of the motherland, some of which were gradually modified by their environment. But the beach comber has reversed all this. His purpose in leaving home was to doubt to return on a sea-skipper, but driven into revolt by the actual or imagined enmity of his superiors, and captivated by the ease of living and wedding in these purple isles, he deserted, found a wife among the simple islanders, and at once lapsed back to the condition of his ancestors a thousand years or more ago.

For more than a hundred years desertions from ships of every class have been going on in the Pacific, so that the half-breed descendants of these men number tens of thousands. Old ship captains say that these deserters were usually the brightest of their crews, young, strong, vigorous men, who rebelled under the harsh restraint on shipboard, and who had no ties binding them to their homes, and no morals that would make them averse to the free and easy habits of the natives.

Among these beach combers are men of over seventy years old, perfect giants in strength and endurance. They dress like the natives, and the exposed parts of their bodies are quite as dark. They are, as a rule, more powerful than the natives, and they surpass them in those qualities that are the basis of the art of the sailor.

They can climb the highest and smoothest palms with the dexterity of apes. They wear no foot covering, but can walk over the sharpest coral or volcanic rocks, as if on velvet carpet. They make and manage canoes, and they can swim and are well as if their ancestors since the flood had been born on these islands.

The beach comber is the antipode of the missionary, whom he heartily and openly hates. When he or his father, or it may be his grandfather, cast off civilization, he did himself at the same time of all his religious teachings, and while he rarely adopted the worship of his savage associates, he readily assimilated such of their customs as best pleased himself. Foremost among these customs, and the one continued with the most persistency, is that of polygamy. Some of these men have four or five wives, and as many as twenty-five, and in some cases, these children, although as might be expected, of a low moral standard, are magnificent specimens of physical manhood. A number of these half-breed women seen at Upolu in the navigator's group, who, with their superb, little, foreign, bronze complexions, and great, dark eyes, looked like the finest types of gynecomorphs, in which the old Spanish painters delighted. The half-breed men are even superior to the women. They will average six feet in height, and in repose look like bronze statues of the old Grecian gladiators.—N. Y. Advertiser.

Preserves and Jellies.

The most perfect fruit should be selected for preserving. It should never be over-ripe. Raspberries, blackberries, whortleberries, gooseberries and currants require very little boiling. They must be cooked with great care in order to preserve their shape and color.

Only the best quality of sugar should be used, and equal quantities of fruit and sugar allowed. The sirup should be boiled thick before adding the berries, as strong sirup tends to make the fruit firm. To make raspberry, blackberry, whortleberry or gooseberry preserves, pick the berries over carefully, rejecting all soft and imperfect ones. Weigh the fruit and sugar, put the latter in a porcelain-lined preserve kettle with water to dissolve; boil until thick and the fruit set; cook very slowly until clear. Take up carefully, put in small glass jars and cover. All small berries make excellent jam by boiling slowly, mashing and adding half a pound of sugar to a pound of fruit. If the seeds of berries are not liked the juice may be strained, measured and boiled with the sugar until firm, when a seedless jam will be the result.—Ladies Home Journal.

A HIGH-TONED COLORED BAWL.

Time Is Money.

Col. Simpson, who was always asking people to advance him money, died not long ago in a Texas town at the age of eighty-six. Two gentlemen, one of whom had advanced him money very frequently, were talking about the deceased, when one of them took occasion to say:

"With him the ruling passion was strong in death."

"Well, you see he even died at an advanced age."—Alex Sweet, in Texas Siftings.

PREPARED FOR AN EMERGENCY.

Widow—Arrah, an' it is yerself, Policeman Murphy, I dunno?

Policeman—It is that same, by this token. I've got orders to go down an' arrest two numbers of the slaughter house gang!—Life.

Heard Through the Speaking Tube.

Cook—So yer goin' to be married, Mary McGinty? An' to a man that was three years kapin' company wid yer sister? Well, Oi don't begrudge ye. Chambermaid—Shall I difference of ye do, Miss Egan, an' it's the foine, ill-fancied fellow O've got, an' he says he'd sooner marry me than me sister any day.

Cook—An' did ye stan' still an' let him pass disprachin' remarruks about yer family? Faix, Oi'd hove broke the mug av him!—Judge.

A FAIR PROPOSITION.

"If you'll give me some of that chocolate I'll give you a bite of the apple I'm likely to have next fall."—Harper's Young People.

Not a Peculiar Term.

"Why do you use such peculiar terms?" asked a lawyer's wife of her husband, who had returned home worn out by his day's labors.

"I don't see how you could have been working all day like a horse."

"Well, my dear," he replied, "I've been drawing a conveyance all day. Isn't that working like a horse?"—Green Bag.

A Deep-Laid Scheme.

"No," sobbed the pretty girl, "Harold and I never speak now. And it is all through the machinations of that devious Sallie Slimmins."

"Why, what did she do?"

"She persuaded us to join the same church choir."—Washington Evening Star.

Thirst for Knowledge.

Farmer Tibbets—(Hanging that cow!) I always have to elude her 'fore I can make her stand still.

Little Nephew (from the city)—Is that the one that gives the whipped cream?—Chicago Tribune.

Appropriate Uniform.

Wife (in a fashionable store)—I wonder why all these salesladies are dressed in black?

Husband—I suppose because business is dead.—Judge.

Maternal Anxieties.

His Wife—Do you wear that fright of a hat on the streets?

Himself—No—on my head.—Chicago Record.

A King and a King.

"Weren't you at the front door last night when Mr. Smith came?" inquired the mother of the daughter, referring to the young man who had been coming seven nights a week for a year.

"Yes, mamma," chirruped the daughter.

"I thought he didn't ring."

"That's all you know about it, mamma," and the delighted daughter extended a finger with a brand new solitary glittering on it.—Detroit Free Press.

A Special Inducement.

Agent—I'd like to insure your life. Respectable Old Party—I don't want my life insured.

"But we offer special inducements. Every policy is paid on death."

"Well, all the companies do that."

"Yes; but we pay up even if you are hanged. How's that for a special inducement?"—Tammammy Times.

Highly Recommended.

Miss Penstock—Do you know anything about Jagsby?

Jack Clubber—Why, yes; he's a fine fellow. Of course you know he deserted his wife and his morals are somewhat lax; he drinks to excess and is very profane; and, to tell the truth, he ain't exactly honest; but otherwise he's a very nice sort of fellow.—Judge.

GRANDPA'S BIRTHDAY.

"Many happy return of the day, grandpa; and mamma says if you give us each fifty cents, we won't lose it!"

Unshaken Still.

Dinkane—I shook hands with Spudkins to-day and tried to show him that he was wrong in that little dispute between us the other day.

Gaswell—Did you succeed?

"No."

"That's just like Spudkins. You may shake his hand, but not his opinions."—Pittsburgh Chronicle.

Poor Thing!

Mother (entering parlor suddenly as the lovers turn up the light)—Ethel, you were sitting entirely too close to Mr. Getthere when I entered.

Ethel—Mother, you know well enough how afraid I am in the dark!—Puck.

FIXING THE PRICE.

Dr. Howler—How much is it?

Dr. Scowler—One dollar.

Dr. Howler—You know I'm a druggist myself in Indianapolis, and—

Dr. Scowler—Oh, price to you is three cents.—Chicago Record.

She Didn't Scare.

Marshall—What the mischief is the matter with you, Raymond? been held up by some highwaymen or have you been in a railway disaster?

Raymond—Well, I can't say I have done either. Last night I just hid under the bed to scare my wife.—Life.

Good Suggestion.

Mother (to runaway Tommy)—Is there any place I can put you and be sure of finding you there five minutes after?

Tommy (meekly)—You might try the cupboard.—Arkansas Traveler.

FOR YOUNG PEOPLE.

A CAT HATER CURED.

How Dash Learned to Take Care of His Mistress' Puss.

Dash was a Gordon setter who had enjoyed the full confidence of all the members of a large household for half a lifetime—that is to say, half a dog's lifetime. From puppyhood he had been petted and treated as a person of importance.

He had many pleasures, but the greatest was being sent scampering down the long garden in pursuit of cats ignorant that this particular piece of ground belonged to a dog.

Dash's master disliked cats almost as much as the dog, and as these animals made havoc with his flowers, breaking down his favorite rose trees and lying in the midst of his Canterbury bells, perhaps his dislike was no more to be condemned than the dog's. However, that may be, the moment a cat's nose or tail appeared at any corner of the garden wall Dash was summoned to give chase. Cats and the legs of the leeman were two morsels that Dash longed to taste. The man had accidentally hit the dog with a piece of ice which he was throwing away, and on another occasion he had shaken his tongs at him.

One day Dash bounded into the sitting-room in answer to a call from his mistress and found her petting a little ball of black fur, which on being set down on the floor in front of him humped up its back and hissed at him like a snake. A cat! Dash could not believe his eyes. How kind of the mistress to give him such a treat. He pricked up his ears and wagged his tail and then pounced toward the kitten, but before he could seize it he was struck a sharp blow by little Rob and called "bad dog" by Rob's mother.

Worse even than that, his mistress picked up the kitten and stroked it, while she stamped her foot at him and

DASH AND HIS CHARGE.

drove him out. Dash went and lay down in the garden to think about it. Surely his master would set things right—he would never allow cats in the garden, much less in the house.

But when Rob showed the kitten to his father he, too, stroked it until it purred. The cook was told to give the little beast milk regularly, and let it curl up by the stove whenever it was pleased to visit the kitchen.

If the dog had been in a cage he might have strangled himself or beaten his brains out, as I have known birds to do. As it was, after trying several times to kill the intruder he stalked and growled but tempered that his mistress became uneasy, lest he should bite some one of the family.

It was little Rob who suggested a cunning plan. The cat should be kept in the kitchen, and it should be Dash who should keep her there. In short, Dash should be made the cat's guardian.

The plan worked to a charm. Dash soon grew proud of his duty of looking after Tipple. When she became a thief, as most good mousers do, he would chase her out of mischief. When he saw her on the table he would reach up, catch her in his mouth and set her down on the floor. He did this several times, but as she did not seem to mind it, one day he turned her before letting go. That made her understand.

She soon grew fond of Dash, and would run to meet him every morning, jumping up and catching his nose between her forepaws and sometimes throwing them round his neck, as if she were hugging him. He would play with her by turning her over on her back, holding her down with his paw and then pretending to bite her, but he never hurt her.

Nor would he let others punish her if he thought she did not deserve it. One day her mistress, who spoiled them both, grew tired of the cat's meowing when she was not hungry, and was only asking for food because she smelled it, and to teach her better attempted to put her out into the snow. Dash ran to the rescue. He snatched Tipple out of the lady's arms and carried her over to the corner where she slept. Then he ran back to his mistress wagging his tail, as much as to say: "She won't bother you any more, take my word for it."

So they lived until Tipple, the cat, and Dash, the cat hater, died of old age. And all this came about because a little boy understood the strong points of a dog's nature—Margaret Compton, in St. Louis Republic.

THE WAYS OF TURKEYS.

Experiences of a Lady Who Knows All About the Quirky Birds.

In April your turkey-hens will not stay together, as they have done all the winter, but each seems to have a separate secret, and you will often meet one in the most unexpected places, far away from the house. Then the deceitful old turkey-hen will try to look so unaccountable! She just goes on plucking at the grass and weeds, slowly turning first one way and then another in an aimless fashion; and when she is sure you are watching her, she will lead you back and forth, around and around, sometimes for half a mile. Yet—would you believe it?—right there,

near by, along the fence in a clump of grass, or under some dried brush, or perhaps in the middle of the pear orchard, with never a thing to mark the spot, or in a tangle of blackberry bushes in the old graveyard on the cool moist earth is a nest of speckled eggs! But some day! Do not for the world put your hand in the nest! You must take those eggs out with a fresh, clean

HIS HIGHNESS, THE GOEBLER.

spoon—turkeys are "mighty particular" as the colored people say; but if you don't take them the crows or the setter dog will. You must leave her a "nest egg" of course, and above all things the hen must not see you do this, for you and she are playing at hide-and-seek.

Some day you will find her sitting on the nest, crouched down close to the ground, with a scared look in her pretty brown eyes. Don't say a word; trip noiselessly away, and late that evening give her back those speckled eggs, slipping them under her with your hand. She will pluck you, but do not mind that; you and she will be friends some day.

Once I made a turkey sit in a hen-house where there was many a rat hole. She had been on the eggs four weeks when little turkey voices were heard beneath her and little turkey heads peeped out from among her breast feathers. When I took her up by both wings such plucking and picking and scratching as she did! I looked, and behold! not a turkey chick was there. The little things just out of the shell, obeying the instinct of their nature, had "secoated" in the twinkling of an eye, leaving a nest of empty shells. I hunted all over the henhouse, but no sight or sound of them could be heard, but as I turned away, I heard the old hen calling softly; then, more softly still, came the answers, and from ratholes, from wisps of scattered straw, from chips, from cracks and from corners the little ones came creeping back to the nest. I caught them though, after all, and did as an old woman told me. With my finger nail I scratched off the "pip" at the end of each tiny bill, and, holding the little turkey firmly and placing a finger in the bill to keep it open, I rammed the little pip—which looks like a piece of meal husk—and a whole grain of black pepper down each little throat. The black pepper and the meal made the young turkeys so uncomfortable that they were treated to a dab of salt grease and stuff, mixed together in a brown paste, and on the top of each head and then under each little throat. Their food is now to be wet corn meal and chopped garlic on onion tops—with an occasional seasoning of black pepper and damp earth to the center of the track; then early in the morning the birds are to be dusted with a fine powder of salt and pepper.

Then, with a wagon, draw off all the stones, and do not throw them back to the side, to be seraped up in the road again next year. Now, if gravel is wanted on the road, have two teams for three wagons and men enough to load as fast as the teams can draw.

In this way we have built our roads, and they have given good satisfaction, and no one gets credit for labor when sitting under shade trees.—Cor. Country Gentleman.

PRACTICAL EVIDENCE.

Why the Good Roads Movement Should Be Popular in the South.

The southern road congress, which met at the end of the year, brought out the fact of the value of good roads, and the pecuniary advantage of them was fully recognized. Among the cases cited was the experiment made in building good roads by the people of Union and Essex counties, N. J. The pecuniary results resulting from this experiment are summed up in a report from the board of freeholders of the former county, which states that the total outlay has been nearly \$350,000, and there are now nearly forty miles of telford and macadam road in the county.

The beneficial effect of the roads is seen in the fact that property in Union county alone has appreciated in value far more than the cost of the roads, as the assessment shows. The county is valued \$350,000 worth of road bonds, the interest on which must be met annually, yet there has been no increase in the county tax rate, because the increased assessment easily produces enough revenue to meet this charge. Very few of these roads have been built more than a year and most of them only a few months, but already the people appreciate the advantages flowing from them.

Such practical evidence as this will certainly encourage roadbuilding in the south. The movement so far has made little practical advance here and has been confined mainly to conventions, etc., but this is a step in the right direction. It is true that conventions in themselves do not accomplish much in the way of roadbuilding, but they show how the work can be done; they arouse the interest of the people in the matter; they prove the value of good highways, and they will, in the course of time, arouse the south to the necessity of building them.—N. O. Times-Democrat.

FARM AND GARDEN.

REPAIRING FENCES.

Experience of One of the Overseers of Yates County, N. Y.

We have a great many different ideas of working roads here in Yates county, N. Y. Each town has a road commissioner, and he appoints an overseer for each district, and the appointed man must lay his plans and pick out his shade trees for the men to sit under and work on their road tax, and the man that can tell the best story gets the most praise. That is one way.

Then, in some districts we have road machines. Then the overseer gets two or three teams hitched to one following after to throw out stones and sticks and turn sods over now and then; and when they get through there is a ridge in the center of the track. Of course a team can be driven with one horse each side of the ridge, but with a single horse wheel will be in the ditch and the other on the ridge, which has been left by the road grader—that is, by the man's lack of judgment in running the grader. If this is the only way a wheel scraper is to be used they can be used in some respects, but do not mind that; you and she will be friends some day.

I was talking with an overseer in the first part of April who had just been putting his district in the shape just mentioned, and when I remonstrated with him and told him it was too early to put fresh earth in the road he said it was all right, as you could not work roads too early in the spring. I thought at the time it would be work thrown away. In what condition would the highway be when the spring rains came? As the soil is clay, there was no earth to grade up when the weather became settled. That is the way the work goes on in the different districts; and the bicycle rider comes along and wishes to make a turn on the farmer, and I do not blame him in some respects, for a great many roads are worked out.

As I have been overseer in the past, and there are about 150 days in our district and one-half of that paid in cash, I have managed in the following manner with good results. The first thing after the frost is out in the spring, I hire a man with a good team and plow furrows on the side of the road where it is necessary, and then, after the plowing is done, clean out all sludge ways and the old log-scraper, which is a saw-blade bolted to a log. This will smooth off the rut. One man with a team can do it. And this is all that should be done early in the spring; if it gets rough again, go over it in the spring, and keep on until it is time to use the wheel-grader. When I start with that I manage to have three teams, and that makes a power that will keep the wheels turning. I set the grader blade to take furrows that move the earth into the center of the road, and go twice around this way. Then adjust the blade to move it to the center; then go to the ditch again and take all uneven places down, so that the water can run freely; when this is finished, move all loose earth to the center of the track; then adjust the blade again so as to move this ridge, and have teams driven so as to move it from high to low places. When this is all done, I clean out by sludge-ways where we cannot go with the grader.

Then, with a wagon, draw off all the stones, and do not throw them back to the side, to be seraped up in the road again next year. Now, if gravel is wanted on the road, have two teams for three wagons and men enough to load as fast as the teams can draw.

In this way we have built our roads, and they have given good satisfaction, and no one gets credit for labor when sitting under shade trees.—Cor. Country Gentleman.

IN THE WHITE CELLS AT JOLIET.

A Species of Punishment That No Prisoner Can Long Endure.

Public sentiment became so strong several years ago in the state of Illinois against the dark cell that the legislature took a hand and abolished the institution. Some means of punishing the refractory spirit of convicts who would not work was necessary, and as whipping was abolished the warden at Joliet prison evolved the most refined and effective form of torture yet discovered. The dungeon was supplied by what is known as the white cells. They are located in a detached building in a portion of the inclosure far distant from the workshop. The walls of the cell are of great thickness, the silence of the tomb prevails. They are lighted from above, but no glimpse of the sky can be obtained, and the walls, floor and ceiling are painted a glaring white. Even the narrow board, the only piece of furniture in the cell, upon which the prisoner is permitted to sleep outside of working hours, is painted white. During the hours when the other convicts are at work the man in the solitary is handcuffed to the door of his cell, his hands being chained at an easy and natural elevation. There is not a speck of color to relieve the steady, glowing white with which he is surrounded. Within an hour the brain of the prisoner begins to swirl and he becomes deathly sick. Few men have ever been able to stand the white cell, with its maddening monotony, unrelieved by a single ray of light before they begin to beg for mercy. Two or three hours of the tomblike surroundings generally brings the most virile and rebellious spirit to terms.—N. Y. Advertiser.

PARASOL AND PHILOSOPHY.

A Woman Discovers a Disadvantage of the Sunshade.

A bright Washington woman lately made a discovery. For some seasons she has been in the habit of summering in the city, and she has been wondering of late why it was that she seemed to be just as warm when she raised her shade as when she forgot it, and allowed it to remain open.

The other day she was walking along Pennsylvania avenue, and acting upon the impulse of her habit, she raised her parasol as soon as she emerged from a store. Then she noticed that her breathing was difficult, and that her face was burning. Suddenly it dawned upon her that she had noticed this before, and set to work to reason out the cause. For a time she pondered, growing warmer with each step, until she moved in the shade of a tree and snapped her parasol into its folded state. In a moment her face was as cool as fresh, cool air, and she was immensely relieved. It then flashed across her that she had been unconsciously imprisoning all the hot air rising from the sidewalks and asphalt pavements beneath the dome of her shade, which, instead of acting as a protector, as intended, was really acting as a hood to surround her face with the hottest atmosphere of the street. As long as she held her parasol up the air had no chance to circulate, and this was the more uncomfortable because she persisted in holding it quite low. So she experimented, and as a result found that she was more comfortable when she walked with her parasol folded than when she opened it. (and now she has quite taboored that dainty article except as a means of defense against dogs and cows and other wild beasts.—Washington Star.)

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

WEBS AND FLIES.

Wetly spiders, great and greedy,
Wear their webs from sea to sea;
They grow fat and men grow needy—
Shall our robbers rulers be?

"Sweep the webs away!" the nation
In its wrath and wisdom cries.
Say the folk, with heads bowed low,
"No, but educate the flies!"

We do both, twin wings who smolder:
Let the school fill out their sphere;
Let the church sound seven thunders—
But the webs must disappear.

Up! the webs are full of slaughter,
Sweep away the spider's lair;
Up! wife, husband, son or daughter,
Make the vessel earth clean and fair!

—Joseph Corz, in Union Signal.

A LIFE FOR LIQUOR.

Pathetic Story of an Ohio River Inundation.

The Ohio river was on its annual rampage. The rain had been falling steadily for a week or more; in the mountains where the river's headwaters had their source, the snow was melting rapidly, and the signal service men predicted an inundation equal to that of '84.

Already the water had "backed up" twelve-mile creek and had overflowed the lowlands lying between the hills and the bluff on the edge of the river. The tall white willows that thickly bordered the banks of the smaller stream reared their headless heads above the muddy brown water like slender guide-posts outlining its original channel.

All the houses at Blair's landing, a half mile below the village proper, were well-nigh submerged; the brick yard had been closed down for the last two weeks, and the evening when the waves came creeping up to within six inches of the school-house door, the teacher announced that the educational department of New Palestine would have to do likewise.

"You had better not drink any more tonight, Joe," the postmaster said to the little hunchback who formed one of the party that crossed from the bluff to the foot of the hills in rowboats that night for their indispensable revel. "The river's a-coming up like sixty. Well! all you can get out to-morrow, for ever' house in the school is half filled in twenty-four hours. You'll be the first to catch it, too, for it's low, down there on the point. You'll need all your wits about you. I tell you it ain't no fool of a job to move all your belongings in a skiff. I've tried it often enough and that's all."

Joe laughed. "I guess I know what I am doing," he answered. "I ain't lived in these bottoms for twenty years for nothin'. I'll take little Sis an' pull out for the hilltops the first thing in the mornin'. Don't letch me takin' no chances, you'd better believe."

He meant to do so. He really did not intend to take another drink that night, nor any other night; he thought he had sworn off for good, and even when he got home and brought the black bottle to the cupboard, he told himself that it would be but the smallest of sins to take off a chill that the trip across the lowlands had given him.

"Daddy's got to brace himself up for just this once, ain't he, little sis?" he said, kissing the yellow-haired child of three that slept in her low bed in the corner. "He'll get over it last night, and you, an' he'll always be a man after this. Never stop, nor drink, nor nothin' any more."

He took his one swallow that called for another and then another; at last the flask was empty.

"Got to get out of this to-morrow," he muttered, and he threw himself on the bed and waited for the morning to come.

His drunken stupor lasted for hours. Many times was it partially broken by blurred visions of his baby stretching out her little hands to him and crying "papa, papa," and each time he made manlike attempts to answer her, but the power of the liquor was stronger than that of his will, and he slept on.

In his dreams he grew cold, very cold, and it seemed that he could hear the waves lapping slowly, regularly, up among the willows. At last, with a mighty effort, he sat upright. The river had, indeed, arisen; the bluff was submerged; the house was rapidly filling, and a half-inch deep or more.

He stared around him in bewilderment for a time, and then he thought of his child. "Haisy," he called, but she did not answer him. He leaned forward and looked for the low bed where the baby slept. There was nothing there but the muddy water, and on its surface a yellow eul.

The dreams of the outstretched hands and pleading voice had floated before his mind, and with a cry of terror he bounded out into the cold water and tried to snatch her to him.

He remembered then. Always before making his nightly visit to the post office, he would rock her to sleep and then, that she might not harm herself in any way, should she awaken, he would tie a cord round her waist and secure it to both sides of the bed. She had ever slept so until his return. The night before he had forgotten to loosen her bonds and the rising river had found her fastened there.

He reached down and broke the cord, and gathering her in his arms, he waded to the ladder that led to the loft and mounted it. All day long he sat there. His brain was benumbed, and the thought of trying to devise some means of escape never came to him. He only waited for the time with his dead child. By and by the light that came through the one attic window, began to fade away, and he knew that night was coming on. The last faint rays revealed some moving object oozing up through the cracks in the floor.

He stooped and felt of it. It was the water.

Early that morning the well-to-do dwellers on the hilltops had thrown open their homes to the deluged villagers, and by noon the one-story frame houses of the lower town were deserted.

It was night before they thought of

hunchback Joe. "I guess he's all right," said the postmaster. "He was fairly sober last night, and he said he was going to take his baby and pull out for the back country the first thing this morning. I expect he was the first to get away. Somebody ought to see to that man's child, though, when this flood excitement's over again. He thinks a heap of her, I suppose, and means to do the right thing by her, but he can't let liquor along long enough to take decent care of her. She's a bonny little thing, too."

In spite of this reassuring account of Hunchback Joe's welfare, they could not dislodge him from their minds, and about eight o'clock three of the men took a rowboat and started toward his cabin.

Through the attic window, to whose ledge the water had crept, one of them thrust a lighted lantern. "Joe," he called, peering in, "are you here?"

Yes, Joe was there. In the highest part of the sloping room, he stood, holding his baby above the touch of the current that reached to his waist. "I drowned her," he said when the men had placed them in the boat and commenced to row back to the shore. "I guest I was drunk. I tied her in bed. She called an' called, an' called—"

The men did not speak. The only sounds were the long, low, steady roar of the rising river and the phrasing of the oars.—Emma S. Wise, in Union Signal.

TO INSURE LENGTH OF DAYS.

Temperance Has More to Do with Longevity Than Anything Else.

A paper whose purpose is to investigate longevity in the interest of the insurance companies has taken up the subject of drink and its effect on life. Life may be a questionable boon to many, but it is a desirable thing to all. If a man can be convinced that as a result of habitual excess the tenure of his life is rendered unsafe or shortened; if he has any reasoning power and will remain, he will be apt to call a halt, and to restrict or stop the habit which, if persisted in, will lead to premature death.

The doctor may warn and point to the probable effect of temperance upon kidneys, liver or heart, and the patient may listen to him, but he will keep on with his cups, because in his case the habit has ripened into disease, and the use of alcohol becomes actually essential to his comfort and a necessity to his tired nerves.

Where a man is not too gone—that is, where the habit has not become a disease—he is apt to be more affected by figures than by all the arguments of the doctors. The experience of those who have studied the subject with unbiased minds is that temperance is a slow mode of suicide, varying in its issue according to the constitution of the victim.

The most careful statisticians of the United Kingdom have demonstrated that where the alcohol habit is contracted before the twenty-fifth year, the period of life following is ten years where contracted after that age, eight years the intermediate years having the same proportion. Strangely enough, there is not one case of inebrity in a thousand where the habit was contracted after the forty-fifth year.

The theory that inebrity is largely due to inheritance has long since been exploded. As a matter of fact the nations addicted to the use of intoxicating liquors through continued generations have reached a condition of immunity that practically protects them against its ravages, while people of races not so trained are destroyed by an amount of liquor that would have no effect upon the English, French or Germans. This is illustrated by the destruction of our Indian tribes, and by the late fate of the native races of Polynesia, who are being virtually swept away by the introduction of alcohol.—Chicago Tribune.

TEMPERANCE TIDINGS.

COUNT TOLSTOI never drinks wines nor smokes. He lives entirely on bread, vegetables, fruit and grain, and uses a beverage made from hot water and raisins.

SIR ANDREW CLARK, the general physician in the largest hospital in London, says that seven out of every ten persons treated there owe their ill-health to drink.

JAMES has been peculiarly blessed in temperance missionary work, says SHO XENOTO, calls come from all the provinces for meetings, and lectures, and young people especially are earnest and interested.

In France the consumption of spirits has increased three times since 1850, and remedial measures are now being suggested. A thousand million francs is the estimated cost of alcohol in France each year.

A PROMINENT physician of San Francisco says: "No cigarette that I ever heard of is free from opium. Beyond question, the boy who smokes cigarettes stunts his growth, wrecks his nerves and weakens his heart and kidneys long before he reaches manhood."

MISS WILLARD says: "I once asked Thomas A. Edison if he were a total abstainer, and when he told me that he was, I said: 'May I inquire whether it was home influence that made you so?' and he replied: 'No. I think it was because I always felt that I had better use for my head.'"

MISS NETTA HAWORTH, one of the teachers of the Kickapoo mission, Oklahoma, writes that there is a strong sentiment among the Indians there against drinking, that the more white men have come about the Indians, the more whisky they have in their camps.

THE London liquor dealers, in their meeting not long ago, stated that the total revenue from the trade to the exchequer was about thirty-five million pounds. As the expense of British armament is thirty-eight million pounds, it was urged that the drink traffic nearly paid for the cost of the country's defense. Nothing was said about the cost to the individual and nation because of the drink.

A BATTLE WITH APACHES.

An Old Indian Fighter's Clever and Courageous Act.

Thirty or forty years ago, when the Santa Fe trail was the great highway of the southwest and the merchants and traders were passing the merchandise in wagons, Don Juan Christoval Arrijo, of Albuquerque, was one of the richest men in New Mexico. He was also one of the most progressive and clear-headed, and seeing the possibilities of profit in freightage, he converted most of his lands and cattle into cash and the cash into wagons and mules. He had, in the early sixties, fifty big freight wagons and six hundred mules. In those days "mules were mules," and worth from three to five hundred dollars apiece. They were also worth stealing, and Apaches and Navajos knew that for sure.

One summer day in 1862 a long train of senior Arrijo's wagons came creaking into Albuquerque from Tucson, and the three hundred mules that had dragged them across the deserts and prairies were hunched in a narrow place near the town to graze, guarded by two herders.

A band of Apaches had followed the train patiently for days, watching for a chance to stampede and steal the stock, but Arrijo's herders had been too vigilant to give them an opportunity, and the Apaches, keeping out of sight, had trailed the train to the end of its journey.

It was a warm day, the mules were glad of a chance to rest and a graze and would not stray, and the herders, too vigilant to suspect so near the town, and when the mules on the outskirts of the herd began to snuff and snort the sleepy herders paid no heed to them.

There was a low but sharp whistling in the air, and one of the men pitched from his saddle with three arrows in his chest and a broken bow. The other felt the third and stung of an arrow in his side, and was almost moused by the sudden frantic leap of his horse.

The attack was not followed by the shrieks and yells usually employed to complete a stampede. The Apaches disappeared suddenly and mysteriously on all sides, were silent, and although many of them carried rifles, not a shot was fired at the herders as they galloped furiously away. A few arrows whistled viciously past him as he fled, and two or three Indians followed him, but he was not to be caught.

Don Manuel, however, was easily outstripped by the herder's fresh horse, maddened by the arrow in his haunch. The herder, mortally wounded, reached the town and told Don Christoval that a band of Apaches had driven away his three hundred mules, and then they pulled the arrow out of his side and he died.

The Apaches, it was known, would strike for the Manzano mountains, and near these mountains lived Don Manuel Chavez, the most daring and successful Indian fighter in New Mexico. Don Christoval set about gathering a troop to follow the Apaches, but first he put his son, Juan, upon his thoroughbred mare and told him to ride to Don Manuel's place as he never rode before, and get that warrior and his men to head off the band in the mountain passes.

Don Manuel gave the mare her head and flew over the prairie like the desert wind, covering the forty miles in a little more than three hours. But when he arrived at Don Manuel's ranch and told his story, he was dismissed to get his horse. As a matter of fact, he learned that all of the Don's men were out chasing the Navajo sheep thieves, and Don Manuel himself was the only man at home, except a sick brother-in-law in the house.

Don Manuel was not in the least excited by the news. He listened gravely, and then invited young Arrijo to alight and dine with him. After dinner Don Manuel rose, took his rifle from the pegs, and said:

"Now, my boy, we will go out and head off those Apaches."

"What? You and I?"

"Certainly; why not? We have plenty of time, and your mare is fasted to get to the town. Are you afraid?"

"Surely, Don Manuel, I am not afraid, but my father told me to come to you and do whatever you should say, and I will go with you. But I think we shall be killed, for there are many Apaches."

"Don't be afraid! We shall not be killed. You know that I have seen many Indians, and you can believe what I tell you."

Don Manuel and young Don Juan mounted their horses and rode away into the mountains to stop twenty-four Indian warriors and fight them. Chavez knew the pass the Indians would have to take, and he led the way to a high point, and there, to his disappointment, and concealed the horses in the timber.

Looking out upon the plains, they presently saw two clouds of dust, one made by the Indians and the herd of mules, and the other, some miles behind, evidently indicating the pursuit by Don Christoval and his men.

When the Indians entered the pass, Don Manuel told young Arrijo to remain out of sight, while he stepped out upon the crest of the ridge in plain view. The Apaches soon caught sight of this lone figure, boldly outlined against the sky, calmly surveyed them from the ridge, and they halted and rounded up the mules in a bunch. Chavez counted twenty-four warriors, seventeen of them armed with rifles. The Apaches huddled together, apparently consulting and uncertain what to do.

Chavez watched them keenly, and in a moment he saw one slip from his horse and glide into the woods. He knew that the warrior's purpose was to get upon the ridge and ascertain the strength of the force that the Indians supposed to be in front of them, and he knew that the success of his plan depended upon preventing the scout from carrying out that purpose.

But Chavez gave no sign that he noticed the movements of the scout, although he never lost sight of him as he made his way stealthily up the hill. The Apache came up through the timber to the left, and Chavez carelessly rested his rifle in the hollow of his left arm. The Apache approached to within

a hundred yards, and, becoming emboldened by Don Manuel's apparent indifference to his movements, he made a short run to cross an open place and reach the top of the ridge.

Don Manuel was watching for just that movement, and his rifle went to his shoulder and cracked instantly, and the Apache rolled over with a ball through his body.

Don Manuel then turned and beckoned to young Arrijo as if calling up a party of men. The Apaches in the pass, finding that the delay had enabled the pursuing party to approach within less than half a mile, attempted to drive the mules forward, but the animals got hunched in a narrow place, and all was confusion in an instant. The Apaches could not get the herd started, and the clatter of hoofs in the pass told them that in another minute Don Christoval would be upon them. So they began shooting into the bunch of mules, determining to do all the damage possible by way of revenge for the failure of their raid.

When Don Manuel saw that he ran into the woods and down the pass, and at short range began shooting at the Indians. But those were the days of muzzle-loading rifles, and he emptied only two saddles before the charge of Don Christoval and his men scattered the Apaches and drove them into the woods.

A few Apaches were killed in the mountains by the pursuers, but most of them escaped. Arrijo recovered all of his mules, ten mules and returned in triumph to Albuquerque. Col. Chavez said "radio" at the mouth of the pass and started home alone at nightfall. In the dark his horse stumbled and fell, breaking Chavez's leg. The horse was stunned by the fall, lay still for a minute, which gave Chavez time to get such a hold that when the horse got up he was still in the saddle. He reached home after midnight, was lifted from the saddle by the woman at the ranch, and he was laid up with his broken leg for six months.—N. Y. Sun.

THE BENGALIS.

Hindus Who Will Fight and Those Who Will Not Fight.

The population of India may be divided into two classes, those who hope and those who lack courage and the power to fight. In Europe all nations belong to the former class, but there are in India whole nations and castes which, with occasional individual exceptions, are completely devoid of physical courage. Of these, the Bengalis are the most conspicuous among others, are the Hindus, or trading caste, in Northern India. The proofs of this are ample.

About the year 1200 A. D. Bengal yielded without a blow to a handful of Mohammedan invaders, and from that day to the present the Hindus of Bengal have made no single effort to shake off the yoke of alien rule. There are no Bengali soldiers in the Indian army. Even in the police of Calcutta, the headquarters of the race, out of two thousand men there are only one hundred and sixty Bengalis. The Hindus of Bengal are timid, and are despised throughout the population of Upper India. They make no secret of it themselves.

In a discussion held on December 31, 1892, in the senate of the Calcutta university, on a scheme for promoting physical training among the students, a Bengali Hindu, a rajah, and a speaker of the faculty, declared that the Bengalis are a peaceful—if you like, an effeminate race. Maleness, physical excellence, is not a thing we prize. God gave us brains instead; we are content to use them, and leave the development of them and sinew to other of the Bengis. Bengis are not a learned gentleman of this nation argued, the so-called virtue of courage is a relic of barbarous times, and not essential to the modern type of ideal manhood. But, unfortunately, India contains a number of powerful races, holding shocking medieval ideas on this subject, as the following anecdote will show:

An Englishman was talking about the Bengalis to the son of the Indian commander-in-chief of the army of a very powerful Hindu prince. The old man was present, but took no part in the conversation, which was conducted in English. At last he broke in, and said: "I don't know what you're talking about, but I hear the word 'Bengali' frequently used. Now, I never could understand why the British government made so much of the Bengalis. It seems to me the British Raj is nothing but the glorification of the Bengis. If the British army were withdrawn, I would take a couple of my regiments of cavalry—no, one regiment would be enough—and there wouldn't be a Guram bit or a virgin left in the whole of Bengal."—National Review.

The Black Bear of North America.

The black bear (Ursus Amer-icanus) is the most persistent of all our large mammals in his refusal to be exterminated. Because of the facts that his senses are keen, his temper suspicious and shy, and his appetite not at all capricious, he hangs on in the heavily wooded mountains, swamps and densely timbered regions of North America, generally long after other kinds of big game have all been killed or driven away. As his name implies he is jet black all over, except his nose, and when his fur is in good condition it is glossy and beautiful. His muzzle, from his eyes down to the edge of his upper lip, is either dull yellow or dingy white, and sometimes—particularly in Alaska—he has a white spot on his breast. According to locality and climate, the hair of the black bear may be short and close, as in the south, or long and matted to shagginess, though not so much so as the grizzly's. Very often his coat will be abundantly thick and of good length, but so even on the outside and so compact that he looks as if he had been in the snow for the season and come out of it a skunk. So far as I have seen neither the grizzly nor cinnamon ever has that appearance. In the north, where his furry coat is thickest, it is now eagerly sought by the furriers, and the standard price for a large skin of good quality is \$25. The Indians prize it for muffs and collars, and the carpet warrior and the bandmaster love to have it tower heavenward from their warlike brows as a shako.—W. T. Hornaday, in St. Nicholas.

SCIENCE AND INDUSTRY.

A combination of gas stove manufacturers has been formed under the name of the United Vapor and Gas Stove Company. The concern has been incorporated in Illinois, and is capitalized at \$8,500,000.

By actual experiments it has been ascertained that the explosive power of a sphere of water only one inch in diameter is sufficient to burst a brass vessel having a resisting power of 27,000 pounds.

Recent statistics show the United States stand third on the list of wool-producing countries, Australia being first with a yield of 550,000,000 pounds, Argentine Republic second with about 400,000,000 pounds, and this country next with 300,000,000 pounds.

The first really intelligent experiments made with a view of ascertaining the conditions of dew formation were by Dr. Mills, a London physician, who in 1844, at Charleston, S. C., his book on the subject appeared in 1844.

Aristotle was the first philosopher to suggest the real cause of the phenomenon of dew. He says: "The sun's heat raises the vapor, from which the dew is formed as soon as that heat is no longer present to sustain the vapor."

In India certain regiments with 5,510 men were placed under observation. They were divided into free drinkers, moderate drinkers and abstainers. It was found that the health of the free drinkers was that of 1,000, of the moderate drinkers twenty-three per cent, and of the abstainers only eleven per cent.

The results of examinations of European statistics by M. Lagneau go to show that as among occupations consumption is most prevalent among persons whose work is sedentary; while persons living in the open air enjoy an almost complete immunity. From another point of view, consumption appears to increase in towns rapidly with the density of the population.

In 1893, 189 miles of new railroad were opened for traffic in France, making the total of the country 22,302 miles, of which 19,748 miles belong to the six great companies, 1,609 to the state, 698 to branch railroad companies, 190 are not chartered, and 128 are made in shops, yards, etc. Besides, there were at the end of the year 2,219 miles of local railroads, 188 miles of which were opened in 1893. There were also 1,033 miles of street railroads.—N. Y. Railroad Gazette.

Some months ago Dublin inventor claimed for a preparation of his that it would preserve eggs in perpetual freshness. To thoroughly test the efficacy of the invention, which, if successful, would revolutionize the egg market, an experiment was carried out at the Freeman offices. A sample of eggs immersed in the putrid paste of the consistency of honey, have remained undisturbed there for a period of four months, and when opened the other night in the presence of experts were found to be all perfectly fresh.

Pasteur, the French scientist, has shown that all fruits and vegetables when undergoing even partial decay contain bacteria, which, if taken into the stomach, may cause disease. Fruit grown near to the ground may contain the bacteria of typhoid fever, tetanus, diphtheria or cholera, which may have found their way into the material used for fertilizing, or may have become incorporated with the dried dust. Hence one should never neglect to cleanse fruit. Especial care should be taken with imported or shipped fruit—more particularly that from districts where there are infectious diseases.

The Swiss government forbids jokers the use of tobacco, and boys dare not smoke in public streets. The French prohibit its use by public school students. Dr. Bremer, physician to a St. Louis lunatic asylum, declares that its use by youth is a cause of mental, physical and moral deterioration, and he attributes Carlyle's bad temper to its use. The editor of the Review of Insanity and Nervous Diseases finds that idiotic and nervous children may have inherited their bad heredity from tobacco-using fathers. Its bad effects are not immediately noticeable, but in the long run are bound to tell. Paste this in your hat, young man, or put it in your pipe and smoke it instead of the weed that kills.

THE MECHANISM OF THOUGHT.

Singular Illusions Produced by the Sense of Feeling.

A person shuts his eyes of his own free will. He takes his hand, he crosses the forefinger and the middle finger one over the other, and between them he slips a little ivory ball. A singular illusion immediately arises. The person believes he feels two distinct balls. And why? No doubt, because under ordinary conditions, when the fingers are not crossed, one ball would not simultaneously touch the right edge of the forefinger and the left edge of the middle finger—two balls being necessary to produce the double sensation. Such is the experimental fact which we all possess in our memory without being conscious of it.

By an artificial arrangement of the fingers, one ball may produce these two impressions, and the mind, not taking into account this artificial disposition of the fingers and interpreting the impressions by the ordinary rules, arrives at the illusion of touch which has just been described. Nothing is simpler to bring about than this illusion, because the sensory impression from which it is derived may be modified at will, without any necessity of speaking to the subject under experiment. Is it the same with an idea? Evidently not. For in order to communicate an idea one must speak to a person, and make one's self understood; so that as he becomes informed about the object of one's inquiry, illusion is impossible.—Fortnightly Review.

Jewette Bargainin.

"Well, little girl," said the grocer, "what can I do for you?"

"I don't want to buy anything," replied the little girl. "Mamma told me to find out the prices and then come back. How much will I have to pay to get a dollar's worth of sugar?"—Chicago Tribune.

PUNGENT PARAGRAPHS.

"The best thing to do when you make a mistake is to make it teach you something."—Kam's Horn.

"The first printed books had their leaves printed on one side only, the blank sides being pasted together."

"Is it possible the colonel is running for office?" "No; he hasn't run since the war."—Atlanta Constitution.

"Nearly one-half of our voting strength in 1890 was either foreign-born, native-born of foreign parents or colored."

"Muggles"—"Say, old boy, I've just invested in a chalk pit." Jones—"Do tell! And I'm running a pump factory; why not start a milk router?"—Arkansas Traveler.

"So you feel you cannot marry him?" "Yes, I am fully decided."

"Why, don't you like him?" "O, I like him well enough, but I can't get him to propose."—Brooklyn Life.

"Disastrous Landing."—Dusty Rhodes—"I was shipwrecked on the Coney Island coast, an' lost every cent I had." Mrs. Dogood—"But you got ashore?" Dusty Rhodes—"Yes; that's how I came to lose it."—Puck.

"There is more pleasure in giving than receiving," was the proverb that a mother was trying to instill into a youthful mind. "That's true about castor oil, mother," was the answer she got.—Tit-Bits.

"Hicks"—"See that lady over there that's making such a simpleton of herself over her dog?" Wicks—"Yes." "Well, wouldn't you like to give her a piece of your mind?" Not much. She's my wife."—Inter Ocean.

"Want Him Back."—"The lunatic asylum authorities are looking for Josiah." "Why, I thought he was discharged cured last month." "So he was; but they've just heard that he's trying to start a newspaper."—Judge.

"Ye Editor Gets \$9.00."—In the settlement of an estate recently \$900 was allowed the undertaker and \$500 was granted to the monument maker. The poor newspaper man who perished obituary never got a cent. It's a hard world to live in and an easy one to leave.—Arkansas Traveler.

"Teacher to boy whose father keeps a corner grocery."—Johnny, if your father has a hundred dollars and twenty of them are bad, how many of them does he lose?" Johnny—"He doesn't lose any of them. He sells the bad ones to the restaurant keeper."—Texas Sittings.

"Suddenly, to his horror, a large portion of the log detached itself from the parent stem and, in the shape of a big snake, evidently ready for dinner, made straight for the toothsome spectator. The naturalist withdrew to his base of supplies, some thirty yards away, seized his gun, and considered the situation. The snake was approaching rapidly; flight was impossible. So he stood his ground and put a charge of heavy shot square into the reptile's brain. The snake recognized that this was his cue to die, and he proceeded to do so in a manner that left no room for criticism. He took seven hours to finish the scene, dying at the rate of six feet an hour."—Rochester Democrat.

FOR SLEEPLESS ONES.

Various Simple and Harmless Remedies Alleged to Cure Insomnia.

Do you lie awake at night and anatomize the man who first suggested the connection between sleeplessness and guilty consciences? Have you counted all the clocks in the house striking all the hours of the night, at different times? Have you tried to fix your mind on something impersonal and failed? And have you finally come to the conclusion that there were many arguments in favor of the chloral habit?

If you have done these things, of course the indications are that you need a doctor, but it is not always convenient to summon a physician at 1 o'clock in the morning simply because you can't sleep. It is better to read, work and learn a few cures for insomnia, which you may try over night and see a physician in the morning.

If you fear a sleepless night, undress in the dark. Light stimulates and arouses the activities. Darkness is supposed to produce drowsiness. Put some chipped ice in a rubber bag and place it at the lower extremity of the spine. This is particularly quieting to the nerves. Do not use anything except a rubber bag, or you will surely have a damp cloth and rheumatism by morning.

Do not use a pillow. Relax every muscle as far as it is possible. Sprawl over the bed with arms and legs stretched out. Take a sponge bath with tepid water just before going to bed.

Lie on your face instead of on your back. That is the way babies sleep, and their methods are scarcely to be improved upon in this particular. All pressure is removed from the spine by this means, and a delicious feeling of restfulness ensues.

Make up your mind that you want to keep awake long enough to hear some one come in or to outline the next day's work. You will drop asleep immediately.—Philadelphia Times.

An Orang-Outang's Nest.

The nest of an orang-outang has been placed in the natural history museum at Berlin by Prof. E. Salenka, and Prof. Moins has discussed it in the Berlin academy. Prof. Salenka removed the nest himself from a tree in Borneo. The nest, which was situated about thirty feet from the ground, in the crotch of a tree forty-five feet high and about one foot in diameter, measured four and one-half feet long, one to two and one-half feet wide, by about seven inches high. It is made of twenty to twenty-five branches locked and twined together, and is large enough for a full-grown orang to lie in it at full length, though this monkey probably always sleeps as it does in captivity, with legs drawn up and arms crossed over its body. The so-called nests of the orangs are not skillfully built huts or closed shelters for new-born young, but simply sleeping-places as young careful observers of these monkeys in Borneo have established.—Detroit Free Press.

TEMPERANCE NOTES.

A FEROCIOUS MONSTER.

An Over True Tale of the Awful Appetite for Drink.

I remember a tract—a temperance tract, I suppose. It would be perhaps with this fearful title: "Don't Unchain the Tiger." And I suppose the tiger meant the fearful appetite, which, once aroused, is fierce beyond all resistance. Men say: "O! I can stop at any time. It is perfectly easy to give it up. I'm not a slave."

But in fact, *they never do*. And now and then, one will confess to being aware of this, sensible of the bondage, and yet perhaps powerless to resist it. We remember a case, a case that occurred long ago; probably all concerned have done with the world and its cares, its honors and its fears.

Two or three friends met to consider Mr. X., their friend, was genial and pleasant, a good friend, a good neighbor, a useful man. But this baleful habit had begun to lay its hold upon him; he was in danger, in danger, perhaps more than even these friends were aware of. They could not see how the craving came upon him at night, when no eye could see, and how, by stealth, as if he felt he was watched, he took his composing draught.

"The use of alcohol and stimulants dulls the moral sense."

Habits are more easily formed than broken.

These friends concluded that something must be done, but each shrank from the hard task and the plain speaking that must come with the warning. Finally one was persuaded, and undertook, not in a formal interview, to see him alone. He took a fair opportunity, and in a pleasant and genial way began to approach the subject.

After a few minutes, Mr. X. interrupted him.

"Stop a moment, and hear what I have to say. You mean well. You are strong; I am not. There was despair in his voice. Then he poured forth his soul; he told of the miseries of drink, the disgrace, the horrors of the bondage, the useless struggles, and the miserable end. "And yet, he added, with despair in every line of his face, and a look of anguish in his eyes, "I CAN'T HELP IT."

While he was at work and among men, the temptation was ever before him. And alone and in seclusion, the appetite attacked him with tenfold force. The fault was in the beginning, the penalty in the ending. And the most fearful feature is the inheritance. "Therefore leave off contention—be fore it be meddled with." Let there be no beginning and then there may be an end.

A man who knew the curse of the inheritance, but whose moral nature was not yet quite deadened, and who fought the good fight, against fearful odds, was describing the conflict to his good physician.

Said he: "When the appetite comes upon me, I dare not pass a place where the bottles are shining and the odor comes to my senses. I go around, whole streets, to avoid it. And at times I am desperate. Why, if a bottle or glass stood upon that table, and was surrounded with knife blades in every direction, so that it would pierce my hand to pieces, I should plunge right in and seize it, even at the risk of my life. You've no idea." "That's the ticket," said his way!—National Temperance Advocate.

WHAT TO DRINK.

Plenty of Refreshments Without Recourting to Intoxicants.

Miss Ruth Hays was the leader of a temperance band of ten little girls. They met at her house on Thursdays at three o'clock. And there, under temperance news and stories, sang songs, spoke pieces, recited temperance lessons and talked freely on all that concerned temperance.

One day Lizzie Noyes said: "My Aunt Louise in the city says if we can't have any wine or eggs on Thursdays, parties and dinners it is just impossible to entertain company, and one can not be in society at all."

It was evident that all the girls who belonged to well-to-do families thought that this would be a dreadful state of affairs.

"Are there no temperance drinks?" asked Anna.

"Mrs. G— says that there are none fit for anything," replied Fanny.

"Now, girls," cried Miss Ruth, "I will invite you all to a lunch party here for Thursday at three o'clock. And I will engage to give you only temperance drinks, and each one a different drink."

When the girls were seated at table on Thursday Nora handed about the drinks, and here is the list, which Miss Ruth declared to be better than any wine list ever published:

1. Anna—Lemonade.
2. Laura—Lemon tea.
3. Mary—Chocolate.
4. Kate—Coffee with whipped cream.
5. Susan—Currant sherbet.
6. Ada—Raspberry vinegar with tea-water and sugar.
7. Belle—Milk.
8. Jane—Shaved ice, pineapple and sugar, with water.
9. Sara—Milkshake.
10. Nell—Fruit-ade: the juice of many fruits with sugar and water.
11. Miss Ruth—Water.

"Don't think I have used up all the temperance drinks," said Miss Ruth. "Nora shall have some hot tea with cream; that will be the twelfth drink. I could serve you a lovely drink, made of the strained juice of berries in water, sweetened to taste, and served with the white of an egg beaten in each glass. I think a cup of clear beef tea, or bullion, is a delightful drink; that is fourteen; and hot milk, which is wholesome and delicious, will count fifteen. In the country we could have buttermilk for sixteen, and a drink made of cold water, ginger and molasses, beaten together, which is very refreshing on a hot day, that counts seventeen. A glass with cream or new

milk, an egg, beaten, the white and yolk separately, a little sugar and a little vanilla or fruit flavor, makes a fine drinkable lunch for a feeble person; count it eighteen. The Scotch make a very nice drink of oatmeal stirred in water, with a little salt, pepper, and barley, boiled to a jelly, strained, flavored with sugar and lemon and reduced with pure cold water, is an admirable drink to make as number twenty. Now what do you think of temperance people who have nothing to drink?"—Julia McNair Wright, in National Temperance Advocate.

THE ARCH ENEMY.

Wreck and Ruin Wrought by the Demon, Drink.

Tonight it enters a humble home to strike the roses from a woman's cheek, and to-morrow it challenges this republic in the halls of congress. To-day it strikes a crust from the lips of a starry-eyed child, and to-morrow it leaves from the government itself. There is no cottage in this city humble enough to escape, no palace strong enough to shut it out. It defies the law when it can not coerce suffrage. It is flexible to the moral enemy of peace and order, the despoiler of men, the terror of women, the cloud that shadows the face of children, the demon that drags more graves, and sent more souls unsaved to judgment than all the pestilences that have wasted life since God sent the plagues to Egypt, and all the wars since Joshua stood beyond Jericho. It comes to ruin, and it shall profit mainly by the ruin of your sons and mine. It comes to mislead human souls, and to crush human hearts under its grinding wheels. It comes to bring gray-haired mothers down in shame and sorrow to their graves. It comes to change the wife's love into despair, and her pride into shame. It comes to still the laughter on the lips of the little children. It comes to stifle all the music of the home, and fit it with silence and desolation. It comes to ruin your body and mind, to wreck your home, and it knows it must wreck its prosperity by the swift and certain with which it wrecks this world.—Hon. H. W. Grady, in National Temperance Advocate.

A DEADLY SHOE.

Experiments with Alcohol Show Some of Its Terrible Effects.

That alcohol is a deadly and insidious foe to life is constantly being shown by the facts of science. The latest noteworthy developments along this line are brought out by a French scientist and summarized as follows:

It was shown by experiments with hen eggs, exposed to the vapor of alcohol, that such eggs, as a rule, do not hatch out. And when they do, they often produce monstrosities. M. Fere, who made the experiments, concludes that, similarly, in the human species, the low and degenerate of persons addicted to alcohol are attributable to that habit. Development is checked, not only in the user, but the effect is transmitted to the offspring of an alcoholic person. Fere's experiments with absolute vapor on hen eggs also resulted in the production of monstrosities.

This is not the first time that the striking fact has been intimated that the decreased birth-rate and actual falling off of population in some countries—namely France, where the effect of the alcohol habit is shown at its worst in the frightful consumption of the deadly absinthe—is due to alcoholism. If modern civilization is not to decay before its time, it must take means to curb, and that right speedily, the alcohol habit.—The Voice.

Insanity from Drink.

Intemperance in drink breeds the list of physical causes of insanity, and domestic trouble and grief the moral causes, but out of over 2,000 cases of insanity we find intemperance in drink the cause of 577 cases, or 27.4 per cent., and domestic trouble and grief in only 72 cases, or 3.4 per cent. There can be no doubt that intemperance in drink is the cause of insanity in fully 25 per cent. of all the insane cases in the United States, either directly or indirectly. It is also responsible for very much of the imbecility and idiocy of the offspring of intemperate parents. Fifty per cent. of all our idiots and imbeciles are directly or indirectly the offspring of drunkards. Where strong liquors are increasingly consumed we find a proportionate amount of alcoholic insanity. Where the consumption of alcohol doubles, there we find the cases of insanity from intemperance will rise over fifty per cent.—National W. C. T. U. Bulletin.

VARIOUS NOTES.

Is the province of Canterbury, England, there are one thousand parishes in which liquor saloons have been voted out, the voter being the landlord.

The excuse of the inebriate often is: "My heredity is against me." But the reply of the "white ribboner" is a good one: "If you had lived up to your heredity instead of down to your worst, you might have had cause to extol your heredity."—Chicago Standard.

ABRAHAM KEBELLA, a Syrian missionary now in this country, says that in Syria and also in Egypt, there is no open saloon, and very little intoxicating drink is used, and if it is known that anyone has once been drunk in his life, his evidence will not be accepted in court.

The Dublin yearly meeting, also representing the Society of Friends in Ireland, have just taken an advanced step. "The general adviser" in the book of discipline, enjoins friends to "avoid the unnecessary use of intoxicating liquors." They have struck out the word "unnecessary" and have substituted the words "to discountenance the use and sale of intoxicating drinks."

To use an intelligent idea of the vastness of the drink bill of the United States for 1902, \$1,300,000,000, we must make a few comparisons: The net earnings of all the railroads of the United States in 1901 was only one-ninth of the liquor bill. The entire expenses of the United States government are only about one-half what we pay for intoxicants. The aggregate capital of all our national banks is about \$700,000,000, or but little more than one-half the amount squandered on drink each year.

MISCELLANEOUS.

A bookseller's trust was formed in London as early as 1829, for the purpose of crushing out the small book dealers. Coal tar yields sixteen shades of blue, the same number of yellow tints, twelve of orange, nine of violet and numerous other colors and shades.

Mirabehn L. Towns, of Brooklyn, recently presented his client's case in a local court exclusively in rhyme. He wants to be considered versed in the law.

—So there are no seats left for the new play?—No, but it doesn't matter; I know a place where we can see just as lovely hits as we can there.

—Inter Ocean.

—Logographic printing, the most common words being cast in one piece, was attempted for books in 1785, but soon abandoned, later being so convenient as the single letters.

—Judge: "Well, doctor, what is the condition of the burglar's victim?" Doctor: "One of his wounds is absolutely fatal, but the other two are not dangerous, and can be healed."

The blessing of an active mind, which is in good condition, is that it not only employs itself, but is almost sure to be the means of giving wholesome employment to others.—Anon.

—Ah, Long—No, checkmate, no checkmate, O'Flaherty. "O'Flaherty, checkmate, later, begone!" Ah, Long—No, checkmate, no checkmate, O'Flaherty.

—Rats: Ah, Long—Aller lighter, blinger me lats.—Arkansaw Thomas Cat.

—Russia and Italy are the two European countries from which have come the majority of the immigrants who have landed at Ellis Island during the first half of this year. The Russian Jews have brought more money with them than the Italians.—N. Y. Sun.

—Little Rock took its name from a boulder on the shore. It was said to be the first bit of stone seen by the voyagers on their way from the mouth of the river to that point, and so they named the trading station Little Rock.

—Additional evidence on the subject of the supposed heat from the sun's rays is furnished by an experiment recently conducted in France. A balloon carrying instruments was sent up a distance of ten miles above the earth's surface, where the temperature registered was found to be 104 degrees Fahrenheit.

—Count Renato Piola-Caselli, who was one of the world's fair commissioners, came a good deal of money as interpreter for Indian litigants. Himself the daughter of an English speeding Delaware father and a Potawatomi mother, she has unusual qualifications for her work, and a superstition has got abroad that the side which retains her is sure to win.

—What do you think of that?" asked one man of another, exhibiting a ninety-eight cent umbrella from a bargain house. "I never pay more than fifty or seventy-five cents for an umbrella," was the answer, "but I usually get a first-rate silk one at that price."

—There were 42 war vessels launched in 1901, aggregating 100,000 tons. The vessels, by nationality, were: France, 12; United States, 10; Russia and Brazil, each 5; Great Britain, 3; Austria, Denmark and Haiti, each 2; Argentina, Chile, China, Germany and Italy, each 1. Three of France's, both of Denmark's and all of Brazil's vessels were torpedo boats.

Theodore Depompon, a prominent citizen of Belleville, N. J., found cherry thieves in his garden recently, and struck at one with a club as he was trying to escape over a barbed-wire fence. The blow was aimed at the hips as the man was leaning over the fence, but the vice broke, and the man fell squarely on top of his head. The man dropped like a log, and was dead in two hours.

—The black-eyed Susan, that brown-and-golden flower of the sun, is here. It loves the open, sunny meadows, and the stalk and the blossom grow in great luxuriance as the season advances. Here and there the high brown center is streaked with powdered gold, as if it were a touchstone newly used to test the precious metal. The additional touch of beauty, however, is only conferred that the fertilization of the seed may be insured. The gold dust is pollen.—N. Y. Sun.

—This is the time of year and this the particular period when the house dweller comes out after dinner and sits on the stoop to get the fullest benefit of whatever air there may be stirring; and this is also the exact time when the vendor goes about selling those disks of straw or dried grass, which are variously known, according to whether they are sold in the city or the suburbs, as stoop seats, or veranda seats, or lawn seats. One of these seats placed carefully on a brown-stone step softens the stoop materially, and adds greatly to the sitter's comfort.

—H. W. Allen is a man who lives in Rockford, Ill. He travels for a wholesale grocery house. He has a wife and a baby. The other day he threw his shoulder out of joint. He had a trip mapped out that it was necessary should be made. His wife told him that if he would undress the baby she would make the trip for him. He laughed her to scorn, but she was in earnest, and she took his sample case and went the rounds. The result was that, while he made a rather poor list of taking care of the baby, she got ten pages more orders than he ever secured in one day in all the years he has been on the road. The firm has written to Mr. Allen, suggesting that he trade jobs with his wife permanently.—N. Y. Grocer.

HEMLOCK BARK IN VERMONT.

An Important Industry of the Green Mountain State.

The manufacture of leather depends, to a very large extent, on the chemical property, which tannin acid possesses, of uniting with albumen and forming a hard, insoluble compound, which may be said to be the basis of leather. Tannic acid—or, as it is more commonly called, tannin—is found in the bark of nearly every species of forest tree, but the quantity in most trees is small. In fact it is found in but four species of trees in sufficient quantity to be an article of commerce. These are the sumac, palmetto, oak and hemlock. Of these, the hemlock is the only kind found to any extent in Vermont, and the preparation of its bark forms an important and profitable industry for the farmer and lumberman. There are no accurate statistics available relating to the production and consumption of hemlock bark, but from such data as I have been able to obtain by personal inquiry at several tanneries, the amount consumed in this state alone cannot be less than ten thousand cords. Of late years, however, the use of late years has been much used for making shingles. For fence posts hemlock is classed equal to white cedar, though far inferior to the red kind. It will thus be seen that the timber products of the hemlock are by no means inconsiderable, and the bark equally valuable for all the rest of the world.

Hemlock lumber is coarse grained and not very strong. It takes no polish and cannot even be planed smooth, hence it is not very valuable. Still, it is durable and makes good fencing and is much used in building and for stable flooring it is unexcelled.

HIS SPEECH BETRAYED HIM.

How a Beggar Proved Himself to Be an Arrogant Impostor.

Look out for young men with a sandy mustache, of diminutive proportions, fair complexion and light blue eyes, and an imitation British accent, who are going around the city appealing to the sympathies of those whom he judges by their appearance to be Englishmen. He is an arrogant impostor, deserving of punishment instead of sympathy.

The other night on Madison street he unfolded a tale of woe which was anything but confirmed by his well-fell appearance. I listened to it with the sympathy of those whom he judges by their appearance to be Englishmen. He is an arrogant impostor, deserving of punishment instead of sympathy.

"What were you doing in England before you left?" "I was a clerk," pronounced it as it was spelled, "in a store in Liverpool."

"You haven't yet become an expert professional beggar," I said to him, "although you seem to be making a pretty good thing out of it. If you had only left England six weeks ago you would have said that you had been a 'clerk' in a Liverpool shop." Just remember that when you next try to take in an Englishman and it may be dollars in your pocket.

But the migratory scamp, instead of appreciating my disinterested advice, hurled this at me:

"You are Mr. Mean, from Meaville, and I wouldn't take a dime from you if the drinks went along with it."

His speech betrayed an intimate acquaintance with American slang which it would take an Englishman long years to acquire.—Chicago Times.

Superstitious Frenchmen.

In some of the more strictly French sections of New Orleans the superstitions of the Helio European people still survive. One of the most peculiar of these is that a loaf of bread thrown into water will act as a diving bell, and locate the presence of a dead body. Some time ago a small party of citizens of French extraction were trying this experiment. One of their friends had been missing for several days, and the impression had gained ground that he had drowned himself in the river. So the friends had started out to ascertain definitely whether this was the case. When I saw them they had been working long enough to see their abandonment of the task. The general satisfaction all felt was due to the fact that the bread had not been attracted to any specific spot, this being in the opinion of the searchers proof positive that the man had not been drowned in the river at all.—St. Louis Republic.

Pneumatics tires have been found very serviceable on hospital ambulances.

THE OLD SPANISH COINS.

Recollections of the Tips and Levies of Our Grandfather's Days.

"No one born in this generation in this country knows anything about the old-time tips and levies that constituted a large portion of the subsidiary coin in circulation as late as the breaking out of the civil war," said Col. C. A. Pine, of the Port Jervis Gazette, who remembers everything. "These were Spanish coins, and they got into circulation in this country through some pecuniary settlement between the governments of the United States and Spain."

"Fifty years ago very few silver coins from our mint were in circulation, especially the smaller ones. A few half dollars and dollars were in use. The Spanish small coins were essentially the people's money in those days."

"The tip represented the one-sixteenth of a dollar, the levy one-eighth of a dollar. The tip was the abbreviation of an abbreviation of five-penny bit. When people spoke out the whole of penny bit they said in talking of a five-penny bit they said it a five-penny bit, but just tip was sufficient for ordinary everyday transactions. Similarly, folks didn't often say eleven-penny bit. They contracted it to levy. That is, except in New York state, northeastern Pennsylvania, and northern New Jersey and in New England, where they had no use for either eleven-penny bit or levy. In those localities the levy was a shilling."

"But in southern New Jersey, southern Pennsylvania, Delaware, Maryland and other border states, if you said shilling people wouldn't know what you meant. They called it a bit. Further south a levy became a bit, and the tip was a pittance. This was especially the case at and about New Orleans, and this nomenclature was carried up the Mississippi river by the popular means of communication in those days, the steamboat to Rock Island, Dubuque, Galena, St. Paul and other river points."

"In the same way the terms were carried from New Orleans up the Missouri river as far as the white people had pushed their way, up the Ohio to Louisville and above, and in fact, the Pacific coast was settled by people from the east. In the west it was easy to tell from what part of the country a man had emigrated, according to the way he handled the names of the coins. It is safer, he was sure not to be from the New England States, New York, northern New Jersey or northern Pennsylvania."

"These Spanish coins must have been circulated many years, for they were generally worn very smooth. Of them were so smooth, in fact, that they were used as buttons. The rule was that if the pillars on them could be plainly seen, the coins were all right. I have seen tips that were so smooth and thin that they resembled nothing more closely than a sand scale, and levies that had been so worn that they would not pass current. They were used as buttons on the coats of the poor."

"Some parts of the country, notably in the southwest the tips and levies were rated equal with five-cent and ten-cent pieces, but in the east, and particularly in Philadelphia and the Quaker country about it, the people wouldn't have it. They said, 'they called it eight levies made a dollar, while it required ten ten-cent pieces to make a dollar. Hence, if the levy had been recognized on a par with the dime, the frugal Philadelphia argued that he was out just twenty-five cents on every deal of that kind. Then again, twenty recent pieces had to be got together before a man had a dollar, whereas he only had to accumulate sixteen tips to have the same amount. This was because the levy was valued at twelve and a half cents and the tip at six and a fourth cents. The same rule existed among those who called the levy a shilling."

"Down south, however, there was more flexibility in the rule of value of these coins, and they were passed for either their face value or as dimes and half-dimes. This was owing to the contempt and indifference with which the southerners of that day regarded small coins. They held pennies especially in contempt. Back in the early fifties a Vicksburg gentleman told me how the people of that town scorned to take pennies in change at the post office, and hurled them contemptuously off the counter to the floor, from which even the 'niggers' wouldn't condescend to pick them."

"Those old Spanish pieces, worn as they might be, contained more pure silver than the newest of our own coins, and one of them, he was a great curiosity to-day."—N. Y. Sun.

The Summer Bedroom.

However the summer bedroom may be furnished and whatever part of the house it may be in, it should be well ventilated, and yet arranged so that all the glare of the morning light may be shut out. Young people, who are good sleepers, do not notice such irritating conditions so much as older people, who become more sensitive as their nervous system becomes worn. The heavy, thick, green shades which people sometimes add in addition to the regular shade, are objectionable, because they also shut out the air. Inside blinds, with awnings over the windows to shade the light from the top, seem to solve the problem as well as it can be solved. Where there are no inside blinds a lattice screen and an awning shade the window in an ideal manner. Outside blinds are too cumbersome to open and close every day, and they are virtually abandoned, the more picturesque awning being substituted for them.—N. Y. Tribune.

The Acme of Homeliness.

"I think Mrs. F. is the homeliest woman I ever saw. 'Why, she's homely enough to stop a—a—"

"Clock?"

"No; a trolley car."—Brooklyn Life.

A company is forming in St. Petersburg for the purpose of establishing extensive cotton plantations on the Bolshaya banks of the Amur-barya, the great river of central Asia.

MARRIAGE STATISTICS.

Some Interesting Facts Concerning the Married and Single in America.

There is one divorced person to every 185 married couples in the United States. Of the entire population of the United States, on June 1, 1900, nearly three-fifths were single.

According to the census reports there are 19,045,576 males and 17,181,988 females in this country who have never been married.

Notwithstanding a belief, to the contrary, the per cent. of divorced people, as compared with the population, is very small, amounting to a fraction of one per cent.

The number of divorced men is 95,101, while the number of divorced women is 71,806. The excess of divorced women is accounted for on the ground that a great many divorced men failed to report themselves.

All men in this country could not marry if they desired, because there are not women enough to go round. Census revelations show that there are 1,422,410 males who would have to view conjugal happiness through other eyes than their own.

The widows are very much in evidence in America, according to the census taker. Carefully gathered figures show that there are 2,154,015 widows and only 815,437 widowers in the land. Add this excess of widows to the other unmarried females and there are yet 1,422,410 more unmarried men than women in the United States.

In a table setting forth the conjugal condition of the aggregate population, subdivided according to sex and age groups, it is shown that there were twenty-three males under the age of 15 married and 1,411 females. One male of younger than 15 had been separated from his erstwhile wife through the instrumentality of the divorce court, while twelve females of like tender age had been relieved from unhappy conjugal relations through the same channel.

Between the ages of 15 to 64 the proportion of married males had diminished to 82.34 per cent. and that of married females to 90.35 per cent. For the age group representing persons 65 years and upward seven-tenths of the males were found to be married, while the proportion of females was one-half as great, or 55.35 per cent. of all females of the ages stated. The proportion of widows was greater than that of widowers at all ages. It became appreciable between the ages 15 to 19 and increased rapidly. For females 65 years and upward the proportion of widowers exceeded the proportion of married women. The proportion of widowers was less than that of married men for each age group.

Of the percentages relating to sex and age groups the bulletin says: "Of the males under 15 years the proportion of married was inappreciable, while of the females under 15 about one in every 10,000 was married. Between the ages of 15 and 19 only 2.3 per cent. of the males were married and 9.49 per cent. of the females. Among those of 20 years of age and upward the proportion of the married increased with great rapidity with both sexes. Between the ages of 20 to 24 less than one-fifth of the males were found to be married, while of the females nearly one-half were married. Between the ages from 25 to 29 over one-half of the males and nearly three-fourths of the females were married. Between the ages of 30 to 34 nearly three-fourths of the males and four-fifths of the females were married. Up to this point the proportion of married females in each age group was considerably in excess of that of males."—Chicago News.

ABOUT SQUINTING.

Some Cures That Were in Vogue Half a Century Ago.

The most common form of "squint" is that in which the globe of the eye is turned inward. Fifty years ago "cross-eye" persons must have been much in evidence, judging from the forms of treatment laid down in the standard text books of that period for the relief of the deformity. Nothing was known of the deformity of its causation, the treatment of it, of course, was entirely at fault. Most elaborate reasons were assigned in the endeavor to account for its appearance. One distinguished author attributed "squint" to "the bad custom which nurses have of holding a child in such a position in its cradle that it sees the light or any other remarkable object with only one eye."

Reading between these lines, it is almost impossible to avoid exclaiming: "Poor nurses, poor children!" for under these circumstances a nurse with the certain to be consumed for her alleged carelessness, and a child as it grew older would be certain to be subjected to a treatment of a rather excessive disciplinary character for having had the audacity to acquire "squint." But it was in the treatment of this affection that our predecessors excelled. There was laid down that one method of curing a squinting eye was "to make a child look often in the looking-glass, because 'the child will see the squint and correct it.'" It was further pointed out that this was a useful means of cure "when vision is sufficient, as it sometimes is, to prevent the squint."

Imagination pictures a child being dispatched to its bedroom every day for half an hour for the purpose of gazing at itself in the looking-glass and having to perform this lunge time after time, the same regularity as that of learning its scales on the schoolroom piano. Again the expression, "poor children!" unconsciously suggests itself. When the "cure" after this method was unsatisfactory, doubtless the failure was attributed to some defect in the "condition" for which, of course, no one could be blamed except the child. In some cases the squint was attributed to a child's bad temper, but at the eventualities suggested by the mention of such a subject as this had better be left undisturbed.—Nineteenth Century.

The United States manufactures more iron, steel, copper and lead than any other country on the globe.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made otherwise, at the risk of the sender. Address, THE REPUBLICAN, Oakland, Md.

THURSDAY, AUG. 9, 1894.

A DISPATCH from Rome to the London Times of July 25 states that in the fortnight preceding 530 anarchists were arrested, and since May 1 no fewer than 3,500 have been taken in custody. Large numbers have been released, and it is computed that 1,000 of them have sailed for America. This is hardly a desirable addition to our population. Congress will do well to consider whether any law it may pass to regulate immigration may not be so framed as to exclude an element whose creed leads it to plot the destruction of all government.

Free Wool and Its Effect.
If wool be put on the free list the American wool grower will have to submit to the disadvantages of raising wool in this climate on even terms with his foreign rivals, who do not have such difficulties to contend with, and so without adequate protection must necessarily be driven out of the business. Our seventh largest agricultural industry, producing annually \$60,000,000 worth of wool, and representing an investment of \$200,000,000 in sheep, will be destroyed by Free Trade. Sheep will be fattened and will then be sent to market as food, and flocks will disappear forever. Our food supply will in time thus be decreased and our manufacturers eventually will be driven to buy their wool in London or in Australia. Gold will thus be sent out of the country again, increasing the harmful influences that must follow with the balance of trade permanently against us. The wool growers will be forced into some other industry. They would probably plow up their present sheep pastures when the land is suitable and raise wheat, of which we already have an overproduction and a surplus. It is to the interest of American farmers to diversify their industries and to produce such articles as will find a market at home instead of abroad. The present administration favors the glut of a few products with their consequent cheapness to the producers.

Pensions.
It will be remembered that the Administration, in making up its estimate for the expenses of the Pension Bureau for the present year, made a very material reduction from that of the preceding year. It was a question in the minds of a good many old soldiers how this saving could be effected when they knew that the pension roll was being still augmented. The whys and wherefores of this reduced estimate is being made apparent to a great number of the old soldiers and pensioners of Garrett county at this time, and it is not half so hard for them to understand this lesson in Democratic financial and pension methods. It is a common occurrence, laterally, to meet men coming from the post-office in this and other towns of our county, with down cast faces, with the suspicion of a tear lurking in their eyes, and if one takes the pains to enquire the cause of their dejection he will be answered, "I have received notice that my pension has been either reduced or entirely taken away."

Of course the Administration is going to save that \$25,000,000. Of course they are going to show a reduction in the expenses of the Pension Department, but the methods and means by which this saving is to be made should cause a blush

of shame on the face of every true, patriotic and loyal American citizen. They will save the money, perhaps, but the suffering and the misery which this saving entails will hang as a mill-stone about the neck of the Democratic party and will eventually drag it down into that oblivion which it so richly deserves.

Can any man, knowing the treatment which the defenders of the constitution and the saviors of his country are receiving at the hands of this Administration, longer countenance, give aid and comfort to the Democratic party?

No Women in Heaven.
The Rev. Dr. Matley of the Concord Baptist church of Christ at Brooklyn, N. Y., is likely to encounter a storm of feminine vituperation on account of a recent sermon in which he dealt upon the fact that the Bible nowhere speaks of a woman being in heaven. "I don't believe there is a woman there now, or ever will be," he declared. His theory is that all members of that sex "will go back into their original state whence they were taken by the Creator," and that when the Savior said that there were no marriages in heaven, but that all should be as angels, "he meant that there were no such creatures as women in that world of blessedness and song." This view is not an agreeable one, to say the least, and it is to be hoped that Dr. Matley is mistaken. A heaven without women would certainly be a mockery to men.

Communicated.
To the Editor of the Republican,
Primarily the people are responsible for the condition of their schools. If they want good schools they can have them, and if satisfied with poor ones they are sure to be of that character. Determine that your schools shall take rank with the very best in the State.

I have read three articles published in the last two issues of THE REPUBLICAN. To be frank I am not in sympathy with any one of them as a whole. The right spirit is not manifested—simply laying the foundation for a general wrangling which will result in great injury to our schools. This we cannot afford. Our schools are poor enough now. I believe now, under existing circumstances, that to pass the bond bill would be wise. I see no other way to save our schools. The small increase in taxation would be insignificant compared with the loss our children would sustain should the bill be defeated—an incalculable loss to them and our school term cut down to about two months—a little better than no school. Let us then do all we can for better schools.

It appears now as if it is Oakland vs. The County or The County vs. Oakland. I am not a citizen of Oakland but feel that as a people our interests are common. I will also say that I think our school authorities have made a mistake in going ahead to build in Oakland. It is surely premature. They should have waited for the result of the election. We believe and all others are with us, that Oakland needs a school building; in fact I believe she ought to have two and that the two could have been built for much less than the one now in course of erection and would have been more satisfactory to the people even of Oakland.

The frequent reference made that District No. 7 pays about one-fourth or one-fifth of all the taxes cut no figure as an argument for the action taken by the School Board. The tax rate is the same all over the county and the poorest district in the county is entitled to the same consideration as the wealthiest. Give all the children of the county an equal chance.

Let us as a people be a unit for better schools. Y. Z. X.

Married.
CUMMINS.—GRANLEE.—On July 4, by the Rev. George W. Kepler, at the New Glade Hotel, Oakland, Mr. John B. Cummins, of Monongalia county, W. Va., and Miss Amanda B. Granlee, of Greene county, Va.

DAVIS.—FISHER.—On July 10, 1894, by the Rev. George W. Kepler, at the M. E. parsonage, Oakland, Mr. George Davis and Miss Margaret B. Fisher, both of Keyser, W. Va.

PELL.—GLENN.—On August 1, 1894, by the Rev. George W. Kepler, at the M. E. parsonage, Oakland, Mr. John R. Pell, of Independence, W. Va., and Miss Sadie Lee Glenn, of Grafton, W. Va.

SWIZER.—GAIN.—On August 6, 1894, by the Rev. George W. Kepler, at the Central Hotel, Oakland, Mr. Caleb L. Swizer and Miss Mary E. Gain, both of Doddridge county, W. Va.

Grantsville.
Sheriff Wegman and wife were in town visiting relatives over Sunday. Rev. George A. Royer and wife, of Accident, spent last week in town among friends and relatives. Prof. Reeser, of Franklin, Pa., gave an entertainment in the school house on the evening of August 1st. A large crowd attended the re-opening of the Reformed church on last Sunday. The affair was a success financially and otherwise. Rev. Leader, of Salisbury, preached the opening sermon, and the music was furnished by the choir of the St. Paul congregation of Keim, Pa. Miss Mary Bill, of Racine, Wis., and Mrs. Henry Bill, of Wheeling, W. Va., are stopping at Mr. Chas. Bill's.

Mr. E. W. Somerville and family have moved from this place to Hyndman, Pa. Rev. J. J. Young, D. D., of New York, arrived in town and will remain for some time. He will preach in the Lutheran church on the morning of August 12th in German, and in the afternoon in English.

Mr. Nathaniel Slicer and wife and Mr. Joseph Blocher and family attended the re-opening on Sunday last.

Miss Alice Weible returned to her home in Cumberland last week. Mr. Henry Wagner and family, Rev. J. J. Young and family, Rev. George A. Royer and wife, G. Doerr and sister and Thos. H. Bittiger attended the reunion picnic of the Lutherans of Somerset county, Pa., held at Yoders Station, Pa., on August 9th.

Mr. Samuel Sheets and family, of Frostburg, were in town Saturday night and Sunday.

Mr. Thomas B. Wiley and wife, of Bittiger, spent Saturday night and Sunday in town with his mother-in-law, Mrs. Winterberg.

OCCASIONAL.

Dear Park.
The farmers are busy harvesting their oats. The straw is short but the heads are well filled.

Between one and two o'clock on last Sunday morning thieves broke into Mr. W. C. Jones' store. They took the safe out to the door and there loaded it on a truck and hauled it about twenty-five yards when the truck gave way and the safe fell to the ground. They then broke the knob and part of one of the hinges off. By this time Mr. Jones was there and raised an alarm. He tried to shoot but for some reason his revolver would not work. Mr. S. P. Specht and others arrived and the thieves then ran along the boiling spring road. They fired a shot just as they crossed the railroad but whether it was at Mr. Jones or not I cannot say. The robbers had horses a short distance out of town ready to mount. Had they succeeded in opening the safe they would have received a poor reward for their labor, for there was only about one dollar in it. They got one or two dollars out of the till, two or three pairs of shoes and about thirty-five dollars worth of postage stamps, as the post office is in the store. In their hurry to get away they lost one pair of shoes. The thieves entered the carriage shop of Miller Bros. and there found tools with which to do their work.

There will be a meeting in this place on Saturday evening next for the purpose of electing trustees for the Union church and to make arrangements for the re-opening of the same. All interested are invited to attend, particularly the old trustees if there are any living. Late arrivals at Mountain Home cottage, Miss N. S. Murray, Baltimore; Misses L. O. and Bessie Fishback, and Mrs. T. Birney and family, Washington.

Reduced Rates to Washington, D. C.
The biennial encampment of the Supreme Lodge and grand-encampment of the Knights of Pythias of the world will be held at the National capital August 27th to September 5th.

For this occasion the Baltimore & Ohio Railroad Co. will sell round trip tickets at reduced rates from all points on its lines east of the Ohio River, August 23rd to 28th inclusive, valid for return trip until September 6th; a further extension of time to September 15th can be secured, provided the ticket is deposited with the joint agent at Washington, D. C., on or before September 6th.

The rate from Philadelphia will be \$4.00, Pittsburgh \$8.00, Cumberland \$4.55, and correspondingly low rates from all other stations.

Write For New Catalogue.
To the Central Commercial College, Cumberland, Md. Fall sessions begin September 3, 1894. Ten per cent. discount to September 10th.

Fruit and Vegetables.
Cheapest and best and freshest and everything satisfactory in the way of fruit, vegetables, melons, way down at H. E. Felty's grocery.

TALK ABOUT SUGAR.

Iron Ore and Coal Are Also Discussed.

RAW MATERIALS ARE WANTED

By the House Conference, Who Do Most of the Talking—Senate Members Growling Impatiently—Want Either an Agreement or Disagreement.

WASHINGTON, Aug. 8.—The tariff conference was entirely subordinate to the house caucus and was devoid of interesting features. The conferees held two brief sessions during the day and discussed the coal and iron ore question, besides reverting to the sugar schedule. The talk, however, served to no purpose, except to emphasize the fact that the disagreement is still unbroken and that very little if any progress is being made. The purpose of taking up the sugar schedule again cannot be learned. It is also impossible to ascertain what reason the house conferees assigned for declining to accept the sliding scale on coal and iron ore proposed by the senate conferees. It would appear from all information that can be secured that without giving any special reason they resumed their argument for free raw material.

It has come to be understood that in these meetings the house members are doing the greater part of the talking and that the senators have been very impatient listeners. The yielding of Senator Voorhees has led the house conferees to the conclusion that other conquests are possible. On the other hand, the senators have not consoled their impatience at the delay and the senate conferees have expressed and re-expressed their conviction many times during the past week that if an agreement is not soon reached the situation demands the reporting of another disagreement. This sentiment found utterance more than once and being reported in the senate chamber last night the conferees of the report that either an agreement would be reached or a disagreement decided upon today. When asked as to the foundation for this report one of the senate conferees stated that it was among the possibilities, but he would not say that it was possible.

There are some indications that an early conclusion of the conference may be brought about. One of these is the fact that Senator Gorman has been making careful investigation of the status of the bill in case a report should be made. Certain of the conservative senators have been very impatient of the delay in conference, and it is known that a resolution discharging the conferees from the further consideration of the bill and referring it to the committee was drawn up by one of them on Monday, and would have been presented on that day but for the interference of members of the conference committee. There is still talk of the possibility of such a motion, but it will not be made except with the consent of the senate conferees.

VICTORY FOR CONFEREES.
The House Democratic Caucus Adjourns Without Taking Action.

WASHINGTON, Aug. 8.—Chairman Wilson and his associate house tariff conferees scored a victory when the house Democratic caucus called with a view of terminating the tariff struggle by instructing or advising the house conferees, adjourned without taking any action. The effect of this was to leave the house conferees to proceed as they saw best, and show conspicuously that the effort to advise them had failed. The caucus was called to order by Chairman Holman. The roll call disclosed 109 members present. The meeting was opened by Mr. Bynum offering a resolution, calling on the senate and house to assist in the passage of a tariff bill by making mutual concessions. The proposition created the debate, which lasted for over an hour, and developed such strong opposition to any interference on the part of the house Democrats with the conferees that Mr. Bynum withdrew his resolution and the caucus adjourned.

Postmasters to Take Postmaster's Oaths.
WASHINGTON, Aug. 8.—Mr. Gallinger has favorably reported to the senate bill authorizing fourth-class postmasters to administer oaths to pensioners.

Were Forbidden Each Other's Company.
CHICAGO, Aug. 8.—Two Southside girls, Ida Dreyer and Hattie Johnson, have been missing since Sunday and it is feared have committed suicide. They had been for relatives, and becoming dependent the girls threatened to jump into the lake together. The police were notified and are now dragging the lake in hope of finding some trace of the absent young women.

Sensational Developments Expected.
HAMMOND, Ind., Aug. 8.—Miss May Livingston, one of Crown Point's belles, has begun a breach of promise suit against Prof. George W. Christie of Hohart, placing damages at \$10,000. The fair plaintiff alleges that the professor is trifling with her affections for the past two years. Sensational developments are expected.

Suicided Over Her Children.
NEW YORK, Aug. 8.—Mrs. Adelaide Stock, 35 years old, has committed suicide because of dependency over the death of her two children. The children died within a few days of each other in July and since then the mother has been melancholy. Standing before a mirror, she shot herself in the head, the bullet causing instant death.

Shorter Route to the Pacific Coast.
KANSAS CITY, Aug. 8.—It is announced here that the Burlington route's new spur, Sheridan, Wyo., to Billings, Mont., is fast approaching completion. The new line will make the distance from Kansas City to Portland 400 miles shorter than any other line and will shorten the mileage to Puget Sound 300 miles.

Iowa Town Has a Big Fire.
DES MOINES, Aug. 8.—Fire at Adair consumed 20 business houses and three residences, loss \$152,000, insurance one-third.

HORRIBLE DOUBLE TRAGEDY.

A Husband Cuts His Wife's Throat and Then Suicide.

CHICAGO, Aug. 8.—Henry Russell, colored, murdered his wife Carrie by cutting her throat with a razor. He then ended his own life by slashing his own throat. The scene of the tragedy was in the building in the rear of No. 6 South Sheldon street. The couple lived on the second floor. Russell came to the house and commenced quarreling with his wife. In a short time the woman was heard screaming and several men who went to her assistance were driven out by Russell, who threatened to kill them if they came back. The police at the Lake street station were notified and Sergeant Ellwood and Officer O'Connell were sent to the house. Before they arrived Russell had cut his wife's throat from ear to ear and then taking the dying woman in his arms he bore her to the window and hurled her out into the yard.

He then stood at the window with a bloody razor in his hand and looked down upon the apparently dead form of his wife. Before any one could enter the house and seize him, the desperate man threw the bloody razor across his own throat. The first gash did not seem to have any effect upon him and he again brought the razor into play and slashed and hacked at himself until he fell dying to the floor. He expired in a short time.

The woman died while being taken to the hospital. Russell had frequently threatened to kill his wife if she did not cease quarreling with him.

Will Comply With the Ordinance.
CHICAGO, Aug. 8.—The officials of the Lake Shore and Rock Island railroad have formally accepted the terms of the track elevation ordinance recently passed by the city council and agreed to proceed immediately with the work of raising the tracks. This announcement was made to Mayor Hopkins, and with it was posted the deposit of \$100,000 as a guarantee of the fulfillment of the terms of the ordinance.

Window Glass Men In Session.
CHICAGO, Aug. 8.—Fifteen window glass manufacturers from Pennsylvania, Ohio and Indiana are in session here. The principal object of the meeting is to appoint a wage committee to confer with the workmen in the factories and arrange a wage scale for next year, which is usually done in September.

Verdict Expected Today.
KANSAS CITY, Aug. 8.—Judge Wolford has handed down the court's instructions in the Sattley trial and the arguments both to begin. Each side was limited to six hours. The instructions are considered favorable to the state case. It is probable that a verdict will be rendered today.

Prominent Newspaper Men Dead.
SAN FRANCISCO, Aug. 8.—Durant De Ponte, a prominent citizen of New Orleans, and at one time manager of The Picayune, died suddenly. He was 60 years of age. He was a native of New York and a grandson of Lorenzo DePonte, a Venetian dramatist, who wrote several librettos for Mozart.

Married Too Often.
NEW YORK, Aug. 8.—George H. Dickerman of Brooklyn has been given into the custody of officers from Peoria, Ill. Dickerman is under indictment at the latter place for larceny. The complaining witness is a Miss Price, whose family is wealthy and of the best social standing in Peoria.

Alleged Forger Sent Back.
NEW YORK, Aug. 8.—Frederick W. Leclerc, who was arrested about three months ago on the charge of forgery and embezzlement, while acting as city treasurer of Frankfurt-on-the-Main, Germany, has been sent back to that country. He has been in custody here awaiting extradition papers.

Weather Forecast.
Increasing cloudiness; possibly showers near the lakes; southwest winds.

PITH OF THE NEWS.

About 800 men are at work at the Pullman shops.
Augustus Nicola Caine, the French sculptor, is dead.
Bynum Association of Dentists is in session at Port Monroe, Va.
The house judiciary committee has recommended to exclude Japanese.

The British steamer Culmore was injured in a collision with an unknown schooner off San Francisco Bay.
Mr. Gray has introduced in the senate a resolution looking to having government printing done by contract.

The business portion of the town of Franklin, Ill., was destroyed by fire. The loss is not known, but will be heavy. Thirty members of Carl Browne's army captured a train near Atlantic City, but were driven off. Three of them were arrested.

The steamship Balmoral has arrived at Gravesend, England, from St. Petersburg and reported that one of her seamen died of cholera.

Mr. Shinichiro Kurino, the new Japanese minister to the United States, is on his way to his country and will arrive next month.

In an attempt to wreck a Panhandle passenger train in Chicago, an express and baggage car were derailed. No other damage was done.

Mr. Bries of Ohio, has introduced in the senate a bill for the appointment of a public building commission of three architects of high standing.

During the month of July the steamers leaving New York have carried 19,908 emigrants back to Europe, while the incoming steamers have brought only 11,849 steerage passengers.

Adjutant General Taraney was fined \$250 and cost by Judge Campbell at Colorado Springs, for contempt of court in refusing to appear before the grand jury at once and testify regarding the outrage of which he was the victim.

MUCH MORE SERIOUS.

Trouble May Arise Over the Omaha Strike.

NON-UNION WORKMEN SHOT AT.

Union Men Disclaim All Knowledge of Assaults Committed—Special Police Asked For—Many Desertions From Those at Work Claimed by Strikers.

OMAHA, Aug. 8.—The situation at South Omaha is more serious than at any time since the strike began and Adjutant General Gage is closely watching the angry strikers. All the packing houses are surrounded by strikers, most of whom are armed, and all persons desiring to enter the plants must satisfy the guards of strikers who are located every ten yards. The trade in revolvers has been rushing here for the last week. Pernis have been issued to many of the men to carry guns and each day the situation grows more serious.

"We must have better police protection," said Manager Cuddey. "The men who want to work are assaulted, both going and coming from home. We ought to have at least 200 specials for a while until this excitement abates."

A Frenchman who was anxious to go back to work but who was afraid he would be assaulted if he did, rigged himself out in a novel way and passed through the picket lines without being molested. He dressed himself in one of his wife's gowns and accompanied by her, the pair walked into the plant without any questions being asked. The Frenchman is now at work but he does not go home in the evening.

Anthony Franks, a man employed at Cuddey's, was pursued by strikers and fired at five times.

The executive committee of the strikers disclaim any knowledge of the assaults committed by the union men. They claim all the men who want to work are given strict orders not to create any disturbance whatever. The committee has chosen 15 citizens and will ask Mayor Johnson to swear them in as special policemen. The committee also petitioned the mayor and council not to employ any men as specials who do not live in the city. The picketers still claim that many more of their old comrades go back to work, but are afraid to do so for fear they will be assaulted.

The strikers claim none of the old men have gone back to work, but that on the other hand, the men who want to go back to work, but are afraid to do so for fear they will be assaulted. The strikers claim none of the old men have gone back to work, but that on the other hand, the men who want to go back to work, but are afraid to do so for fear they will be assaulted. The strikers claim none of the old men have gone back to work, but that on the other hand, the men who want to go back to work, but are afraid to do so for fear they will be assaulted.

Cases of intimidation are being reported daily at police headquarters, and the chief's attention has been called to several cases where men have gone to the homes of those who were at work and compelled their wives to go after their husbands and take them to their work, or if they would not do that, to suffer the consequences. In all instances of this kind the men have been compelled to quit work. It is claimed by the committee that 25 men have quit at Hammond.

Will Escort the New Vessels.

GIBRALTAR, Aug. 8.—The Japanese warship Satsuta, from New Castle, arrived here en route to Japan. The Satsuta is a new cruiser, fitted out as a cruiser, which were recently purchased in England for the Japanese government. On the high seas, these three vessels are to be transferred to the Japanese government and their equipment is to be completed in Japan.

Italian Banker Missing.
BOSTON, Aug. 8.—Druggio Turko, an Italian banker, has disappeared from bank at 215 North street in charge of a keeper. Turko went away last Friday and his wife has since followed. This led to an apprehension of the depositors, who have \$30,000 in the bank, which forced a temporary suspension. It is said that Turko is in New York.

Resigned on Account of Old Age.
COPENHAGEN, Aug. 8.—King Christian has accepted the resignation of Premier Jacob Broendum Seaveus Estrup, who retires on account of old age, and has appointed Baron Reede Thorst, minister of foreign affairs, to be president of the council of ministers, in place of M. Estrup, who was also minister of finance.

She Weathered the Typhoon.
SHANGHAI, Aug. 8.—The British bark Alchida, Captain Dart, which sailed from New York on April 14, has arrived here in a crippled condition. On Aug. 2 a typhoon struck the vessel. Everything movable was swept from the decks, ballast was carried away and other severe damage was sustained.

Consul Underwood Dead.
EDINBURGH, Aug. 8.—B. H. Underwood, the United States consul in Leith, the seaport of this city, died here of blood poisoning. Mr. Underwood's death was not unexpected, as he had been suffering for some time past.

The Steamer In Good Condition.
LONDON, Aug. 8.—The German steamer Porto Alegre, which was supposed to have been sunk by the steamship Lipmore Castle in a collision off the French coast last week, has passed Beachy Head apparently in good condition.

Claims Damages Against the State.
ALBANY, Aug. 8.—Frank W. Hawley of Rochester has filed a claim against the state for \$31,001 damages for the killing by the state of 150 head of cattle, said to be infected with tuberculosis.

Barnes, Benjamin Barnes, James H. Barnes, Louisa Barnes, George Barnes, Sarah Barnes, Thomas Barnes, Matilda Barnes, George Barnes, Mary E. Barnes, Samuel Barnes, Francis S. Barnes, Samuel Barnes, John F. Barnes, Mary M. Barnes, James Barnes, Edward J. Barnes, Howard Barnes, William H. Barnes, Benjamin T. Barnes, Alexander Barnes, Martha Barnes, Rebecca Barnes, Joseph Barnes, Ida Barnes, William Barnes and John Barnes, defendants.

No. 618 Equity. In the Circuit Court for Garrett County.

The object of this suit is to obtain a decree for the sale of certain real estate situated in Garrett county, and State of Maryland, of which one William Barnes died seized and possessed.

The bill states that the said William Barnes died about the year A. D. 1821, seized and possessed of certain real estate situated in Allegany now Garrett county, State of Maryland, described as follows: Known and designated as Military Lots Nos. 200 and 201, containing fifty acres each, and being the same land which was sold and conveyed to William Barnes by the State of Maryland on the 10th day of October, 1801.

The bill further states that the said William Barnes left a will which was duly probated in the Orphans' Court for said and real estate to his daughter Abigail for life and to her death to her son John Barnes.

The bill further states that the said Abigail Barnes and John Barnes are both dead and that by a proper construction of the will of William Barnes the said Abigail and John Barnes took but the estates in the said land of the reversion and that the heirs-at-law are now entitled to said real estate.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

The bill further states that the said William Barnes left surviving him seven children and heirs-at-law as follows: John Barnes, William Barnes, Elizabeth Barnes, Sarah Barnes, Hilda Barnes, Abigail Barnes, and Louisa Barnes, of whom William Barnes, Elizabeth Barnes, Sarah Barnes and Hilda Barnes were living at the time of the death of the said William Barnes.

the plaintiff by causing a copy of this order to be inserted in some newspaper published in Garrett county, State of Maryland, before the 20th day of August, 1894, and to the said clerk of the Circuit Court for said county, to the effect that the said order is to be in person or by subscription, on or before the 20th day of September next, to answer the premises, and show cause, if any they have, why a decree should not pass as prayed.

E. Z. TOWLER, Clerk.

BRITISH NEUTRALITY.

England Will Not Meddle In Japanese-Chinese Affairs.

Belligerent Ships Must Leave

Her Majesty's Ports Within Twenty-Four Hours After Arriving—Chinese Cruiser Captured by a Japanese Trading Bark—Russia's Movements Being Watched.

LONDON, Aug. 8.—An extraordinary gazette has been issued containing a proclamation by the queen of Great Britain's neutrality in the war between China and Japan. There is also published in the gazette a letter from the Earl of Kimberley, the foreign secretary, to the lords of the admiralty, setting forth the rules to be observed at the various British ports and harbors. A belligerent man-of-war must leave British waters within 24 hours after its arrival therein, unless the weather or the necessity of taking on coal or provisions prevents. In the event of a Chinese or Japanese vessel being in a British port together, an interval of 24 hours must elapse between the departure of the two vessels.

A dispatch from Tien Tsin says: "A Chinese steamer, the 'Kwangtung,' was captured by a Japanese trading bark and taken her to Taku. All pilots have been warned officially that they must not guide Japanese vessels nor give them any information as to the waters and coast. The rivers are falling steadily in consequence of the drought. It will soon be impossible for the Japanese to make a raid up the Pei Ho towards a Japanese edict issued since the declaration of war has been received by The Central News correspondent in Shanghai and says that the local authorities will be held responsible for the lives and property of the Chinese subjects remaining in the several districts. The Russian officials in Shanghai deny that Russian warships are going into the war to interfere. Russia's movements are watched very closely by Japan, because of the report of a Russian-Chinese entente. The weather on the China sea is so rough that the smaller vessels have been driven to shelter. The Japanese cruisers are supposed to be concentrated at Chemulpo.

Receiver For an Insurance Company. ST. LOUIS, Aug. 8.—In the district court John M. Cleland of this city was appointed receiver of the Underwriters' Mutual Fire Insurance company. The appointment was made on application of the attorney general of Iowa.

Will Accept the Scale. SPRING VALLEY, Ill., Aug. 8.—A mass meeting of the citizens of this town resulted in an unanimous vote to accept the Columbus scale, with several conditions of local importance.

Threatened by Forest Fires. STANTON, Mich., Aug. 8.—Forest fires are raging almost to the city limits on the south and west sides. A strong west wind is blowing. Many persons are fighting the fire.

In a Receiver's Hands. TRENTON, Aug. 8.—The New Jersey Flint and Spar company has gone into the hands of a receiver. The liabilities are placed at \$16,000 and the assets nominal.

More Cholera Cases. MAESTRICH, Aug. 8.—There were three new cases of cholera and two deaths here.

THE MARKETS. PITTSBURGH, Aug. 7. BUTTER

FARM AND GARDEN.

THE PEAR MIDGE.

Damage Done by This Pest and How to Hold It in Check.

The pear midge is one of the insects which has been introduced into the United States within recent years and is causing a good deal of injury in the eastern states, so that Bulletin No. 99 of the New Jersey station should be of much assistance to fruit-growers in that section, as well as in other localities where pear growing is extensively carried on.

The adult insect or fly is described as much resembling a diminutive mosquito. It makes its appearance very early in the season, before the pear blossoms open. The female deposits her eggs in the latter by piercing the petals or the calyx. The midge larva lives on the substance of the pear tissue, destroying the seed and checking the growth of the fruit, which decays and drops in early summer. Our illustration shows a sound young pear and one deformed by the pear midge larva.

The great difficulty encountered in fighting this insect lies in the fact that there is no period at which it is within reach of ordinary insecticides. The eggs are laid in the bud before it opens and the young larvae get into

SOUND AND DISEASED PEARS.

the heart of the fruit before it is fully formed. The adult fly does not feed and is hence beyond our reach. It is only after the injury is done that the insect goes underground and within reach of destructive agencies.

As a preventive measure it is recommended that the trees be examined as soon as the pears are well set, and that every unvested or suspected pear be picked off and completely destroyed, while if an orchard is generally infested the following practice is recommended.

Cultivated as usual or, if the orchard is in grass or clover, plow under after June 15 as soon as may be. Top-dress with kainit 1,000 pounds to the acre, to benefit trees as well as to kill the insects. As soon as proper, say early in August, sow crimson clover. This will use up the potash not required by the fruit trees, and will store nitrogen as well as occupy the ground. Early the following spring turn their sods under as deeply as may be proper. It should be done before the pear buds are developed in order to head off and destroy any midges then in the pupate near the surface of the soil. This practice is, at the same time, the best for the benefit of the orchard.

ADVICE FOR HAYMAKERS.

This hay loader is a great saver of labor, yet on many of the smaller farms it may not be good policy to purchase one.

If the hay is to be shocked, rake it in large windrows, and avoid twisting as much as possible in handling. Treated this way it is easier to load and there is less trouble in making a good stack.

It is best to start the mower in the morning after the dew is gone. If the hay is cut while still wet, especially if dew is very heavy, the effect will be somewhat like that of a light shower.

Where there is considerable clover mixed with hay it will pay to use a tedder, especially during rainy weather, where it is desirable to get it into the barn or stack as quickly as possible after cutting.

As a general rule timothy hay cut when about half through blooming is most desirable for all purposes. The leaves and stalks then contain the most digestible matter, seed does not shatter, and there is little waste in feeding.

After the hay is partially dried, put it into small shocks and let it there dry out completely. Cured in this way it retains a green color and is much more readily eaten. The object is to cure with the least possible exposure to the sun.—Orange Judd Farmer.

Proving Food for Plants.

There is perhaps no part of the farmer's work so deeply shrouded in mystery, and therefore so little understood, as that which relates to the selection and application of manures. Yet it is generally acknowledged that at a point of importance the question involved in this connection is unsurpassed. Manuring land is simply another term for providing food for the plants that may be sown thereon. The principle is the same as that observed in the feeding of animals; the difference is merely in detail. Animals we feed direct, plants we furnish through the refining agency of the soil. But in both cases we have first of all to ascertain the chief requirements of the "consumer," or what is practically the same thing, the special class of article it favors and responds to most liberally. The feeding of animals, however, complicated as it is, is even a simpler matter than the feeding of crop.—Colman's Rural World.

Meeting of Beekeepers.

The call has been issued for the quarter centennial convention of North American Beekeepers, to be held at St. Joseph, Mo., October 16, 17 and 18.

MARKETING HONEY.

Points to be Considered in Rendering Combs Attractive.

The finer grades of comb honey will perhaps always remain a luxury and progressive beekeepers will continue to produce it in the most attractive form possible. Most apiculturists recognize that it is the beautiful appearance of a section of honey, more than anything else, that helps to sell it. Although some place it for their own use or to give to their friends, they find great satisfaction in having it just as nice as it can be. In order to have it so furnish the hives with bright new sections holding not over one pound each and filled with foundation. Of sections, beekeepers have full control, and if they fail to use the best they themselves and not the bees are to blame. Over the honey filled in by the bees they have not so much control, and often after the most careful planning, snow-white sections, filled with fine honey-dew almost as black as ink. To get my ideal of section honey, separators must be used, says a writer in American Bee Journal. They should be as wide as the sections, and no part of the outside must be exposed to the travel of the bees. Foundation in full sheets is not indispensable to get the bees to attach the comb to the section bottom. When all is well done, and the beautiful white-capped honey in new white sections is taken from the hive the apiculturist wonders whether anything else can be done to make the product more attractive. Many attempt to make it so in various ways. I have seen honey on the market in sections which were painted a bright red, others which were stained a cherry red, or mahogany color. However, this seemed to add little to its appearance. It rather indicated that something was covered up, the honey had a queer look, and if the sections were new and clean, the paint and stain were only a detriment. Others try to gain the desired result by placing the producers' trade mark or name upon each section in bright red ink by means of a rubber stamp. This not only serves to advertise the producer, but slightly enhances the appearance of the product if the work is neatly done.

As to the shipping cases hold these sections, it is not so important that paint and stain. I have seen cases painted a black walnut color, that really looked quite neat, and the white edges of sections, and delicate comb honey, looked very attractive through the glass. I should prefer to ship my honey in cases painted black, rather than have them stained or dirty. But even when applied to shipping cases, it is very doubtful if anything can be gained by paint—nothing seems so neat and bright as new, planed boards. The whiter the wood the better it pleases me for sections, even though the comb is stained or dirty. Somehow it lends a charm of neatness, which can be secured in no other way.

WHITE HOLLAND TURKEYS.

Description of a Breed Which is Entitled to Greater Popularity.

White Holland turkeys rank next in weight to the bronze. They are highly esteemed, as they make a nice appearance when dressed. They have a lighter

WHITE HOLLAND TURKEY COCK.

colored skin, with a pinkish tinge, which is very attractive. The flesh is white and juicy.

White Hollands have clear white plumage, though during summer, like other white fowls, they become more or less yellow. The bills and feet are a yellowish color. They are good layers and excellent mothers, generally maturing quite early. They are not considered so hardy as the bronze and some other varieties and not so commonly seen.

The white Holland is much larger than the common white turkey, with which it should not be confounded. It traces its origin to the Netherlands and Belgium and is sometimes termed the Flemish. Its feathers are very valuable, as they possess the softness of the down of the geese.

Dampness in Poultry Houses.

When a poultry house is lined with tarred paper it is frequently the case that the house is damp. This is due to several causes, among them being that the lumber gives off more or less moisture and tarred paper condenses the moisture of the room. When the house is thoroughly seasoned this may not happen. The doors and windows should be kept open during the day, and during cold weather a lump of stone lime should be placed in the corner of the room to absorb the moisture. It is not due to the exhalations from the birds, but rather to the dampness of the atmosphere, which is condensed by the cold tarred paper. Ordinary building paper does not condense the moisture. The damp boards will also give off considerable moisture in the room, which will be condensed and precipitated on the colder tarred paper.

When timothy is wanted for the seed allow it to get well ripened; then cut with self-blinder and treat much as you would wheat.

FIRESIDE FRAGMENTS.

—Bananas and Lemons.—Some bananas sliced down the center with a small knife which has been squeezed a little lemon. Too much lemon will turn the cream.

—You can sweeten and dry a damp closet by placing in it a half full of quick lime; it will slake slowly and may then be used for its original purpose, and on the compost heap. A pan of charcoal will serve much the same purpose in the closet.

—A rubber clothes wringer should be kept in as even a temperature as possible, and especially not exposed to severe freezing. In cold weather it should be warmed before using, by placing it over a pan of hot water or near the range.

—Veal Sandwiches.—These are almost as good as chicken, and much cheaper, and the water in which the veal is stewed may go towards the next day's soup. Boil the veal until tender and when cold chop fine. Mix with a good mayonnaise dressing and spread between slices of bread.

—With Cheese.—Break a boiled emmentaler into strips and arrange these neatly in a baking dish; season each layer with pepper and salt, and cover with a thin layer of cream. Bake in an oven of grated Parmesan or other nice cheese has been added. Dot the top with bits of butter and bake until nicely browned.

—Chester cloth is desirable cotton for summer use, as it may be laundered perfectly and is only five cents and twenty cents a yard. It comes in a great variety of colors and designs. If used for curtains, it should be lined with itself or silk in a single color. In pillows and cushions it is as desirable as for bedroom curtains.

—The Philadelphia Record says that powdered soapstone and salt in equal proportions wet with water will make an everlasting and fireproof mending for the lining to trousers; it is much less expensive and troublesome to produce and put in place than new firebricks. Don't let fine spots and water become the brick needs mending.

—A coffee pot that filters is best if one is experienced in that art, but an old black Maryland cook can make the beverage in a plain, common tin pot, and have it fit for the gods. She puts the ground coffee in the pot and then slings it in a warm place for the boiling water. In this way the heated ground coffee imparts to the fluid an extra pungency of flavor and richness.

—Farm, Field and Fireside.

—Blackberry Pudding.—One quart blackberries; two cups milk; and eggs; four cups flour; one-half yeast cake dissolved in four tablespoonsful warm water; one scant teaspoonful soda; one-half teaspoonful salt. Beat the eggs with the milk; add to this the soda dissolved in a little hot water, the salt, the flour, and the yeast. Put the mixture in a warm place for four hours. Dredge the berries with flour and stir them into the risen batter, and bake in a buttered pudding-dish for an hour. Eat with a hard sauce.

—Cauliflower Soup.—Melt four ounces of butter in a saucepan; add the cauliflower sliced, a large onion minced, three stalks of celery minced very fine and a tablespoonful of boiled beans, if you happen to have them; fry gently five minutes, add three points of water, simmer until reduced to a pulp, four cups flour; one-half yeast cake dissolved in four tablespoonsful warm water; one scant teaspoonful soda; one-half teaspoonful salt. Beat the eggs with the milk; add to this the soda dissolved in a little hot water, the salt, the flour, and the yeast. Put the mixture in a warm place for four hours. Dredge the berries with flour and stir them into the risen batter, and bake in a buttered pudding-dish for an hour. Eat with a hard sauce.

FASHION'S FANCIES.

Odds and Ends of the Modern Woman.

In order to keep the extravagantly wide revolvers in place, little slivers of whalebone are stitched into the edges. A very convenient and desirable way of fixing these edges is to take thin whalebone, soak it for twenty-four hours in warm water and put it in place. The machine needle will penetrate the bone without the slightest difficulty. Then press until dry and there is body given to the fabric that can be obtained in no other way.

There is a good deal of talk about a new style of whalebone which is made by soaking leather in some liquid and drying it under pressure. This is all very well for some purposes, but most expert dressmakers soak the whalebones before putting them into the waist, and stitch them through and through. Arranged in this way they are pliable and are every way more desirable. But those of leather cannot be so treated.

Elaborate arrangements of turned-over collar and revers are among the new things. Some of these collars are set in deep points, others are in deep scallops, others are overlapped like shingles on the edges and others have the points turned back and faced with some contrasting color.

A new and pretty bodice for simple wear is made of white India silk. It is made with the outside shirred in at the waist-line over a fitted lining. The neck is cut somewhat low, and there are full ruffles or ruchings of the silk and a tiny edge of soft lace.

Petticoats of black-and-white striped silk have flounces of some bright color, as peachblow, yellow, cherry or hellebore, and these are drawn up with flounces of black net or silk mull.

Shoulder ruffles are less popular than heretofore. Many thin dresses are made this way, but heavier materials show fewer trimmings of this sort.

Ties and cravats of mull, tulle and various gauzy fabrics are much liked. The newest cravats have large rosettes instead of loops.

A silk petticoat recently ordered for a bride is of heavy white satin with ruffles of embroidered chiffon, beautiful but expensive.

Embroidered India muslins are again in demand, and are made up with large quantities of ribbon.

Velvet ribbon belts with loops and long ends are seen upon some of the newest thin dresses.

Velvet cutaway coats are one of the latest novelties.—N. Y. Ledger.

TWO WAYS.

The Wastefulness of Mankind in Regard to Natural Resources.

Mankind is almost invariably wasteful with natural resources, and is especially destructive of wild animals which yield valuable commercial products. The skin of the buffalo was so extremely useful that in the space of fifty years the millions upon millions of buffaloes which reamed the plains west of the Mississippi were exterminated. What we have done with our buffaloes the inhabitants of French Algeria and the wilder races to the southward of them, have done with their ostriches. In taking them for their plumes they have either exterminated them, or else driven them completely away to the southward out of their reach. Thus they have deprived themselves, as the hunters of the western prairies did, of a considerable source of income.

This is what the Arabs and other tribes of western Asia had already done. Ostriches were once abundant in Asia, but now are found only in small numbers in some almost inaccessible spots in Arabia and Persia.

A different policy has been pursued by the thrifty Dutch and English farmers of South Africa. They, too, hunted the ostrich until he ceased to be found in a wild state within the limits of Cape Colony, and then they set it out to domesticate him. In this they succeeded admirably as the keepers of the Yellowstone National park have succeeded in domesticating the buffalo.

Ostrich farming is now a lucrative business in South Africa. Eggs are procured and artificially or naturally hatched and are worth twenty-five dollars apiece. Young birds are worth one hundred and fifty dollars apiece—more than a good horse in many parts of the United States—and a fine mature male ostrich is worth three hundred and fifty dollars. Yet not many years ago birds of this sort were pursued and killed merely to get three or four feathers out of their tails.

To some extent the negroes of Senegal shame their French neighbors, who have permitted the extermination of the ostrich farther to the northward and eastward. They have domesticated many of the birds without difficulty. They are, however, curiously afraid of them. All ostriches are exceedingly fond of picking up bright articles of every kind—jewels, trinkets, bracelets and the like; and the Senegal ostriches include among such articles the glistening eyes of the Senegal babies. It is necessary to tie the children tightly to the ground, lest they be carried off by the ostriches. In the Senegal natives have not yet learned to construct pens or yards for the ostriches.

At the last advice, there were in Cape Colony eighty thousand ostriches kept for their plumes; and the market for feathers has not become seriously overstocked. Ostriches have not yet been domesticated in the southern countries of South America and in California, although as yet on no such scale as in South Africa.

The time is evidently near when all manner of wild creatures, which have heretofore yielded valuable products—except those which are exceedingly fond of being kept in some sort of captivity—will be kept in some sort of captivity in order to keep up the supply of their products. Not all wild creatures will yield their products once a year, as the ostrich and the angora and Cashmere goat, the llama, the alpaca or guanaco, which have all been domesticated. But it has been found profitable to raise certain animals for the value of the skin, which they can yield but once, and that upon their death.

The skunk, which yields the really valuable "black martin" fur of commerce, is being maintained on several "skunk farms" in the United States for the sake of his skin; and it is believed by many that in certain parts of the west, buffalo raising, for the fur, beef and other products from the carcasses, could be made profitable.—Youth's Companion.

Royal Baking Powder

ABSOLUTELY PURE

Economy requires that in every receipt calling for baking powder the Royal shall be used. It will go further and make the food lighter, sweeter, of finer flavor, more digestible and wholesome.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW YORK.

He Wanted the Latest.

The other morning a man went into a music store and asked for "Ave Maria."

"Which one do you want?" asked the clerk.

"O, I don't know whose it is," he said. "Give me the best one."

"Well, we have one by Gounod, Liszt, Luzzi, Massenghi, Millard, Cherubini, and Ducloux—any one is good."

"Gosh," said the customer. "I didn't know there was so many. Give me Jerry Boone's."

Cherubini's was handed him, but about noon he came back dissatisfied.

"This is no good on earth," he said. "I can't make head nor tail to the tune."

Gounod's "Ave Maria" was then given him, but 3 o'clock brought him back again.

"It wasn't 'Ave Maria' at all I wanted," he explained. "It was 'Sweet Marie.'—Indianapolis Sentinel.

Germany's Quercus Tree.

One of the most curious trees in Germany stands on the left bank of the river Oder, in Ratibor, Silesia. It is a maple, at least one hundred years old, which has been twisted and cut into a sort of circular two-storyed house.

A flight of steps leads up to the first level, where the branches have been gradually woven together so that they make a firm leafy floor; above this is a second floor of smaller diameter, formed in the same way, and the ends of the branches have been woven into a sort of circular roof.

Eight or nine rooms, each of a different size, are arranged in a circle, and each room has a fireplace. The rooms are lighted by the fire in the fireplace.

THE POT INSULTED THE KETTLE BECAUSE THE COOK HAD NOT USED

SAPOLIO

GOOD COOKING DEMANDS CLEANLINESS. SAPOLIO SHOULD BE USED IN EVERY KITCHEN.

Always On Time and Ahead of the Times

Seems to be the motto of the John A. Salzer Seed Co., of La Crosse, Wis., whose general manager, Mr. Henry A. Salzer, is now securing the celebrated farm districts of Russia, France, England, Germany, Bohemia, Belgium, Italy, etc., in search of new and rare varieties of farm seeds, as also vegetable and flowerseed novelties. Mr. Salzer is thoroughly acquainted with the wants of the American farmer and gardener, and he will be sure to obtain the very best that Europe has to offer.

The John A. Salzer Seed Co. makes a specialty of seeds for the farm and garden, and is the introducer of many new and rare varieties of farm seeds, as also of wheat, oats, potatoes, vegetable and flower plants than all western seedmen combined.

"Yes," Mrs. Eaton seems to take a great interest in all the current events. "Mrs. Grassy—'great goodness, why not! She took the prize last year for both the jelly and pie!'"

A Valley, Plain and Peak.

An art book of Northwestern scenes, from photographs, over 100 reproductions and colored excursions, with descriptions, elegantly printed, sent to any address for 10 cents in postage. Contains more artistic features and general information than many of the cheaply printed publications now on sale. Address P. L. Whitney, G. P. & T. A., Great Northern Railway, St. Paul, Minn.

Every bride and groom should have their pictures taken together. It affords such sport for their grandchildren.

DIFFERENT TIMES

bring different methods. The big, bulky pills such as our grandfathers had to put up with won't do today. Medical science has gone beyond them. It has given us something better—Dr. Pierce's Pleasant Pellets; say as many seeds, but more effective than anything you can take. That's because their methods are more natural. They have a peculiar tendency for tonic effect on the lining membranes of the intestines, which gives them permanent cure. They prevent, relieve, and put an end to Biliousness, Constipation, Jaundice, Dizziness, Sour Stomach, Sick or Bileous Headaches, Indigestion, and every ills disorder.

"Incurable" cases of Catarrh are cured, perfectly and permanently, by Dr. Sage's Catarrh Remedy. The makers of this medicine guarantee it to benefit or cure, or money refunded. By all dealers in medicines.

OUR WASHINGTON LETTER.

From the Washington Correspondent.

WASHINGTON, Aug. 6, 1894.

The Democratic distraction over the tariff bill is still as great as ever. There is talk of talk every day about an agreement to-morrow, but the agreement never comes. Just when a new sugar schedule is in words, but the same in principle as that prepared by Democratic senators and Secretary Cleveland under the direction of the sugar trust—which was to be used to blind the ignorant followers of Mr. Cleveland and the House free traders to their surrender to the Senate and the trust, which its acceptance meant, had been patched up at the White House and the end seemed in sight, when the Louisiana Senators, reinforced by the populists, Allen and Kyle, bobbed up with the statement that no sugar schedule would be supported by them which did not provide for the payment of the sugar bounty for this year. That sent the conference to sea again and they are still floundering around in this wringing, drifting nearer and nearer to the breakers on the rocky coast all the while. How they will get out, or whether they will get out at all, is still problematical. It is certain, however, that the Republicans will not volunteer as life savers.

Boss Cleveland has succeeded in preventing the House committee on Foreign Affairs reporting the Hawaiian resolution for the immediate recognition of the Hawaiian Republic, although it was word for word the same resolution introduced by the present Democratic chairman of that committee, when the Hawaiian Republic was established, during the Harrison administration, and when a majority of the committee and of the House was Republican. But at least one Democrat on the committee—Geary, of Cal.—was ashamed of his party and had the manliness to speak his mind. He said: "We might as well admit that the Democratic party has blundered in its treatment of this Hawaiian question; and we cannot afford to make another blunder." The Democrats "scent the devil around the stump" by postponing the consideration of the resolution until next Thursday, hoping that it will then be too late to have it acted upon at this session. In view of this action by the committee at Mr. Cleveland's instigation it is not surprising that the members of the Hawaiian commission now in Washington, who represent the ex-queen, should say that they intend to remain until informed by Mr. Cleveland whether he intends to carry out his promise to restore the queen to her throne. They naturally think that Mr. Cleveland still wishes to restore the queen, and other people think so, too. Who should be wise to postpone recognizing the republic?

There is a R. R. man here sent a formal request to Mr. Cleveland and his cabinet to bring to the attention of the coming National conference at Pittsburgh the unjust treatment of the old soldiers here recognized by the Cleveland administration. Out of 150 employees dropped from the rolls of Record and Pension division of War Department, 11 were Union veterans, and it is said that the records of some of the ex-soldiers show them to have been among the most efficient clerks in the division, while none of them were below the average in their efficiency records. Old soldiers have also been discriminated against in other departments, particularly in the Agricultural department and in the various branches of the Interior department, including the Government Printing office and the Pension Bureau.

There is more or less anxiety in Congress because of the war between Japan and China. This is not because of any special interest taken in the war as it now is, but because of the fear that the United States may be in some manner dragged into it by the diplomatic blundering of Secretary Gresham, who appears to have, in place of the calm judgment that should dominate a Secretary of State, an over-estimate of the very undesirable American position "put his foot in it" every time he makes a move in connection with the foreign relations of the government.

Representative S. M. of Pennsylvania has been discouraged by the opposition of the administration to the bill requiring all immigrants to be examined and certified by U. S. consuls. A bill recently passed the House, and which the Senate committee on Immigration has tried to kill by reporting a substitute therefor which might easily have been added to the bill as an amendment. He says: "I can see no ground for objections except from stomach companies that are engaged in the anti-suffrage of transporting to this country criminals and paupers. I had hoped that this measure would be considered from a patriotic standpoint alone and would not be killed by party measure, as

the opposition from the administration gives me cause to fear it will be. The people, without regard to party, demand a further restriction upon immigration; it will come, if not now, in the near future. For one, I propose to keep this standard to the front as long as I remain in Congress, and I believe all patriotic people will respond. The objection that inspection by consuls will interfere with the present laws is ridiculous. The measure will save expense to the government by utilizing these consuls instead of adding expense. This objection seems to be a mere pretext and will not weigh with men of intelligence."

Selbysport.

William Graham and family, of Uniontown, Pa., passed through town en route to Friendsville where they will remain for a few days.

Mr. E. Vansickle, a business man of Ursina, Pa., paid our town a visit last week.

Thomas J. Moyer is still in our town building air castles. He is reading of the exploits of Meshach Browning, and after its completion will return home.

Hay harvest has come and gone and oats harvest will be completed by this week's issue of THE REPUBLICAN. Oats is a medium crop. Some of it is so short that it cannot be reaped with a cradle.

Diamond is having more family troubles. He discharged his female cooks and put Tom in charge of the kitchen and canteen. Tom has a good appetite and knows when the food is palatable, but he could not wash dishes for me, and in fact he does not care much about washing dishes. He sees that all the boarders are cared for but goes elsewhere for his meals. Diamond doesn't frequent the kitchen as often as when his former cooks were in possession.

Cora, a little daughter of Mr. E. J. Frantz, was badly injured last Saturday. She took her father's dinner to him at the saw mill where some railing fell upon her inflicting some ugly wounds. Luckily no bones were broken and she will be able to walk in a few days.

For some months past Mr. Joseph Lint, Jr., has been in a very melancholy state of mind and has been repeatedly urged by his intimate friends to dispel all unpleasant thoughts and be prepared for whatever fate may be meted out to him by a kind Providence. One beautiful and serene evening last week his highest anticipations were fully realized when his wife presented him with a charming lad which occurrence has wreathed his countenance in smiles. We trust that the appearance of the lad will be the cause of future happiness and contentment.

Mr. Pullman, of Confidence, Pa., a lumber inspector, was here a few days last week.

Brave hearted Charles Stuck met with what might have proved a serious circumstance last Monday evening while assisting C. W. Fike and "Dad" to load lumber on a car for Diamond. Stuck and Fike ran on a large copperhead which he concluded to dispatch in very short order, but the snake was willing for the combat and prepared for the defense. Charles took the advantage of his opponent and held him down with a club which broke while Fike was after a stone. The snake struck at Charles, just grazing his right hand. "Dad" has met with and conquered many a copperhead and held his composure, while Messrs. Stuck and Fike had symptoms of the ague.

It is claimed that limestone water is a balm in Gilead for all mineral diseases. We advise our fellow-townsmen to make an investigation.

Mr. Milton Waterloo Lytle, of the Glades, was here a few days last week looking after his matrimonial fences.

Mr. Luther Wood, of Frostburg, was a business caller Monday and registered at the Diamond.

A man in this section found a bee tree recently and last Saturday evening was announced as the time the tree would be cut. The whole neighborhood turned out to witness the affair and partook of the poor bees' hard earned store.

Jonas Frazee visited Mr. R. F. Savage of near Deer Park last Saturday and reports Frank and family all well.

It is reported that a new political party will be organized in this district soon. We are not able to inform your readers who the originators of this scheme are, but we feel safe in saying that they are renegades from either the Republican, Democratic or Prohibition parties. They have never solicited our influence yet, and we will inform them now that the party of Lincoln, of Grant, of Garfield, of Blaine, and of Harrison is good enough for us. We are always willing to follow the greatest statesmen that our country has produced.

Some of our Democratic brethren think that our recent arraignment of King Democracy was too severe and uncalled for to say the least. Friends, nothing is too severe if it

is only the truth and can be substantiated. We have stated nothing in regard to the condition of affairs that we cannot verify. We refrained from putting before the people any statements which we cannot sustain. We love the truth and endeavor to state it in as plain and simple language as possible so that it can be perfectly understood and heeded. A non-partisan review of the history of our beautiful land, so recently rent with internal dissensions, for thirty years immediately preceding the inauguration of Abraham Lincoln, compared with the thirty years of Republicanism following his inauguration is sufficient evidence to convince the most stupid. For instance, compare the wages paid during the two periods above stated and behold the difference. The former was under Democratic rule while the latter embraced a period occupied by Republican incumbents. It has been stated that history repeats itself and indeed to compare the present with that of thirty-five and sixty-five years ago inclusive, corroborates it. And yet this period includes those good old Democratic times that we hear so much about and have a slight idea as to what they really were. If we have been led into a business transaction which proved detrimental to our anticipations we should pursue another course and persevere in this manner until we find the right thing. Then, if we have been voting blindly with a party that has proved itself time and time again inimical to our welfare it is our duty as intelligent and conscientious voters to join the party that is our friend in adversity as well as prosperity. This is not so with the dominant party for they adhere tenaciously to that old English saying, "Once an Englishman always an Englishman." But a good substitute is, "Once a Democrat, always a Democrat," regardless of condition and theories. The United States Senate, well styled the "American House of Lords," has been the seat of lawlessness as disgraceful as that prevailing in the coke regions and the west. Those Senators have laid aside their dignity and allowed their evil passions to master them. When the Senate, which is supposed to be composed of the cream of the nation, can't hold its composure and make laws for the people we must look with compassion upon those who are in the coke regions contending for their rights.

Laughlin's Infant Cordial

Laughlin's Infant Cordial is a valuable remedy for all the ailments of infants, such as colic, diarrhea, and fever. It is made from the most pure and healthful ingredients, and is perfectly adapted to the delicate system of the young child. It is sold in bottles of 10 and 25 cents.

THE SECRET OF SUCCESS.

Not fancy, merely, or the rush
Of feeling, guides the pen or brush.
As that by time, and line by line,
The verses grow, the verses shine.
We find with these the crowning art
Whose magic can alone impart
To genius all its highest gifts—
The faculty of taking naps.

Lo, for the joy of years to be,
Desired for immortality,
We hail the statue's marble grace,
The loveliness of form and face.
Now dream what hours the sculptor wrought
With tireless hand and anxious thought.
Till from the stone, with stroke on stroke,
The unveiled beauty shone and woke.

The rept misdeed, whose secret strain
Hills vanquished sorrow smile again.
Throw his whole soul, the while he wrote,
Into each heaven-aspiring note.
Pursuing a thousand times before
His judgment passed the perfect score,
For holding measure work in scorn,
He tolled for ages yet unborn.

They learn the secret of success,
Who seek content with nothing less—
Perfection, with no aim beside,
And missing this, dissatisfied,
And there alone, in life's way,
To fame and honor win their way.
Who'll strive to reach such high gains,
The strenuous art of taking naps.

Aunt Hetty and the College Girl
Just Home from School.

Out under the rose-arbor in the pleasant front yard of the parsonage, Betty Dexter, the minister's only daughter, and her roommate at college, pretty Rose Houston, in their fresh summer gowns are chatting merrily with Mamma Dexter while they receive a great dish of strawberries of their choice.

Betty, a college senior now, was scarcely a beauty, though her handsomeness, smiling brown eyes made one forget any little irregularity of feature. And though everyone in college, at least in the upper classes, knew that she was only a minister's daughter, and though any girl with half an eye could trace the transmigration progress in her hats and dress, and knew that she could never give a really handsome spread, yet no girl within the college gates was so popular as Betty Dexter. No girl had so many invitations for vacation, so many engagements to walk, drive, row and go into the city, but nearly all of her vacation was spent at home with the over-busy mother and the delicate father, who made many self-denials in order to meet the slender college bills. With her this summer, by special request of the mother, had come her room-mate, little Rose Houston, the orphan heiress from New Orleans, who loved Betty better than she loved anyone else in the world.

"Ours is a lot of a home," said Betty, "and mother and I do most of the work together, but you will have a royal welcome, dear." And Rose, being a genuine, though a very desultory sort of girl, by reason of her long years of orphanage and years of traveling about with a maid and her guardian, "had been more than glad to come."

On the little table in the rose arbor, besides Mrs. Dexter's working basket, was a volume of "The Vision of Sir Launfal" which the ladies had been reading in turn.

"There is such a musical swing to those last verses," said Rose, "that one is forced to remember them."

"Who gives himself with his aims feeds himself," his hungering neighbor and me."

"But really," said Betty, "it is only the purest selfishness to be kind and generous to others, for the reward is so sweet."

"And here comes over the hill a reward for two busy young housekeepers, I suspect," said Mrs. Dexter, as the sound of a trolley-horn from the coach of a neighboring mountain resort was heard rolling in peculiar evidence among the echoes. "It is a charming day for a coaching party."

A nearer sound, however, attracted their attention before the coach could reach the gate—a sound of the querulous, high, cracked voice of an old woman in gown and bonnet, that may have been bravely fashionable fifty years ago.

"So glad to find you at home, Betty, and your ma, too. Walked all the way from Chatham Mills on purpose to see you and hear all about the college. I haven't seen you in a long time, and I have been longing for a sight of your sweet face."

They gave her cordial greeting, this old Aunt Hetty from Blake's Corners, and Betty kissed, with genuine affection, the withered face, once outwardly beautiful and now shining with inward goodness, which action Rose noted with a bit of jealousy, for Rose expected her friends to be very kind to her, and loyalty, from her standpoint, meant ardent much for her and little for others. It was a part of her education and perhaps no one could blame her. Indeed, one reason why she had so gladly accepted the invitation to the parsonage had been that she wished to have Rose all to herself. At college some one was always seeking her; but here she thought it would be otherwise. Yesterday, however, there had been a Sunday-school class to entertain, and here was the old lady. The coaching party would take them both away, no doubt, and certainly at Mrs. Dexter's age, she, and not the daughter, would be the proper one to entertain Aunt Hetty. So Rose settled the affair in her own mind.

It was a gay company on the great coach, with a little grig of a hanger and twenty young people on top, while the chaplains were snugly bestowed inside. If you doubt whether many could find space on a mountain trolley, just present the problem and the coach to a party of that size, on a fine summer morning, and they will speedily prove the truth of my statement.

Two smiling young men, in summer flannels, and cheeks reddened by the brisk drive, were on the ground before the coach had time to stop, and were making their salutations to the ladies and their request to Mrs. Dexter. They were going to Eagle Cliff

for a day's outing; party well chaperoned, horses and driver absolutely reliable. Could the young ladies join them? And a chorus of girlish voices added their entreaties, while the boys-bugler blew a delicately suggestive little songlet out into the air by way of flattering invitation.

Aunt Hetty's old eyes filled with tears of disappointment, but she bravely winked them back before anyone could see them—so she thought.

"Get up at five o'clock, did all the work, tramped over to Zene Lucas's to catch a ride on his mill-cart, and then walked three miles more from the mills in the hot sun, and all for nothing," she was thinking. "But, dear me! I wish a young girl once myself, and had my good times, too." So it chanced that what she said, in all sincerity and earnestness, was almost convincing. "Do go right along, Betty. I shall be over again in a few days, maybe, and this will give me a nice chance to visit with your ma." And by avoiding Betty's eye the old lady considered that she had made a very neat thing of her hard task.

Rose turned eagerly to Mrs. Dexter and waited; but Betty took the old, withered hands that were nervously clasping an undulating incoherence, and without a shadow of regret on lips or in her heart, said:

"I am so much obliged to you, Tom, but I have other pleasures on hand for today. But Miss Houston will go, I think. You have never seen Eagle Cliff, dear," she continued, turning to her friend, "and it is glorious up there in the darkness of the pines."

But the sunny face of the heiress was clouded with disappointment; and that look that looked from Aunt Hetty's sharp eyes, Betty drew her friend quickly away to the house to prepare for the drive.

"Tain't no matter about me at all," said Aunt Hetty. "Betty won't stay at home on my account, will she?" asked the wavering old voice.

"She said that she had some pleasant plans for today," answered the mother, with a loving glance down the path where her daughter was waving her hand to the departing coaches.

You may think the girl was practicing self-denial; but her mother detected no trace of regret or disappointment in the dear face, and Aunt Hetty had one of her happier days, for the whole life—a day remembered with deepest gratitude to the last of her soon-closing life.

Looking over photographs in a commonplace amusement to most of us; but when one's eyes have been seen just about the same sights year after year, for over fifty years, until the world seems made up of little brown farm-houses and barns and sheds, and the church and store once a week, then a glimpse of handsome buildings, broad lawns diversified with picturesque cottages and groups of pretty girls scattered about under the trees, of art treasures gleaming in marble white-ness, of smooth waters covered with dancing boats rowed by girlish oarsmen, of study parlors decorated and cushioned in the last and daintiest fashion of college girls—then, I say, looking over photographs ceases to be commonplace.

Betty had no end of pleasant stories to tell of the college life; of its good times and disappointments; of the days when she visited the great city and walked through the busy streets which Aunt Hetty had never seen, of the concert when Betty had been showered with roses by her enthusiastic classmates, and how some of the roses were as large across as a saucer, and so sweet; of the days when she worked so busily to refashion the three seasons' old hats or gowns into dainty trifles, some of these going to the side of the gay headgear of her companions.

She lived over again all her pleasant college days, her freshman hopes, sophomore ambitions and junior triumphs. She brought out Rose's banjo and made Aunt Hetty's face shine with youthful delight as she sang the lively boating songs and rollicking tunes beloved of college girls and men. For Aunt Hetty had been a lively girl, too, in her day, and loved merry times. She would always be a little gayer in spirit, a little less likely to sit down in her old brown, worn room and think of her heresayments, than she had been; and once in awhile, out in the little orchard where not even the hired man could hear her, or by the winter hearth when the wise cat was asleep, she would hum to herself, with great satisfaction, some of those college ditties.

They had a pretty luncheon of bouillon, lettuce sandwiches, fresh eggs, berries, and a great golden custard pie, Aunt Hetty's special delight. Then Betty's deft fingers attacked the time-worn black bonnet, to make it look a little more "fashionable," as the owner expressed it. And if a particular piece of black ribbon which was to have made a smart bow on her own little turban "made snafu in a shady place," so to speak, on the dreary waste of that ancient piece of headgear, I think that none of Betty's friends missed it, because under the turban was a face that made you forget what was above it.

"Who gives himself with his aims feeds himself," his hungering neighbor and me."

—Helen M. North, in Demorest's Magazine.

Queer Guests.

Lady Morgan records in her "Diary" that while dining at the palace of the archbishop of Taranto she met with guests whose presence would have been more becoming to the playground of a boy than to the dining room of an Italian prelate. Between the first and second courses the door opened, and several enormously large and beautiful men were introduced by the names of Pantaleone, Desdemona, Otello, etc. They took their places on chairs near the table, and were as silent as motionless, as well behaved as one could desire. On the bishop requesting one of the chaplains to assist Signora Desdemona to something, the butler stepped up to his lordship and observed: "Desdemona will prefer waiting for the roasts."—Youth's Companion.

ODD OCCUPATIONS.

A Chicago Irishman Who Acts as a Perimeter. Patsy, stirring 'em up again," said the officer on the beat at Thirty-ninth street, near Cottage Grove avenue.

"Shure an' I am. Orah, but they're a shaly lot in the mornin'. But that's what feteles 'em," and the small, stooped man with the well-developed Irishman accent shook a stocky stick which he carried in his left hand, and dashed along the street at a dog trot without waiting for further conversation with the officer who had accosted him.

A huge ring of keys jingled at each step and kept merry time to the man's hurried gait. Before Patsy had gone half a block he darted up the stairs of a boarding house, applied a key, and was soon lost to sight. But he was out again in a twinkling, and cut diagonally across the street to a cottage, and again his bunch of keys seemed him entree. Another short interval and he slipped out of the cottage and once more resumed his restless way.

Many people in this locality knew the unique vocation of the little man, but many more do not; and a passing glimpse of him has been a puzzle to numberless unfortunates who are compelled to rise in the early morning by the first street cars.

For twelve years this wrinkled, jolly little Irishman has followed a profession, the existence of which is known only to the few men who have occasion to need his services, and those who come in personal contact with him. His general headquarters are at the street car barns, where he keeps his clock of every morning, rain or shine, thus him out upon the street armed with his big ring of keys, his sturdy stick, and in the season of long nights, with a dark lantern.

If his task should once go tidone hundreds of early passengers to the grip cars would feel the effect of a full stop. For Patsy is the alarm clock for scores of conductors who use the first cars out of the barns. However, there seems to be small chance for such a contingency, for Patsy is not reliable, than any alarm clock yet invented, and it is safe to say that a general failure of the conductors in the reliability of the sun, moon and stars.

Chicago is pre-eminently the city of grip cars, and another species of night workers connected with the great grip lines may also be said to be peculiarly a Chicago type. He is the cable repair man and may be seen as soon as the midnight star twinkles—at about midnight or shortly after. There is scarcely a corner around which the cable makes a turn where these men, in groups of four or five, may not be seen working with their tripods of hoisting pulleys and flaring torches from midnight until dawn daylight.

A group of these workmen squatting in the middle of the street, with jack-screws and drills by the light of a half dozen torches, presents a striking similarity to an Indian encampment and but little imagination is required to conjure the frame of the tripod into the likeness of the bare poles of a wigwam.

The active operation of the Chicago university revives in this city still another class of those who gain their livelihood by honest work while the great mass of people are enjoying their sweetest hours of slumber. This night worker's shirt is dangerously near both twilight and dawn, and snatches his scanty hours of sleep between these two fleeting and fantastic periods. He is armed at evening with a torch-tipped rod, but his guiding light is ambition and his motto "Excelsior." In other words he is the student lamp-lighter, and a descent of future achievement always sheds a halo over his darkest path, as he zigzags from one lamp to another, lighting or extinguishing them as the case may be.

The number of students who worked their way through the old Chicago university by this means is legion, and the honor-roll of future achievement among the attendants upon the new and greater institution.

Among the students who followed this profession during the closing days of the old university was a young man who now is a member of a prosperous law firm in the Chicago Opera House block. Should some of the ambitious young law chasers chance to arise early enough and make a careful scrutiny of the lamp-lighter in a certain district they would probably be greatly surprised, and if they held fastidious ideas concerning the difference between the dignity and respectability of manual and professional labor they would doubtless be shocked, for they would recognize in the lamp-lighter none other than the prosperous young lawyer. He likes the exercise, has no scruples against adding thirty dollars a month to his legal income, and has, consequently, not yet reached the place where he chooses to relinquish the old lamp-lighting habit which furnished him the "shew of war" for his university course. What city beside Chicago can boast of a man who is at once both lamp-lighter and lawyer, and who is prosperous in both vocations?

Each lamp-lighter has a route of one hundred to one hundred and five lamps and receives from the gas company employing him one cent a night for lighting and extinguishing each lamp. His duties are defined and his hours governed by a book of rules furnished by the gas company.

The late night hours, in the minds of the sober, early-rising populace are intimately associated with vice, crime and dissipation, but a brief acquaintance with those who are compelled to turn night into day in order to earn their bread and keep the great wheels of metropolitan life running smoothly, will bring a distinction into the common judgment passed upon those who are seen returning to their homes in the gray of the morning hours.—Chicago Tribune.

PUNGENT PARAGRAPHS.

—It is not strange that very few men know themselves intimately. Most people like to get rid of disagreeable acquaintances.—Texas Siftings.

"Do you have a great deal of trouble changing servants?" "No, indeed; the last girl stayed an hour and the one before didn't even take off her hat."

—Mrs. Banks—"Is there any one, dear, you would like to have me marry when you die?" Mr. Banks—"No, darling; I hold no bitter grudge against any man living."

—An Appropriate Costume.—Tom—"I saw a resolute of a girl go by awhile ago on a bicycle." Jack—"Did she have on a proper costume?"—Detroit Free Press.

—Proud Father (looking at his first-born)—"Is he sweet?" Mother—"Yes, indeed. Weetost itly sing as ever was." Proud Father—"Looks almost human, doesn't he?"

—A Room for Expansion.—He—"Do it your soul sometimes yearns to read out and encompass the universe?" She—"Yes, but I have to suppress the feeling when it comes on; you see we live in a flat."—Brooklyn Eagle.

—How do you like the dressmaker I got you?" "I'm afraid she's not so good as to make a suggestion with at being her temper."—Demorest's Monthly.

—Uncle Clover—"Mandy, you better what them city folks' knives." Aunt Clover—"Why?" Uncle Clover—"Well, there must 'a bin something wrong with you, for they every one cut with their forks."

—Habby—"Well, I guess I'll have a shave." Wifey—"Wait till Willie leaves the room. It is so hard to break him of bad words when once he gets started on them."—N. Y. Herald.

—A Lesson in the Geography.—Teacher—"Who had to be converted from paganism?" "Can't you tell me where the Blue Ridge is?" Boy (rubbing his shoulder)—"No, but I can tell you where the black and blue ridge is." He is treated more rigorously than even.—Texas Siftings.

—Hard on Him.—Mabel—"I suppose you have heard of Sister Lora's marriage?" She's taken a flat up town." Miss Jellins—"Yes, I heard she had a flat, but I didn't hear where she had taken him."—Leslie's Weekly.

—His Threat.—The brassy policeman crouched in the doorway, glaring out into the darkened street. Suddenly the loud blast of a tin horn sounded near at hand. The policeman gave a mighty bound into the street and caught two trombling boys by the collar.

"Wow!" he thundered. "If O'Leary which way an you done it, O'Leary, stop running—at about midnight or shortly after. There is scarcely a corner around which the cable makes a turn where these men, in groups of four or five, may not be seen working with their tripods of hoisting pulleys and flaring torches from midnight until dawn daylight."

A group of these workmen squatting in the middle of the street, with jack-screws and drills by the light of a half dozen torches, presents a striking similarity to an Indian encampment and but little imagination is required to conjure the frame of the tripod into the likeness of the bare poles of a wigwam.

THE IMPERTINENT BABOON AND THE ATHLETIC CROCODILE.

An Editor Insulted.

Editors have to put up with all manner of taunts and insults. Not so long ago, at a social gathering, a Dallas lady said to a young man who is connected with a local paper:

"You ought to belong to a church choir."

"But I can't sing. What put the idea of my belonging to a choir into your head?"

"O nothing, except that I was reading the other day that a San Francisco church proposes to introduce harmony into the choir, and there is not much difference, you know, between a harp and a lyre, so I thought I'd just make the suggestion."—Alex Sweet, in Texas Siftings.

Why He Failed.

First Agent—Failed utterly in Philadelphia. Couldn't sell two gross of blot-ters in the whole city.

Second Agent—What's the matter? Don't they use blotters there?

First Agent—Never. They wait for the page to dry.—Brooklyn Life.

As a Tear-Starter.

"Father," said the sweet girl graduate, "do you think it is right to make fun of commencement essays?"

"I do not, my daughter," replied the middle-aged parent, hastily shoving back into the private drawer of his writing-desk a faded and time-stained manuscript tied with a blue ribbon.

"The commencement essay, my child, is a thing to weep over and—ah—to swear at."—Chicago Tribune.

An Amiable Example.

As she took a seat in the car she inadvertently deposited her heavy market basket on the toes of the passenger next to her. He winced but made no outcry.

"Excuse me," she said. "I ought to have looked what I was about."

"Oh, it's no matter, madam," he replied. "I don't mind a little sociability."—Judge.

Simple Preposterous.

"In order to prove your calculation as well as your capabilities in this matter," continued the suspicious lawyer, "I will now ask you to prepare a table of logarithms."

"Here and now?" inquired the plaintiff. "I fear it will consume too much of the court's time."

This seemed to confirm the lawyer's doubts, and so he insisted the more upon having a complete table of logarithms prepared. The plaintiff smiled maliciously, took paper and pencil and began his work. In about five minutes the lawyer asked him if he had finished.

The plaintiff shook his head and continued at work. Ten minutes passed by and again the question was put:

"Have you nearly finished now?"

"Very far from finished," remarked the plaintiff.

"Well, may I ask how long it will take you to prepare a table such as Napier's? You seem to be very slow about it."

The expert hesitated a little and then replied: "I estimate that, working alone, I might be able to complete it in about fifteen years, working day and night. It took Napier and five assistants seven years to prepare his table, but I am less familiar with the calculation than he was, and, as you say, work slow. Still in fifteen years I think I can complete it."

It is unnecessary to say that the lawyer was not a little taken aback by the answer, which enlightened him a trifle on the subject. He withdrew the question and eventually the expert won his case.—N. Y. Herald.

Mabel (aged fourteen)—Mr. Doolittle proposed to me last night.

Florence (same age)—What did you do?

Mabel—"I merely laughed at him. The idea of a twenty-four-year-old boy talking about love!—Truth."

A Chicago Drawing-Room.

"Who is that man to whom Mrs. Muelwied is speaking? She seems to know him very well. Is he a connection?"

"A distant one. She was, I believe, his second wife."—Brooklyn Life.

Hard to Please.

Mother—"Why do you so object to having your photograph taken?"

Little son—"Oh, they always pluck me up and twist me around until I get mad, and then they tell me to look pleasant."—Good News.

Wanted Them to Enjoy Life, Too.

Little Mabel (one of a family of seven) recently went to visit an aunt, where she evidently had a very good time. The morning after her return she was unusually silent at breakfast, and noting her pre-occupation her mother inquired: "Well, Mabel, what are you thinking about?"

To which the little maid replied with a sigh of deep satisfaction: "Oh, I'm so glad that my children will have plenty of aunts and uncles!"—Judge.

A Treasure.

Mr. Hardseuse—You have no accomplishments, Miss Biddings?

Miss Biddings—No.

Mr. Hardseuse—And you have never been taught how to cook at a fashionable cooking school?

Miss Biddings—Never.

Mr. Hardseuse (with energy)—Will you be my wife?—Chicago Record.

Always Right.

Old M. D.—What did your patient die of?

Young M. D.—Don't know what it was.

Old M. D.—Never confess your ignorance. In case of doubt call it heart failure.—Arkansas Traveler.

How Prima Donnas Are Made.

"Miss Twinkles has gone to Italy to cultivate her voice."

"Dear me! I didn't know she could afford it."

"The neighbors subscribed the money."—Answers.

STUDIO TALK.

Stamp—I've just come from the academy; Smeat has sold his head.

Dryer—What did he get for it?

Stamp—Two fifty.

Dryer—All it's worth. There's nothing in it.—Scribner's Magazine.

A Good Reason.

Brown—Say, I'll give you a sure thing on the third race to-morrow. Play Mulsticker to win.

Green—Thanks! But why don't you play it yourself?

Brown—I can't. I've already lost all the money I can spare this month.—Puck.

The Height of Courtesy.

Blago—Is that friend of yours from Kentucky going to be here to-night to see our fireworks?

Mrs. Blago—I expect him, my dear.

Blago—Then I guess I would better leave those snakes out of the programme.—Life.

7

GUN WASHINGTON LETTER.

(From the Regular Correspondent.)

WASHINGTON, Aug. 12, 1894.

The tariff bill still hangs between life and death, and the Democratic caucus are as much in the dark as to which it is to be as the public. As I write the House Democratic caucus is in session for the avowed purpose of reaching an agreement to recall the conferees and agreeing to all of the Senate amendments for fear that the Senate will prevent all tariff legislation by laying the whole business on the table until December, which is understood to be the real motive that is behind Senator Till's resolution, instructing the Senate conferees to report either an agreement or a disagreement and to deliver the tariff bill to the secretary of the Senate for the further action of the Senate thereon.

During the discussion on the resolution it was discovered that there was a wide difference of opinion among Senators, not only as to the present parliamentary status of the bill, but also as to where the actual bill now is. Senator Chandler raised such a shout of laughter on the floor as well as in the galleries, that Senatorial dignity was for the moment forgotten, when he said: "There seems to be so much doubt as to where the bill is that I suggest that it may be found at the White House." It was a center shot, as Mr. Cleveland has completely dominated the House conferees from the day the conference began, compelling Mr. Wilson to report to him and get his orders as often as two and three times a day, and it is Mr. Cleveland who is most bitterly blamed by the anti-crook Democrats because no agreement has been reached by the conferees. It is not quite clear whether it was Mr. Cleveland or the Senate conferees who upset the agreement which was informally made and announced one night last week and formally repudiated the next day. Each side blames the other.

Mr. C. H. J. Taylor, the colored citizen of Kansas who was by Mr. Cleveland made Recorder of Deeds for the District of Columbia after the Senate had refused to confirm his nomination to a diplomatic position, is in bad odor with the Civil Service Commission because of his having violated the law in soliciting and receiving money for political purposes from employees of the government. The combined cheek and egotism of this fellow Taylor may be judged from the following explanation given by him: "Mr. Cleveland no doubt thinks there are plenty of white Democratic politicians out of office to take care of the politics of the party, without the office-holders taking a hand, but with the negroes it is altogether different. There are so few men among them possessed of sufficient ability to lead that if all the recognized leaders are put into office and told to shut their mouths and keep their hands off politics, there would be absolutely no one left to direct affairs among the colored Democrats. It is necessary that the men who have the ability to lead should continue in politics." Perhaps a court sentence would reduce the size of Taylor's head.

Speaker Crisp hasn't always been a crook, but there is no discount on his crookedness at this time. He even carried it to the extent of making a ruling that literally taken would mean that any member of the House would be out of order the moment he uttered a criticism of a member of the Cabinet. This ruling was made when Representative D. C. Corcoran, of Maine, was making a few remarks concerning the cowardly smothering in the House Foreign committee of his resolution for the recognition of Hawaii, and the snarling manner in which the administration went about announcing its formal recognition of the new republic, after it had been unnecessarily delayed for several weeks.

Secretary Carlisle has issued an order that will certainly make trouble for him if it is strictly enforced. It prohibits the giving out of any information concerning matters before Congress without the express permission of the Secretary or one of the assistant Secretaries of the Treasury, and the prohibition extends to everybody, including members of Congress and the government officials. To no other department will the Secretary go so often for information, and the first time that Congressmen of prominence stop at the Treasury in a hurry to get some information and run up against that order, Secretary Carlisle may expect a storm in his immediate vicinity.

The fizzle of the Coxeyites has indignities indeed. Last week the men left by Coxey to starve were all arrested by the Maryland authorities and sent to prison as vagrants, and Saturday several companies of Virginia militia drove the remnant of Coxey's army out of Virginia and set fire to their camp.

The men are being sent a part of the way to their homes, or where they came from last, by the District of Columbia authorities.

Selbyport.

Miss Mollie Goodwin, of Brandywine, W. Va., was here with friends recently.

Nearly every person of this section has donned Democratic badges which consists of a patch on some part of their apparel.

We overheard Jonas Frazee the other evening inquiring for a man who wishes to purchase a No. 4 Brown wagon. Terms will suit purchaser. Democratic notes. No horses or oxen for sale until wheat sowing is over.

R. E. Derrien, of Akron, Ohio, an employee of the Buckeye Machine Company, was here looking after the interest of said company last week.

We acknowledge the receipt of the program of the Garrett County Sunday School Convention to be held at North Glade, August 24th and 25th, inclusive. By perusing it we notice that our fellow townsman Mr. H. M. Frazee is Hon. A. F. George's opponent on the question, "Should the Lesson Leaf supplant the Bible before the class?"

Mr. Frazee has the negative which, in our opinion, is correct as nothing is worthy to supplant the Bible.

An ice cream social was extended to a circle of young friends by Mr. C. W. Fike on last Thursday evening. An enjoyable affair was the result and continued until the wee hours of Thursday night took command. Such socials cultivate a higher degree of sociability among the young people of a community.

Those present from here were: Misses Nezzie and Lucy Friend, Helen and Sallie Frazee and Belle Welch, and Messrs. W. E. Friend, Harry Welch, Albert Londermilk, William Frazee and Clarence DeWitt.

Congress has been in session for more than a year and indeed we are perplexed to discover one thing of importance that they have effected to relieve the distress of the people. When congress was called in extra session August the 7th, 1893, for the express purpose of relieving the present financial embarrassment of the country, it was thought that the democracy would show some executive ability. The first thing that Congress effected was the unconstitutional repeal of the Sherman act, and spent considerable time afterwards trying to pass a substitute which was finally given up in disgust. Then and there the Democracy showed its weakness and has never been able since to release itself from the thrall of the resolute demands then to do something at once, or throw up the sponge and let the anarchists take the reins of the government in hand and see if they can rival their predecessors. It is evident in order to secure the proper legislation that we must march next November triumphantly over the Hill to Cleveland via Germantown, Md., and Williamsburg, W. Va.

The trouble in Diamond's kitchen has not abated, but has assumed a serious aspect. The cooks have organized an "Anti Fire Builders' Union" and struck. It is rumored that he will call out the militia in order to suppress the insurrection. The organization has elected the following officers: president, Tom; secretary, Rattler; treasurer, Nellie. Their object is to invade the kitchen and devour all the eatables possible.

A. J. Frazee has invaded this district with his steam thrasher and has no opposition.

Mrs. Jerry Savage, who has been critically ill for some time, is convalescent at present, owing, no doubt, to the efficient treatment administered by Dr. J. C. Cox, of Markleysburg, Pa.

Miss Sallie and Frank Frazee left last Friday morning to sojourn for a few days with relatives of Frostburg and Cumberland. Our best wishes accompany them while gone.

Messrs. Austin and Mansfield Frazee, students of the Accident Normal School, came home last Thursday.

Mr. Frank H. Taylor, of Uniontown, Pa., will recreate for a few days in the vicinity of Friendsville. Frank is a prominent newspaper man of Uniontown.

J. R. Browning, of Deer Park, was a recent welcome business visitor.

Wm. H. Friend, Jr., lost his pocket book and \$30 or \$40 while riding on the merry-go-round last Saturday evening at Friendsville.

E. J. Frazee, a prominent lumber man, was badly hurt last Monday morning while after his horses. Mr. Frazee was pitting the bridle on his horse when a horse belonging to Wm. Hone came running up and either kicked or struck Mr. Frazee on the calf of the leg, inflicting quite an ugly wound. He succeeded in reaching the house and is not able to walk at this writing.

needed in reaching the house and is not able to walk at this writing.

Communicated.

To the Sunday school officers and scholars of Garrett county. We are blessed by having a State organization and county organizations auxiliary to the State. We have been greatly aided in our work by State officers, namely, Baker, Nock and others, and by county officers, namely, Roy, J. M. Davis, Bros., W. D. Hove, Wm. Hinebaugh, C. M. Miller, John Sharitzer, J. A. Enlow, G. S. Hamill and a host of district officers, but for want of space I cannot mention. To them and the ones named above there are rich blessings being bestowed by our Heavenly Father.

Having such a grand Christian gentleman as G. S. Griffith at the head of the Maryland Sunday School Union, who so liberally gives his time and money to rescue the perishing, so we of Garrett county ought to follow the noble pattern given us. We are glad our Sunday schools are doing great good; but to assume that all of the Sunday schools of the county are doing all that could be done would be a mistake. There should be a forward movement along the whole line. The enemy of souls is making a special effort to follow the mind of the youth, and knowing this to be a fact we cannot afford to be careless in any of our departments of Sunday school work.

Come to the Annual Sunday School Convention to be held at North Glade M. E. church, four miles west of Swanton, and bea blessing to those dear people, for I feel confident they will be a blessing to us. All ministers of the county, all county officers, all district officers and the superintendent and one delegate from each Sunday school has a vote in the convention and are earnestly requested to attend, and all others attend as far as possible.

May God's choicest blessings rest upon you.

Yours fraternally,
Geo. E. Bischoff,
Pres. Garrett Co. S. S. Association.
Hoyes, Md., Aug. 14, 1894.

The Valley of the Gods. What has been termed a "limited but beautiful" road to the Yosemite valley is a canyon lying in San Benito county, Cal. Sheep herders and roving Indians have long known of its wild grandeur, but to Professor Gilbert of the Stanford University lovers of nature are indebted for a first account of it.

The prediction is made that the canyon of Gabilan, lying in future to be included among the scenic features of California. Prof. Gilbert says: "If the Gabilan valley had Yosemite's water effects, it would be fully as beautiful as the world famous California wonder." The nearest house is 14 miles distant, and Tres Pinos, the only settlement in the region, is 24 miles away. Flanking the valley tower the peaks of the Gabilan range. Some admirers have made bold to call it "The Valley of the Gods." Its attractions are sky reaching crags, ponderous rocks hanging suspended in gulches and caves of vast extent that are yet to be explored.

The main canyon has an area of five square miles. One of its cliffs, which rises 1,650 feet, is the asylum of great numbers of eagles, which at times cover the face of the crags with the shadow of their wings. Entering the canyon from the northwest runs a natural wagon road under a series of arches formed of boulders caught between the converging walls of the canyon. The smallest of the rocks is 250 feet in circumference, while the largest measures some 1,400 feet. In a side canyon, near the southern end of the valley, there is suspended, 200 feet above the brawling of a stream, a mass of rock which is estimated to be as big as a block of six story buildings.

Of the caves there are three that will repay a thorough exploration, extending far into the bowels of the earth, and containing pools in which swim a species of trout. Stalactites depend from the ceilings, which in places are 150 feet high. One more feature should be mentioned—"The Thumbs," two splintered crags which rise 1,360 feet from the bed of the valley, but fall short 600 feet of the altitude of a palisade, on whose front lies a natural pathway. The Gabilan valley is distant from San Francisco 125 miles in a southeasterly direction.—New York Post.

Rogers' Sarsaparilla. A specific for all. 100 doses for 75 cents. Rogers' Little Laver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgis, Oakland; Crippet Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Union; P. T. Garthright, Hayden & Eekles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gagey, Accident; Smith & Callis, Hoyes, and by all general dealers.

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD., THURSDAY, AUGUST 23, 1894.

NUMBER 24.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

The regular services will be held in St. Mark's church Sunday morning and evening.

If you want an agency for the best steam laundry in Ohio write to the Zanesville Steam Laundry Co., Zanesville, O. 24-4t

The dam at the Oakland mill which was washed away early last fall has been repaired and the mill is now running by water power.

Messrs. Shartz & Bolden will shortly dissolve partnership. The business of the firm will be continued by Mr. John Shartz at the old stand.

Mrs. Frederick Gortner died at her home about four miles south of Oakland yesterday afternoon. She leaves a husband and a number of small children.

A large veranda is being added to the house on Oak street belonging to the Rev. J. W. Sharpes. Mr. John A. Wolf is doing the carpenter work.

The Summer Normal will close Aug. 31st. A private school will be opened September 10 in Hamill & Little's Hall. 24-4t CHAS. D. SMITH.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh. 20tf

\$5.00 reward will be paid for the return of a compass watch chain with platinum and gold band lost on the road to Deer Park. HENRY WHITEHILL, Oakland Hotel.

Mr. Joseph Warnick's new house at Elbow, Md., which was just built last summer, caught fire from the blue Tuesday and was burned to the ground. Insurance \$1,500.—Piedmont Independent.

The Republican primaries held Saturday in Frederick county resulted in favor of the Hon. John C. Motter. Those name that county will probably present to the Republican Congressional Convention.

Prof. Little, the eye specialist, will be at Dr. H. W. McComas' office, Aug. 27. Eyes examined free. Glasses correctly adjusted to suit your eyes, and furnished if required. Satisfaction guaranteed.

Gov. Brown had an interview with the Coxwites at the House of Correction the other day and agreed to pardon all of them on condition that they would go home. The Governor expects to raise the means of transportation.

The Davis, A. Va., authorities declared a merry-go-round started in that town a nuisance. The proprietor kept up the business notwithstanding and was locked up in default of a fine of \$30. He gave bond and has taken the matter to court.

Mrs. Luda Dawson, wife of Hon. Wm. M. O. Dawson, of Kingwood, died on last Tuesday and was buried on Thursday. Mrs. Dawson was a member of the Presbyterian church for a number of years and lived an upright Christian life. Her husband and one son survive her.

Rev. Herman G. Stoetzer, of Pennsylvania, preached in the Garrett Memorial church last Sunday morning. The pulpit of St. Mark's church was filled by Rev. Dr. Butler, of Washington, at the morning service Sunday, and by Rev. Dr. J. J. Young, of New York at the evening service.

In order to introduce Chamberlain's Cough Remedy here we sold several dozen bottles on strict guarantee and have found every bottle did good service. We have used it ourselves and think it is superior to any other. W. I. MOWREY, Jarvisville, W. Va. For sale by Oakland Druggists.

W. A. Beard, of Sandy Hook, Washington county, has preserved in alcohol a most wonderful curiosity. It is a pig with two perfect heads and six legs, two front and four hind, attached to one body. The freak nursed with both mouths at once, and no doubt it would have lived had it not been injured by its mother. Mr. Beard has refused several good offers for the curiosity and the many persons who have viewed it unite in pronouncing it greater than any they have ever seen in museums or shows. 22-3t LEWIS GORTNER.

An editor works 365 days per year to get out 52 issues of a paper—that's labor. Once in a while somebody pays a year's subscription—that's capital. And once in a while some dead beat takes the paper for a year or two and vanishes without paying for it—that's anarchy. But later on justice will overtake the last named creature, for there is a place where he will get his deserts—that's hell.—Exchange.

When moving into our present home I found a bottle of Chamberlain's Pain Balm left there by the former tenant. On the label I found the statement that it was good for cuts and burns. I can testify to the truth of this. Nothing in all my experience has found its equal for treating blisters or burns. F. E. BARRETT, manager Le Sueur Sentinel, Le Sueur, Minn. Pain Balm is also a sure cure for rheumatism. For sale by Oakland Druggists.

Kenneth Bazemore had the good fortune to receive a small bottle of Chamberlain's Colic, Cholera and Diarrhea Remedy when three members of his family were sick with dysentery. This one small bottle cured them all and he had some left which he gave to Geo. W. Baker, a prominent merchant of the place, Lewiston, N. C., and it cured him of the same complaint. When troubled with dysentery, diarrhea, colic or cholera morbus, give this remedy a trial and you will be more than pleased with the result. The praise that naturally follows its introduction and use has made it very popular. 25 and 50 cent bottles for sale by Oakland Druggists.

Thomas M. Newhouse, a West Virginian with a martial history, survived by an intrepid bearing, was in town this week. He testifies that the Keego sporting club, lately depopulating the streams of fish and the forests of wildcats and bears in whom there is otherwise no danger. He lives at Purgittsville, Hampshire county, West Va.; travels for J. B. Williams, of this place, and when through with all the business he can lay his hands on, dedicates his time to building a bridge "across the bloody chasm." He is an ex-Confederate soldier in league with John Carr, of Keyser, W. Va., an ex-Union soldier, in an enterprise looking to the organization of a society of the Blue and Gray from Hardy, Hampshire, Grant and Mineral counties, W. Va., and Allegany and Garrett counties, of Maryland. The scheme is a good one.—Frostburg Journal.

Valuable Advice.
Avo'd lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardean Cottage, opposite the bank, Oakland, Md. 41-tf.

Notice.
To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to MICHAEL W. DUBST, Grantsville, Md. 7-26t.

Picnic.
There will be a dancing picnic held in McLean's grove at McHenry, on September 1st. Refreshments of all kinds on the ground. Music will be furnished by the Dewitt string band.

Write For New Catalogue.
To the Central Commercial College, Cumberland, Md. Fall sessions begin September 3, 1894. Ten per cent. discount to September 10th. 22-4t.

Notice to Creditors.
This is to give notice that the firm of Ashby Bros. doing business at Crellin, Garrett county, Md., have sold out their stock of goods and desire to close up their books as soon as possible. All persons indebted to the late firm will call and settle by September 25, 1894, otherwise their accounts will be placed in the hands of an officer for collection. 24-3t ASHBY BROS.

Notice.
All persons knowing themselves indebted to me will please call and settle on or before Sept. 13th. After that date all accounts will be put out for collection. I will sell my entire stock at cost. 22-3t LEWIS GORTNER.

HERE AND ELSEWHERE.

[Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.]

Mr. and Mrs. John M. Crane, of Kingwood, W. Va., are here on a visit to Mr. and Mrs. F. G. Hyde.

Miss Bertie Cleveland, who has been on an extended visit to relatives in Frostburg, returned to her home in Oakland last Saturday evening.

Miss Millie Clark, of Broddus College, Clarksburg, W. Va., was here several days recently as the guest of Mrs. Robert Felty on Alder street.

Miss Margaret Shaw, of Moscow Mills, Md., is in Oakland as the guest of Miss Maggie Tower.

Mr. E. J. Fringer was on a business trip to Davis, W. Va., the first part of this week.

Mr. Perry E. Kimmel attended the band picnic at Accident last Saturday. He returned to Oakland Monday afternoon.

Mr. Henry F. Kahl, of Accident, is on a visit to friends in Oakland.

Dr. Hattie B. Jones, of Wheeling, was here two or three days this week visiting her brother, Mr. Scott T. Jones.

Mr. M. N. Wilson, of Wilson, W. Va., was here on Tuesday calling on friends.

Miss Hallie Trippett, of West Liberty, Ohio, is in Oakland visiting Mr. and Mrs. S. T. Jones.

Mr. William R. Michaels, of Westernport, was here a few hours Tuesday on business.

Mr. E. Harvey, of Kearney, was a pleasant caller at this office Tuesday morning.

Mr. C. C. Spercher, of Accident, was a business visitor to Oakland Tuesday.

Mr. H. S. White and family, of Weatherford, Texas, arrived in Oakland last Thursday morning and are visiting the parents of Mr. White near Oakland.

Mr. Thomas Cuppett, of Johnstown, was here a few hours yesterday morning.

Miss Schultz, of New Berne, N. C., and Miss Raphael, of Norfolk, Va., who are stopping at the Oakland, were very pleasant visitors at THE REPUBLICAN office yesterday morning. These two young ladies were very much interested in the intricacies of the "art preservative of arts."

Mr. Lewis Lantz, of Kingwood, was an Oakland visitor yesterday afternoon.

Dr. J. G. Butler and family, of Washington, who were at Oak Hall for a number of weeks, returned to their home yesterday.

Mr. Martin Hughes, of Hutton, who has been in Baltimore since June receiving medical attention for an abscess on his side, returned to his home on last Saturday very much improved in health and with hopes of an ultimate recovery.

Rev. J. J. Young and family, of New York City, who have been at Grantsville and Accident for a few weeks visiting friends, came up to Oakland last Saturday, accompanied by Mr. Eli McMillan, of Accident. They remained here several days and then started for their home in the east.

Hon. A. F. George, of Swanton, was in Oakland a few hours last Monday.

Miss Mayme Gessner, of Annapolis, arrived here on Thursday night and will remain several weeks as the guest of Mrs. E. H. Sincell.

Mr. Wm. C. Kidd, of Baltimore, spent Sunday in Oakland with friends.

Mrs. A. J. Parsons, nee Beck, of Baltimore, who has been at the Oakland Hotel for several weeks left Monday morning for Piedmont where she will visit her parents before returning to her home.

Mr. H. J. Metheny, of THE REPUBLICAN force, spent Sunday in Terra Alta with relatives.

Mr. Ed. P. Anderson spent Sunday at Newburg with his parents.

Mr. John Lee Harne, of Clarksburg, W. Va., spent two or three

days last and this week with his parents in Oakland.

Mr. M. E. Talley, of Parkersburg, W. Va., was here visiting friends a few days last week.

Mr. Will Sincell, of Washington, who spent last week with relatives in Oakland, departed for his home Monday night.

Mr. Clements Legge, of Pittsburgh, is here as the guest of his uncle, Mr. George W. Legge.

Mr. Robert L. Green, a flourishing young farmer of near Loudon, was here on last Friday and paid his respects to this office.

Misses Mamie and Alice Perry, of Parkersburg, are visiting Mrs. L. D. Walker on Green street.

Mr. Charles E. Hoyer, of Sang Run, was here last Saturday for a few hours.

My boy was taken with a disease resembling bloody flux. The first thing I thought of was Chamberlain's Colic, Cholera and Diarrhea Remedy. Two doses of it settled the matter and cured him sound and well. I heartily recommend this remedy to all persons suffering from a like complaint. I will answer any inquiries regarding it when stamp is enclosed. I refer to any county official as to my reliability. Wm. ROACH, J. P. Primory, Campbell Co., Tenn. For sale by Oakland Druggists.

Look Here.
We are receiving water melons in car lots and selling them at 25 to 30 cents for some as big as you can carry. Call at once and get bargains in cantaloupes—almost given away. Car in Friday, Aug. 17th. 23-2t. H. E. FELTY.

Bucklen's Arnica Salve.
THE BEST SALVE in the world for cuts, bruises, sores, ulcers, salt rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 2-13r

Land for Sale.
The undersigned offers for sale a part of "Swan Meadows," lying about 44 miles south of Oakland, containing about 600 acres, in lots or tracts to suit purchasers. A plat of the land can be seen at my office. For terms, etc., apply to E. H. SINCCELL, Oakland, Md.

A Quarter Century Test.
For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all the cases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00. 6

For Sale Cheap.
The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre. FRED. A. THAYER, Office in Felty Building opposite postoffice.

It May do as Much for You.
Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all Kidney and Liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. All Drug Stores.

Dead Letter List.
List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending August 25th, 1894, the parties addressed being unknown to the postmaster.

Frank Farmer, D. T. Davis, Geo. W. Ganser, David Miller, P. Ashburner, Charles S. Banks, J. C. Glendon, W. H. Thompson, M. L. G. Whiard-2, D. K. Wilson, Sloan & Sloan, Mrs. Minnie Britt, Mrs. Sarah Bohrer, Miss E. D. Bell, Miss Alice Campbell, Miss Stella Wener, Miss Cathell, Miss Nina B. Haverem, Mrs. W. E. Messersmith.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it. E. H. BARTLETT, Postmaster.

The Mountain Chautauqua.

The success attending the Mountain Chautauqua this year, and which closed on Tuesday night, is a source of gratification not only to the managers of the Mountain Lake Park Association but to the whole people of Garrett county. The program of the Chautauqua this year overflowed with good things and a better one is promised next year.

In connection with this it may be said that the Board of Directors have determined to sell one hundred choice lots lying between Wheeling and Philadelphia avenues and near the lake at from \$50 to \$75 per lot. This offer holds good until September first. A large number of these lots have already been sold and we feel confident that before the time allotted for this sale expires every one of the lots will be sold. The directors are now at work opening up new streets in this section of the Park and are determined to make it more attractive next year than it has been heretofore.

From the infancy of the Park it has had a steady growth and it seems now that it will take on a boom and grow faster than ever.

The New Mill.

As stated in these columns last Thursday Mr. George M. Mason's new flouring mill was put in successful operation one week ago today.

This mill has been under construction for several months past and was built by Capt. J. M. Jarboe. The main building is 32x50 feet, with an engine house 24x32 feet. The mill proper is three stories high. The machinery is driven by an Erie engine of thirty-five horse power. The machinery was manufactured by the Case Manufacturing Co., of Ohio, and is a complete mill throughout. The capacity of the feed and chop mill is ten bushels per hour and the buckwheat mill twenty bushels per hour. Both these machines are full roller and the product is of extra quality. Provision was made in the erection of the building for a full roller wheat mill. The storage capacity of the building is about four thousand bushels. The cost of the building and equipment was about five thousand dollars.

The Road Parade.

Through the efforts and energy displayed by a prominent Washingtonian who summers here every year, yesterday was observed as "Road Day" and to say the least it was a great success taking into consideration the short time given the participants to prepare for the occasion.

A short time after three o'clock the procession started from the Oakland Hotel grounds, headed by Smith's Military Band, and moved through town out the Mountain Lake Park road to Deer Park.

Those who took part in the affair had their equipages neatly decorated with flowers, ferns, moss and flags. At least fifty "turn outs" were in the procession and taken altogether it was a very enjoyable occasion.

New Fall Millinery.

We will open on Friday morning a new line of hats, fancy feathers, ribbons, trimmings, velvets, etc. Also a large stock of Evitt's line hand made shoes—best \$2.00 shoes ever offered; real value \$2.75. M. L. SCOTT, Baltimore Store. 24-2t.

Chamberlain's Eye and Skin Ointment.

A certain cure for Chronic Sore Eyes, Tetter, Salt Rheum, Scald Head, Old Chronic Sores, Fever Sores, Eczema, Itch, Pruritic Scratches, Sore Nipples and Piles. It is cooling and soothing. Hundreds of cases have been cured by it after all other treatment had failed. 25 cents per box.

Rogers' Sarsaparilla.

A specific for all 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Stargas, Oakland; Cuppett Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Bekles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gnagrey, Accident; Smith & Callis, Hoyes, and by all general dealers.

Needing a supply of the best what health and vigor can be secured. BROWN'S IRON BITTERS. It is pleasant to take, cures Malaria, Indigestion, Biliousness and Liver Complaints.

SAMUEL LAWTON,

—DEALER IN—
Steam and Water Fittings, Hand and Power Pumps, Pipes, Valves, Etc., Etc.

Telephones, Electric Bells, Lino Material, Etc., Etc. Bicycle 23-1yr. Repairing.

Proposals for Building a Bridge.

Oakland, Md., Aug. 13, 1894.
On the 3rd of September the Mayor and Town Council will receive bids for the building of a bridge over road on Third St. The Mayor and Council reserve the right to reject any and all bids. For specifications call on the Mayor. 23-3t L. E. TOWNSEND, Town Clerk.

In Poor Health

means so much more than you imagine—serious and fatal diseases result from trifling ailments neglected. Don't play with Nature's greatest gift—health.

Brown's Iron Bitters

It Cures
Dyspepsia, Kidney and Liver Neuralgia, Troubles, Constipation, Bad Blood, Malaria, Nervous ailments, Women's complaints. Get only the genuine—it has crossed red lines on the wrapper. All others are substitutes. On receipt of two 2c stamps we will send set of Ten Beautiful World's Fair Views and book—free. BROWN CHEMICAL CO. BALTIMORE, MD.

MILLINERY!

I desire to inform the people of Oakland and vicinity that I have come to furnish them at very reasonable prices. Millinery Goods, Flowers, Ribbons.

Store on Oak street at end of Davis bridge. Give me a call, examine my goods, and be convinced that my stock is complete in every particular. 11-2m MARIE CUNNINGHAM.

PLACE YOUR ORDERS FOR

Monuments, Headstones, AND Chimney Pipe WITH J. B. WILLIAMS, FROSTBURG, MD. AGENTS WANTED. 41-13r-4

Why Pay More When You Can Get Them For Less?

Look at These Prices:

20 lbs. granulated sugar, \$1.00; all package coffee, 21c; Mocha and Java coffee, 31c; good green of black tea, 21c; 16 cups chocolate 10c; per pound; Baker's cocoa, 25c; Van Houten's cocoa, 25c; California prunes 12c; evaporated peaches, 10c; 4 lbs. choice raisins, 25c; 5 lbs. choice currants, 25c; Lemax soap, 4c; per bar; 2 cans choice pie peaches, 25c; 2 cans choice chocolate peaches, 25c; 2 cans corn, 25c; 2 cans beans, 25c; 2 cans tomatoes, 25c; early June peas, 11c; per can; French peas, 20c; per can; fine baking powder, 25c; per pound, guaranteed to be as good as Royal.

We Can Save You Money on Anything in Our Line.

We receive daily a full line of choice fruits and vegetables. Everything the market affords at a reasonable price. We have just received a full line of fresh crackers and cakes—the finest ever in the city. Call and see us and we will make it to your advantage to call again.

W. H. MALETTE, Oakland, Md.

TEMPERANCE NOTES.

THE SALE OF PARALYSIS.

Alcohol as a Destroyer of Health, Morality and Prosperity.

Paralysis has long been deemed one of the direst misfortunes that could afflict humanity—a death in life—the heart still beating, the form perhaps unweakened, but the hand powerless, the feet bound more fast than by fetters of iron, the tongue refusing to speak the words of affection, counsel or command. To escape this the man of wealth will spend money like water, and the physician will send him to wander far over land and sea to flee the withering touch of Palsy's grisly hand.

Yet this dread plague is now on sale, and daily purchased at fabulous prices by thousands of the American people. Whoever has seen a drunken man or a drunkard has seen a case of paralysis. There is paralysis of muscle. It manifests itself early in the lips and tongue, so that, like the Ephraimites who could not say "shibboleth" at the fords of Jordan, the victim can not say "centenary celebration," and soon the baby words "good night" become too much for the stammering lips. The eyes grow heavy, the head droops, the hands lose their grip, the feet stumble, and soon, in one chaotic mass, what was a man rolls under the table or into the gutter.

There is paralysis of vital energy. Never was there anything more deceptive than the idea that alcohol is a sustaining power. It is from first to last a paralytic. Its very stimulus is due to paralysis. Why does the blood fly to the face and surface of the body, fill all fingers with the glow? Why is the brain stirred to momentary vigor and uninvited brilliancy? For the same reason that a railroad train dashes down the grade when the brakes refuse to work. Every artery is provided with an elastic coat which acts as a brake, restraining the flow of blood. Alcohol paralyzes the delicate fibers, the restraining agency lets go, and the blood rushes in full tide on its way. It is as if the throttle of a locomotive should be set wide open and the engine be powerless to close it. But what is the result of throwing all the blood in the body swiftly to the surface and back again? The same as the result of pouring hot tea from the cup into the saucer. The tea or the blood is cooled, and the infallible test of the chemical thermometer shows that the temperature of the whole body will fall within a short time after the taking of alcohol. Hence it is that the drunken man so readily freezes to death.

Pure health for every human organism depends on the constant and prompt removal of the waste matter of the system, every vein and cell sending to the surface through some one of myriad outlets the material that has done its work and become dead matter foreign to the animal economy. If we check this process by closing the lungs or skin or any other channel, we run speedily into the danger of serious corruption. Alcohol checks this removal of waste matter. The man "blunts," as we say, perhaps pines himself on his fullness of flesh, and goes about an inanimate sculpin, ready to die of lockjaw if he runs a splinter into his hand, or to become the ready prey of any disease.

There is paralysis of intellect. The man of intelligence, or even of high ability, utters manifold for the confidence that it is supreme wisdom, and takes the laughter that greets his facile shannities as a tribute to the brilliancy of his wit. Poor mental paralytic! In a fair, bright day, on a calm sea, a commander orders an impossible maneuver, persists in it against all remonstrance of his subordinate officers, and sends his battleship, with four hundred men, to the depths of the blue Mediterranean to rest till the sea shall give up its dead. The current explanation is that the commander's usually clear mind was clouded by alcoholic mists. Whether that was the fact may not be surely known. But this is sure, all the world instantly feels that, if true, this was sufficient cause. All men know that a few glasses of liquor would be equal to producing just that result. There is no wisdom that may not be turned to folly by the paralysis of drink.

There is paralysis of affection. Alcohol makes the man who comes home one day with love and tenderness for wife and children to come home the next night an inanimate fiend, more dangerous to that family than a savage from the jungle. It leads him to drug them through years of poverty, hunger, cold and wretchedness, while he exults upon himself and his vile comrades in the saloon the wages that might support them in comfort.

There is paralysis of will. Who has ever tried to help the drunkard who has not found this failure of that god-like power? Here pledges fail. Here resolutions die. The man who knows that every step to the saloon is a step to shame, woe, and death, goes, drawn by an invisible but resistless power, as if under an enchantment's spell. He has come to what Coleridge called "complete impotence of volition."

There is a greater depth, and that is paralysis of conscience. While conscience lives, even with enfeebled will and mighty appetite, there is hope. There is something in the man to which we may appeal. But alcohol deadens, and at last paralyzes, the moral sensibilities, so that eight-tenths of the world's crimes are committed and most of its woes perpetuated under its power. Either the liquor instigates to the crime, or it is taken expressly to deaden the conscience so that the crime may be done.

In a word, the magic effect of alcohol is to paralyze the nerve centers that are the seat of all the finer, nobler powers, while it stimulates to fierce activity those that are the seat of all the coarse, animal instincts. It paralyzes all that is godlike in man, and maddens and loses all the wild-beast instincts of his nature.

Did space permit, it might be shown how for the nation this results in the paralysis of industry, as every shop and factory suffers from drunken workers;

the paralysis of trade, as liquor destroys the buying power till millions are ragged and hungry and cold, while the bread and clothing and fuel they need are left unsold on the dealer's hands; that it is the paralysis of good government, as drunken citizens become the dupes or the purchased tools of the corrupt politician; that it is the paralysis of religion and the church, winning ten young men to the saloon for one that is drawn to the sanctuary.

But it is enough to say that this fell plague of paralysis is in the market, that half a million men are engaged in its manufacture and sale, that it is sold at a profit of four hundred per cent, that the American people pay one billion two hundred million dollars every year in buying the palsy; and that the national government, most of the states, and a multitude of towns and cities look upon the spreading of this wasting paralysis among the people as one of the choicest sources of revenue, and that any attempt to stay the march of the disease is regarded as an infringement of personal liberty.

Across our land strides the grisly specter reaching out his deadly hands for all our noble, beautiful boys, the hope of the future of America and of the world. More than against the cholera that comes on the winds from afar, let us quarantaine against the dread paralysis that is bred in the vat and the still, and sold over the bar within our own fair land. Let us make the quarantine wide as the nation sustained by the true hearts and strong hands and pure ballots of all the good. That quarantine against alcoholic paralysis we call national prohibition.

—Rev. James C. Fernald, in Demorest's Magazine.

EXAMPLE THAT RUINS.

Social Customs Which Lead the Young to Drink.

A child's character and beliefs are largely shaped by the daily unconscious teaching of his father's example—far more, too, by that example than by his precepts. The effect of the most eloquent and oft-repeated warnings to "keep away the taste of rum" is utterly dissipated the moment that boy sees his father drinking in a saloon, or notes its fumes upon his breath. Children early learn that there is a wide difference between precept and example; and where a father's practice in the matter of non-drinking differs from the precepts he lays down to his children, the latter will be quite sure that the father's example will be followed as to the practice, and the precepts be ignored. Actions exert more influence than words; example is far more potent than precept.

This principle of unconscious yet potent teaching by example extends much further than over the period of childhood and youth. Many a young man has been led into the habit of drinking through the example of his employer, or of his fellow-workman or fellow-craftsman. We are like sheep; we follow a leader, even though that leader is a drunkard, and we go to our deaths upon the jagged rocks of ruin before we are aware of it.

Another striking instance of the evil of a bad example in the use of strong drink is found in the fashionable habit of having wines upon the table at formal dinners, receptions, etc. The harm that results from this pernicious custom is largely due to the example of a comparatively very few of the ultra-fashionable set. They are the leaders of fashion—they set the example, and the others, desirous of being ultra-fashionable, too, follow blindly. What more striking instance can be given of the power of example and of the imitative instinct of humanity, prompting us to follow blindly the footsteps of others? We are like sheep; we follow a leader, even though that leader is a drunkard, and we go to our deaths upon the jagged rocks of ruin before we are aware of it.

In view of all these facts, it is the plain duty of every parent who wishes his sons saved from the vice of intemperance, of every employer who has young clerks or workmen of every one who has the slightest influence over his fellows (and who has none?) to abstain utterly and entirely from indulgence in liquor. It matters not whether we believe indulgence on our part harmful to ourselves or not; each of us owes a duty to those under him, or dependent upon him, which we must not shirk. No man desires to have the ruin of a life placed to his responsibility. We must set the example of abstinence to our children, to our generation, and that shall be free from the drink curse; and that generation will add its power and its influence to the effort to pulverize the rum power. —Toledo Blade.

FACTS AND FINDINGS.

JOHN B. GOREN once very forcibly said: "Every moderate drinker could abandon the intoxicating engine if he could. Every inebriate would if he could."

T. V. POWDERLY, asked his opinion as to how far the nearest saloon should be from a schoolhouse, said: "About five hundred miles would be a reasonable distance, according to my way of thinking."

The grand jury of Comstock county, Georgia, sometime since, made the following report: "We note with sorrow the marked increase of crime in this county, and that the same is traceable almost invariably to the influence of whiskey."

Everywhere are supposed to have been responsible since the beginning of recorded history for the death of fully thirteen million people." And strong drink how many? We do not know, but, undoubtedly, the earthquake is the lesser crime. Still we are not taking tickets for Constantinople just yet. —N. Y. Observer.

An old New York club man says that the tendency of the modern club is to make drunkards. It is encouraging to read of one club which will not have this influence. The new Commercial club of Brooklyn, Mass., allows no intoxicating liquors in its elegant building, and although many distinguished guests were present at its opening, no wine was served.

MISCELLANEOUS.

—The finest champagne is produced by the juice from the black and white grapes being mixed together, the black giving body and strength, the white delicacy.

—Lot's Wife.—The Sunday-School Teacher.—"What can you tell me of Lot's wife, Mamie?" Mamie promptly—"Nothing." Mamie says we should never speak of people behind their backs.—Truth.

—A steel rail costs twice as much as an iron one, but the universal use of the former means millions to the farmers of the west. It has enabled railroads to use larger and heavier engines, and the results are cheaper freights and quicker transportation.

—No Formalities Necessary.—"As to this case of yours, my friend," said the lawyer, "to be perfectly honest with you—" "There needn't be any guf of that sort between you and me," interrupted the client. "In a horse-jockey." —Chicago Tribune.

—There is one thing," said the new boarder, emphatically, "that will have to be settled before I make up my mind to remain with you." "And what is that?" inquired the landlady, anxiously. The new boarder paid a high price and paid it promptly. "The coffee," was his response.

—These masses of men who are called drinkers are the strongest and most enduring in the world. The Aryan folk are indeed characteristically drinkers of milk and users of its products, cheese and butter. It may well be that their power is in some measure due to this resource.

At a m.—"What's the matter with the baby?" Mr. Firecracker said explosively. "There must be a pin-wheel sticking into it somewhere, popper," sleepily replied his wife, lighting a Roman candle. "Why don't you rocket them. And with these words Mr. Firecracker went off to sleep.—Truth.

—Mrs. Nellie Jones, a pretty widow, who was employed as cook at the Boone County (Ind.) jail, has received word from Boston advising her of the death of a relative who had beenqueuing her to determine whether all the black horses and all the white ones were meant, or only the pickled, or black-and-white ones, a witness testified that all the horses of the dead man were mares, and confusion was worse confounded.

Heads will stand almost anything. There was one in Galas, Mo., which swallowed a pin and became nervous and irritable. The owner administered ether, and the gizzard open, took out the pin, sewed up the wound with a needle washed in a dilute acid, and the hen is now all right again. The wretched creature whenever it is fed by hand draws near.

—"God moves in a mysterious way," was written by Cowper in 1773, just before his second attack of insanity. He intended suicide and engaged a coachman to drive him to a point of view on the River Sever, where he was to drown himself. The coachman lost his way and Cowper, instead of carrying out his intention, returned home and wrote this hymn. Cowper gave it the title "Light Shining Out of Darkness."

—The highest recorded speed on the Atlantic is an average for the whole passage of 31.9 knots per hour, performed by the Cunard line steamer *Leanora*. This has now been nearly equaled by her sister ship, the *Campania*, which has just made the passage from New York to Queenstown in 5 days, 13 hours, 8 minutes, over a total distance of 2,905 knots, her average speed having been 21.8 knots per hour.

—An Arkansas man the other day rapped on his collar just as the minister was about to begin the burial service over him. A man in the room, who thought some one outside was knocking at the door, yelled, "Come in," hearing which the supposed dead man in the coffin exclaimed: "What's the matter with you? I am in already, and want to get out." He finally became so obstreperous that the funeral had to be postponed. —N. Y. Tribune.

—Mrs. Thistlethwaite, who died in England quite recently, was, in her youth, remarkable for her exceptional beauty. A celebrated episode in her life was when, some forty or forty-two years ago at the opera, the whole house rose to its feet to watch her leave the theater. Her eyes and forehead were beautiful beyond description, and some idea may be formed of the coffin exclamation: "What's the matter with you? I am in already, and want to get out." He finally became so obstreperous that the funeral had to be postponed. —N. Y. Tribune.

—A remarkably droll wedding, at the registrar's office, Bristol, attracted an immense crowd not long since. The bride, a prim spinster fair and forty, pushed into the office of the astonished registrar a family perambulator, in which was the bridegroom, a man of forty-five, so crippled in both legs that from his birth he had not been able to walk. He was permitted to remain in the perambulator during the customary declarations of the civil contract, and when the bride again appeared, pushing the perambulator containing her husband, the crowd wished them joy and gave them plenty of rice. —N. Y. Ledger.

—The other morning when I was taking a walk before breakfast," said a citizen, "I saw on the curbstone in front of a house a box filled with the ordinary refuse of a kitchen, on top of it was about a quarter of a loaf of bread—the crusty end of a square loaf which even from where I was I could see looked all right. It might be stale, but it looked nice, and it seemed a pity to waste it. But, dear me, it wasn't wasted. Even while I was looking at it a man ahead of me, whom I had noticed particularly before, and who was now just passing the box, reached out and picked up the quarter loaf and dropped it into his pocket, all without stopping." —N. Y. Sun.

AN ADVENTURER OF RENOWN.

Sir Henry Layard Was Helped to a Diplomatic Career by His Darling.

Sir Henry Layard might be quoted as an example of the truth of Gordon's saying that England has been made by her adventures. Using the word in the honorable old sense, and not with the ugly invidious meaning which has come to attach to it, he was an adventurer about as was a man who picked out a piece of work to be done of his own motion and by his own efforts, with means which he either supplied himself or obtained by personal influence over others. It is true that he had a parliamentary and a diplomatic career, but that would have had neither if he had not first earned distinction by his own efforts as an explorer. Something of the adventurous disposition remained with him throughout.

It prompted him to witness the battle of the Marston, and the capture of Agamemnon, and was, perhaps, not without its influence on his during his tenure of the Embassy at Constantinople. Sir H. Layard will, however, not be remembered either because he was for a few years a member of the house of commons or because of his services as ambassador at Constantinople at a time of crisis. Between the incorrigible faction of Mr. Gladstone and the equally incorrigible corrupt faction of the pashas, which he may not have estimated at their true, stupid worthlessness, and confined in no case control the pashas he endeavored to help Lord Beaconsfield to carry out had no chance of success. In the earlier part of his life Sir Henry Layard had fortunately had opportunities of doing work which neither English officialdom nor Turkish pashas could do.

We have observed with what is popular to call surprise, that the leading Gladstonian paper is of the opinion that the honorable degree conferred on Sir H. Layard in 1818 by the university of Oxford was given for some mysterious reason. It may appear mysterious, but it is not so. Sir Henry Layard was a very interesting and valuable part of it England would not have taken any adequate part but for the Manchester school, and the prevalence of the feeling which dictated the well-known explosion. "Down the Finsbury" would have combined to prevent the English government from giving the help which was freely rendered to French scholars by their own country.

During a visit to Mesopotamia Layard had seen that exploration of the mound of Nimrod, already begun by Mr. Loftus, would be of great value. He obtained the means of excavation by the help of Sir Stratford Canning, and the result of his excavations was to put English scholarship beyond the risk of having to envy the success of French research in that field.

Wherever could be done by official neglect to waste the gains due to his labors was not omitted. The great winged figures and the highly interesting bas-reliefs were ill-packed and ill-carried. Many of the smaller objects were so badly packed that they were, as it would seem, almost deliberately subjected to differing and some of the best of them accordingly disappeared. But the energy of Sir Henry Layard bore down even official inertia, and the sculptures from the Assyrian palaces finally took their proper place in the British Museum.

Sir Henry seems very well, as is known by those who have read his account of his explorations at Nineveh, and the more recently published narrative of his early travels in Armenia and Kurdistan. The facts that he was the son of an Indian civil servant, was half a spaniard by blood, and an Indian by education, must be allowed for as fitting him to the kind of work he had to do, by giving him an understanding of foreign and Oriental peoples which a more purely bred Englishman might not have had. But the energy to use these advantages was all his own.—London Review.

The Story of a Blind Lamb. Dog stories are common enough; stories concerning sheep are much more rare. Many years ago it came under the notice of the writer to observe a mother with twin lambs, one of which seemed quite different from the other, wandering about aimlessly and not as others of the kind. We were not long in discovering the cause—it was blind. The mother and brother were quite alive to the fact, and vacillated care, one or the other, as they saw it getting into danger, rushing forward to the rescue, and with a sharp but kindly "bark" turning the little blind one out of danger and into a safer path. By giving him an understanding of foreign and Oriental peoples which a more purely bred Englishman might not have had. But the energy to use these advantages was all his own.—London Review.

During the blockade. His Mother.—Johnny, I want you to go to the milk depot and get five cents' worth of cream. Here's the cream pail.

Johnny.—Yes'm.

—And on your way back I wish you would stop at the grocery store and get a half dollar's worth of potatoes. Here's another cream pail. —Chicago Tribune.

Understand Her Own Sex. "Huh," exclaimed the first little girl, after she had heard the story of the fall of man, "the serpent couldn't tempt me with an apple. I don't like apples."

"But," argued the second girl, "suppose somebody told you not to eat apples?" —Detroit Tribune.

—Miss Daintyface.—"Have you noticed that horrid man across the way? So well dressed, too." "No; has he been staring at us?" "No; no; he hasn't glanced his way once." —Inter-Ocean.

FIRESIDE FRAGMENTS.

—For grease spots, equal parts of ether and chloroform.

—A simple way to remove grease spots from wall paper is to hold a piece of clean blotting paper over the spot and press a warm flat-iron over it. Repeat the operation until the grease is out.

—This is the proper way to peel tomatoes: Cover them with boiling water half a minute, then lay them in cold water until perfectly cold, and the skin can be peeled off without difficulty, leaving the tomatoes unbroken and as firm as they were before being peeled.

—Cream Muffins.—Three eggs beaten separately, one tablespoon of butter, one pint of sweet cream, one-half teaspoonful of salt, flour enough to make a stiff batter, whites of four eggs well beaten, fill the hot, well-greased muffin tins half full and bake quickly. —Farm, Field and Fireside.

—The best cement for joining glass and metal together is pure alum heated in an iron spoon held over hot coals. As kerosene will not penetrate it, it is better than plaster of Paris for uniting the bulbs of a lamp to its base, where these are only loose. —Christian Inquirer.

—Spiced Grapes.—Five pounds grapes, underripe (the large wild grapes are best), three pounds sugar, two teaspoonfuls each ground cinnamon and allspice, one-half teaspoonful cloves, and one-fourth cupful vinegar. Put the grapes and boil the skins until tender. Cook the pulp and rub through a colander; add skins, sugar, vinegar and spices, and boil until thick as marmalade. —Cultivator.

—Ice Cream.—This is considered a very nice recipe and is very easily made. Take equal parts of cream and milk and sweeten it very sweet. Flavor with any extract desired. Pour it in the freezer with plenty of rock salt and ice around it, and let it stand fifteen minutes before stirring. After stirring it for fifteen minutes it will be a nice cream. —Western Rural.

—Dried Beef Gravy.—Put a tablespoonful of butter in the hot frying pan; when melted, add one-half pound shaved beef. Let it fry till the butter begins to brown, then add one pint of sweet milk. Thicken with one level tablespoonful of flour moistened with milk, and one egg beaten into the hot mixture. Season with salt and pepper. This is a delicious breakfast dish. —Ohio Farmer.

—Lamb Broth.—Lamb broth, which is highly recommended, not only for invalids, but as a steady diet for those inclined to grow stout, is made by simmering chopped mutton in their own broth with an equal quantity of water. The advantages of such substitution are claimed to be many. In the first place, mutton is a liquid of a deep black color, which renders the column very visible in the second place, the freezing point of this liquid is very remote from its boiling point, and, finally, it is less than mutton, and the manipulation of it is attended with no danger to the health of the workmen. —The Naturist.

—The Alaska Treadwell Gold Mining Company of Douglas Island, Alaska, has declared a bonus dividend of 75 cents per share, of \$100,000. The Treadwell mine, which cost the company \$1,000,000, has produced \$150,000. About \$800,000 has been spent developing the mine; \$300,000 was spent experimenting with chlorination. About 600 tons of ore is milled daily, at an average cost of \$1.25 a ton. The ore averages in value \$1.50 a ton. The company has already been refused \$150,000 for the mine. It is thought there is nearly \$25,000,000 in sight. —Mining and Scientific Press.

WILD COSSACK RIDERS.

Two Americans Saw Them Break Winter Camp in Turkistan.

Mosses, Allen and Suchtelien, who went around the world on bicycles, give the following account of one of their experiences in Turkistan:

One of the chief incidents of our pleasant sojourn was afforded by Gov. L'Amour. We were invited to head the procession of the Cossacks on their annual departure for their summer encampment in the mountains. After the usual religious ceremony, they filed out from the city parade ground, being immediately followed by a few moments we did not come up until some time after the column had started. As we dashed by to the front with the American and Russian flags fluttering side by side from the hand-banners, cheer after cheer arose from the ranks, and even the Cossacks, who had looked their caps in acknowledgment, gave us a special exhibition of horse-manship. By a single twist of the reins the steeds would fall to the ground, and their riders crouch down behind them as a bulwark in battle. Then, dashing forward at full speed, they would spring to the ground, and leap back again into the saddle, or hanging by their legs, would reach over and pick up a handkerchief, cap, or a soldier's supposed to be wounded. All these movements we photographed with our cameras. Of the endurance of these men and their Kirghiz horses we had a practical test. Overtaking a Cossack courier in the early part of a day's journey, he became so interested in the velocipede, as the Russians call the bicycle, that he determined to see as much of it as possible. He stayed with us the whole day, over a distance of fifty-five miles. His chief compensation was in witnessing the surprise of the natives, to whom he would shout, across the fields to come and see the tomshak, adding in explanation that we were the American gentlemen who had ridden all the way from America. Our speed was not slow, and frequently the poor fellow could have to resort to the whip, or shout, "Slowly, gentlemen, my horse is tired; the town is not far away; it is not necessary to hurry so." The fact is, that in all our experience we found no horse of even the famed Kirghiz or Turkman breed that could travel with the same ease and rapidity as ourselves even over the most ordinary road.—Century.

SCIENCE AND INDUSTRY.

—There is now a continuous line of street railway between Lowell and Haverhill, Mass., a distance of forty-two miles.

—Australia stands first among the wool producing countries of the world. The yield last year was 550,000,000 pounds.

—Stomachions will probably get a better idea of the immense size of the great pyramid when they learn that it consists of 2,025,000 cubic feet.
